Source: Crisil Intelligence

- The analysis of freight movement across the toll plaza reveals that the major commodities being transported include Agri produce, construction materials, iron and steel products and consumer foods and products,
- Courier & Parcels is the major commodity passing through the toll plaza, majorly carried by LCV with 15.0% and 12.5% with MAV. This is due to the presence of multiple warehouses in the proximity of the project road.
- About 11 percent of MAV and 15% of 3A trucks are carrying construction materials across the toll plaza. These trucks are travelling to Hyderabad & surroundings areas that has several cement manufacturing units also this construction material consists of stone due to presence of various stone quarries at Chikballapur located on Northern end of the asset.
- Around 13% of LCV and 11% of 3A trucks are found to be carrying agri produce across the project road. This is due to presence of urban centres at both ends of the project road.

Direction wise commodity is presented in Annexure.

Courier & Parcel is the topmost commodity on the stretch

Courier/Parcel traffic on the project stretch form a significant proportion of the commercial traffic and is majorly for the purpose of consumption in domestic market in the urban and semi urban regions of Bengaluru, Devanahalli, Hyderabad, Hospete and nearby regions of the catchment. Traffic on the project stretch originates from Karnataka (Bangalore, Chitradurga), Delhi, and Maharashtra State. Courier/Parcel traffic is destined for consumption in regions of consumption hubs like Telangana, Karnataka, Tamil Nadu, Delhi, and to warehouses in Karnataka.

India is rapidly becoming a key domestic shipment market, driven by increased e-commerce due to venture capital funding, rising internet access, and urbanization. User-friendly platforms, attractive discounts, and convenient delivery have fueled growth, with the pandemic accelerating online shopping trends.

Agri produce is one of the major commodities

Agri accounts for 11% at the toll plaza. This category comprises of rice, wheat, vegetables, and fruits. Karnataka's food grain production has been growing due to adequate rainfall and increased acreage, heavily relying on rainfall for agriculture. While food grain production is expected to continue growing, rainfall patterns will be crucial. Horticulture crops like fruits and vegetables are anticipated to grow faster due to their short storage life, and seasonal crops may yield higher incomes.

Construction Materials

Construction Materials accounts for 9.4% on the project road. Construction materials represent a significant commodity transported throughout the area. The primary sub-commodity within construction materials is cement, followed by stone. It is to be noted that there are several cement manufacturing units in the region of Hyderabad, Chikballapur and Doddaballapur. The demand for this commodity is expected to continue increasing, driven by the growing needs of the infrastructure, housing, and other related sectors.

Consumer Foods

The FMCG (fast-moving consumer goods) industry is India's fourth-largest sector, growing steadily due to rising disposable incomes, a youthful population, and increased brand awareness. Post-pandemic changes in food habits, a demand for healthier options, and a shift towards branded packaging are driving growth. Additionally, new product launches and an expanding distribution network are expected to support ongoing demand.

3.2.5 Trip Length Distribution

Trip Length Distribution analysis gives distance-based patterns for project road traffic. Trip length is categorized into nine trip length groups. Trip length distribution table for different vehicle types is presented below.

Table 3-5: Trip Length Distribution

Trip Length Group (Kms)	Car/Jeep/Van (CJV)	2A Bus	LCV	2A Truck	3A Truck	MAV
Devanahalli TP						
0 to 20	11.5%	3.2%	3.8%	7.2%	3.4%	5.1%
21 to 40	51.9%	47.2%	35.0%	33.6%	20.9%	26.8%
41 to 100	26.0%	31.6%	31.3%	29.6%	28.8%	21.5%
101 to 200	2.9%	3.8%	3.7%	7.0%	4.2%	4.2%
201 to 350	3.2%	7.9%	9.5%	14.4%	12.7%	10.6%
351 to 500	0.9%	2.0%	1.4%	3.2%	2.6%	1.4%
501 to 750	2.4%	2.7%	8.2%	4.5%	15.9%	15.3%
751 to 1000	0.7%	1.4%	3.4%	0.5%	5.6%	5.3%
Beyond 1000 Km	0.6%	0.3%	3.6%	0.0%	5.9%	9.8%
Grand Total	**100.0%**	**100.0%**	**100.0%**	**100.0%**	**100.0%**	**100.0%**

Source: Crisil Intelligence

Cars are mostly short distance trip, about ~90% of trip travel within 100 kms of toll plaza due to proximity of Bengaluru Airport and Bengaluru city.

In MAV about ~58% of trips lie between 0-200 km, indicating travel over short distances is a key feature of vehicle movement along this corridor.

4 Review of Historic Traffic

4.1 General

This section summarizes the historical performance of the project section in order to understand baseline traffic patterns comprising of historical tollable traffic and revenue growth, traffic and revenue composition, trip distribution, trip factors, seasonality and trend of traffic over the available data set.

The historical tollable traffic data mode wise was made available by client for the toll plaza on the project road as per following:

Table 4-1: Historical Traffic and Revenue Data Availability

Data Source	Type of Data	Period
TMS Data	Traffic & Revenue Data Vehicle Wise	May 2014 to September 2025

Source: Client, Crisil Intelligence

Mode wise historical traffic and composition is presented in the table below.

Table 4-2: Historic Traffic

FY	Car/Jeep/Van (CJV)	LCV/Mini Bus	2A Bus/ Truck	3A Bus/Truck	MAV	OSV	Total	PCU
2015	45,059	3,535	2,233	556	652	1	52,035	61,663
2016	53,710	3,627	2,134	586	687	0	60,744	70,403
2017	60,238	3,894	2,206	590	691	1	67,620	77,582
2018	61,759	3,980	2,175	598	701	3	69,216	79,218
2019	57,802	3,748	2,452	813	953	1	65,769	77,512
2020	52,703	3,152	2,473	690	808	2	59,827	70,562
2021	27,140	2,582	1,438	564	661	2	32,386	39,999
2022	33,241	2,262	1,839	826	968	3	39,140	49,000
2023	59,384	1,432	2,867	1,010	1,184	2	65,880	78,501
2024	74,408	1,358	3,290	964	1,130	3	81,152	94,302
2025	81,307	1,330	3,534	817	957	2	87,947	100,672
2026 (Till Sep)	84,064	1,344	3,723	773	905	2	90,811	103,650
CAGR (25-16)	**4.7%**	**-10.5%**	**5.8%**	**3.8%**	**3.8%**		**4.2%**	**4.1%**
CAGR (25-20)	**9.1%**	**-15.9%**	**7.4%**	**3.4%**	**3.4%**		**8.0%**	**7.4%**
CAGR (25-23)	**17.0%**	**-3.6%**	**11.0%**	**-10.1%**	**-10.1%**		**15.5%**	**13.2%**

Source: Client TMS Data, Crisil Intelligence

Project road has seen traffic CAGR growth of 4.1% at the toll plaza in PCU terms from FY 2016 to FY 2025. In the last two years the traffic shown higher growth of 13.2% at the toll plaza in PCU terms.

- Car and LCV traffic has declined in FY19 due to operational of alternate route via BK Halli in 2018.In addition to BK Halli alternate route, there are two more alternate routes that contributed to decline in car traffic, these are SH 104 and New Airport access road.

- Post ETC/Fastag implementation, LCV and 2A corrections have also been observed across the project

corridor which is in line with the benchmark across the country. Therefore, a sudden decline in LCV volume because of MLCV being recorded in Car category post FY20.

- Post pandemic there is surge in passenger traffic due to operation of Terminal-2 airport in Jan-23 and international operations in Nov-23. Also, removal of work from home played a significant role for this surge in traffic during FY23.

- There is a decline in 3A/MAV traffic due to restrictions of heavy vehicles in Bengaluru city on weekdays from Nov-22, in addition this restriction is further extended to Saturdays from Aug-24 onwards. In addition to restriction to freight movement, STRR was also partially operational therefore impacting FY24 & FY25 traffic.

4.2 Historic Toll Segmentation

For the present study FY26 (Apr-Sep) toll segmentation has been adopted for FY26. However, in case of Car category Oct-25 data has been used for the segmentation. Return tickets are major in CJV category primarily due to the closer proximity of Bengaluru city and Kempegowda International Airport.

Table 4-3: Historic Toll Segmentation at the toll plaza on the project road

FY	Vehicle Type	Single	Return	Monthly	Local Pass	Exempt	Annual Pass
Oct-25	Car/Jeep/Van (CJV)	21.6%	56.8%	2.8%	2.3%	6.1%	10.4%
2026 (Apr-Sep)	LCV/Mini Bus	39.0%	57.7%	0.4%	0.0%	2.9%	
	2A Bus	3.8%	89.7%	2.3%	0.0%	4.2%	
	2A Truck	57.6%	39.4%	0.3%	0.0%	2.6%	
	3A Bus/Truck	37.4%	57.9%	2.0%	0.0%	2.7%	
	MAV	57.4%	40.6%	1.5%	0.0%	0.5%	
	OSV	54.9%	19.1%	0.0%	0.0%	26.0%

5 Base traffic estimation

5.1 Seasonality Factors

Traffic volumes on roads varies throughout the year, influenced by socio-economic activities in the surrounding regions. To accurately estimate the Annual Average Daily Traffic (AADT) for the road, it is crucial to account for these seasonal variations.

To achieve this, a seasonal correction factor is applied, which is derived from secondary data sources such as historical traffic data, fuel sales and similar indicators. Project Road is having enough historical data to arrive the seasonal correction factors. Hence consultant adopted the same factors to arrive base year AADT.

Seasonal correction Factors (SCF)

Seasonal correction factors for the latest years of FY 24 & FY 25 are tabulated below.

Table 5-1: Seasonal correction factors for FY 24 and FY 25

FY	Month	Car/Jeep/Van (CJV)	LCV/Mini Bus	2A Bus/ Truck	3A Bus/Truck/MAV	OSV
2024	Apr	1.07	0.97	1.08	0.93	0.88
	May	1.05	0.99	1.06	1.02	0.95
	Jun	1.05	0.95	1.04	0.96	0.93
	Jul	1.04	1.01	1.06	0.96	1.18
	Aug	1.04	1.01	1.01	0.91	1.16
	Sep	1.03	1.04	0.99	0.97	1.06
	Oct	1.00	1.03	0.97	1.02	1.16
	Nov	0.98	1.05	0.99	1.10	1.70
	Dec	0.92	1.01	0.97	1.03	1.31
	Jan	0.95	1.03	0.97	1.08	0.99
	Feb	0.93	0.95	0.94	1.01	0.96
	Mar	0.96	0.99	0.94	1.04	0.56
2025	Apr	1.04	1.05	1.04	1.04	0.54
	May	1.02	1.01	1.01	1.00	0.76
	Jun	1.02	1.00	1.02	0.99	0.75
	Jul	1.04	0.98	1.02	0.97	1.00
	Aug	1.00	1.01	0.99	0.97	1.15
	Sep	1.02	0.98	1.00	0.95	1.20
	Oct	1.01	1.01	0.99	1.03	1.75
	Nov	0.96	1.00	0.99	1.05	1.08
	Dec	0.95	0.99	1.00	1.03	1.51
	Jan	0.97	1.00	0.98	0.99	1.24
	Feb	0.98	1.01	0.99	0.99	1.24
	Mar	1.00	0.96	0.98	1.01	0.96

5.2 Base Traffic Estimation

For base traffic (annual average daily traffic) estimation of the present study, current fiscal 6-months (Apr-25 to Sep-25) of TMS traffic data were annualized using SCF factor of FY 24 & FY 25 traffic data to arrive at the annual average daily traffic (AADT) for FY 26.

The AADT estimation for the base case for FY26 is presented in table below

Table 5-2: Base Traffic Estimation -FY26 AADT

Particulars	FY Year	Car/Jeep/Van (CJV)	LCV/Mini Bus	2A Bus/Truck	3A Bus/Truck	MAV	OSV	Vehicles	PCU
ADT (Apr-Sep)	**FY 26**	84,064	1,344	3,723	773	905	2	90,811	103,650
SCF	**FY 24 & FY 25**	1.03	1.00	1.03	0.97	0.97	0.92		
AADT	**FY 26**	**86,930**	**1,341**	**3,818**	**750**	**879**	**2**	**93,720**	**106,608**

Source: Client TMS Data, Crisil Intelligence

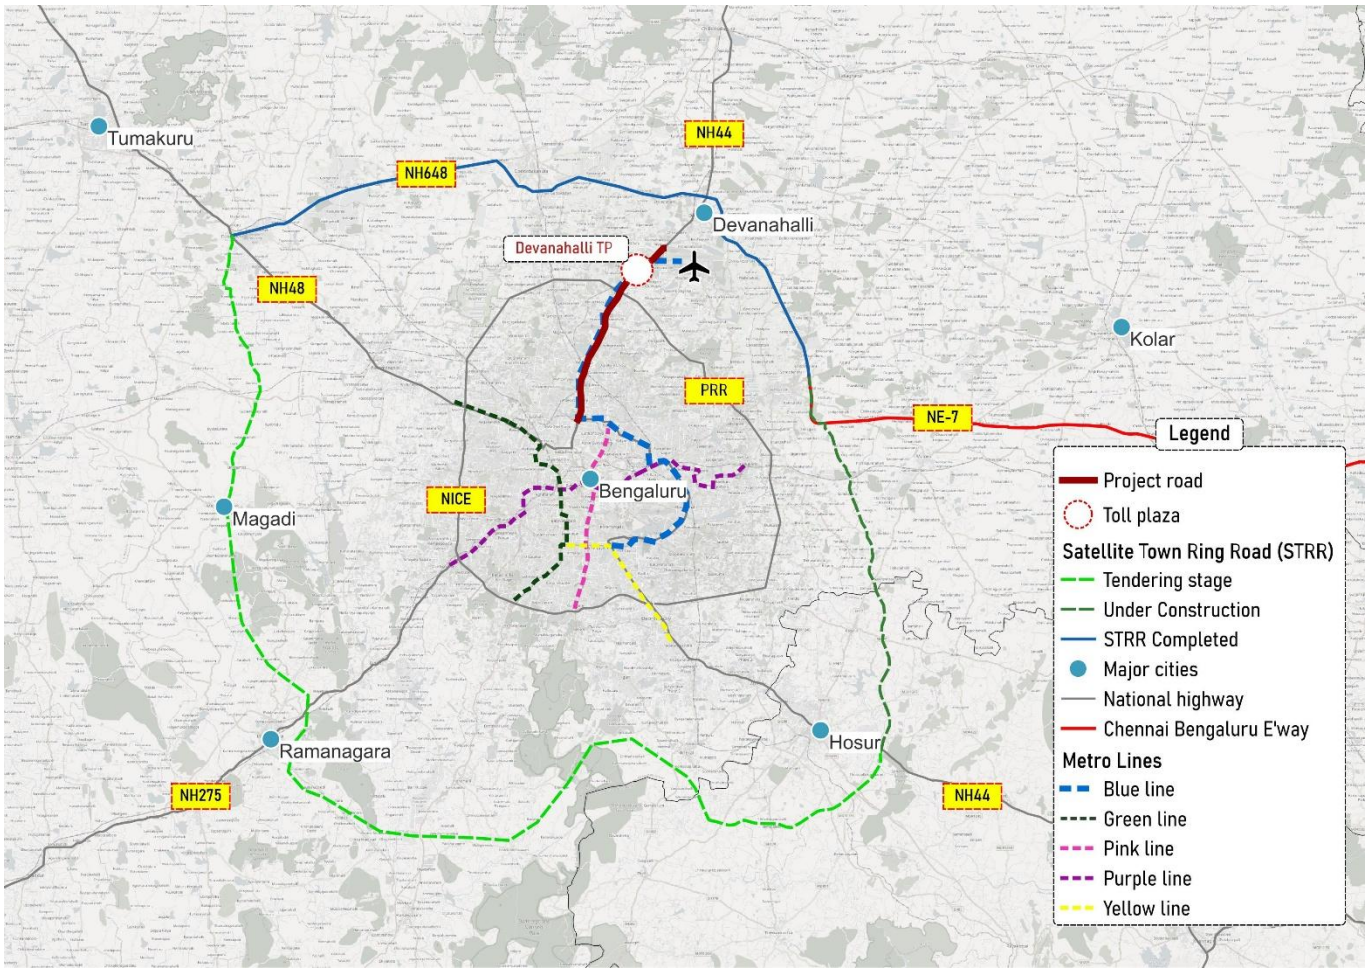
6 Network and Industrial developments in the Region

In the case of the project road, there are no short distance alternate routes available that will impact the traffic on the project road. However ongoing and upcoming network developments that could impact the project road are:

- Bengaluru Satellite Town Ring Road (STRR)
- Bengaluru Metro- Airport Blue Line

The alignment of the developments along with the project road is presented in figure below.

Figure 6-1: Network Development around project road



Source: Open Street Map, Crisil Intelligence

The details of the development in term of milestone, expected completion date and possible impact to project road traffic is presented in table below.

Table 6-1: Details of Network Development and Possible impact

S. No	Details of Development	Milestone/Completion	Impact Type	Possible Impact
1	**STRR** • 280.8 km long • 4/6 lanes	• Dobbasapete to Doddaballapur- **Apr-24**	Negative	At present, STRR is partially operational and is expected to be fully

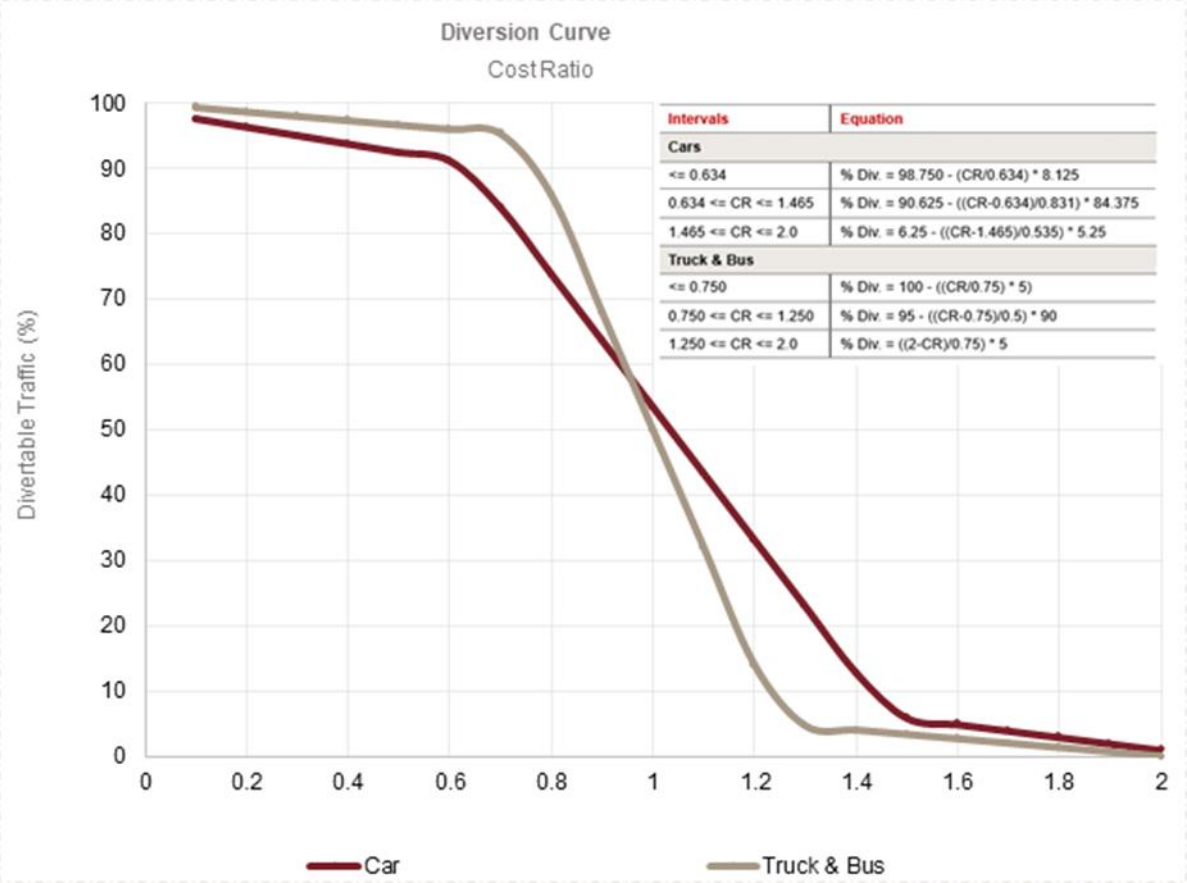
S. No	Details of Development	Milestone/Completion	Impact Type	Possible Impact
		• Doddaballapur to Hoskote- **Nov 23** • Hoskote to Chandrapura-**Dec 24**		operational by FY31. Impact has been divided into three categories, these are Hosur bound trips, Ramanagaram bound trips and Kunigal bound trips. For Hosur bound trips partial impact has been considered from FY27 with 50% and 100% onwards FY28 and for Ramanagaram bound trips and Kunigal bound trips impact has been considered from FY31 with 50% and 100% onwards FY32
2	**Impact of Bengaluru Metro**	Bengaluru metro is currently operational on Purple, Green and Yellow lines and under construction projects include pink lines and blue lines and is expected to be completed by 2027	Negative	As the construction of metro is undergoing and is expected to be completed by FY27, therefore metro impact has been considered from FY28 with 50% and 100% onwards FY28

Source: Crisil Intelligence

6.1 Approach and Methodology for Diversion Analysis

The assessment of traffic diversion if any away from the project road has been done using cost ratio analysis. The road user cost is estimated based on the vehicle operating cost (VOC) and Value of time (VOT) as mentioned in IRC: SP30-2019. The generalized cost ({VOC} + t{VOT} + {toll rates}) for the project road and the alternate or proposed route is then compared to obtain a cost ratio. Cost ratio is applied on the diversion curve equations (Binary logit model) to estimate the expected percentage of traffic diverting, based on users perceived costs on the existing and alternate or proposed facility. The diversion percentages are then applied on the in-scope traffic derived from the OD analysis to estimate the traffic that would shift to/from the project road. Diversion curve (equation) mentioned in IRC:108-2015 and is presented below.

Figure 6-2: Diversion curve as per IRC:108-2015



Source: IRC 108-2015, Crisil Intelligence

6.2 Impact of Bengaluru Satellite Ring Road

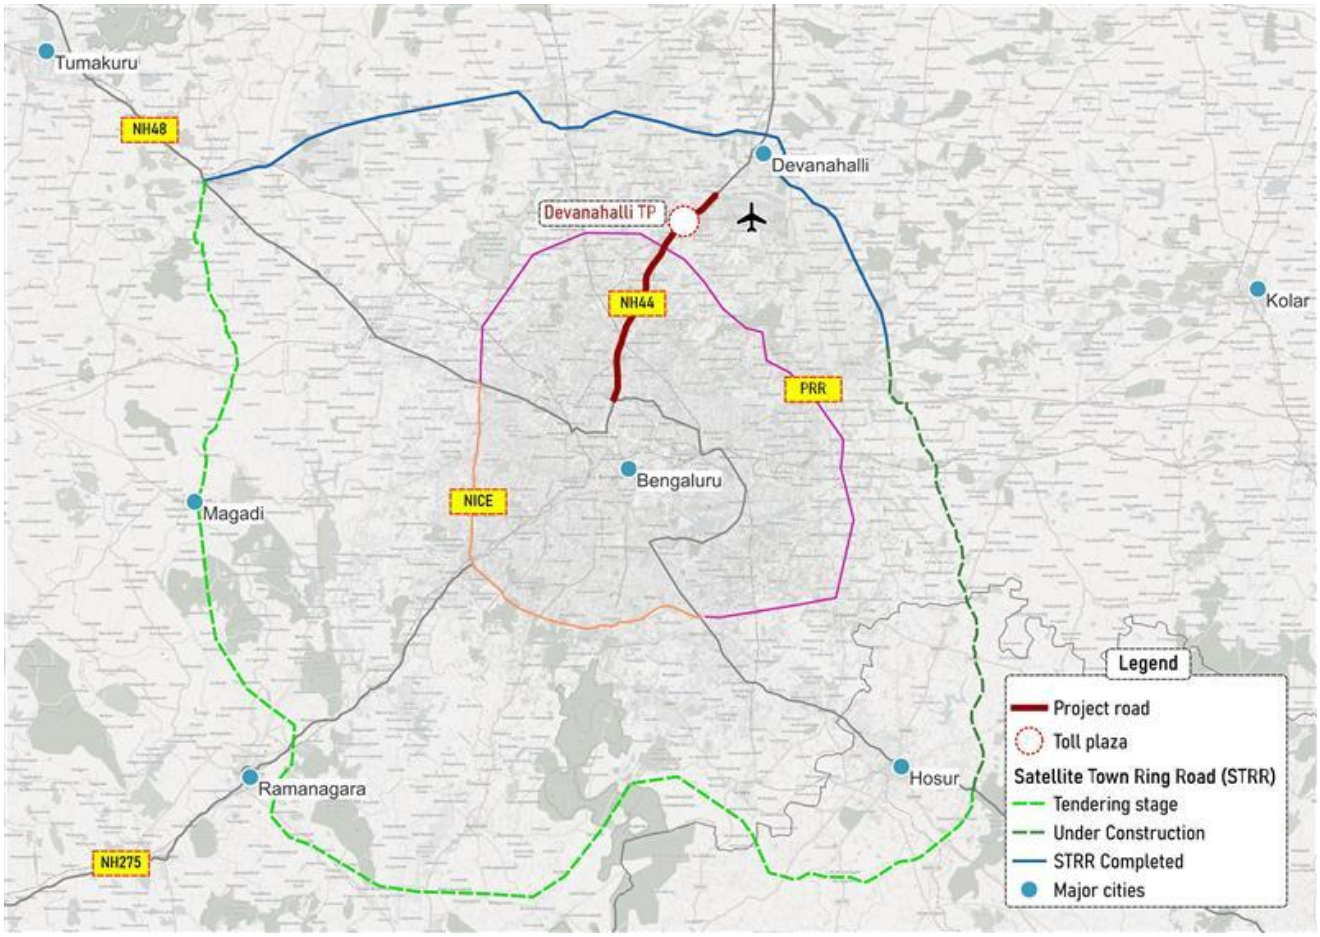
The 280.8 km Bangalore Satellite Town Ring Road (STRR, NH-948A), developed by NHAI, is partially operational and under construction. This access-controlled expressway has 4-6 lanes and connects 12 towns in Karnataka, including Dobbasapete, Doddaballapur, Devanahalli, Sulibele, Hoskote, Sarjapura, Attibele, Anekal, Tattekere, Kanakapura, Ramanagara, and Magadi. The Bengaluru Satellite Town Ring Road (STRR) Packages 1 and 2, covering the Dobbasapete – Hoskote segment, were inaugurated on March 11, 2024.

STRR once fully operational may take away some of the traffic which is currently using the project road. In order to understand the quantum of traffic that may shift to STRR, the potential divertible traffic is divided into three categories, these are: -

- Hosur Traffic
- Ramanagara Traffic
- Kunigal Traffic

The alignment of the STRR and the project section is presented in figure below.

Figure 6-3: Alignment of Project Road and STRR



Source: Open Street Map, Crisil Intelligence

Based on the information available in the public domain, it is anticipated that the STRR will be fully operational by FY31. The length for via Project Road and Via Alternate Road is presented below.

Figure 6-4: Length Via PR and AR

Particulars	Via Project Road Length (Km)	Via Alternate Road (STRR) Length (Km)
Hosur Traffic	85	70
Ramanagara Traffic	94	117
Kunigal Traffic	70	79

Source: Crisil Intelligence

Figure 6-5: Toll Rates and Generalised Cost

Particulars	Car/Jeep/Van (CJV)	LCV	2A Truck	3A Truck	MAV
Toll Rates					
Hosur Traffic-PR	120	185	370	560	560
Hosur Traffic-AR	145	235	490	535	770
Ramanagara Traffic-PR	120	185	370	560	560
Ramanagara Traffic-AR	195	315	660	720	1,040
Kunigal Traffic-PR	120	185	370	560	560
Kunigal Traffic-AR	140	225	465	510	730
Generalised Cost					

Particulars	Car/Jeep/Van (CJV)	LCV	2A Truck	3A Truck	MAV
Hosur Traffic-PR	1,554	6,901	7,612	12,106	12,116
Hosur Traffic-AR	1,141	3,422	3,604	5,202	5,461
Ramanagara Traffic-PR	1,610	7,624	8,427	13,447	13,456
Ramanagara Traffic-AR	1,856	5,624	5,872	8,531	8,891
Kunigal Traffic-PR	1,233	5,696	6,254	9,872	9,882
Kunigal Traffic-AR	1,265	3,812	4,040	5,865	6,113

Source: Crisil Intelligence

The assessment of STRR diversion from the project road is presented in table below.

Table 6-2: STRR Diversion Impact

Particulars	Car/Jeep/Van (CJV)	LCV	2A Truck	3A Truck	MAV	Total	PCU
Potential Traffic							
A) Hosur Traffic	0.4%	1.6%	1.9%	2.9%	2.2%	0.5%	0.6%
B) Ramanagara Traffic	1.4%	4.8%	5.0%	7.0%	4.2%	1.5%	1.7%
C) Kunigal Traffic	0.2%	0.5%	0.0%	0.5%	0.2%	0.2%	0.2%
Diversion %							
D) Hosur diversion %	100%	100%	100%	100%	100%		
E) Ramanagara Traffic	38.0%	100%	100%	100%	100%		
F) Kunigal Traffic	50.8%	100%	100%	100%	100%		
Diverted Traffic							
G) Hosur Traffic (A*D)	0.4%	1.6%	1.9%	2.9%	2.2%	0.5%	0.6%
H) Ramanagara Traffic (B*E)	0.5%	4.8%	5.0%	7.0%	4.2%	0.7%	1.0%
I) Kunigal Traffic (C*F)	0.1%	0.5%	0.0%	0.5%	0.2%	0.1%	0.1%

Source: Crisil Intelligence

The operation of STRR may result in a loss of about 0.6% of Hosur trips, 1.0% of Ramanagara trips and 0.1% of Kunigal trips. It is to be noted that one of the sections of STRR, i.e., from Chandrapura to S.Mudhuganapalli is expected to be operational by the end FY26, therefore the impact for Hosur trips has been considered from FY27 with 50% impact and 100% onwards FY28. The section from S.Mudhuganapalli to Dobbasapete is under tendering process and is expected to be completely operational by FY31, therefore the impact for Ramanagara trips and Kunigal trips has been considered from FY31 with 50% and 100% onwards FY32.

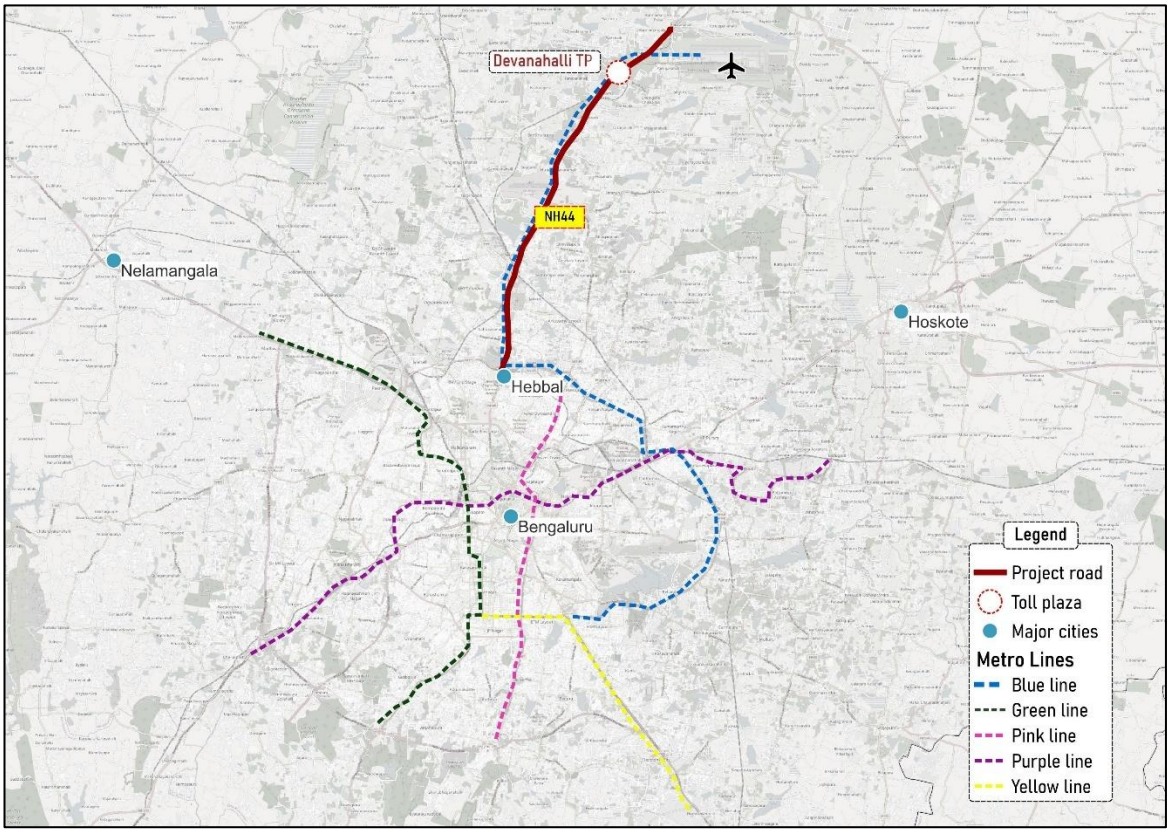
6.3 Impact of Bengaluru Metro

Bengaluru has a well-planned and expanding metro network, known as Namma Metro, which is a rapid transit system. At present Namma metro is currently operational on two lines. Purple lines which connect Baiyappanahalli to Mysore Road covering a distance of 18.1 km with 17 stations and green line which connects Nagasandra to Yelachenahalli covering a distance of 24.2 km with 24 stations.

The Bangalore Metro Rail Corporation Limited is presently undertaking construction of several metro lines in the city, of which blue metro line will enhance the connectivity to the airport and provide an alternate mode of transport to the road-based traffic moving towards Airport.

The alignment of metro with respect to PR is presented below.

Figure 6-6: Alignment of Project Road and Bengaluru Metro Lines



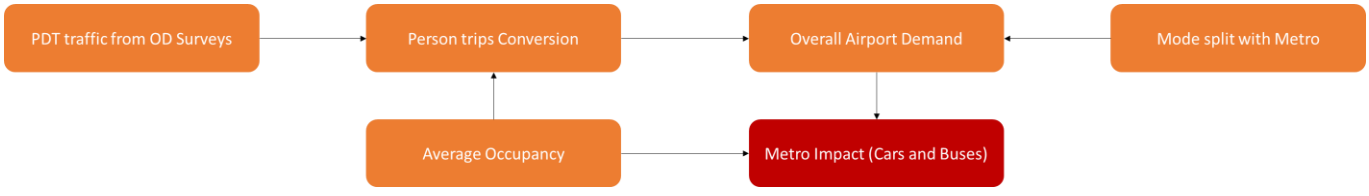
Source: Open Street Map, Crisil Intelligence

6.4 Approach and Methodology for Metro Impact

As the impact of Metro cannot be analysed through Generalized Cost Ratio, therefore a separate methodology has been adopted to arrive the potential traffic that may shift to Metro.

In this methodology Potential Divertible Traffic has been analysed and is converted to passenger trips by multiplying it with the occupancy factor. This passenger trips have been considered as overall airport demand and a mode wise split for metro has been applied and divertible traffic has been calculated.

Figure 6-7: Methodology for Bengaluru Metro



Source: Open Street Map, Crisil Intelligence

The assessment of metro line diversion has been considered based on the DPR for Airport metro line published in 2019 by BMRCL present in the public domain which states that almost 8 lac people will ride metro by 2031. As per the information available in report an occupancy factor of 2.3 for Cars and 37.5 for buses has been considered. Based on the travel demand estimation, mode share of different modes is presented below.

Modal Share	Domestic Passenger
Metro	30%
Car	20%
Taxi	40%
Bus	10%
Total	100%

Source: Bangalore Metro Rail Corporation Ltd. Report, Crisil Intelligence

Metro line diversion from the project road is presented in table below.

Table 6-3: Metro Diversion Impact

Particulars	Car/Jeep/Van (CJV)	2A Bus	Total	PCU
Potential Traffic (A)	44%	30%	46%	42%
Total Person Trips (B)	1,24,466			
Car Person Trips (Mode share*Total Person Trips) (C)	24,893		-	-
Taxi (Mode share*Total Person Trips) (D)	49,786			
Bus (Mode share*Total Person Trips) (E)		12,447		
Metro Trips ((A*Occupancy Factor)-(B+C))	14,142	22,730		
Metro Diversion	7%	19%	7%	7%

Source: Crisil Intelligence

The operation of blue line metro may result in loss of about 7% PCU from the project road. As per the information available in the public domain the operation of blue line metro is expected to start from FY28. Therefore, impact for the same has been considered in phased manner with 50% in FY28 and 100% impact onwards FY29

7 Traffic Growth Estimation & Traffic Forecast

7.1 Traffic projections – Outline

Traffic projections for the asset are done through Crisil's proprietary commodity-based approach (bottom-up). This section provides an overview and detailing of the commodity the approach.

7.2 Traffic projections – Commodity based approach

Crisil, based on its coverage of 80+ sectors and the MSME industry, has developed a knowledge base to understand the growth of industries and demand across various regions and clusters. The growth expectations for various industries are applied to each vehicle category based on the commodity composition of the vehicle category. For example, the share of light commercial vehicles (LCVs) carrying agricultural commodities is expected to grow as per agricultural output growth; the share of LCVs carrying consumer products is expected to grow as per the volume growth of durables; and the share of Multi axle vehicles (MAVs) carrying steel commodities is expected to grow as per demand/supply volume of steel products based on regional dynamics. This approach helps Crisil provide a more accurate growth rate of commercial traffic in the region.

For passenger traffic, Crisil assesses the sale of passenger cars in the region, growth of vehicular population, purpose and frequency of passenger travel, population growth, expansion of the city, and infrastructure development in the catchment area. From the OD analysis, the major influence of passenger traffic is from Bengaluru region and same has been detailed out in section **7.2.2**

Further, Crisil also examines the various factors that will impact traffic over the concession period, such as upcoming alternative road routes, truck aggregation by logistics players, dedicated freight corridors and other transportation options. Thus, the analysis considers the impact of central and state policies, growth in production and consumption centres along the stretch, and infrastructure in the adjoining regions. The report covers both growth drivers and restraints for the traffic along the stretch. Crisil has enumerated and detailed the parameters that will positively/negatively impact the traffic on the stretch in the future.

Crisil has used its proprietary traffic projection methodology to project traffic using regional industry growth assumptions, macroeconomic developments, infra development and consumption centre growth factors of the catchment area and adjacent regions.

Figure 7-1: Commodity based approach: Illustrative example for Commercial vehicles

Commodity	MAV (Vehicles) Year 1	YoY growth	MAV (Vehicles) Year 2
Construction materials	300	9%	327
Consumer products	100	4%	104
Agri Produce	200	3%	206
Iron & Steel products	50	9%	55
Chemical products	200	5%	210
Total vehicles	XX		YY

Commodity	LCV (Vehicles) Year 1	YoY growth	LCV (Vehicles) Year 2
Construction materials	100	9%	109
Consumer products	200	4%	208
Agri Produce	50	3%	52
Iron & Steel products	300	9%	327
Chemical products	200	5%	210
Total vehicles	XX		YY

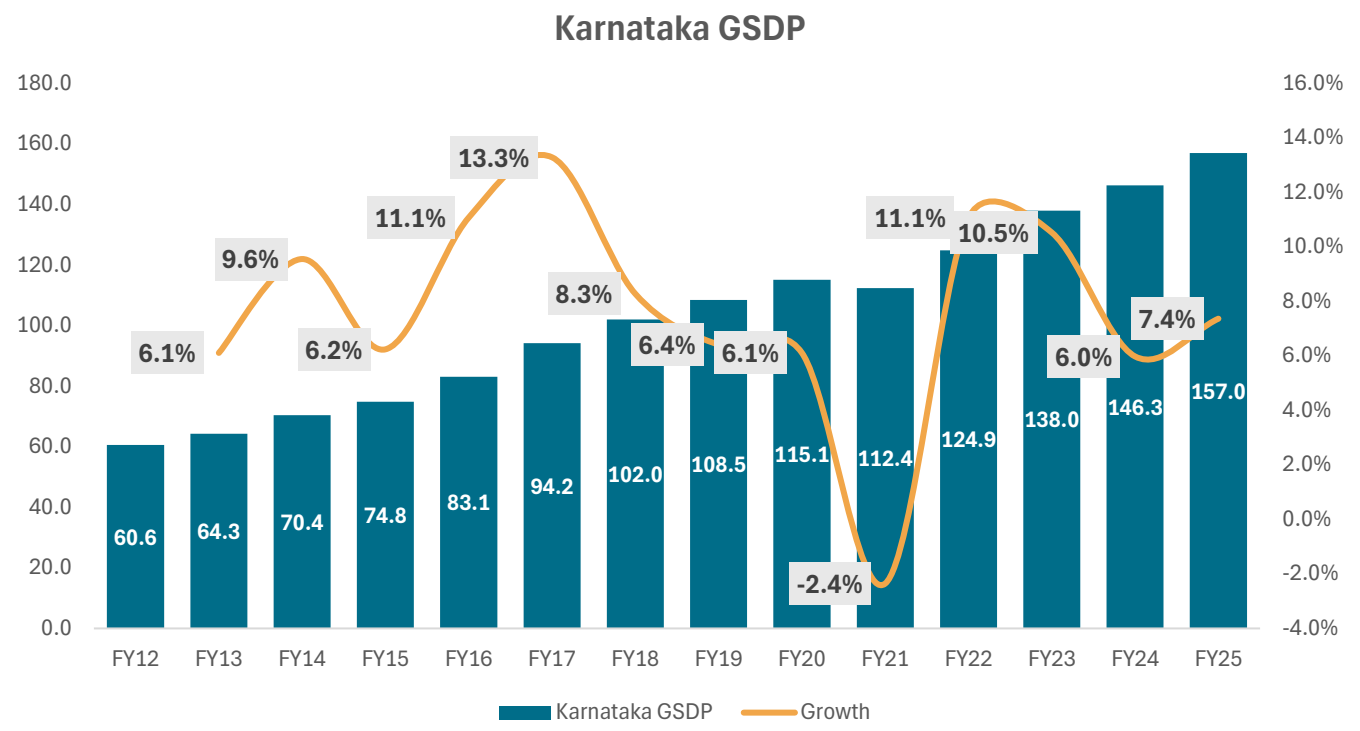
Growth rates for commodities are based on commodity specific demand/supply drivers and regional dynamics

7.2.1 Karnataka State profile

Karnataka, located in the southwestern part of India, is a state known for its rich cultural heritage, diverse geography, and vibrant economy. With a population of approximately 64 million people, Karnataka is a major hub for industry and services, accounting for around 10% of India's GDP. The state has a strong industrial profile, with major manufacturing sectors including aerospace and defence, automobiles, IT and electronics, biotechnology, and textiles. Karnataka is also a leading destination for service sectors such as IT and ITES, tourism, healthcare, education, and financial services, with many world-class institutions and companies operating in the state. Bengaluru, the state capital, is known as the "Silicon Valley of India" and is home to many major IT companies, while the state's rich cultural heritage and natural beauty attract millions of tourists every year.

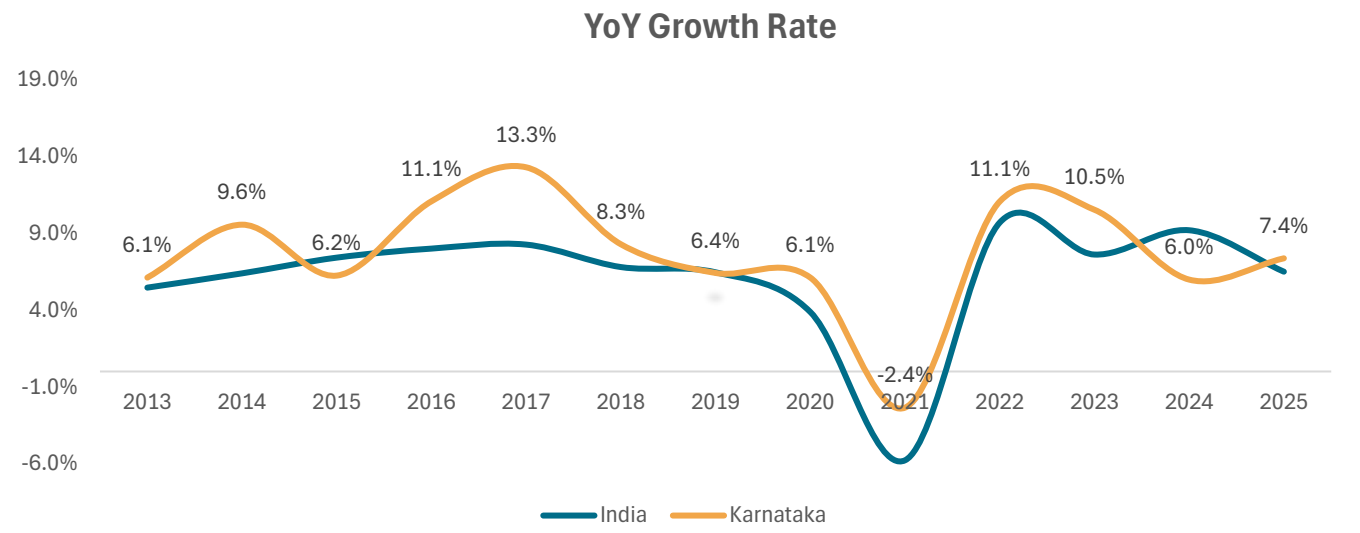
Karnataka, with a GSDP of ₹15,703 billion in 2024-25, has consistently demonstrated robust economic growth, achieving a compounded annual growth rate (CAGR) of 7.8% from 2011-12 to 2022-23. After experiencing a 2.4% decline in FY21 due to the COVID-19 pandemic, the state's economy rebounded with a 11.1% growth in FY22, underscoring its resilience. The state's per capita income has also shown steady growth, with a CAGR of 7.6% from fiscal 2012 to fiscal 2025.

Figure 7-2: Karnataka GSDP (Lakh Crore)



Source: MOSPI, Crisil Intelligence

Figure 7-3: Karnataka GSDP vs India GDP



Source: MOSPI, Crisil Intelligence

The tertiary sector dominates Karnataka's economy, contributing 66.6% to the GSDP in 2024-25, followed by the secondary sector at 23.6%, and agriculture and allied activities at 9.8%. Sectoral historical performance is presented in **Table 7-4**.

Table 7-1: Sectoral Growth-Karnataka

Sector	2013-2019	2019-2025	2013-2025
Primary	4.0%	6.4%	5.1%
Secondary	8.2%	4.4%	6.3%
Tertiary	9.6%	7.7%	8.6%

Source: MoSPI, GoI, Crisil Intelligence

Primary sectors, which include agriculture, forestry and fishing, exhibited a steady growth of 5.1 percent during 2013-2025. The secondary sector, comprising industries such as manufacturing, construction and utilities, experienced growth of 6.3 percent during 2013-2024.

The subsector indicator growth is presented in **Table 7-2**.

Table 7-2: Sub-Sectoral Growth-Karnataka

Sub Sector	2013-2025
Crops	2.4%
Mining	11.3%
Manufacturing	6.9%
Construction	4.9%

Source: MoSPI, GoI, Crisil Intelligence

7.2.2 Outlook for Car growth

The rate of car ownership in India has increased from 6.6 per 1,000 people in 2001 to 30-35 per 1,000 people in 2024. Despite India's car fleet growing at an annual rate of 10% for nearly 25 years, the rate of car ownership remains low compared to countries with similar economic status and significantly lower than developed countries, which have a rate of around 450 per 1,000 people. This low rate of car ownership indicates potential for continued growth in the coming years. With the ongoing increase in car ownership and improvements in the road network, the use of cars for inter-urban travel is showing a growing trend.

Bengaluru’s vehicle population grew steadily across all segments between FY17 and FY25 with private car registration surged by ~900k during the period and CAGR of 5.4% from 2017 to 2025.

Figure 7-4: Motor Car vehicle registration growth

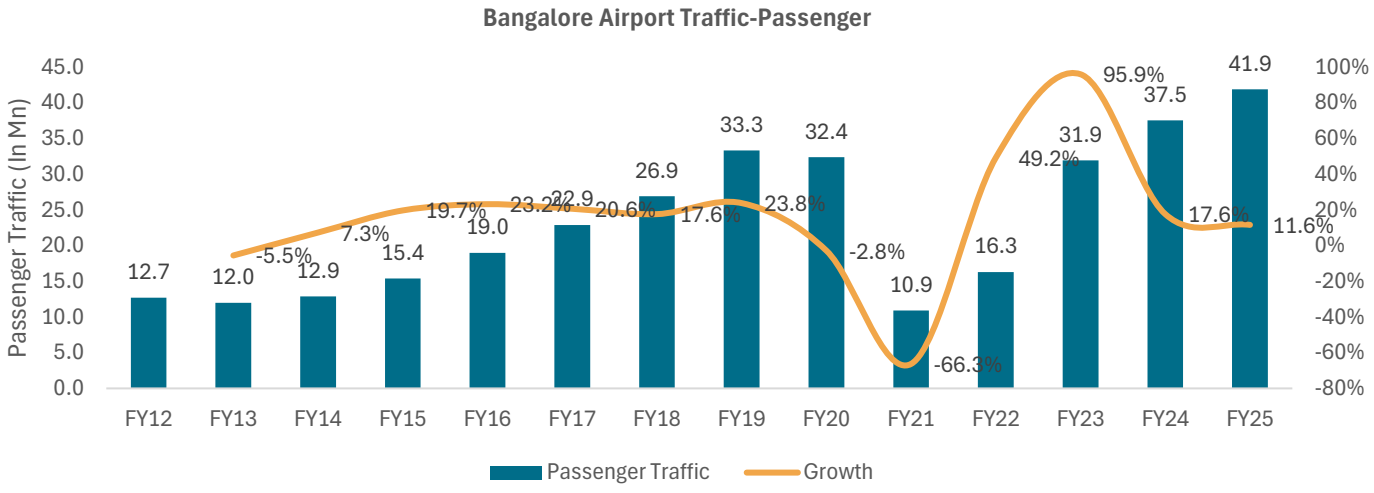
Bangalore Airport Passenger Traffic

Kempegowda International Airport, Bengaluru (KIAB) is one of the fastest-growing airports in India, serving as a major hub for domestic and international air travel. The airport has witnessed significant passenger traffic growth over the years, driven by the city's thriving economy, growing tourism, and increasing air connectivity. Historically, it was noted that the traffic on the Asset, particularly CJV traffic, closely aligned with the passenger traffic at the airport.

Airport Authority of India shows good growth in passenger traffic both domestic and international for (FY12-FY25) at 9.6% CAGR. Airport Passenger data for Kempegowda International Airport, Bengaluru (KIAB) from AAI is compiled in the chart below.



Source: AAI, Crisil Research Estimates

Bangalore Airport Expansion Plan and Growth Assumptions

The airport experienced a robust growth of 10% in FY24, driven by terminal expansion and an increase in international connectivity to Bangalore following the COVID-19 pandemic. With the operationalization of Terminal 2,

the current capacity of Bangalore Airport stands at 52 million passengers per annum (MPPA).

The Phase 2 expansion of Terminal 2 is expected to boost the airport's capacity by an additional 25 MPPA. Accordingly, a jump in passenger traffic is expected in fiscal 2029 and 2030.

The increase in passenger traffic at the airport will contribute to traffic growth on the Asset. CJVs represent 90% of the traffic and 72% of the revenue on the Asset.

Crisil's projections for passenger traffic, based on the capacity addition plans are as provided below:

Table 7-3: Airport Passenger Forecast Growth Rates

Vehicle Type	FY26	FY27	FY28	FY29	FY30	FY31	FY32
Passenger Forecasts (in MPPA)	~45			~62	~70		82.0
Growth Rate	7.5%	9.0%	9.0%	15.5%	13.4%	8.0%	8.0%

Source: Bangalore International Airport Limited (BIAL), Crisil Intelligence

7.2.3 Commodity Overview

As mentioned in section primary data collection & analysis, the analysis of freight movement across the toll plaza reveals that the major commodities being transported include Agri produce, construction materials, iron and steel products and consumer foods and products.

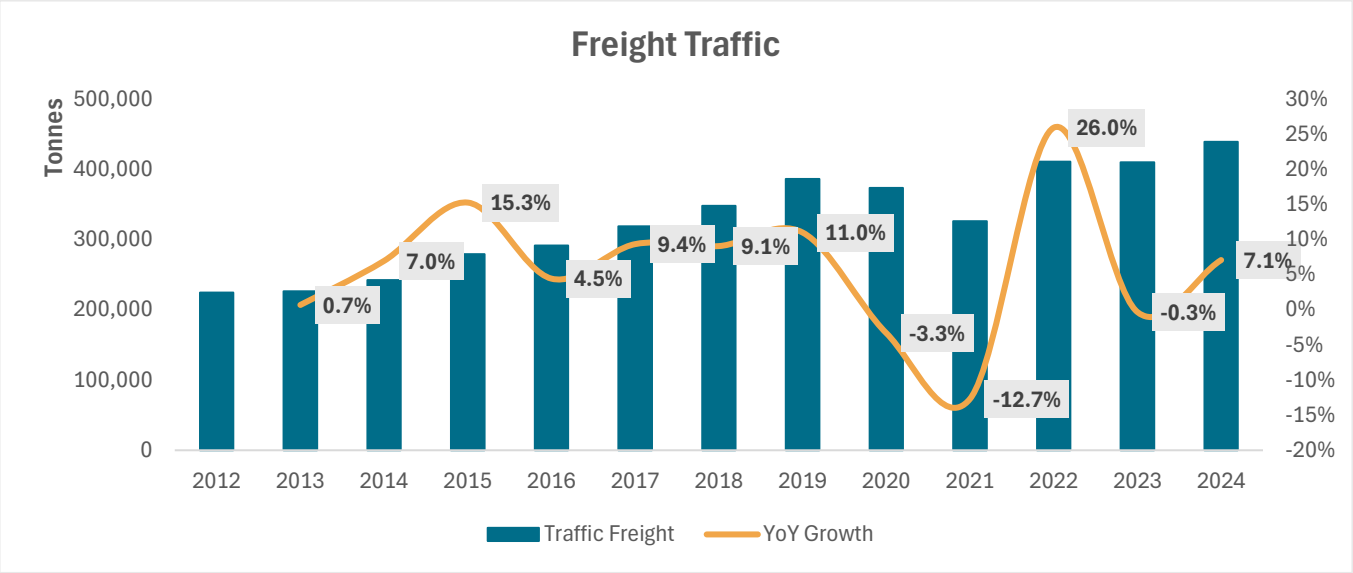
Courier & Parcels

The project road connects major cities like Bengaluru, Hyderabad, Devanahalli and Chikballapur. The project section is part of North-South corridor

Bangalore's Kempegowda International Airport (BLR) has witnessed significant cargo growth over the years, establishing itself as one of the leading cargo hubs in India. Recent years have seen a robust increase in cargo traffic, reflecting the overall growth of the logistics and supply chain sectors in India. In the fiscal year 2022-2023, BLR handled approximately 500,000 metric tonnes of cargo, marking a significant increase compared to previous years. A substantial portion of the cargo handled at BLR is international, with a significant increase in exports, particularly in sectors like pharmaceuticals and electronics.

The airport's dedicated cargo terminal has a capacity to handle over 1 million metric tonnes per year, which supports the anticipated growth in cargo traffic. Bangalore's Airport freight traffic (In Tonnes) has shown a steady growth with CAGR of 5.7% from FY12 to FY24. Year on year freight traffic (In Tonnes) handled at Bangalore's Kempegowda International Airport is presented below.

Figure 7-5: Bangalore Airport Freight Traffic (In Tonnes)



Source: Bangalore International Airport Limited (BIAL), Crisil Intelligence

Also, the trend of individuals and families relocating to cities like Bangalore for better employment opportunities. Bangalore has established itself as a hub for technological innovation, entrepreneurship, and diverse job opportunities. As more people choose to relocate to Bangalore, the demand for Movers/Packers services has surged. The influx of new residents and the growth of e-commerce in Bangalore have led to a corresponding increase in Courier/Parcel movement.

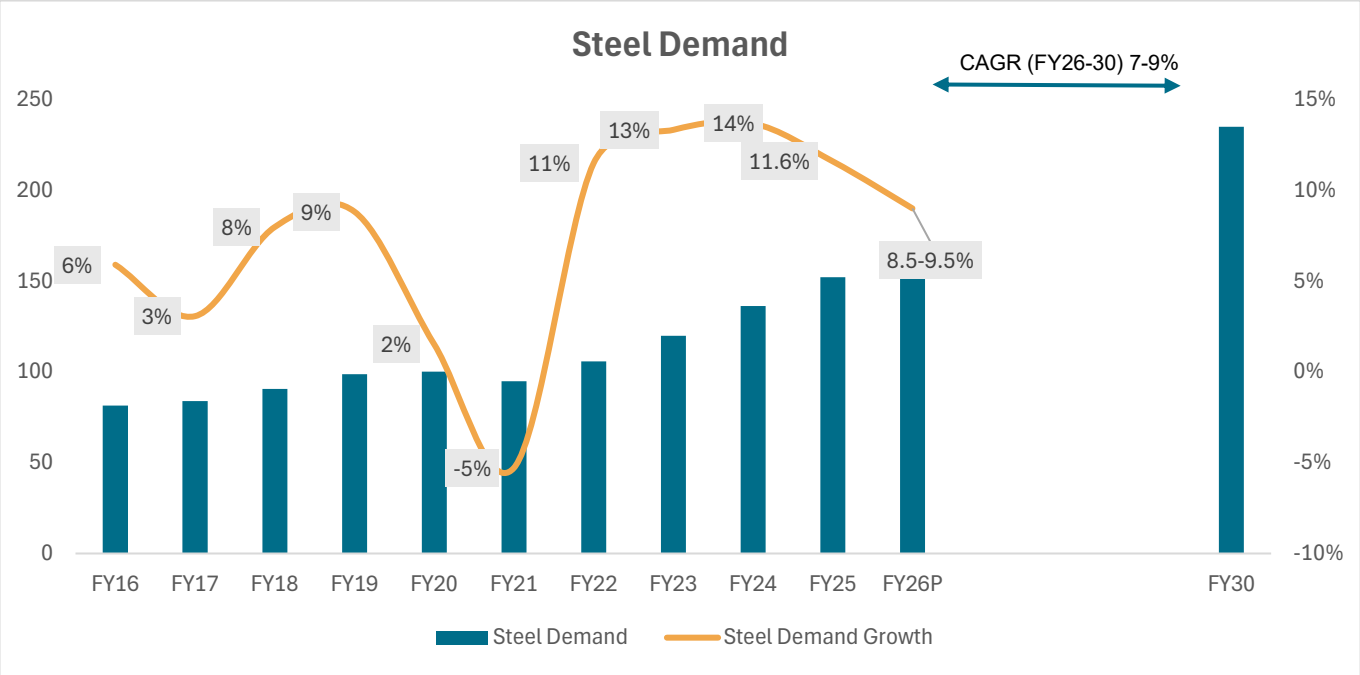
The e-commerce industry is on a rise with increasing consumption levels and moderating inflation and project corridor being an important link in connecting the important cities of Karnataka, Crisil expects CAGR of 6.7% from fiscal FY27-FY32 for Courier and parcels related traffic on the project road.

Iron & Steel Products

Iron & steel is one of major commodity plying on the project road with 8.9% share. The consumption of iron and steel in Bengaluru has been increasing steadily over the years, driven by the growth of the construction, infrastructure, and manufacturing sectors. The city's iron and steel industry is expected to continue to grow, driven by the increasing demand for steel from the construction and infrastructure sectors.

On-going and up-coming infrastructure activities have been key driving factors to the growth of this sector. A healthy housing market and an increase in individual house construction across the country are supporting this segment. Government initiatives, such as the Pradhan Mantri Awas Yojana (PMAY), are further supporting this segment. Cold storage, food processing units, warehouses, and irrigation structures also create consistent steel demand, linking back to the agrarian strength of both states.

Figure 7-6: Steel Demand in India



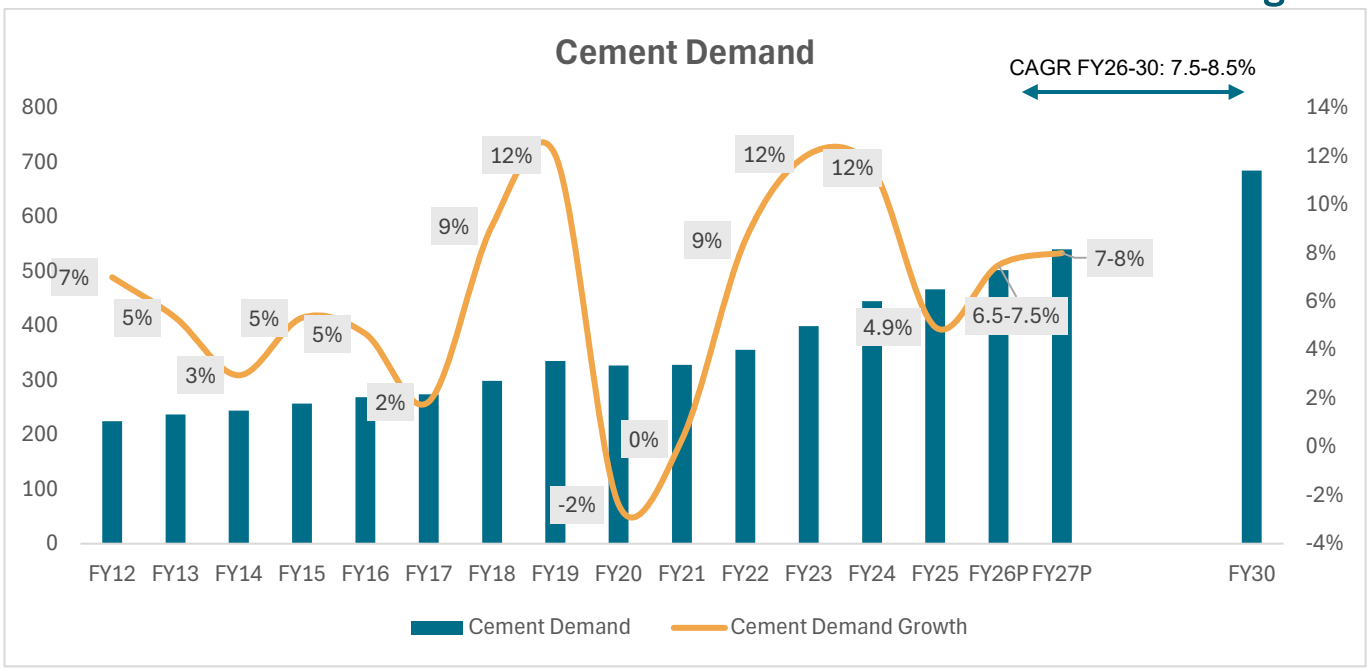
Source: CMA, Industry, Crisil Research Estimates

Considering all these factors Crisil expects growth of 5.3% from fiscal FY27-FY32 for Iron & Steel related traffic on the project road.

Construction Materials

Construction Material is another commodity, which is travels on the road stretch amounting to 9-10% of traffic on project corridor of which cement is the major commodity crossing the toll plaza owning to presence of various cement industries in and around the project corridor

The construction industry in India is expected to grow steadily at an annual rate of 6-8% between fiscal years 2026 and 2030. This growth will be mainly driven by increased spending on infrastructure projects such as roads and railways, supported by both central and state government investments.



Source: CMA, Industry, Crisil Research Estimates

Cement Demand growth moderated in fiscal 2025 to ~5%, following three years of healthy growth. While infrastructure segment continued to remain the key demand driver, growth moderated owing to slowdown in state capex roll outs during first half of fiscal 2025. However, with revival in state spending in the second half, infra projects picked up pace. Demand from the housing sector moderated to 3.5-4.5% with higher growth from rural housing segment. However, urban housing growth slowed down owing to slower execution under PMAY-U along with muted traction from real estate. In the industrial and commercial (I&C) segment growth slowed down after three consecutive years of healthy growth; however, continued traction from the PLI scheme and commercial real estate demand supported the growth.

Considering all these factors Crisil expects growth of 6.2% from fiscal FY27-FY32 for construction materials related traffic on the project road.

Consumer food and products

The fast-moving consumer goods (FMCG) industry or consumer packaged goods (CPG) industry is mainly responsible for producing, distributing, and marketing fast-moving consumer goods. Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years because of rising disposable income, a rising youth population, and rising brand awareness among consumers. Improved penetration of the organized snacks sector post the pandemic and new product offerings to drive growth of the industry in fiscal 2027.

Crisil expects growth of 3.6% from fiscal FY27-FY32 for consumer food & products related traffic on the project road.

7.2.4 Commodity Outlook

Crisil Intelligence has forecasted the freight traffic growth based on the growth in relevant sectors influencing traffic in the region. Industry growth has been analysed and forecasted based on our proprietary database of industries for the surrounding regions that impact traffic on project road as well as our internal assessment on a relevant set of sectors at the pan India level.

Package wise forecast incorporates the regional dynamics including, but not limited to, investments, commodity trends, district output (GDDP) profile (primary/secondary, construction/manufacturing) etc.

The traffic for the coming years is projected by factoring in the impact of these parameters on commodity wise growth rates and is presented in table below.

Table 7-4: Commodity outlook for the Project section

Commodity	FY 27 - FY 32
Agri Produce	2.2%
Automobiles	5.3%
Chemical products	3.6%
Coal	2.2%
Construction materials	6.2%
Consumer Foods	3.6%
Consumer Products	3.6%
Container	3.6%
Courier & parcel	6.7%
Iron & Steel Products	5.3%
Machinery	3.6%
Milk & Animal Food	1.8%
Others	4.4%
Paper products	3.6%
Petroleum Products	2.7%
Pharmaceuticals	3.1%
Plastic products	3.1%
Plywood & Timber products	3.1%
Rubber products	3.1%
Textile & Footwear	3.6%
Tiles & Ceramic products/powder	3.6%

8 Revenue forecast

8.1 General

The project section is under “open tolling system” which enables the concessionaire to collect tolls from long distance as well as short distance traffic joining the project from adjoining highways.

8.2 User Fee Schedule

As per Gazette notification dated 05.12.2008, under the National Highways Fee (Determination of Rates and Collection) Rules 2008 [GSR 838 (E) and concession agreement the per km toll rates applicable from 2007/08 for normal tolling length and permanent structure, the revision basis and concessions are provided.

The concessions of traffic have been provided under the categories/ toll tickets as presented in table below.

Table 8-1: Tolling Tickets

Ticket	Maximum number of one-way journeys allowed	Period of validity
Single/Normal	Single	-
Daily Pass	Two	24 hours
Monthly Pass	Fifty (50)	One month from the date of payment
Local Personal	Multiple	One month from the date of payment
Local Commercial	Single	-
Annual Pass	Multiple	One year from the date of payment or 200 trips

Source: Concession Agreement, Crisil Intelligence

8.3 Toll Segmentation

As mentioned in traffic assessment of the project stretch section, historical toll data of FY26 is used in adopting the segmentation for the project road and is presented below.

Table 8-2: Toll segmentation in % - FY26

FY	Vehicle Type	Single	Return	Monthly	Local Pass	Exempt	Annual Pass
Oct-25	**Car/Jeep/Van (CJV)**	21.6%	56.8%	2.8%	2.3%	6.1%	10.4%
2026 (Apr-Sep)	**LCV/Mini Bus**	39.0%	57.7%	0.4%	0.0%	2.9%	
	2A Bus	3.8%	89.7%	2.3%	0.0%	4.2%	
	2A Truck	57.6%	39.4%	0.3%	0.0%	2.6%	
	3A Bus/Truck	37.4%	57.9%	2.0%	0.0%	2.7%	
	MAV	57.4%	40.6%	1.5%	0.0%	0.5%	
	OSV	54.9%	19.1%	0.0%	0.0%	26.0%	

Source: Historical toll data, Crisil Intelligence

As per recent announcements, the annual Pass activated on the Fastag will allow free passage of private car/jeep/van

at designated National Highway (NH) and National Expressway (NE) fee plazas for one year or 200 trips (whichever is earlier), without per-trip user fee charges. The Annual Pass is applicable only for private non-commercial Car/Jeep/Van after checking through VAHAN database.

To assess the impact of the annual pass, frequency of travel, and number of trips, were made available by client for October 2025. For estimating the annual pass revenue, the plaza constant factor has also been provided by the client for the toll plaza. Details for estimating the annual pass revenue are presented below.

Table 8-3: Annual pass- Trips & Plaza constant factor

TP	% Trips	% Trips <2 trips	Plaza constant factor
Devanahalli TP	10.4%	97.1%	0.80

Source: Historical toll data, Client input, Crisil Intelligence

8.4 Trip Rates

The trip rates are adopted based on the FY26 historic traffic data and trip rates for the present study for FY26 onwards is presented in table below.

Table 8-4: Adopted Trip Rates

Type of vehicle	Single	Return	Monthly	Local Commercial	Local Personal
Car/Jeep/Van (CJV)	1.0	2.0	50.0	1.0	20.66
LCV/Minibus	1.0	2.0	50.0	1.0	
2A Bus/Truck	1.0	2.0	50.0	1.0	
3A Bus/Truck/MAV	1.0	2.0	50.0	1.0	
OSV	1.0	2.0	50.0	1.0	

Source: Historical toll data, Crisil Intelligence

8.4.1 Tolling lengths

The tollable lengths for the project section for plaza is presented in table below.

Table 8-5: Tolling Lengths

TP	Devanahalli TP
Chainage	Km 534.720 to Km 556.840
Section	Devanahalli-Hebbal
Normal Length (In Km)	18.40
Cost of structure (In Cr.)	220.0

Source: Concession Agreement, Crisil Intelligence

8.4.2 Toll Rates Estimation

The toll rates that are likely to be applicable on the project section during the project study are in accordance with the National Highways Fee (Determination of Rates and Collection) Rules 2008 [GSR 838 (E),2008 and article 27 of the concession agreement.

The toll rates (Rs/km) for the base year 2007-08 for different vehicle categories are as per fee rule/concession

agreement mentioned above and are presented below.

Table 8-6: Base Rate in Rs/km

Vehicle Type	Base rate of fee per km for base year from 1st April 2007 (in Rupees)
Car, Jeep, Van, or Light Motor Vehicle	0.65
Light Commercial Vehicle, Light Goods Vehicle or Minibus	1.05
2A Bus/Truck	2.20
3A Bus/Truck	3.45
Heavy Construction Machinery (HCM) or Earth Moving Equipment (EME) or Multi Axle Vehicle (MAV) (four to six axles)	3.45
Oversized Vehicles (seven or more axles)	4.20

Source: Concession Agreement, DTPL

Table 8-7: Toll Rates (in INR)

Type of vehicle	Single	Return	Monthly	Local Commercial	Local Personal
Car/Jeep/Van (CJV)	120	180	3,970	60	350
LCV/Minibus	185	275	6,100	90	
2A Bus/Truck	370	550	12,265	185	
3A Bus/Truck/MAV	560	840	18,615	280	
OSV	725	1,090	24,245	365	

Source: Crisil Intelligence

8.4.3 Review and Outlook of Whole-Sale price index (WPI)

The projected toll rates are dependent on Wholesale Price Index (WPI) assumptions for 2027 to 2032. For WPI projection, Crisil Intelligence has relied on inputs from Client. Past and outlook WPI growth is presented in table below.

Table 8-8: WPI

Year	WPI	Expected Year-on-year growth
2025	478.6	2.57%
2026	490.0	2.40%
2027	514.5	5.00%
2028	540.8	5.10%
2029	567.3	4.90%
2030	592.2	4.40%
2031	616.5	4.10%
2032	641.8	4.10%

Source: Projected WPI (P): - Client Input

8.5 Revenue Estimates

The revenue projections for the project road are presented in the table below.

Table 8-9: Mode wise Revenue in ₹ Millions for the Project Section

FY Year	Car/Jeep/Van (CJV)	LCV/Minibus	2A Bus	2A Truck	3A Bus/Truck	MAV	OSV	Total	YoY Growth (%)
FY-2026	2,845.8	74.4	302.6	83.1	125.9	159.7	0.3	3,591.8	
FY-2027	3,163.4	78.8	326.3	88.6	130.7	174.0	0.4	3,962.1	10.3%
FY-2028	3,447.3	85.1	323.3	96.5	137.8	192.0	0.4	4,282.4	8.1%
FY-2029	3,799.8	91.9	313.9	105.0	146.5	213.3	0.5	4,670.9	9.1%
FY-2030	4,384.9	99.1	341.6	114.2	156.5	238.2	0.5	5,334.9	14.2%
FY-2031	4,858.4	103.6	373.1	120.7	159.1	257.2	0.6	5,872.7	10.1%
FY-2032	5,389.3	108.3	405.0	128.3	162.1	278.3	0.6	6,471.9	10.2%
CAGR (26-32)	11.2%	6.5%	5.0%	7.5%	4.3%	9.7%	11.1%	10.3%

Source: Crisil Intelligence

- For Bengaluru-Hyderabad direction, courier parcel traffic is higher than the Hyderabad-Bengaluru direction, indicating presence of multiple warehousing units in the Bengaluru city.
- For Hyderabad-Bengaluru direction, Construction materials and Iron & steel products traffic is higher than Bengaluru-Hyderabad direction for all modes. This is due to the presence of various cement and steel plants at Hyderabad & surrounding

About Crisil Intelligence (formerly Market Intelligence & Analytics)

Crisil Intelligence is a leading provider of research, consulting, risk solutions and advanced data analytics, serving clients across government, private and public enterprises. We leverage our expertise in data-driven insights and strong benchmarking capabilities to help clients navigate complex external ecosystems, identify opportunities and mitigate risks. By combining cutting-edge analytics, machine learning and AI capabilities with deep industry knowledge, we empower our clients to make informed decisions, drive business growth and build resilient capacities.

For more information, visit Intelligence.Crisil.com

About Crisil

Crisil is a global, insights-driven analytics company. Our extraordinary domain expertise and analytical rigour help clients make mission-critical decisions with confidence.

Large and highly respected firms partner with us for the most reliable opinions on risk in India, and for uncovering powerful insights and turning risks into opportunities globally. We are integral to multiplying their opportunities and success.

Headquartered in India, Crisil is majority owned by S&P Global.

Founded in 1987 as India's first credit rating agency, our expertise today extends across businesses: Crisil Ratings, Crisil Intelligence, Crisil Coalition Greenwich and Crisil Integral IQ.

Our globally diverse workforce operates in the Americas, Asia-Pacific, Europe, Australia and the Middle East, setting the standards by which industries are measured.

1 Executive summary

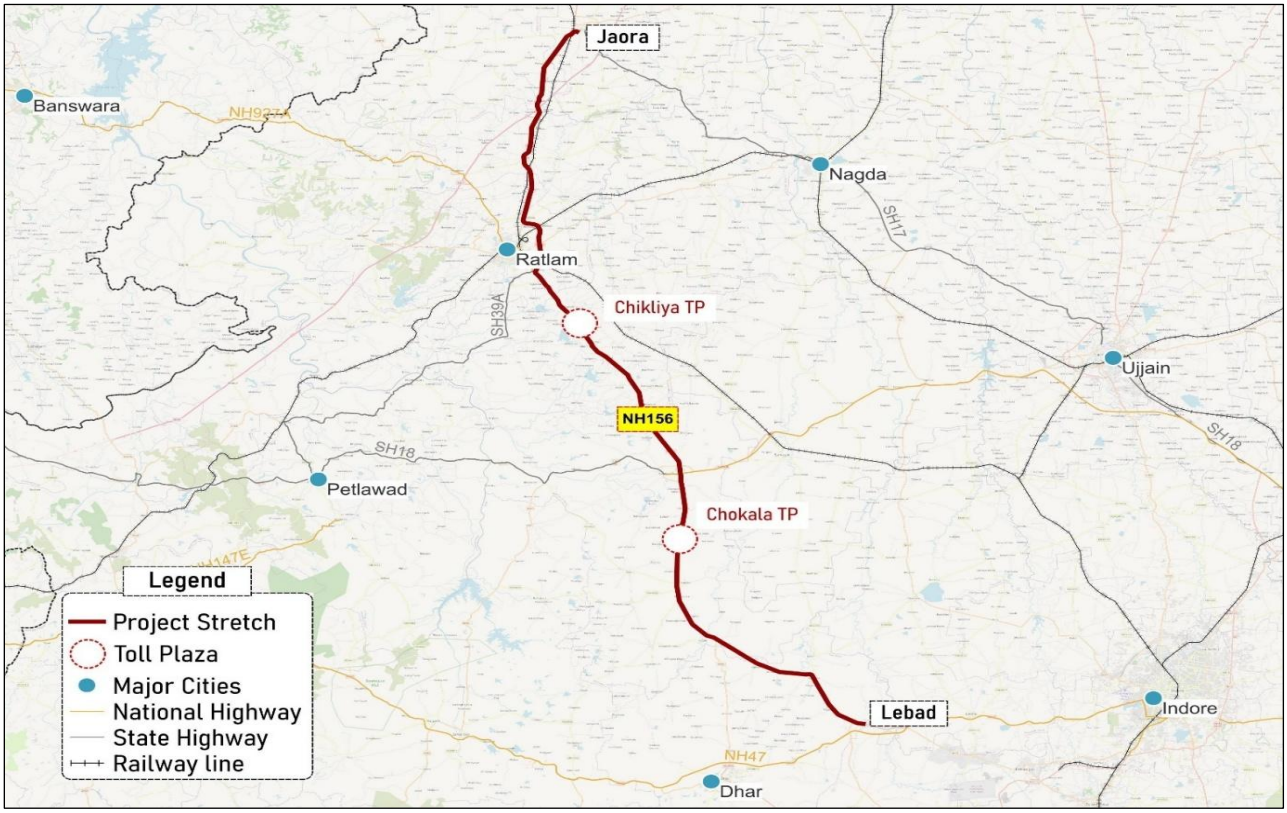
1.1 Project details

M/s Cube Highways Trust (hereinafter “the Client”) as sponsor has appointed M/s CRISIL Limited (hereinafter referred as “Technical Consultant”) to carry out Traffic and Revenue Due Diligence of operational asset of four Laning of Lebad-Jaora Road on BOT Toll Basis in the State of Madhya Pradesh (herein after refer as “the Project”) which is being operated by “M/s Western M P Infrastructure and Toll Road Pvt. Ltd. (WMPTL)" (hereinafter refer as “the Concessionaire or Company”).

1.2 Asset overview

The Lebad–Jaora segment of State Highway 31 is a ~125-kilometer, four-lane corridor that enhances connectivity between Indore and key destinations in Rajasthan and Maharashtra, including Udaipur, Jaipur, and Mumbai. It serves as a critical east-west link between NH48 and NH52, facilitating traffic among major economic hubs. The corridor forms a critical east–west connection between NH48 and NH52, enabling smooth traffic movement among major economic hubs. It includes two toll plazas and serves two key industrial clusters—Pithampur and Indore—which house diverse industries such as pharmaceuticals and textiles. Automobile and associated ancillary industries also have a significant footprint along this corridor. The corridor predominantly carries freight traffic, particularly agricultural commodities like wheat, with Madhya Pradesh being an important wheat-producing state. The area along the project road is also a leading producer of garlic and cotton. In addition, the route accommodates significant courier service movements linking major cities such as Delhi-NCR, Mumbai and Bengaluru.

Figure 1-1: Project Road



Source: Open Street Map, Crisil Intelligence

The four districts of Indore, Dhar, Ujjain, and Ratlam form the industrial core of western Madhya Pradesh, centered around Indore and the Pithampur manufacturing hub. This region benefits from multimodal connectivity, including national highways, Western Railway routes, and air cargo access through Devi Ahilya Bai Holkar Airport. Each district has distinct industrial clusters:

Nimbahera–Badnawar is focused on heavy cement manufacturing, generating significant vehicular traffic for transporting materials. Indore serves as a commercial capital with a diverse industrial base in textiles, food processing, pharmaceuticals, and IT/ITeS, supported by various industrial parks and SEZs. Dhar hosts the Pithampur industrial ecosystem, a major automobile and engineering hub with significant OEM presence. Ujjain has a strong services sector, including tourism and process industries, while Ratlam focuses on light manufacturing and logistics, leveraging its rail junction status.

Agricultural mandis and tourism also contribute to local economies, with Ujjain being a major pilgrimage destination. The corridor's competitiveness is enhanced by robust highway networks, railway routes for bulk goods, and the airport's capacity for high-value shipments, along with expanding warehousing facilities that improve logistics efficiency.

1.4 Base traffic estimation

For base traffic (annual average daily traffic) estimation in the present study, Q1FY26 (Apr-25 to Jun-25) of TMS traffic data were annualized using SCF factor of FY25, FY24, FY20 and FY19 traffic data to arrive at the annual average daily traffic (AADT) for FY 26.

The AADT estimation for the base case for FY26 is presented tables below

Table 1-3: Base traffic estimation FY26 AADT for Chokala TP

Particulars	FY year	Car	LCV/Minibus	Bus	Truck	3 Axle Truck	MAV	Total	PCU
ADT (Apr-June)	FY 26	6,362	571	143	1,634	738	2,335	11,783	25,271
SCF	FY19, FY20, FY 24, FY 25	0.98	0.99	0.92	1.08	1.02	1.02		
AADT	**FY 26**	**6,253**	**567**	**132**	**1,772**	**752**	**2,380**	**11,855**	**25,778**

1.5 Overview of impact due to network developments

In the case of the project road, the major impact on the traffic is expected to be from the development of Delhi-Mumbai expressway (DME) and the DME spur connecting the to the expressway at Garoth (starting from Ujjain with a length of 130 km). The DME intersects with the project stretch near Nayapura (Towards Jaora). These two developments are like to have two-pronged impact on the project stretch's traffic in terms of long-distance traffic and short distance traffic.

Table 1-7: Details of network development and possible impacts

Sr. no	Network development	Traffic impacted	Impact Type	Phasing	Possible impact
1	Delhi Mumbai Expressway long distance Traffic	Mumbai/Pune/South and beyond to Delhi/Jaipur/Haryana/UP and beyond	Negative	20% in FY27 and 100% from FY28	The long-distance traffic on the project stretch which is originating/destined for Delhi and North and Mumbai/Pune/Bangalore and South is considered as potential divertible traffic
2	Delhi Mumbai Expressway short distance Traffic	Indore/Dhule & South till Nashik and surroundings to Rajasthan/Delhi	Negative	20% in FY27 and 100% from FY30-Considering the construction of the Western Indore Bypass in the future the diversion percentage is different from FY 29 onwards	The traffic present on the project stretch which is originating and destined for the catchment area around Indore/Pithampur, Dhule, and Nashik have an alternative in the form of the Ujjain-Garoth spur to connect to DME and travel to Rajasthan (Jaipur catchment) and Delhi/North India. Thus, this short distance traffic is considered as potential divertible traffic.

2 Introduction

2.1 Asset overview

The Lebad–Jaora segment of State Highway 31 is a ~125-kilometer, four-lane corridor that anchors Indore's connectivity to Rajasthan and Maharashtra, linking onward to key destinations such as Udaipur, Jaipur, and Mumbai. This stretch sits within SH31's broader alignment from Nayagaon, at the Rajasthan–Madhya Pradesh border, down to Khargone, effectively tying the two states together. It also functions as a critical east–west bridge between NH48 (formerly NH8) south of Chittorgarh and NH52 (formerly NH3) west of Indore, channeling traffic among major economic hubs including Gurgaon, Jaipur, Ajmer, Udaipur, Nimbahera, Indore/Dewas, and further to Nasik, Bhiwandi, and Mumbai/JNPT. There are two toll plazas on the asset—Chokala and Chikliya—with Chikliya recording the larger share of throughput.

The corridor's catchment features two prominent industrial clusters: Pithampur, which lies close to the project stretch, and Dewas near Ujjain. These hubs host a diversified industrial base spanning pharmaceuticals, automotive, iron and steel, cement, food processing, and textiles. As a vital conduit for north–south long-haul movement, the route carries predominantly freight traffic, while most passenger car volumes are inter-state in nature.

Freight composition is led by agricultural commodities, largely transported by LCV/Minibuss and 2-axle trucks. Heavier multi-axle vehicles primarily move construction inputs—especially cement, marble, and associated powders—originating around Nimbahera and Jaipur and heading toward Indore, Ujjain, and Badnawar to serve local construction demand. The corridor also facilitates significant courier and parcel flows connecting Delhi-NCR, Mumbai, and Bengaluru.

Agriculture remains the dominant commodity theme, with wheat at the forefront. Madhya Pradesh is India's second-largest wheat producer, cultivating high-quality varieties across more than 19 districts. Notably, premium Sharbati and Kathiya (durum) wheats are produced here and supplied to both domestic and export markets.

Table 2-1: Details of the road stretch

Project stretch	State	Toll plaza	Length (km)
Lebad-Jaora section of SH-31	Madhya Pradesh	Chokala (TP1) and Chikliya (TP2)	124.15

2.2 Scope

The scope of the traffic assessment for the project road is divided into following four sections.

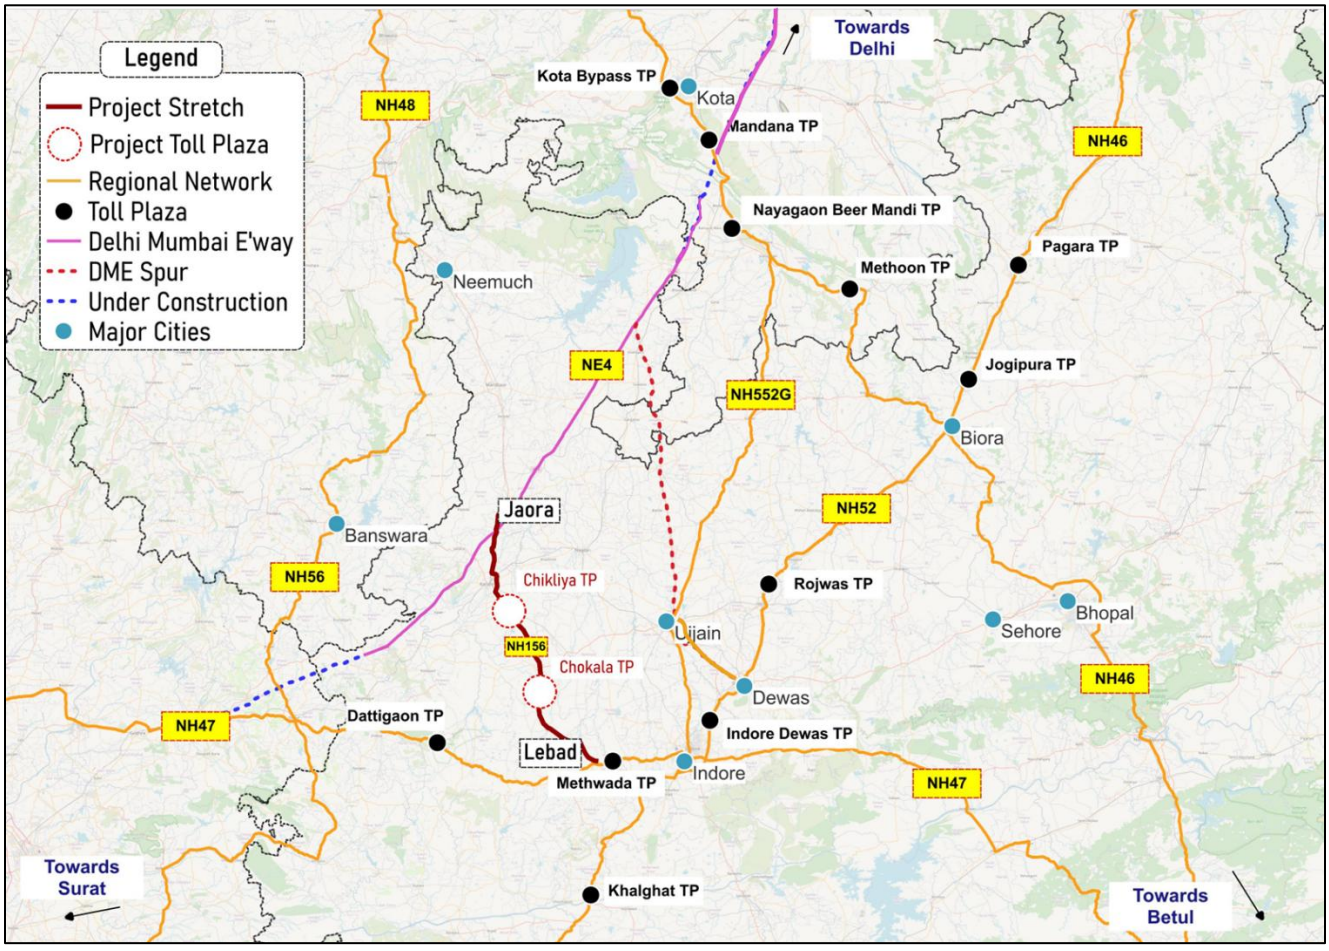
- Detailed Assessment of the project road: - Include review of the Historic TMS Data, past traffic growth, detailed network assessment.
- Primary Data collection & Analysis: - Conducting preliminary traffic surveys like Origin-Destination (O-D) to understand the traffic patterns, commodity profiles.
- Network Impact Assessment: - To Analyse the upcoming network developments which may impact the project road traffic
- Traffic and Revenue Projections: - Traffic & Revenue projections considering relevant growth drivers and network developments

Approach & Methodology is detailed out in Traffic Growth Estimation & Traffic forecast chapter.

2.3 Network profile

The Asset connects the industrial catchment region around Indore/Pithampur with Maharashtra and Rajasthan. For passenger and local traffic, the stretch provides movement between the adjacent districts i.e. Ratlam, Dhar, Indore and Ujjain It plays a vital role in regional trade, business, and passenger movement. The project stretch connects to the 8-lane Delhi-Mumbai expressway at Nayapura (near Jaora). Nearby network development includes the construction include greenfield access controlled 130 km Ujjain-Garoth DME spur, 4-lane Indore-Ujjain section, 4-lane Ujjain-Badnawar section, and 4 lane Ujjain-Agra-Jhalawar section. However, several major network developments in the surrounding region have influenced travel behavior. A schematic representation of the current network within the project influence area is presented in the figure below

Figure 2-2: Network around the project influence area



Source: Open Street Map, Crisil Intelligence, IHMCL Data

Overall, these developments are expected to enhanced regional connectivity and travel efficiency but also concurrently impact the traffic load on the project corridor. The redistribution of long/short-distance traffic is expected to get suppressed on the existing alignment on account of the DME and the Ujjain DME spur.

2.4 Industrial profile

The four districts—Indore, Dhar, Ujjain, and Ratlam—form the core of western Madhya Pradesh's western industrial belt, anchored by Indore city and the Pithampur manufacturing hub in Dhar. The corridor is enabled by multimodal connectivity: national highways linking to Gujarat, Maharashtra, and Rajasthan; Western Railway routes via Indore, Ujjain, and Ratlam; and air cargo access through Devi Ahilya Bai Holkar Airport (Indore). This connectivity underpins manufacturing, trade, and logistics, with Indore serving as the procurement, finance, services, and talent center for the wider region.

The industrial clusters and sector composition of the region is as follows,

Nimbahera–Badnawar (cement cluster): Heavy manufacturing activity spans Nimbahera (Rajasthan)—housing units of Wonder Cement, and JK Cement—and Badnawar (Dhar), where Wonder Cement's cement/clinker facility has strengthened throughput. These nodes generate consistent 3 Axle and multi-axle vehicular flows carrying limestone, clinker, and finished cement across the corridor, including movement observed at the Chikliya toll plaza.

Indore Indore is located in the western region of Madhya Pradesh and functions as the administrative headquarters of the district. The district is a major metropolitan and commercial hub for the state, with strong linkages to the Indore–Pithampur industrial belt. As per the latest publicly available District Domestic Product (constant prices) estimates, Indore's Gross District Domestic Product (GDDP) was recorded at Rs 4,64,282.6 million in fiscal year 2023 marking a growth of 5.7% CAGR compared to fiscal year 2012.

Indore is widely recognized as the "Commercial Capital of Madhya Pradesh," with a diversified economic base spanning manufacturing, trade, services, and technology. The broader Indore region features significant industrial activity, with the nearby Pithampur belt known for automotive and engineering manufacturing, while the district itself hosts clusters in pharmaceuticals, food processing, packaging, and IT/ITES. Indore has also emerged as a major education and innovation hub, anchored by institutions like IIT Indore and IIM Indore, and is noted for effective urban governance and cleanliness initiatives.

Indore, the most populous city in Madhya Pradesh, is a major trading hub with diversified industrial activity in textiles, food processing (a nationally significant namkeen cluster and dedicated park), pharmaceuticals, packaging, plastics, light engineering, and printing. SEZs and parks—Indore SEZ, Dewas Industrial Area, IT Parks, Diamond Park, and the Pharma Cluster—complement robust warehousing and e-commerce logistics along the Super Corridor and key arterials. A growing IT/ITeS base (analytics, fintech, shared services) supports supply-chain digitization and industrial services.

Dhar: Dhar is located in the western region of Madhya Pradesh. It is strategically positioned in the Malwa region, Dhar forms a key part of the Indore–Pithampur–Dhar industrial corridor and benefits from proximity to Indore's markets, talent, and logistics. The district also hosts prominent heritage assets such as Mandu (Mandav), which underpin its tourism potential. As per the latest publicly available District Domestic Product (constant prices) estimates, Dhar's Gross District Domestic Product (GDDP) was recorded at Rs 195,106.1 million in fiscal year 2023 marking a growth of 7.6% CAGR compared to fiscal year 2012. The growth reflects expansion in manufacturing and services anchored by the Pithampur industrial ecosystem.

Dhar's economy is underpinned by the Pithampur industrial area, which is known for automotive and engineering manufacturing, ancillary components, pharmaceuticals, packaging, and allied industries. The district's broader economic base spans agro processing (soybean, wheat, and cotton value chains), logistics and warehousing along key corridors connecting Indore and Gujarat, and tourism centered on Mandu's historical sites. Dhar's integration with the Indore urban-industrial cluster supports workforce mobility, supply chain depth, and market access, while ongoing industrial park development and infrastructure upgrades continue to strengthen its role within the regional manufacturing belt.

Pithampur, south of Indore, is among central India's largest automobile and engineering hubs, with OEMs and tiered suppliers producing buses (e.g., Volvo), trucks and tractors (e.g., Eicher), passenger vehicles, and a wide range of components. MPIDC-managed estates, SEZ/EPZ assets, and common infrastructure enable export-oriented production, vendor development, and rapid scale-up. Proximity to Indore ensures access to managerial talent, testing/certification, and shared services.

Ujjain Ratlam is located in the western region of Madhya Pradesh. Positioned within the Malwa region, Ratlam benefits from strong rail connectivity via the Western Railway network and road linkages to Indore, Neemuch, and Mandsaur, integrating it with the broader Indore-centered market and supply chains. As per the latest publicly available District Domestic Product (constant prices) estimates, Ratlam's Gross District Domestic Product (GDDP) was recorded at Rs 160,867.9 million in fiscal year 2023 marking a growth of 7.4% CAGR compared to fiscal year 2012.

Ratlam's economic base spans light engineering and fabrication, agro-processing (soybean, wheat), food products, and packaging, supported by a robust trading and logistics ecosystem anchored by its rail junction status. The district has emerging warehousing along key corridors and a diversified MSME presence serving regional demand. Proximity to Indore's industrial ecosystem supports vendor development, workforce mobility, and market access, while ongoing infrastructure

upgrades continue to strengthen Ratlam's role within the western Madhya Pradesh manufacturing and trade belt. Industrial activity is anchored by process industries around Nagda (chemicals and fibers), alongside engineering components, food processing, and packaging. A strong services base—tourism, hospitality, retail, and public administration—supports local demand, stabilizes the workforce, and provides ancillary markets for FMCG and packaging.

Ratlam Ujjain is located in the western region of Madhya Pradesh A historic cultural center of the Madhya Pradesh state, Ujjain anchors significant religious tourism—centered on the Mahakaleshwar Jyotirlinga and periodic Kumbh (Simhastha)—and benefits from strong linkages to Indore for markets, talent, and logistics. As per the latest publicly available District Domestic Product (constant prices) estimates, Ratlam's Gross District Domestic Product (GDDP) was recorded at Rs 222,015.1 million in fiscal year 2023 marking a growth of 5.8% CAGR compared to fiscal year 2012.

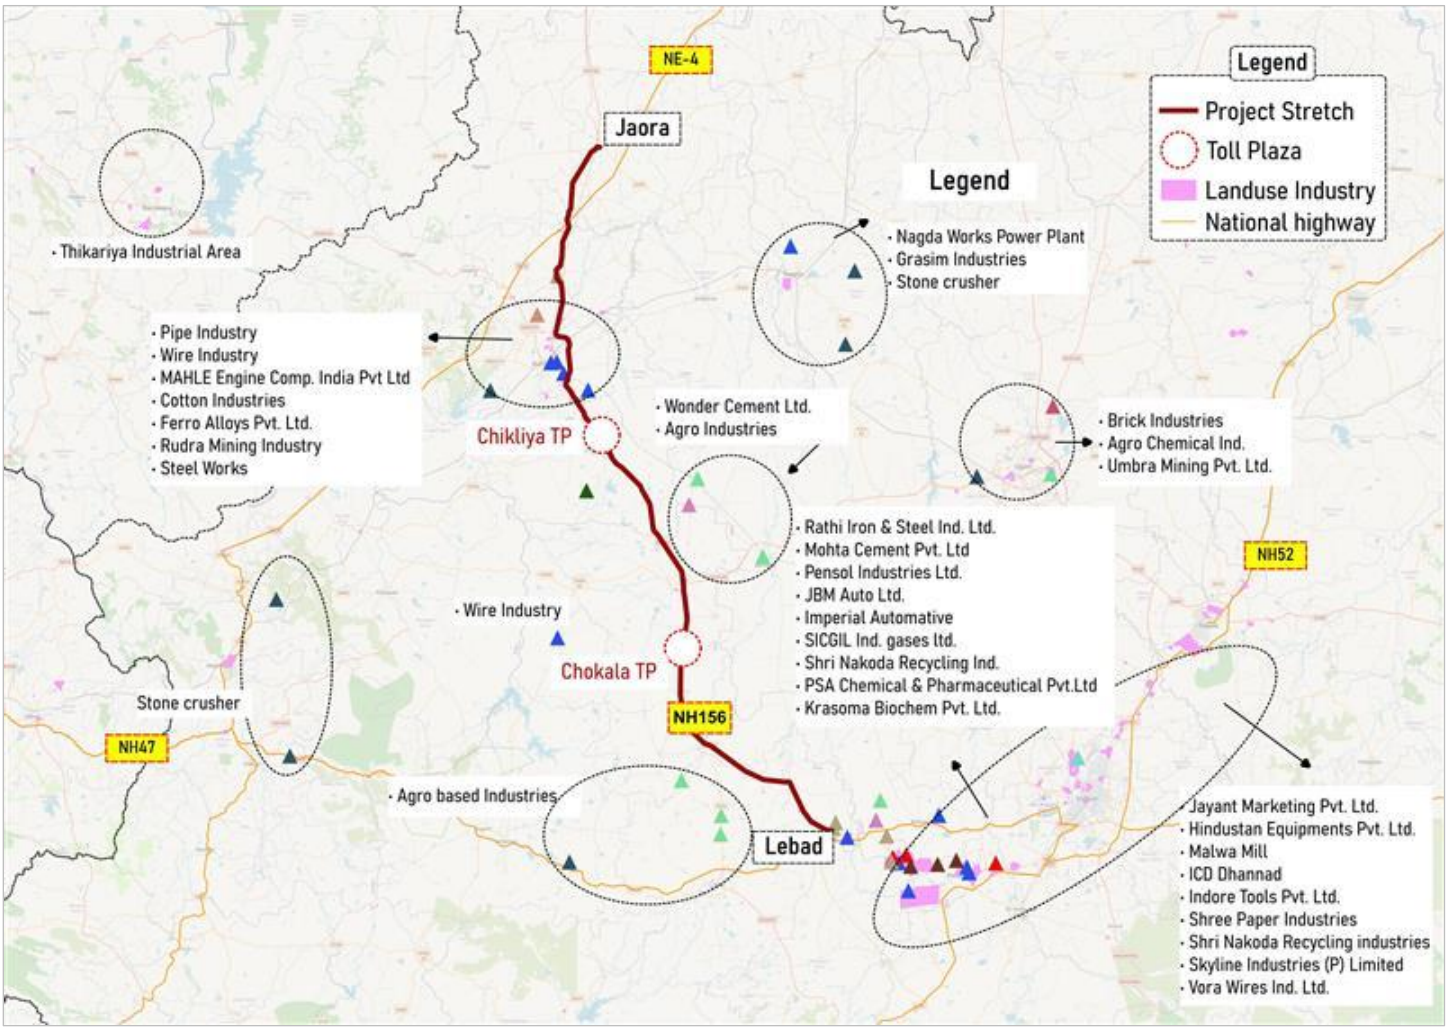
Ujjain's economy features a substantial services component driven by tourism, hospitality, retail, and public administration, alongside industrial activity in and around Nagda (chemical and fiber manufacturing), engineering components, food processing, and packaging. The district's agro-trade (oilseeds, cereals) and warehousing benefit from connectivity along the Indore–Ujjain corridor. Education and skills are supported by various institutions, while civic and transport improvements have enhanced visitor infrastructure and local commerce. Ratlam's rail junction status drives aggregation and distribution of industrial inputs and outputs. The district hosts light engineering, fabrication, food products, and agro-processing, with emerging Grade-B/Grade-A warehousing on corridors linking Indore, Neemuch, and Mandsaur. MSMEs cater to maintenance, tooling, and components for the broader Malwa belt.

Agricultural and tourism linkages Agricultural mandis and small industries at intermediate nodes along SH31—Neemuch, Mandsaur, Ratlam, Jaora, Badnawar—generate steady local commercial traffic via 2-axle and LCV/Minibus segments for loading/unloading and short-haul distribution, feeding agro-processing and packaging value chains in Indore and Ujjain. Tourism is a significant services demand driver: Ujjain, along NH52, is a major pilgrimage center anchored by the Mahakaleshwar Temple, with Omkareshwar and Dewas also attracting pilgrims. South of Indore on NH3, Maheshwar and Mandu (Mandav) are prominent leisure destinations, reinforcing hospitality, retail, and local transport ecosystems—indirectly supporting food processing, packaging, and light manufacturing tied to visitor consumption.

The corridor's competitiveness is supported by:

- Highways connecting the Indore–Pithampur–Dhar belt to Ujjain and Ratlam, and onward to Gujarat/Rajasthan manufacturing and markets.
- Western Railway routes enabling bulk movement (cement, chemicals) and containerized flows for auto components and FMCG.
- Indore airport's belly-cargo capacity for high-value, time-sensitive shipments (pharma, electronics, specialty components).
- Expanding warehousing near Indore's Super Corridor and along Ujjain/Ratlam spines, improving inventory turns and last-mile reliability.

Figure 2-3: Major industries around the project stretch



Source: Open Street Map, Crisil Intelligence

3 Primary data collection & analysis

3.1 General

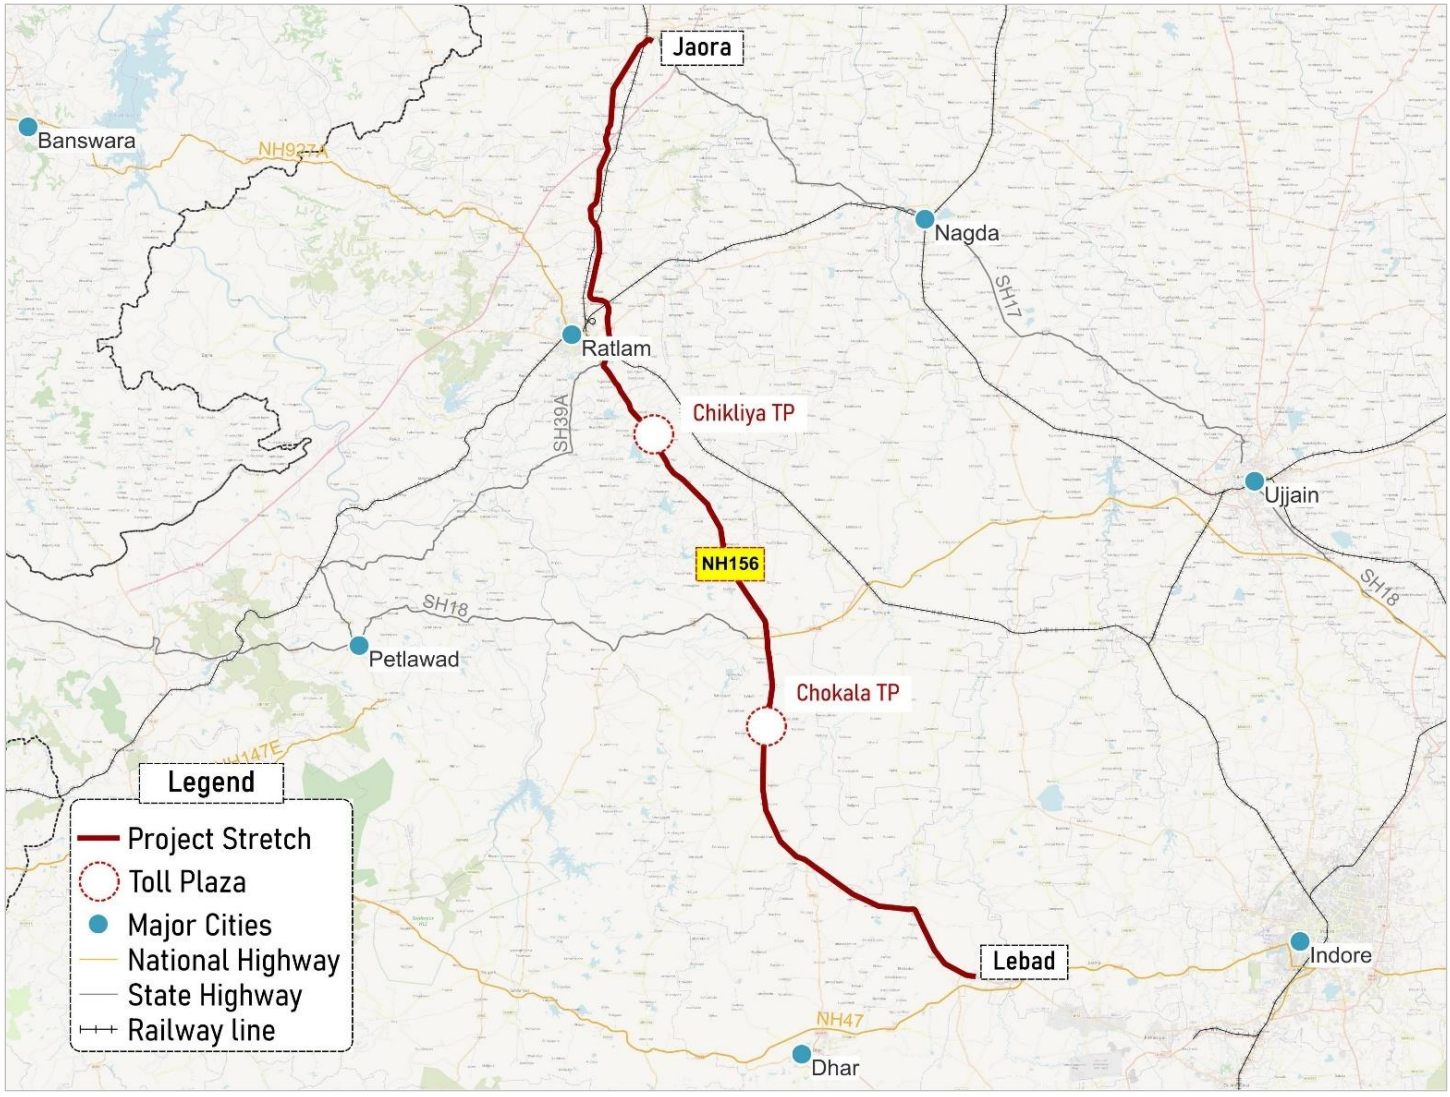
Origin Destination survey was conducted on the project road to understand the traffic and travel pattern of vehicles plying on the project road. For the present study, one day (24-Hours) origin destination survey conducted at the toll plaza locations on the project road. The schedule of the traffic surveys carried out as part of the study on the project road are presented in the below table and figure.

Table 3-1: Type of survey & schedule

Location of Survey	Survey type	Duration	Survey date
Chokala & Chikliya Toll Plaza	Origin-Destination (O-D) Survey	1 Day	22nd September to 23rd September

Source: Crisil Intelligence

Figure 3-1: Survey location (toll plazas)



Source: Open Street Map, Crisil Intelligence

3.2 Origin-Destination (OD) Analysis

Origin-Destination survey was carried out at toll plaza for 1 Day (24-hours), by roadside interview method as described in IRC: 102-1988. A random sampling approach was employed to interview both passenger and freight vehicles traversing the project road at the toll plaza locations. The survey aimed to gather information on various aspects, including origin, destination, frequency of trips, purpose of travel and for freight vehicles, the type of commodity being transported.

The regional distribution of tollable vehicles at all the toll plaza location has been estimated based on OD matrices is presented in below table and figure. The project influencing states will provide an overview of the factors likely to influence the pattern of economic development and hence the flows and volumes of traffic on the project road.

3.2.1 Regional influence

Table 3-2: Regional distribution in % at Chokala TP

States	Cars	Bus	LCV/Minibus	Truck	3 Axle Truck	MAV
Madhya Pradesh	87.6%	79.5%	70.0%	63.9%	57.1%	47.0%
Rajasthan	2.5%	3.3%	8.3%	10.0%	10.7%	14.4%
Maharashtra	6.4%	13.4%	9.5%	12.0%	13.0%	13.2%
Delhi	0.3%	1.5%	2.6%	3.7%	4.3%	7.1%
Haryana	0.3%	0.0%	2.6%	2.7%	3.9%	4.7%
Rest of India	2.9%	2.4%	7.0%	7.8%	11.0%	13.7%
Total	**100.0%**	**100.0%**	**100.0%**	**100.0%**	**100.0%**	**100.0%**

Source: Crisil Intelligence

Table 3-3: Regional distribution in % at Chikliya TP

States	Cars	Bus	LCV/Minibus	Truck	3 Axle Truck	MAV
Madhya Pradesh	88.4%	88.5%	59.0%	48.9%	45.0%	42.7%
Rajasthan	2.9%	1.6%	11.8%	15.1%	17.2%	15.7%
Maharashtra	5.2%	7.4%	12.3%	12.6%	14.2%	15.7%
Delhi	0.8%	0.0%	6.2%	8.1%	9.1%	8.6%
Haryana	0.2%	0.0%	1.8%	2.2%	1.3%	2.6%
Rest of India	2.5%	2.6%	8.8%	13.1%	13.3%	14.8%

Source: Crisil Intelligence

Contribution of Madhya Pradesh declines as vehicle category changes from passenger to commercial vehicles (from cars/buses to LCV/Minibus & trucks, 3 Axle, and MAV). The interstate contributions (notably Rajasthan, Maharashtra, and Delhi) rise—consistent with commercial vehicles undertaking longer-haul, cross-border freight runs. Chikliya TP shows consistently higher non-Madhya Pradesh shares for heavier vehicle classes (LCV/Minibus/Truck, 3 Axle, MAV) than Chokala TP, indicating stronger interstate freight connectivity and commodity movement through Chikliya. Cars and buses

are predominantly Madhya Pradesh-origin at both plazas, with Chikliya even more skewed to intra-Madhya Pradesh passenger flows.

3.2.1.1 Cars

- Car flows are overwhelmingly local/Madhya Pradesh-centric. Dominance of Madhya Pradesh trips at both plazas: 87.6% (Chokala) and 88.4% (Chikliya), indicates primarily intra-state, regional passenger movement.
- Secondary contributors are small: Rajasthan 6.4% (Chokala) vs 5.2% (Chikliya); Maharashtra 2.5% (Chokala) vs 2.9% (Chikliya); all other states collectively under ~4% at each plaza.

3.2.1.2 Buses

- The distribution indicates a strong Madhya Pradesh skew among all categories in case of buses: 79.5% (Chokala) and 88.5% (Chikliya). Rajasthan contributes 13.4% at Chokala vs 7.4% at Chikliya; other states are marginal. Chikliya sees more intra-Madhya Pradesh bus movement than Chokala.

3.2.1.3 LCV/Minibus & Trucks

- Madhya Pradesh remains a majority but with notable intrastate presence: 66.3% (Chokala) vs 52.4% (Chikliya).
- At Chikliya, Maharashtra (14.0%) and Rajasthan (12.5%) shares are materially higher than at Chokala (9.3% and 11.0% respectively); Delhi is also higher at Chikliya (7.4% vs 3.2%). This can be attributed to proximity of Chikliya to Rajasthan and the North. Chikliya experiences more interstate light commercial freight, pointing to stronger through-corridor movements.

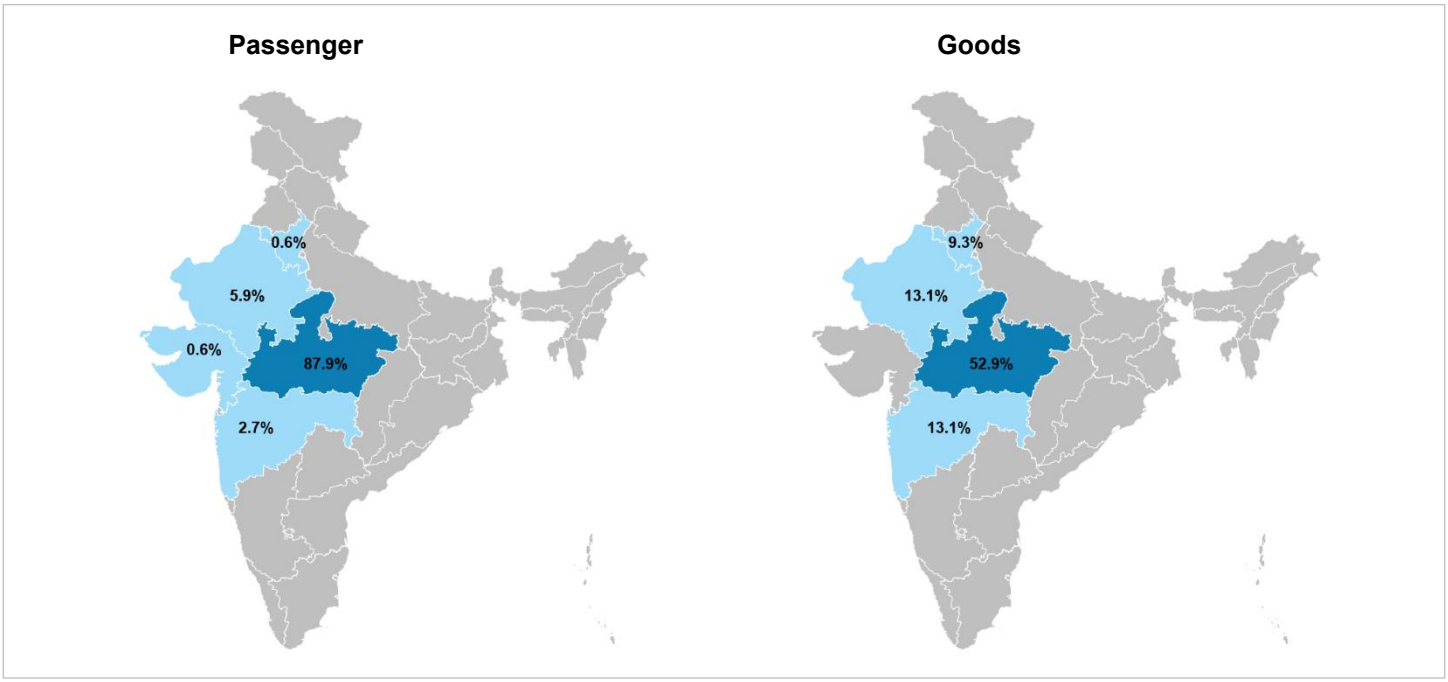
3.2.1.4 3 Axle Truck

- Madhya Pradesh share drops further: 57.1% (Chokala) vs 45.0% (Chikliya). Non-Madhya Pradesh shares rise sharply at Chikliya: Maharashtra 17.2%, Rajasthan 14.2%, Delhi 9.1% (vs 10.7%, 13.0%, 4.3% at Chokala).
- Heavy 3 Axle Trucks is substantially more interstate at Chikliya, suggesting the plaza is a key node for longer-haul industrial shipments.

3.2.1.5 MAV (Multi-Axle Vehicles)

- MAV is the most diversified category: Madhya Pradesh accounts 47.0% (Chokala) vs 42.7% (Chikliya). Rajasthan and Maharashtra are strong co-contributors at Chikliya (both 15.7%), higher than at Chokala (13.2% and 14.4%). Delhi is also higher at Chokala (8.6% vs 7.1%). MAV flows at Chikliya reflect robust interstate heavy-haul corridors.

Figure 3-2: State influence: Passenger & Goods (consolidated - TP1 & TP2)



Zone	% Influence
Passenger	
Madhya Pradesh	87.9%
Rajasthan	5.9%
Maharashtra	2.7%
Gujarat	0.6%
Delhi	0.6%
Rest of India	2.7%
Total	**100.0%**

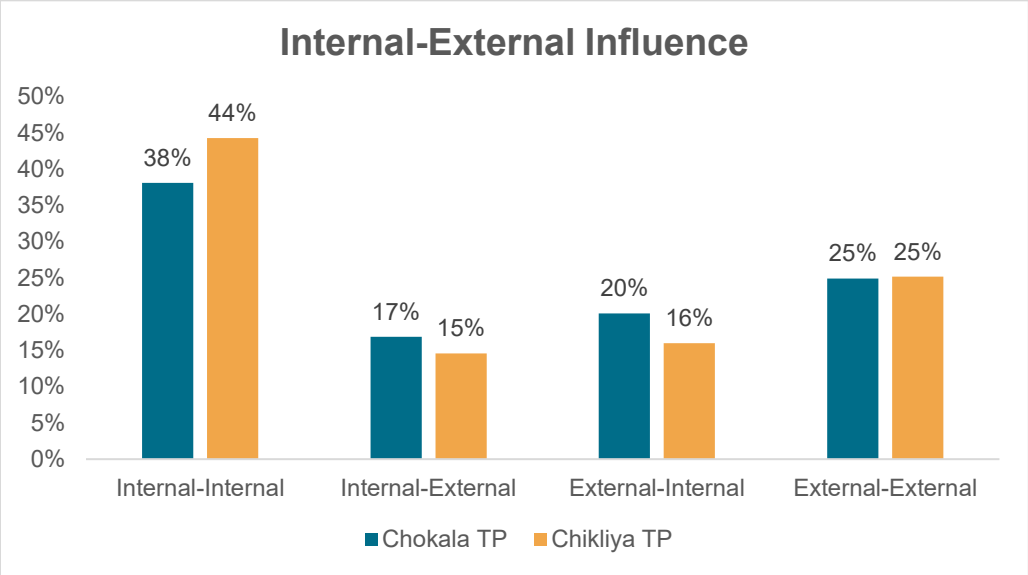
Zone	% Influence
Goods	
Madhya Pradesh	52.9%
Maharashtra	13.1%
Rajasthan	13.1%
Delhi	6.4%
Haryana	2.9%
Rest of India	11.6%
Total	**100.0%**

Source: Crisil Intelligence

3.2.2 Internal-External Analysis

The zones which fall along the project road and very near project road are considered as internal zones and other zones are considered as external zones. If both end of the trips are internal, those trips are internal-internal trips. If one end of the trips is internal and other is external those trips are internal to external and external to internal trips. If both ends of the trips are external, those are external-external trips. Internal-External analysis is presented in the below figure, its shows about 38% trips move within the project road for Chokala TP and 44% trips move with project road for Chikliya TP and about 25% of trips are external to external trips at both the Plazas.

Figure 3-3: Internal-External Influence



3.2.3 Commodity Analysis

Analysis was carried out to understand the various freight vehicles being used to transport different commodities. Table below presents the commodity distribution for the toll plazas in project road.

Table 3-4: Commodity distribution (in %) on the project road – Chokala TP

Commodity	LCV/Minibus	Truck	3 Axle Truck	MAV	Total
Agri Produce	38.1%	36.7%	30.8%	28.4%	33.2%
Courier & parcel	17.4%	15.8%	15.8%	18.0%	16.9%
Machinery	4.7%	3.3%	4.2%	7.5%	5.1%
Iron & Steel Products	5.3%	5.3%	7.0%	6.5%	6.0%
Automobiles	3.0%	2.5%	4.5%	6.2%	4.2%
Tiles & Ceramic products	1.9%	2.9%	4.2%	5.2%	3.7%
Consumer Products	4.9%	7.0%	8.1%	4.4%	5.9%
Empty	8.3%	4.2%	2.8%	4.2%	4.8%
Construction materials	2.6%	4.0%	3.7%	3.9%	3.7%
Others	3.9%	5.1%	3.9%	3.0%	3.9%
Consumer Foods	2.8%	2.6%	2.4%	2.5%	2.6%
Plastic products	0.8%	2.5%	2.5%	2.2%	2.1%
Textile & Footwear	1.4%	1.2%	2.2%	1.9%	1.7%

Total	100.0%	100.0%	100.0%	100.0%	100.0%

Source: Crisil Intelligence

- The analysis of freight movement across the toll plaza reveals that the major commodities being transported include agri produce, courier parcel, consumer products, construction material and Iron and steel products are top commodities plying on the project section.
- For Chokala about 15.8 percent of two axle trucks, around 15.8 percent of three axle trucks and around 18.0 percent of MAV (4-6) trucks at the toll plaza location are found to carry couriers and parcels. In case of Chikliya about 20.0

percent of two axle trucks, around 26.4 percent of three axle trucks and around 19.2 percent of MAV (4-6) trucks at the toll plaza location are found to carry couriers and parcels. The high proportion of use of 3 Axle trucks and MAV suggests that larger shipments are common, likely due to the e-commerce boom and increased demand for parcel delivery services within proximity to Indore region

- Significant portion of vehicles, about 33.2% at Chokala and 22.5% at Chikliya are engaged in the transportation of Agri produce. Especially fruits and vegetables across the vehicle categories. The high percentage of agri produce highlights the region's agricultural output and the reliance on road transport for distribution to markets.
- Consumer products account for 5.9% of the total at Chokala, with 3 Axle trucks having higher share across categories. Chikliya, the percentage remains at 6.6%. This indicates a steady flow of consumer goods, likely reflecting the needs of local markets and retail outlets in the vicinity.
- The higher proportion of construction material, and iron & steel is on account of the ongoing infrastructure projects, industrial activity in the region, indicating economic growth and development.

3.2.3.1 Courier & parcel

Courier & Parcel is among the largest commodity plying on the project road, accounting for 17.4% in LCV/Minibus, 15.8% in 2A, 15.8% in 3A and 18.0% in MAV at Chokala. At Chikliya, the commodity accounts for 17.2% in LCV/Minibus, 20.0% in 2A, 26.4% in 3A and 19.2% in MAV. Courier/Parcel traffic on the project section forms a significant proportion of the commercial traffic and is majorly for the purpose of consumption in domestic market in the urban and semi urban regions of Delhi, Mumbai, Indore, Rajasthan and regions of the catchment for the project stretch. Traffic on the project stretch originates and is destined for majorly Delhi, Indore/Pithampur/Dhar, Mumbai/Maharashtra, and the northern part of the country. The destinations for the Courier/Parcel traffic indicates the key ecommerce and warehousing clusters across India including Delhi, Indore and Mumbai

India has been becoming a significant domestic shipment market, with significant companies entering and expanding networks in the market. The industry was flush with early-stage and venture capital funding that led to growing e-commerce penetration in different retail product segments. Apart from primary growth, drivers such as increasing internet penetration, higher disposable incomes, and rising urbanization, factors such as user-friendly interface of portals offered by players, ease of shopping, increasing awareness, relatively higher pricing discounts (in comparison with brick-and-mortar stores), and easy delivery and innovation, have propelled growth. Pandemics have brought about a shift in buying behaviour with more and more people taking the online route.

High domestic consumption of e-commerce goods is expected to lead to export growth. Going forward it is expected that the demand will remain high along with the pick-up in domestic consumption.

3.2.3.2 Agri produce

Agri accounts for 33.2% and 22.5% at Chokala and Chikliya TP, respectively. The underlying commodity noticed is largely fruits and vegetables traversing between the districts of Madhya Pradesh i.e. Indore, Dhar, and Ratlam. Mumbai, Pune and Delhi are also major origination/destination points for this commodity. Madhya Pradesh's major crops include rice, soyabean, wheat, major fruits includes banana, mango and guava, and in terms of vegetables potato, tomato, brinjal are key ones. In the country, Madhya Pradesh ranks as the 3rd largest producer of fruits and vegetables, 2nd largest producer of wheat and maize, 3rd rank for milk producer and 2nd largest producer of oilseeds

Madhya Pradesh is central to India's farm output, drawing strength from its rich soils and varied climate that suit a broad spectrum of crops. The state cultivates wheat, rice, pulses, oilseeds, cotton, and sugarcane, among others. Its climate has especially favored soybean, making Madhya Pradesh one of the country's leading producers. Expanded irrigation, modern agronomic practices, and policy support for crop diversification have raised yields and improved production resilience. These

initiatives are boosting overall agricultural performance while providing farmers with greater income stability, reinforcing both food security and economic sustainability across the region.

3.2.3.3 Construction materials and iron & steel

Construction Materials and Iron & Steel cumulatively accounts for 9.6% and 11.8% at Chokala and Chikliya TP, respectively. Construction Materials and Iron & Steel represent a significant commodity transported throughout the area. The primary sub-commodity within construction materials is cement, stone and iron rods. It is to be noted that there are several cement manufacturing units in the catchment of the project stretch which contribute to the traffic carrying limestone, clinker, and finished cement. These include Ultratech plant in Neemuch & Dhar, Wonder cement plant in Badnawar, JK cement in Nimbahera. The demand for this commodity is expected to continue increasing, driven by the growing needs of the infrastructure, housing, and other related sectors. Few of the major infrastructure projects underway in the region of Indore, Ratlam, Dhar and Ujjain are given below.

Table 3-6: Key upcoming infrastructure projects in the catchment region of Indore, Ratlam, Dhar and Ujjain

Project name	Promoter	Industry	Cost (Rs Bn)	Expected Completion
Light Metro Rail (Indore) Project	Madhya Pradesh Metro Rail Co. Ltd.	Railways	222.8	2028

3.2.3.4 Consumer foods and products

The fast-moving consumer goods (FMCG) industry or consumer packaged goods (CPG) industry is mainly responsible for producing, distributing, and marketing fast-moving consumer goods. Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years because of rising disposable income, rising youth population, and rising brand awareness among consumers.

The project stretch catchment—covering Indore city and adjoining districts like Ratlam, Ujjain, Dhar, and the Pithampur belt appears to have value-conscious consumer base with a growing middle-income and young workforce; urban Indore is shifting toward premiumization in health, convenience, and branded staples, while semi-urban and rural pockets remain price-sensitive. The consumer base is driving demand for consumer foods and products aiding growth of this commodity on the project stretch

In the catchment area, wheat-based staples and pulses dominate meals, and a vibrant local food culture (poha, sev/namkeen, chaats) sustains strong demand for snacks, spices, dairy, and bakery, complemented by an active eating-out scene that boosts ready-to-cook/eat and condiments at home. Categories gaining traction include packaged staples, savory snacks, biscuits, noodles/pasta, beverages (soft drinks, juices, lassi, packaged water), seasonal ice cream, and home care essentials, with frozen foods and gourmet condiments growing off a small base. Health-oriented choices—millets, high-fiber foods, low-oil snacks, sugar-free options, probiotic dairy, and nutrition drinks—are increasingly visible, especially among urban buyers. Kiranas are dominating with neighborhood loyalty, while modern trade, cash-and-carry, D2C, and quick commerce expand in the region; rural demand relies on haats and traditional distributors. Consumption peaks around festivals and weddings, with summer lifting hydration and ice cream products.

3.2.4 Trip length distribution

Trip Length Distribution analysis gives distance-based patterns for project road traffic. Trip length is categorized into nine trip length groups. Trip length distribution table for different vehicle types is presented below.

Table 3-7: Trip length distribution – Chokala TP

Trip Length Group (Kms)	Cars	Bus	LCV/Minibus	2 Axle Truck	3 Axle Truck	MAV
Chokala TP						
0 to 20	5.3%	2.5%	1.9%	1.8%	1.5%	1.2%
21 to 40	5.3%	2.1%	7.4%	2.7%	2.6%	1.6%
41 to 100	30.1%	26.9%	19.2%	16.7%	14.0%	9.3%
101 to 200	28.9%	31.6%	18.6%	15.8%	14.9%	11.4%
201 to 350	13.1%	17.4%	11.7%	13.3%	11.1%	9.3%
351 to 500	6.6%	6.9%	7.5%	9.3%	9.4%	7.9%
501 to 750	5.6%	4.3%	14.5%	16.8%	14.2%	16.0%
751 to 1000	2.5%	6.2%	6.7%	7.7%	9.8%	12.1%

Trip Length Group (Kms)	Cars	Bus	LCV/Minibus	2 Axle Truck	3 Axle Truck	MAV
Beyond 1000 Km	2.8%	2.2%	12.5%	15.9%	22.4%	31.2%

Source: Crisil Intelligence

Table 3-8: Trip length distribution – Chikliya TP

Trip Length Group (Kms)	Cars	Bus	LCV/Minibus	2 Axle Truck	3 Axle Truck	MAV
Chikliya TP						
0 to 20	5.1%	4.0%	2.3%	0.8%	0.6%	1.3%
21 to 40	18.6%	20.0%	10.9%	6.0%	4.9%	5.3%
41 to 100	22.6%	20.8%	7.4%	7.8%	8.7%	6.5%
101 to 200	27.7%	28.3%	18.2%	14.3%	13.3%	11.2%

Source: Crisil Intelligence

Majority of the car trips are in the range of 41-200km. More than 30% trips of MAV for both toll plazas are in the range of beyond 1000km.

4 Review of historic traffic & revenue

4.1 General

This section summarizes the historical performance of the project section in order to understand baseline traffic patterns comprising of historical tollable traffic and revenue growth, traffic and revenue composition, trip distribution, trip factors, seasonality and trend of traffic over the available data set.

The historical tollable traffic data mode wise was made available by client for the toll plaza on the project road as per following:

Table 4-1: Historical traffic data availability

Notation	Toll plaza	Details
TP01	Chokala TP	FY11 to FY25, and H1FY26
TP02	Chikliya TP	FY12 to FY25, and H1FY26

Source: Client, Crisil Intelligence

Historic traffic has seen some changes in trend due to some events which has occurred during this period. Over the years project road traffic is impacted by construction on the asset due to poor road condition during 2019. Some of the road upgradation on NH-3, which are NH3 four lane completion Biora-Dewas April 2019; Guna-Biora – March 2019 has negatively impacted project road traffic. During Covid during FY 20 FY 22 negative traffic has been observed. Recently traffic was impacted by partial operations of the Delhi-Mumbai Expressway.

Traffic at Chokla TP has seen shown moderate traffic CAGR growth of 1.8% in PCU terms from FY 2015 to FY 2025. Mode wise historical traffic and composition is presented in the below figures and tables.

Figure 4-1: Historical mode wise traffic (AADT) and growth at Chokala TP

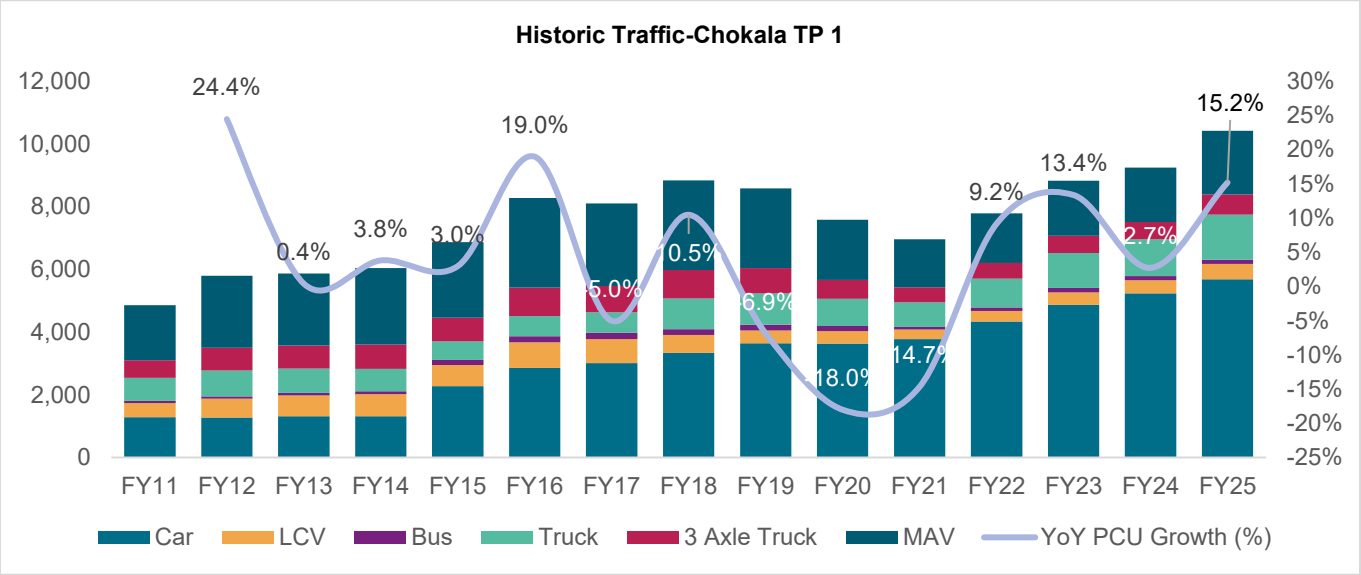

Table 4-2: Historical mode wise traffic (AADT) and growth at Chokala TP

5 Base traffic estimation

5.1 Seasonality factors

Traffic volumes on roads varies throughout the year, influenced by socio-economic activities in the surrounding regions. To accurately estimate the Annual Average Daily Traffic (AADT) for the road, it is crucial to account for these seasonal variations. To achieve this, a seasonal correction factor is applied, which is derived from secondary data sources such as historical traffic data, fuel sales and similar indicators.

The traffic on the project stretch has witnessed volatility on account of recent network developments such as partial operational DME, post pandemic recovery and diversion of traffic from nearby highways on account of construction activity (impacted Q2 FY 26 traffic on project on account of construction of flyover between Indore-Deewas section). In order to understand the normalised trend in traffic, SCF has been considered across FY 19, FY 20, FY 24 and FY 25. The average Seasonal correction Factors (SCF) across these years has been presented in the tables below.

Table 5-1: Seasonal correction factors for FY 19, FY 20, FY 24 and FY 25

Month	Car	LCV/Minibus	Bus	Truck	MAV

5.2 Base traffic estimation

For base traffic (annual average daily traffic) estimation in the present study Q1 FY 26 (Apr-25 to Jun-25) of TMS traffic data were annualized using SCF factor of FY25, FY24, FY20 and FY19 traffic data to arrive at the annual average daily traffic (AADT) for FY 26.

For base traffic estimation only Q1 FY 26 traffic is considered, since Q2 FY 26 traffic on project road is impacted on account of construction activities (flyover) between Indore-Deewas section of NH-52.

The AADT estimation for the base case for FY26 is presented tables below

Table 5-2: Base traffic estimation FY26 AADT for Chokala TP

Particulars	FY year	Car	LCV/Minibus	Bus	Truck	3 Axle Truck	MAV	Total	PCU
ADT (Apr-June)	FY 26	6,362	571	143	1,634	738	2,335	11,783	25,271

6 Network developments in the Region

6.1 Overview

Overview of impact due to network developments

In the case of the project road, the major impact on the traffic is expected to be from the development of Delhi-Mumbai expressway (DME) and the DME spur connecting the to the expressway at Garoth (starting from Ujjain with a length of 130 km). The DME intersects with the project stretch near Nayapura (Towards Jaora).

These two developments are like to have two-pronged impact on the project stretch's traffic in terms of long distance traffic and short distance traffic.

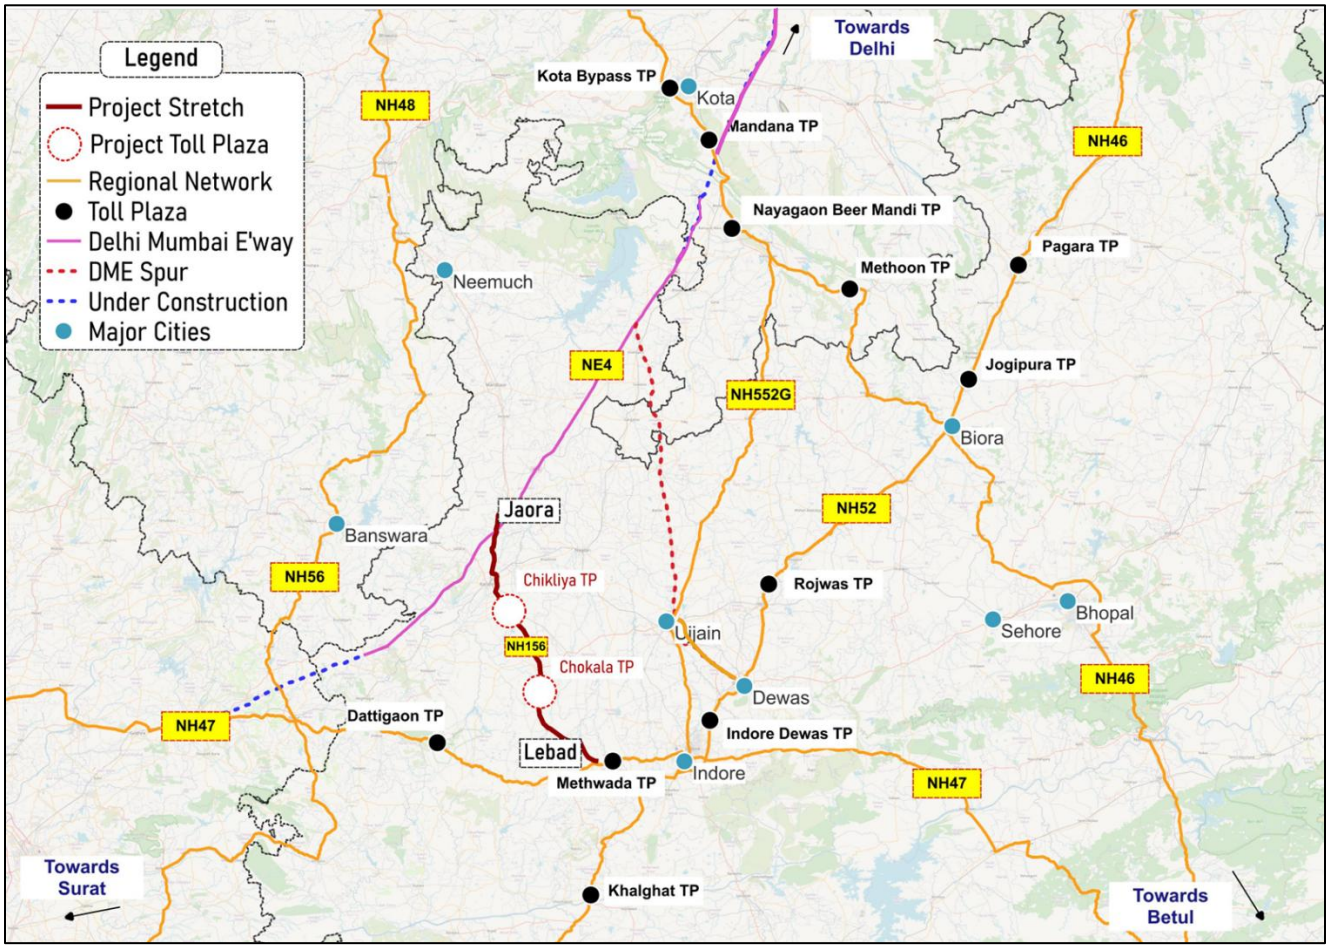
6.1.1 Delhi-Mumbai Expressway (intersecting project stretch near Jaora)

- The Delhi–Mumbai Expressway is India's longest planned greenfield corridor, running about 1,350 km through Delhi, Haryana, Rajasthan, Madhya Pradesh, Gujarat, and Maharashtra. Developed by NHAI under Bharatmala Pariyojana, it is an 8-lane access-controlled highway, upgradable to 12 lanes, designed for 120 km/h speeds. With an investment of over Rs 1 lakh crore, it shortens the Delhi–Mumbai route by roughly 150 km and cuts travel time from around 24 hours to 12–13 hours, strengthening logistics links to key cities including Jaipur, Kota, Udaipur, Ahmedabad, and Vadodara.
- By late 2025, about 82% of the network (around 1,156 km of ~1,386 km) is complete or operational, with 774 km already open—covering Sohna–Dausa, the Bandikui–Jaipur spur (July 2025), and sections of Delhi–Vadodara. The Delhi–Vadodara stretch is nearing full completion by December 2025, while Vadodara–Mumbai and other spurs target early 2026; remaining bottlenecks include the Ankleshwar–Kim section (circa 90% done) and a 4.9 km tunnel near Kota.

6.1.2 Ujjain Garoth Spur (connecting Indore catchment region traffic to the DME)

- The Ujjain–Garoth Spur is a 130 km, four-lane NHAI project linking Ujjain to the Delhi–Mumbai Expressway, aimed at high-speed travel (100+ km/h) and faster market access. With an estimated cost of Rs 2,660 crore, the corridor is nearly complete as of late 2025. Initiated in November 2022, the project was split among GHV, Ravi Infra, and MKC Infra. The road traverses 89 villages across Ujjain, Ghattiya, Mahidpur, Barod, Dag, Gangdhar, Suwasara, Shamgarh, and Garoth, and is already easing travel, cutting the Ujjain–Garoth trip to roughly 1–1.5 hours and reducing time and fuel on routes toward Delhi, Mumbai, and Vadodara.

Figure 6-1: Network Development around project road

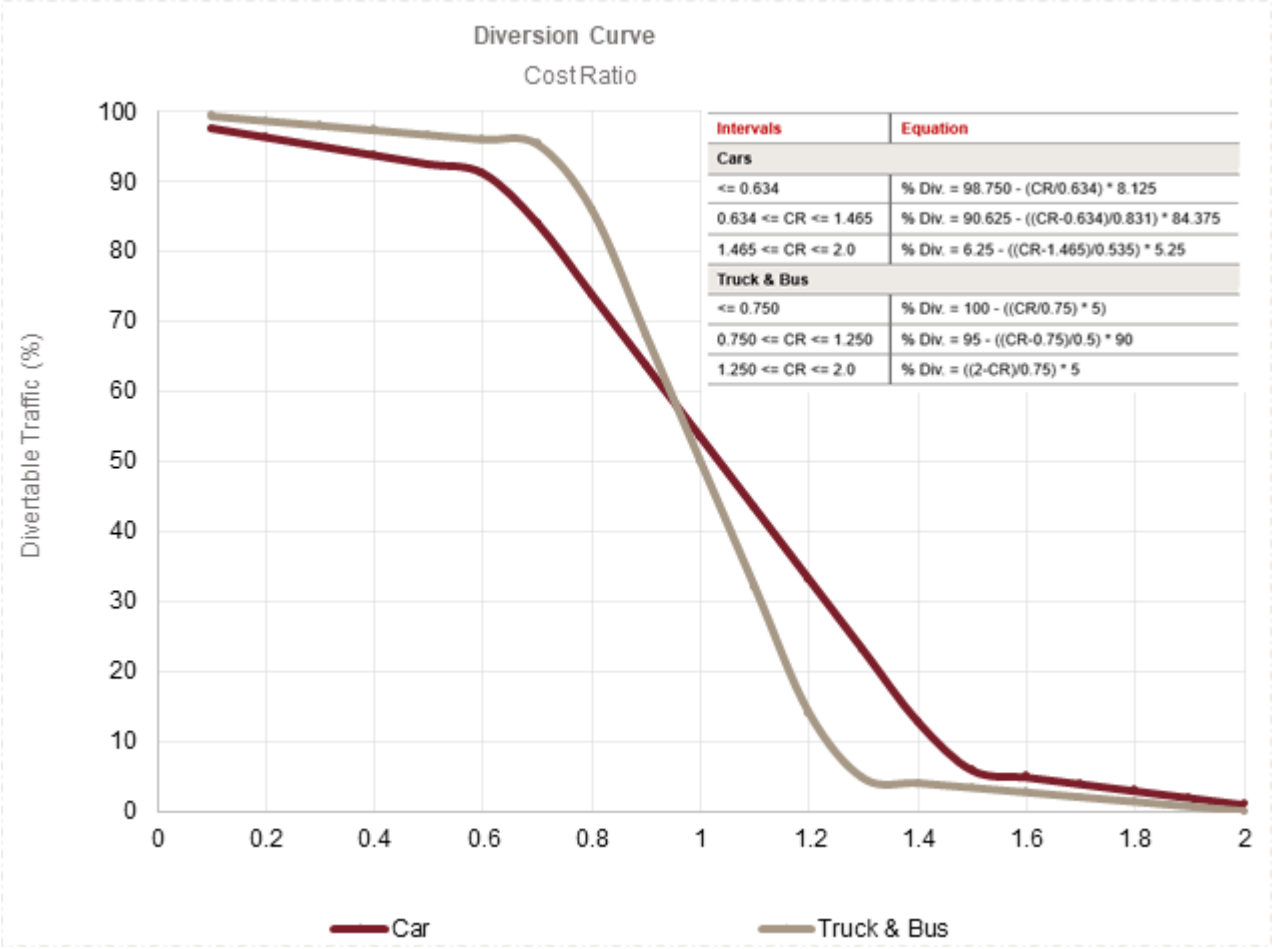


Source: Open Street Map, Crisil Intelligence

6.2 Approach and methodology for diversion analysis

The assessment of traffic diversion if any away from the project road has been done using cost ratio analysis. The road user cost is estimated based on the vehicle operating cost (VOC) and Value of time (VOT) as mentioned in IRC: SP30-2019. The generalized cost ({VOC} + t{VOT} + {toll rates}) for the project road and the alternate or proposed route is then compared to obtain a cost ratio. Cost ratio is applied on the diversion curve equations (Binary logit model) to estimate the expected percentage of traffic diverting, based on users perceived costs on the existing and alternate or proposed facility. The diversion percentages are then applied on the in-scope traffic derived from the OD analysis to estimate the traffic that would shift to/from the project road. Diversion curve (equation) mentioned in IRC:108-2015 and is presented below.

Figure 6-2: Diversion curve as per IRC:108-2015



Source: Crisil Intelligence

6.3 Impact of Delhi Mumbai Expressway

The completion of the Delhi-Mumbai expressway and its spur on the will have negative impact on project road traffic. Status of the Delhi Mumbai-Expressway is given in annexures

The details of the development in term of impacted traffic, phasing of impact and possible impact to project road traffic is presented in below table.

Table 6-1: Details of network development and possible impact

Sr. no	Network development	Traffic impacted	Impact Type	Phasing	Possible impact
1	Delhi Mumbai Expressway long distance Traffic	Mumbai/Pune/South and beyond to Delhi/Jaipur/Haryana/UP and beyond	Negative	33% in FY27, 66% in FY 28 and 100% from FY29	The long-distance traffic on the project stretch which is originating/destined for Delhi & North and Mumbai/Pune/Bangalore & South is considered as potential divertible traffic
2	Delhi Mumbai Expressway short	Indore/Dhule & South till Nashik and surroundings to Rajasthan/Delhi	Negative	20% in FY27 and 100% from FY30- Considering the construction of the Western Indore	The traffic present on the project stretch which is originating and destined for the catchment area around Indore/Pithampur, Dhule, and Nashik have an alternative in the form of the

Sr. no	Network development	Traffic impacted	Impact Type	Phasing	Possible impact
	distance Traffic			Bypass in the future the diversion percentage is different from FY 29 onwards	Ujjain-Garoth spur to connect to DME and travel to Rajasthan (Jaipur catchment) and Delhi/North India. Thus, this short distance traffic is considered as potential divertible traffic.

Source: Crisil Intelligence

6.3.1 Potential traffic (OD survey)

The Q2 of FY 26 traffic on the project stretch has witnessed volatility on account of recent construction activities (Flyover) between Indore-Deewas section of NH-52 which has resulted in the positive traffic on the project road. The OD survey conducted by consultant on September (Q2 - FY 26), which had potential traffic for DME impacts which has the additional traffic due to construction activity on Indore bypass, considering this stickiness factor (referred to nearby stretch plaza traffic data and OD data) has considered on the potential traffic.

7 Traffic growth estimation & traffic forecast

7.1 Traffic projections – Outline

Traffic projections for the asset are done through Crisil's proprietary commodity-based approach (bottom-up). This section provides an overview and detailing the approach.

7.2 Traffic projections – Commodity based approach

Crisil, based on its coverage of 80+ sectors and the MSME industry, has developed a knowledge base to understand the growth of industries and demand across various regions and clusters. The growth expectations for various industries are applied to each vehicle category based on the commodity composition of the vehicle category. For example, the share of light commercial vehicles (LCV/Minibuss) carrying agricultural commodities is expected to grow as per agricultural output growth; the share of LCV/Minibuss carrying consumer products is expected to grow as per the volume growth of durables; and the share of Multi axle vehicles (MAVs) carrying steel commodities is expected to grow as per demand/supply volume of steel products based on regional dynamics. This approach helps Crisil provide a more accurate growth rate of commercial traffic in the region.

For passenger traffic, Crisil assesses the sale of passenger cars in the region, growth of vehicular population, purpose and frequency of passenger travel, population growth, expansion of the city, and infrastructure development in the catchment area.

Further, Crisil also examines the various factors that will impact traffic over the concession period, such as upcoming alternative road routes, truck aggregation by logistics players, dedicated freight corridors and other transportation options. Thus, the analysis considers the impact of central and state policies, growth in production and consumption centres along the stretch, and infrastructure in the adjoining regions. The report covers both growth drivers and restraints for the traffic along the stretch. Crisil has enumerated and detailed the parameters that will positively/negatively impact the traffic on the stretch in the future.

Crisil has used its proprietary traffic projection methodology to project traffic using regional industry growth assumptions, macroeconomic developments, infra development and consumption centre growth factors of the catchment area and adjacent regions.

Figure 7-1: Commodity based approach: Illustrative example for Commercial vehicles

Commodity	MAV (Vehicles) Year 1	YoY growth	MAV (Vehicles) Year 2
Construction materials	300	9%	327
Consumer products	100	4%	104

Iron & Steel products	50	9%	55
Chemical products	200	5%	210
Total vehicles	XX		YY

Commodity	LCV (Vehicles) Year 1	YoY growth	LCV (Vehicles) Year 2
Construction materials	100	9%	109
Consumer products	200	4%	208
Agri Produce	50	3%	52
Iron & Steel products	300	9%	327
Chemical products	200	5%	210
Total vehicles	XX		YY

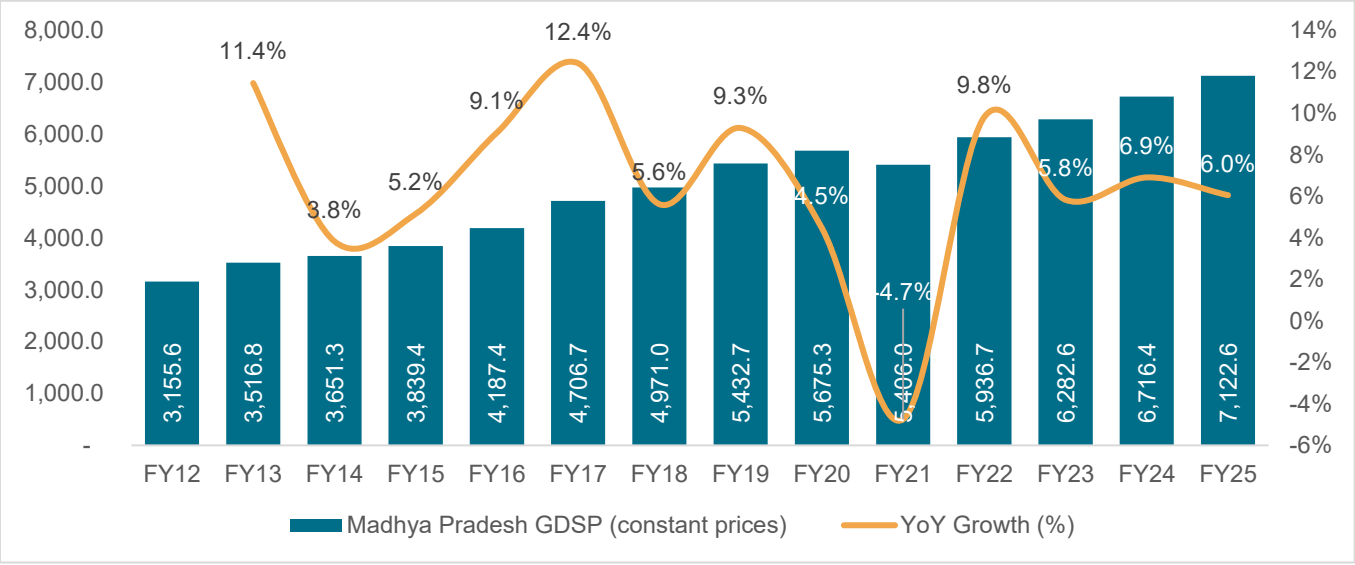
Growth rates for commodities are based on commodity specific demand/supply drivers and regional dynamics

7.2.1 Madhya Pradesh state profile

Madhya Pradesh centrally located and often called the “Heart of India,” combines rich cultural heritage with diverse geography spanning the Vindhya–Satpura ranges and the Narmada–Chambal river basins. As one of India’s largest states by area and population, it contributes meaningfully to national GDP through a balanced mix of agriculture, industry, and services. The state’s industrial profile is anchored by auto and engineering (Indore–Pithampur, Mandideep, Dewas), textiles and garments, pharmaceuticals and chemicals, cement and building materials (supported by extensive limestone reserves), and mining (coal in Singrauli, bauxite, copper, and diamonds in Panna). Services are expanding across IT/ITES, tourism, healthcare, education, and logistics, with Indore as the commercial engine and Bhopal as the administrative and manufacturing hub; Gwalior, Jabalpur, and Rewa serve as important regional nodes. A strong agricultural base—wheat, soybean (a national leader), pulses, rice, and oilseeds—underpins food processing and agro-based industries, while horticulture (citrus, garlic, onion) is rising. Infrastructure momentum—from national corridors like the Delhi–Mumbai Expressway traversing the state to spurs such as Ujjain–Garoth, as well as improving rail links and multiple airports (Indore, Bhopal, Jabalpur, Gwalior, Khajuraho)—is tightening connectivity to northern, western, and central markets. Tourism spans UNESCO sites (Khajuraho, Sanchi), spiritual centers (Ujjain, Omkareshwar), and flagship wildlife reserves (Kanha, Bandhavgarh, Pench), drawing visitors year-round and supporting allied services.

Madhya Pradesh, with a GSDP of Rs 7,122.6 billion in 2024-25, has consistently demonstrated robust economic growth, achieving a compounded annual growth rate (CAGR) of 6.5% from 2011-12 to 2024-25. After experiencing a 4.7% decline in FY21 due to the COVID-19 pandemic, the state’s economy rebounded with a 9.8% growth in FY22, underscoring its resilience. The tertiary sector dominates Madhya Pradesh’s economy, contributing 40.0% to the GSDP in 2024-25, followed by the primary sector at 35.6%, and secondary sector at 24.6%.

Figure 7-2: Madhya Pradesh GSDP (Rs Billion)



Note: FY23 are provisional estimates, FY24 are quick estimates and FY25 are advance estimates as reported by Directorate of Economics & Statistics, Madhya Pradesh

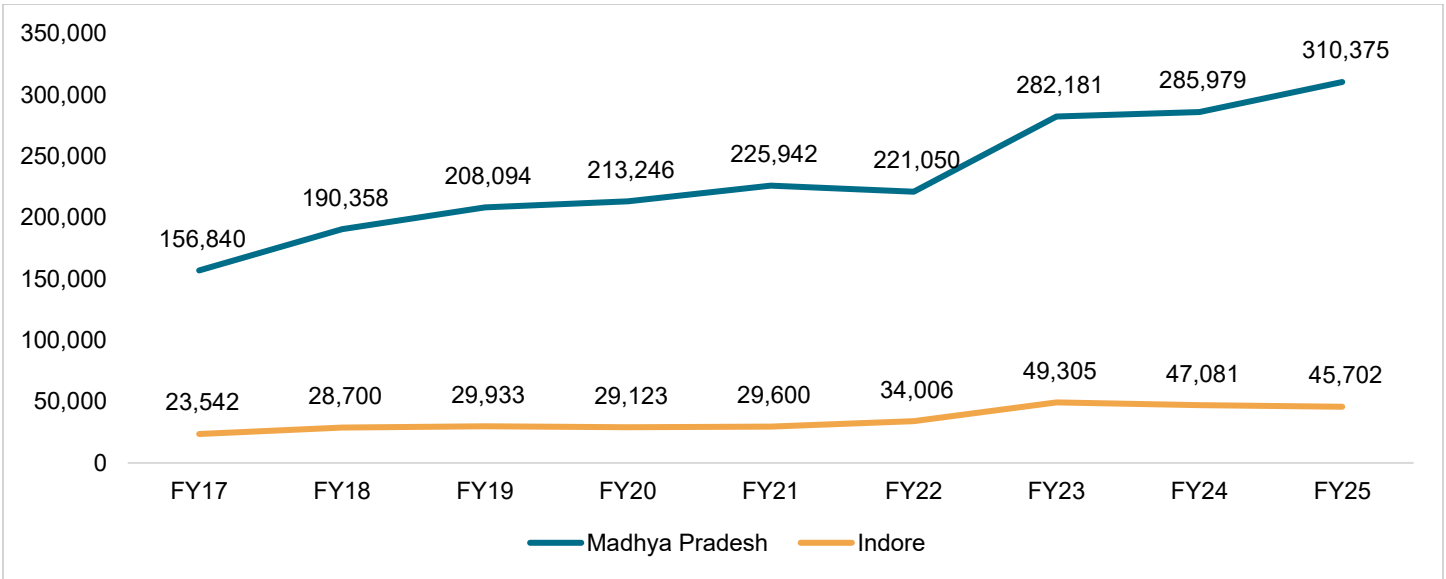
7.2.2 Review of car growth

The rate of car ownership in India has increased from 6.6 per 1,000 people in 2001 to 25 per 1,000 people in 2019. Despite India's car fleet growing at an annual rate of 10% for nearly 25 years, the rate of car ownership remains low compared to countries with similar economic status and significantly lower than developed countries, which have a rate of around 450 per 1,000 people. This low rate of car ownership indicates potential for continued growth in the coming years. With the ongoing increase in car ownership and improvements in the road network, the use of cars for inter-urban travel is showing a growing trend.

Madhya Pradesh and Indore's LMV registration has grown at a CAGR of 8.9% and 8.6% respectively for the period FY17-25.

Figure 7-4: LMV registration count in Madhya Pradesh and Indore RTO



Source: Vahan Dashboard, Ministry of Road Transport & Highways (MoRTH)

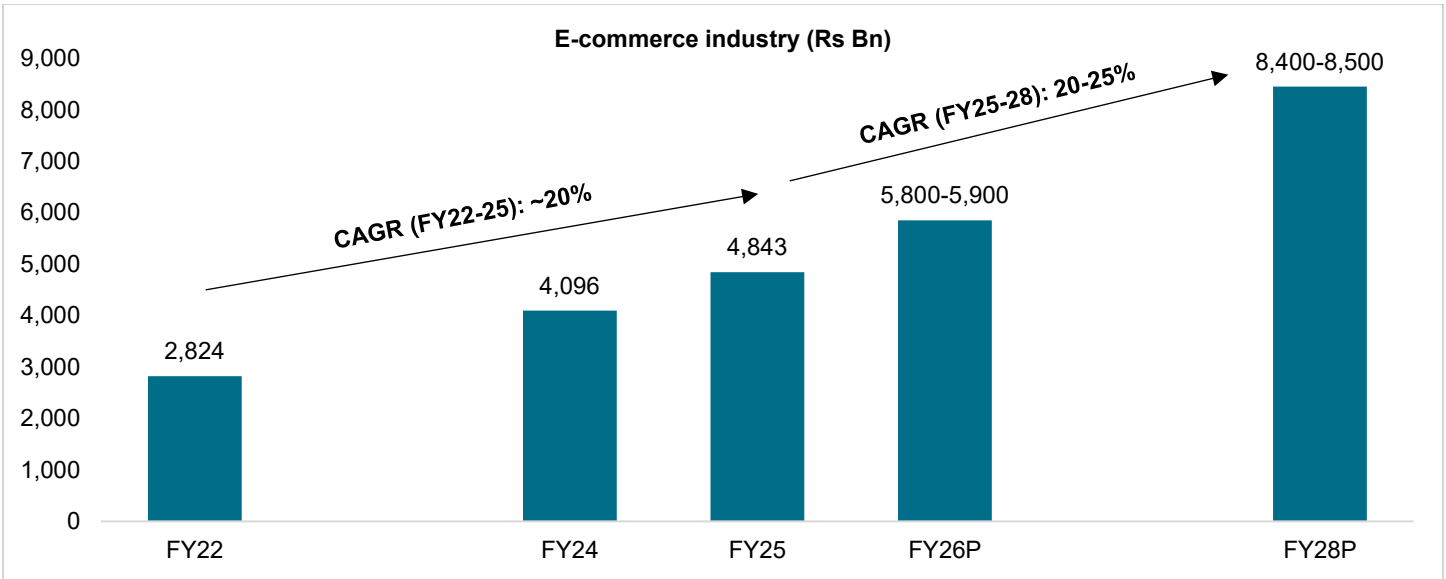
7.2.3 Commodity overview

As mentioned in section primary data collection & analysis, the analysis of freight movement across the toll plaza reveals that the major commodities being transported include Agri produce, courier & parcel. construction materials, iron and steel products and consumer foods and products.

7.2.3.1 Courier & parcels

The project road provide connectivity for major population center and warehousing hubs such as Indore, Mumbai, and Delhi. As a result of which, the project stretch observes strong proportion of courier and parcel traffic driven by the growing e-commerce industry. The Indian e-commerce sector — estimated at ~Rs 4,850 billion in fiscal 2025 — has seen phenomenal growth barring in fiscal 2021 when it was weighed down by the pandemic. The market has managed to attract not only consumers, but also investors across the world, and has grown more than 2.5 times between fiscals 2020 and 2025 on the back of rising internet penetration, increasing awareness of online shopping, and lucrative deals and discounts offered by well-established players and start-ups. Demand is expected to improve in fiscal 2026 to reach 20-22%, led by improving consumer sentiment and moderating inflation. Crisil Intelligence projects the e-commerce industry to reach Rs 8.5 trillion by fiscal 2028, logging a CAGR of 20-25%

Figure 7-5: Ecommerce industry in India



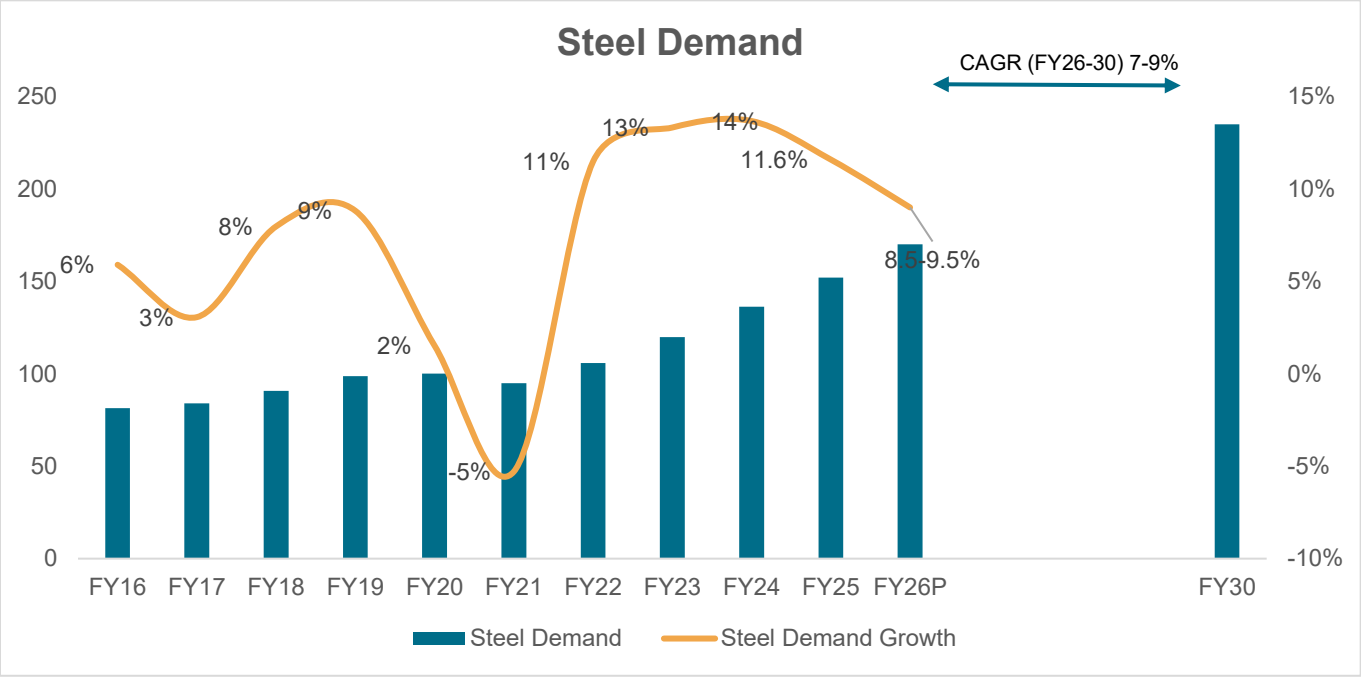
Source: Crisil Intelligence

The e-commerce industry is on a rise with increasing consumption levels and moderating inflation and project corridor being an important link in connecting the important cities of Madhya Pradesh, Rajasthan, Maharashtra and Delhi/North India. Crisil expects CAGR of 6.7% from fiscal FY27-FY32 for Courier and parcels related traffic on the project road.

7.2.3.2 Iron & steel products

Iron & steel is one of major commodity plying on the project road. The consumption of iron and steel in Madhya Pradesh has been increasing steadily over the years, driven by the growth of the construction, infrastructure, and manufacturing sectors. On-going and up-coming infrastructure activities have been key driving factors to the growth of this sector. A healthy housing market and an increase in individual house construction across the country are supporting this segment. Government initiatives, such as the Pradhan Mantri Awas Yojana (PMAY), are further supporting this segment. Cold storage, food processing units, warehouses, and irrigation structures also create consistent steel demand, linking back to the agrarian strength of the state.

Figure 7-6: Steel demand in India



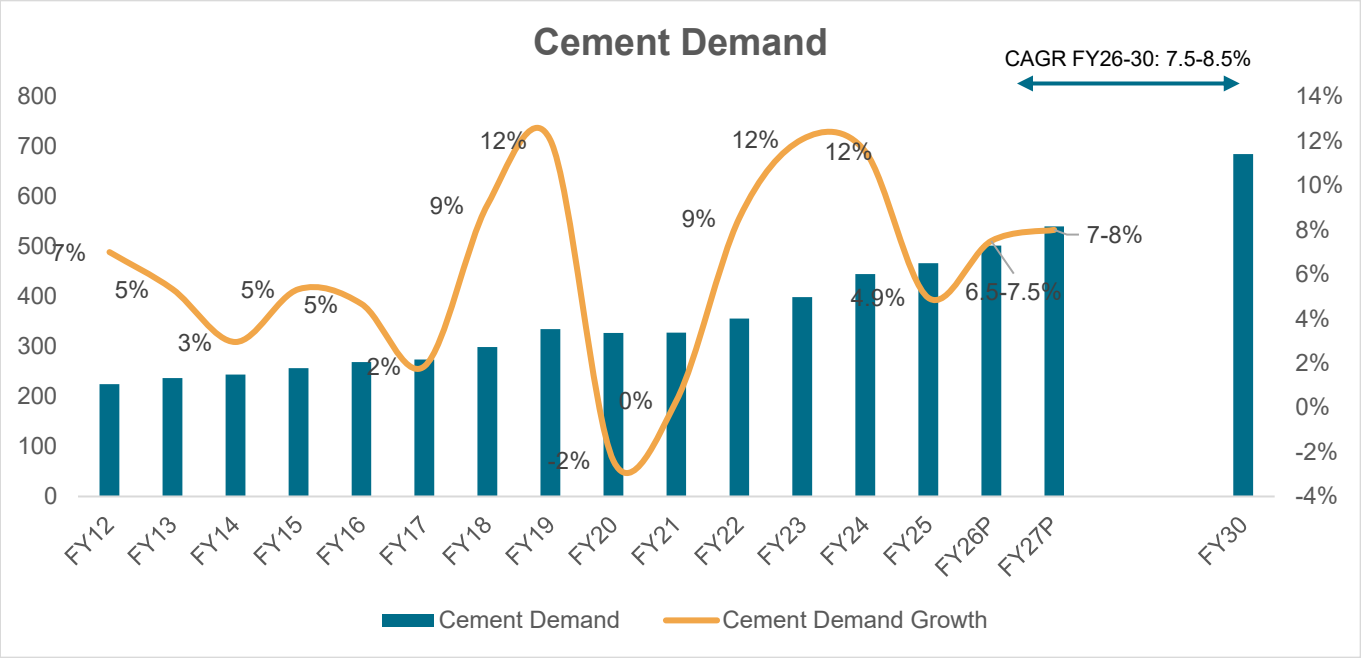
Source: Crisil Intelligence

7.2.3.3 Construction materials

Construction Material is another commodity, which majorly travels on the road stretch of which cement is the major commodity crossing the toll plaza owning to presence of various cement industries in and around the project corridor

The construction industry in India is expected to grow steadily at an annual rate of 6-8% between fiscal years 2026 and 2030. This growth will be mainly driven by increased spending on infrastructure projects such as roads and railways, supported by both central and state government investments.

Figure 7-7: Cement demand in India



Source: Crisil Intelligence

Demand growth moderated in fiscal 2025 to ~5%, following three years of healthy growth. While infrastructure segment continued to remain the key demand driver, growth moderated owing to slowdown in state capex roll outs during first half of fiscal 2025. However, with revival in state spending in the second half, infra projects picked up pace. Demand from the housing sector moderated to 3.5-4.5% with higher growth from rural housing segment. However, urban housing growth slowed down owing to slower execution under PMAY-U along with muted traction from real estate. In the industrial and commercial (I&C) segment growth slowed down after three consecutive years of healthy growth; however, continued traction from the PLI scheme and commercial real estate demand supported the growth. At an overall level, demand growth moderated to 5% in fiscal 2025 after three consecutive years of healthy demand growth.

7.2.3.4 Consumer food and products

The fast-moving consumer goods (FMCG) industry or consumer packaged goods (CPG) industry is mainly responsible for producing, distributing, and marketing fast-moving consumer goods. Fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years because of rising disposable income, a rising youth population, and rising brand awareness among consumers. Improved penetration of the organized snacks sector post the pandemic and new product offerings to drive growth of the industry over the medium term

7.2.4 Commodity outlook

Crisil Intelligence has forecasted the freight traffic growth based on the growth in relevant sectors influencing traffic in the region. Industry growth has been analysed and forecasted based on our proprietary database of industries for the surrounding regions that impact traffic on project road as well as our internal assessment on a relevant set of sectors at the pan India level.

Package wise forecast incorporates the regional dynamics including, but not limited to, investments, commodity trends, district output (GDDP) profile (primary/secondary, construction/manufacturing) etc.

The traffic for the coming years is projected by factoring in the impact of these parameters on commodity wise growth rates and is presented in below table.

Table 7-1: Commodity outlook for the project section

Commodity	FY 27 - FY 39
Agri Produce	4.0%
Automobiles	2.3%
Chemical products	4.7%
Coal	3.3%
Construction materials	2.4%
Consumer Foods	6.8%
Consumer Products	3.6%
Container	3.6%
Courier & parcel	4.8%
Iron & Steel Products	6.4%
Machinery	4.9%
Milk & Animal Food	3.0%
Others	3.4%
Paper products	3.6%
Petroleum Products	3.6%
Pharmaceuticals	2.0%
Plastic products	3.6%

8 Revenue forecast

8.1 User fee schedule

The rate revision is dictated by Schedule-R of the concession agreement which sets the basis using Indian tolls act and notification of the state government. The agreement defines two sections i.e. 1st homogeneous section of 66.25 km and 2nd homogeneous section of 57.90 km. Additionally, the agreement sets forth 7% YoY growth rate for the toll increase. The same has been used for estimation of revenue.

Table 8-1: Toll rates as per schedule R

Ticket type	Toll rate (Rs per km)
Private car, Jeep	0.33
LCV/Minibus	0.79
Bus	1.64
Truck	1.97
MAV	3.93

9 Annexures

9.1 Top OD Pairs

Ratlam to Indore and Ratlam to Badnawar is the top OD pair, accounting in passenger traffic (cars). Top 10 OD pairs contribute nearly 43% of the car traffic at Chokala and 56% at Chikliya. Ratlam-Indore, Ratlam to Badnawar and Delhi to Mumbai are the key pairs for goods traffic

Table 9-1: Top OD pairs at Chokala TP

OD pair	Cars %
Ratlam to Indore	11.9%
Badnawar/Satrunda to Kanvan/Kod/Chho Kalan	6.3%
Badnawar/Satrunda to Dhar	6.3%
Ratlam to Dhar	4.9%
Badnawar/Satrunda to Indore	4.9%
Jaora to Indore	3.6%
Badnawar/Satrunda to Nagda/Sadalpur/Khandigara	3.5%
Ratlam to Nagda/Sadalpur/Khandigara	2.0%

OD pair	Bus %
Ratlam to Indore	16.0%
Ratlam to Dhar	16.0%
Udaipur/Banswara/Pratapgarh/Nathdwara/Sirohi/Samaliya/ Darada/Pipliya/Saroda to Indore	11.8%
Jaora to Indore	9.5%
Jodhpur/Bagri/Sohara to Pune/Baramati/Pipalgaon	3.9%
Badnawar/Satrunda to Dhar	2.9%
Badnawar/Satrunda to Badnawar/Satrunda	2.5%
Ratlam to Methwada	2.5%

About Crisil Intelligence (formerly Market Intelligence & Analytics)

Crisil Intelligence is a leading provider of research, consulting, risk solutions and advanced data analytics, serving clients across government, private and public enterprises. We leverage our expertise in data-driven insights and strong benchmarking capabilities to help clients navigate complex external ecosystems, identify opportunities and mitigate risks. By combining cutting-edge analytics, machine learning and AI capabilities with deep industry knowledge, we empower our clients to make informed decisions, drive business growth and build resilient capacities.

For more information, visit Intelligence.Crisil.com

About Crisil

Crisil is a global, insights-driven analytics company. Our extraordinary domain expertise and analytical rigour help clients make mission-critical decisions with confidence.

Large and highly respected firms partner with us for the most reliable opinions on risk in India, and for uncovering powerful insights and turning risks into opportunities globally. We are integral to multiplying their opportunities and success.

Headquartered in India, Crisil is majority owned by S&P Global.

Founded in 1987 as India's first credit rating agency, our expertise today extends across businesses: Crisil Ratings, Crisil Intelligence, Crisil Coalition Greenwich and Crisil Integral IQ.

Crisil's global workforce operates in the Americas, Asia-Pacific, Europe, Australia and the Middle East, setting the standards by which industries are measured.

INDEPENDENT AUDITOR'S REPORT

To The Board of Directors,
Cube Highways Fund Advisors Private Limited (the "Investment Manager")

(Acting in capacity as the Investment Manager of Cube Highways Trust (the "Trust"))

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying Consolidated Financial Statements of Cube Highways Trust (the "Trust") and its subsidiaries [as listed in note 1(ii) of the Consolidated Financial Statements], (together referred to as the "Group") which comprise of the Consolidated Balance Sheet as at September 30, 2025, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Cash Flows, the Consolidated Statement of Changes in Unitholders' Equity, the Statement of Net Distributable Cash Flows of the Trust and each of the subsidiaries for the half year ended on that date, and notes to the Consolidated Financial Statements, including a summary of material accounting policies and other explanatory information (together hereinafter referred as the "Consolidated Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us and based on consideration of reports of the other auditors on separate financial statements of the subsidiaries referred to in the paragraph (a) of the Other Matters section below, the aforesaid Consolidated Financial Statements

(i) are presented in accordance with the requirements of Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended (the "InvIT Regulations"); and

(ii) in the context of the InvIT Regulations prevailing over certain Ind AS requirements, as explained in the Emphasis of Matter paragraph below, give a true and fair view in conformity with the Indian Accounting Standard 34 " Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013 (the "Act"), as amended and other accounting principles generally accepted in India of the consolidated state of affairs of the Group as at September 30, 2025, its consolidated profit (including other comprehensive income), its consolidated cash flows, its consolidated changes in unitholder's equity, and its net distributable cash flows of the Trust and each of the its subsidiaries for the half year ended on September 30, 2025.

Basis for Opinion

We conducted our audit of the Consolidated Financial Statements in accordance with the Standards on Auditing (SAs) issued by Institute of Chartered Accountants of India (the "ICAI"). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the ICAI together with the ethical requirements that are relevant to our audit of the Consolidated Financial Statements under the provisions of the InvIT Regulations, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in Other Matters section below, is sufficient and appropriate to provide a basis for our audit opinion on the Consolidated Financial Statements.

Emphasis of Matter

We draw attention to Note 19(a)(v) of the Consolidated Financial Statements, which describes the presentation of "Unit Capital" as "Equity" to comply with the InvIT Regulations.

Our opinion is not modified in respect of this matter.

Key Audit Matter

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Key Audit Matter	**Auditor's Response**
A) Impairment of Rights under Service Concession Arrangements (Intangibles Assets) and Receivables under Service Concession Arrangements The Group through its subsidiaries have right to collect toll or annuity under the Service Concession Arrangements (SCA) entered into by the respective subsidiaries having net carrying value of Rs. 280,471.18 million (Net of impairment) as at September 30, 2025. As per the requirement of Ind AS 36 "Impairment of assets", the Management of the Investment Manager regularly reviews whether there are any indicators of impairment of rights under SCA and receivables under SCA, and where impairment indicators exist, the Management of the Investment Manager estimates the recoverable amounts of the assets, basis value in use. The recoverable amounts of the aforesaid assets is determined by the Management of the Investment Manager on the basis of valuation report of the independent valuer, using discounted cash flow method which involves significant management judgement in respect of various key assumptions used as inputs such as determination of future cash flows, traffic estimates, assessment of the variation in concession period in certain subsidiaries considered on account of target traffic/ target revenue at the Target date as per the terms of respective SCA subject to approvals from the authorities, discount rates, revenue growth rate, inflation rate and other economic factors. There is an inherent risk in the determination of above recoverable amounts, as it involves estimation and significant management judgements. Considering complexity and significant management judgements, impairment assessment of Rights under SCA (Intangibles Assets) and Receivables under SCA are considered as a key audit matter.	Principal audit procedures performed included the following: • We obtained an understanding of the Group's process to identify indicators of impairment of Rights under Service Concession Arrangement (Intangibles Assets) and Receivables under Service Concession Arrangement, and process for determination of recoverable amount of these assets on the basis of valuation report of the independent valuer, including involvement of independent valuer and other management experts. • We assessed competence, capability and objectivity of independent valuer and other management experts involved in the process by the Management. • We obtained and read the valuation report of the independent valuer used by the Group to determine the recoverable amounts. • We assessed the reasonableness of the valuation methodology and assumptions (including those provided by the Management of the Investment Manager) used by the independent valuer in determining the recoverable amounts. • We assessed the reliability of management's cashflow forecast through the review of actual performance against previous forecasts, including the considerations due to current economic and market factors. • We assessed the reasonableness of the Management's assessment of the expected variations to the concession period including in respect of matters under arbitration with reference to the terms of the relevant concession agreements, the methodology followed by the Group and the legal advice obtained by the Management in respect of such matters, as applicable.

Refer Notes 2(III)(d)(11) and 2(III)(x) for material accounting policies and Notes 6, 9, 16 and 62 to the Consolidated Financial Statements.	• In performing the above procedures, we involved our internal specialists, who assessed the reasonableness of (i) management's forecast of revenue which mainly included traffic growth, revenue projections based on the independent experts' traffic study reports and inflation factor for assessing user toll fee and (ii) discount rate used in valuation, by challenging underlying assumptions used in such estimates and the methodology to determine the recoverable amounts. • We tested the arithmetical accuracy of the data used in determination of recoverable amounts and also of computation of impairment loss, if any. • We evaluated the appropriateness and adequacy of disclosures made by the Management of the Investment Manager.
B) Computation and disclosures relating to Consolidated Statement of Net Assets at Fair Value and Consolidated Statement of Total Returns at Fair Value as per InvIT Regulations In accordance with the InvIT Regulations, the Group discloses Consolidated Statement of Net Assets at Fair Value and Consolidated Statement of Total Returns at Fair Value, which is based on fair value determined on the basis of valuation report of the independent valuer appointed by the Trust. As at September 30, 2025, fair value of total assets was Rs. 376,018.55 million; out of which enterprise value of investments in subsidiaries as determined by independent valuer is Rs. 3,65,199.18 million representing 97.12% of the fair value of total assets. The fair value of investments in subsidiaries is determined by the Management of the Investment Manager on the basis of valuation report of the independent valuer, using discounted cash flow method which involves significant management judgement in respect of various key assumptions used as inputs such as determination of future cash flows, traffic estimates, assessment of the variation in concession period in certain subsidiaries considered on account of target traffic/ target revenue at the Target date as per the terms of respective SCA subject to approvals from the authorities, revenue growth rate, discount rates, inflation rates and other economic factors. The determination of fair value involve judgement due to inherent high estimation uncertainty in the underlying assumptions. Considering the importance of disclosure required under the InvIT Regulations, significant judgement involved in determination of fair values due to inherent uncertainty and complexity of the assumptions used in determination of fair values, this matter is considered as a key audit matter.	Principal audit procedures performed included the following: • We read the requirements of the InvIT Regulations for disclosures relating to Consolidated Statement of Net Assets at Fair Value and Consolidated Statement of Total Returns at Fair Value. • We obtained understanding of the Trust's process for preparation of Consolidated Statement of Net Assets at Fair Value and Consolidated Statement of Total Returns at Fair Value as per InvIT Regulations and the assumptions used by the Management of the Investment Manager including involvement of independent valuer and other management experts. • We assessed competence, capability and objectivity of independent valuer and other management experts involved in the process by the Management. • We obtained and read the valuation report of the independent valuer used by the Trust to determine fair value. • We reviewed the reasonableness of the valuation methodology and assumptions (including those provided by the Management of the Investment Manager) used by the independent valuer in determining the fair valuation. • We assessed the reliability of management's cashflow forecast through the review of actual performance against previous forecasts including the considerations due to current economic and market factors. • We assessed the reasonableness of the Management's assessment of the expected variations to the concession period including in respect of matters under arbitration with reference to the

Refer Note 2(III)(d)(2) for material accounting policies, Note 58 for Consolidated Statement of Net Assets at Fair Value and Note 59 for Consolidated Statement of Total Returns at Fair Value in the Consolidated Financial Statements.	terms of the relevant concession agreements, the methodology followed by the Group and the legal advice obtained by the Management in respect of such matters, as applicable. • In performing the above procedures, we involved our internal specialists, who assessed the reasonableness of (i) management's forecast of revenue which mainly included traffic growth, revenue projections based on the independent experts' traffic study reports and inflation factor for assessing user toll fee and (ii) discount rate used in valuation, by challenging underlying assumptions used in such estimates and the methodology to determine the fair value. • We tested the arithmetical accuracy of the data used in determination of fair value and also of computation of Net Assets at Fair Value and Total Returns at Fair Value. • We evaluated the appropriateness and adequacy of disclosures made by Management of the Investment Manager for compliance with the relevant requirements of the InvIT Regulations.
C) Provision for Periodic Major Maintenance (MM) expenses In accordance with Ind AS 37 "Provisions, contingent liabilities and contingent assets", the Group estimates and provides for contractual obligations as per Service Concession Arrangement (SCA) with National Highways Authority of India ("NHAI") / State Authorities to restore the infrastructure to a specified level of serviceability at periodic intervals during the SCA period or before it is handed over to NHAI and State Authorities. The Group has Provision for Periodic Major Maintenance (MM) expenses amounting to Rs. 7,649.66 million outstanding as at September 30, 2025. The MM expense estimate is based on maintenance strategy/ methodology prepared by the Management in accordance with the requirements of the respective SCA and after taking into account road survey reports issued by an independent expert. These estimates are further corroborated through purchase orders/ work orders placed or to be placed by the Management generally close to the maintenance execution period. The projected MM expense is periodically reviewed and updated for factors such as new information and past experience. As the estimated cost is based on the various assumptions such as current infrastructure (road, pavements, etc.) condition, inflation in material costs, government policies etc., the Group Management is required to apply judgement over these factors for estimating the provision for MM expenses.	Principal audit procedures performed included the following: • We assessed the appropriateness of the accounting policy followed by the Group for accounting Periodic Major Maintenance (MM) expenses with reference to requirements as per the applicable accounting standards. • Obtained an understanding and evaluated the Management process of estimating provision for periodic MM expense including involvement of the management experts. • We assessed competence, capability and objectivity of independent experts involved in the process by the Management. • We evaluated reasonableness of the method, assumptions and judgements used by the Management. It included evaluation of: a) contractual obligation to restore infrastructure at specified level of serviceability as per the SCA. Corroborating the quantities from the bill of quantity as per technical report issued by independent expert prepared based on MM strategy using the road survey reports issued by the field experts; b) current prevailing or forecasted rates of materials and services, and inflation adjustments thereupon;

Considering the high inherent estimation uncertainty in measurement of Provision for Periodic Major Maintenance expense and amount involved, this matter is considered as a key audit matter. Refer Notes 2(III)(d)(6) and 2(III)(y) for material accounting policy and Notes 23, 29 and 48 (a) to the Consolidated Financial Statements.	c) discount rate used for determining the present value of the projected MM expenditure; and d) appropriateness of above inputs used in estimation of MM expenses by comparing them with the previous completed MM cycle. • We have tested the arithmetical accuracy, where required, involved in the above estimation. • We assessed and validated the adequacy and appropriateness of the disclosures made by the Management of the Investment Manager in the Consolidated Financial Statements.

Responsibilities of the Board of Directors of the Investment Manager for the Consolidated Financial Statements

The Board of Directors of the Investment Manager is responsible for the preparation of these Consolidated Financial Statements that give a true and fair view of the consolidated financial position of the Group as at September 30, 2025, their consolidated financial performance including other comprehensive income, their consolidated cash flows, their consolidated changes in unitholder's equity, their net distributable cash flows of the Trust and each of the subsidiaries for the half year ended on that date, consolidated net assets at fair value as at September 30, 2025 and consolidated total returns at fair value for the half year then ended and other financial information of the Group in accordance with the InvIT Regulations, Ind AS 34 as prescribed under section 133 of the Companies Act 2013, as amended and other accounting principles generally accepted in India to the extent not inconsistent with the InvIT Regulations.

The Board of the Investment Manager and the respective Board of Directors of the subsidiaries included in the Group are responsible for maintenance of adequate accounting records including (where applicable) in accordance with the provisions of the Companies Act, 2013, for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Consolidated Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error which have been used for the purpose of preparation of the Consolidated Financial Statements by the Board of the Investment Manager, as aforesaid.

In preparing the Consolidated Financial Statements, the Board of the Investment Manager and the respective Board of Directors of the subsidiaries included in the Group are responsible for assessing the ability of the InvIT and respective entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board the Investment Manager and the respective Board of Directors of the subsidiaries included in the Group either intend to liquidate their respective entities or to cease operations, or has no realistic alternative but to do so.

The Board of the Investment Manager and the respective Board of Directors of the subsidiaries included in the Group are also responsible for overseeing the respective financial reporting process of the entities included in the Group.

Auditor's Responsibility for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit, We also:

- Identify and assess the risks of material misstatement of the Consolidated Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of such internal controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of the Investment Manager.

- Conclude on the appropriateness of the Board of the Investment Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Consolidated Financial Statements, including the disclosures, and whether the Consolidated Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Perform procedures in accordance with Regulation 13(2)(e) of the InvIT Regulations, as amended, to the extent applicable.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities within the Group to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the audit of the financial information of such entities included in the Consolidated Financial Statements of which we are the independent auditors. For the other entities included in the Consolidated Financial Statements, which have been audited by the other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the Consolidated Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Consolidated Financial Statements may be influenced. We consider quantita tive materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Consolidated Financial Statements.

We communicate with those charged with governance of the Investment Manager and such other entities included in the Consolidated Financial Statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Consolidated Financial Statements of the current period and are therefore key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

We have performed procedures in accordance with Regulation 13(2)(e) of the InvIT Regulations, as amended, to the extent applicable.

Other Matters

a) The Consolidated Financial Statements include audited financial statements of 4 subsidiaries, whose financial statements reflect total assets of Rs. 50,549.84 million as at September 30, 2025, total revenues of Rs. 2,882.63, total comprehensive loss of Rs. 742.68 million and net cash outflows amounting to Rs. 2,914.70 million, for the half year ended on that date, as considered in the Consolidated Financial Statements, which have been audited by their respective independent auditors. These independent auditor's report on the financial statements of these entities have been furnished to us by the Management and our opinion on the Consolidated Financial Statements, in so far as it relates to the amounts and disclosures included in respect of these entities, and our report in terms of InvIT Regulations, in so far as it relates to the these entities is based solely on the reports of such auditors and the procedures performed by us as stated above.

b) The comparative consolidated financial statements as at and for the years ended March 31, 2025, 2024 and 2023 were approved by the Board of Directors of the Investment Manager in their meeting held on May 28, 2025, May 22, 2024 and May 23, 2023 on which we had issued audit reports dated May 28, 2025, May 22, 2024 and May 23, 2023 respectively which expressed an unmodified opinion on those consolidated financial statements for the respective years. The Management of Investment Manager has made additional disclosures and changes to presentation (to the extent applicable) in such comparative consolidated financial information to comply with the SEBI Master Circular SEBI/HO/DDHS-PoD2/P/CIR/2025/102 dated July 11, 2025, which have been audited by us and in so far it relates to the disclosure and changes to presentation for the entities audited by other auditors and referred below, our reporting is solely based on the reports of such other auditors.

   The audit reports on the consolidated financial statements for the respective years were unmodified and includes following explanatory paragraphs:

   i) As at and for the year ended March 31, 2025

      1) Emphasis of Matter Paragraph:
         We draw attention to Note 20 (v) of the consolidated financial statements, which describes the presentation of "Unit Capital" as "Equity" to comply with the SEBI InvIT Regulations. Our opinion is not modified in respect of this matter.

         Note 20(v) as described above is reproduced as Note 19(a)(v) of the accompanying Consolidated Financial Statements.

2) Other Matter Paragraph:
We did not audit the standalone financial statements of 2 subsidiaries, whose financial information reflect total assets of Rs. 19,837.90 million as at March 31, 2025, total revenues of Rs. 1,983.96 million, total comprehensive income of Rs. 14.40 million and net cash inflows amounting to Rs. 784.99 million for the year ended on that date, as considered in the consolidated financial statements. These financial have been audited by other auditors whose reports have been furnished to us by the Investment Manager and our opinion and conclusion on the consolidated financial information, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries are based solely on the reports of the other auditors. Our opinion on the consolidated financial statements above and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

ii) As at and for the year ended March 31, 2024

1) Emphasis of Matter Paragraph:
We draw attention to Note 20 of the consolidated financial statements, which describes the presentation of "Unit Capital" as "Equity" to comply with the SEBI InvIT Regulations. Our opinion is not modified in respect of this matter.

Note 20 as described above is reproduced as Note 19(a)(v) of the accompanying Consolidated Financial Statements.

2) Other Matter Paragraph:
We did not audit the standalone financial statements of 2 subsidiaries, whose financial information reflect total assets of Rs. 26,795.34 million as at March 31, 2024, total revenues of Rs. 7,338.73 million, total comprehensive loss of Rs. 344.19 and net cash inflows amounting to Rs. 1,928.51 million for the year ended on that date, as considered in the consolidated financial statements. These financial have been audited by other auditors whose reports have been furnished to us by the Investment Manager and our opinion and conclusion on the consolidated financial information, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries are based solely on the reports of the other auditors. Our opinion on the consolidated financial statements above and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

Our opinion on the Consolidated Financial Statements and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters.

Report on Other Legal and Regulatory Requirements

As required by the InvIT regulations, based on our audit and on the consideration of report of other auditors on the financial statements as mentioned in "Other Matters" section above, we report that:

a) We have sought and obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit.

b) The Consolidated Balance Sheet and the Consolidated Statement of Profit and Loss (including Other Comprehensive Income) are in agreement with the books of account maintained by the Trust for the purpose of preparation of the Consolidated Financial Statements.

c) In our opinion, the aforesaid Consolidated Financial Statements comply with the InvIT Regulations, and in the context of the InvIT Regulations prevailing over certain Ind AS requirements, as explained in the Emphasis of Matter paragraph above, the aforesaid Ind AS 34 and other accounting principles generally accepted in India.

d) In our opinion and to the best of our information and according to the explanations given to us, the 'Consolidated Statement of Net Assets at Fair Value' as at September 30, 2025 and 'Consolidated Statement of Total Returns at Fair Value' for the half year ended on September 30, 2025 have been prepared in accordance with the requirements of the InvIT Regulations [Refer note 4 to the Consolidated Statement of Net Assets at Fair Value and note (i) to the Consolidated Statement of Total Returns at Fair Value].

Notes:

(i) The distributions made by the Trust to its unitholders are based on the Net Distributable Cash Flows (NDCFs) of the Trust under the InvIT Regulations. Refer Note 63 for distribution to Unitholders for distribution made during the respective periods.

(ii) As the Trust had reduced the Retained Earnings (under Other Equity) for the amount of NDCF distribution in the nature of repayment of capital in past periods, in terms of Clause 4.2.8(b) of the SEBI Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, the Trust is required to regroup the figures for Retained Earnings (under Other Equity) for prior periods presented in the Standalone Financial Statements and shown the same as a separate line item on the face of Consolidated Balance Sheet. Accordingly the Trust has regrouped Repayment of Capital from Retained earnings to Distribution-Repayment of Capital.

The above Consolidated Statement of Changes in Unit Holder's Equity should be read in conjunction with the accompanying notes 1 to 73

Statement of Net Distributable Cash Flows for the half year ended September 30, 2025
(All amounts in Rs. million unless otherwise stated)

Disclosures as required by section F of chapter 3 to the SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025

A Statement of Net Distributable Cash Flows (NDCFs) of the Cube Highways Trust

Particulars	Half Year		Year ended
	September 30, 2025 (Audited)	September 30, 2024 (Audited)	March 31, 2025 (Audited)
Cashflows from operating activities of the Trust	**(372.32)**	**(237.26)**	**(628.18)**
(+) Cash flows received from SPV's/ Investment entities which represent distributions of NDCF computed as per relevant framework (Refer note i)	17,261.43	11,462.29	26,536.85
(+) Treasury income / income from investing activities of the Trust (interest income received from FD, any investment entities as defined in Regulation 18(5), tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments. Further clarified that these amounts will be considered on a cash receipt basis) (refer note iii)	50.55	77.86	98.05
(+) Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs/Holdcos or Investment Entity adjusted for the following Applicable capital gains and other taxes Related debts settled or due to be settled from sale proceeds Directly attributable transaction costs Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations	-	-	-
(+) Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs/ Hold cos or Investment Entity not distributed pursuant to an earlier plan to re-invest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently	-	-	-
(-) Finance cost on Borrowings, excluding amortisation of any transaction costs as per Profit and Loss account of the Trust	(6,765.40)	(5,025.92)	(10,593.82)
(-) Debt repayment at Trust level (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments / debt refinanced through new debt in any form or funds raised through issuance of units)	(2,563.34)	(2,039.95)	(4,139.09)
(-) any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: (i). loan agreement entered with financial institution, or (ii). terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or (iii). terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, or (iv). agreement pursuant to which the Trust operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or (v). statutory, judicial, regulatory, or governmental stipulations; or	(126.16)	(450.00)	(450.00)
(-) any capital expenditure on existing assets owned / leased by the InvIT, to the extent not funded by debt / equity or from contractual reserves created in the earlier years	-	-	-
NDCF at Trust Level	**7,484.76**	**3,787.02**	**10,823.81**

Notes:

i) This includes Rs. 3,900.89 million received from SPVs after September 30, 2025 but before the date of the Board meeting for adoption of the unaudited financial information for the quarter and half year ended September 30, 2025 i.e. October 30, 2025, and excludes Rs. 3,171.92 million received from SPVs during the current half year and had been considered for computation of NDCF for the quarter ended March 31, 2025.

ii) Subsequent to the quarter ended September 30, 2025, the Board of Directors of the Investment Manager in its meeting dated October 30, 2025 approved a distribution of Rs. 3.60 per unit aggregating Rs. 4,838.65 million for the quarter ended September 30, 2025. This distribution is subsequently paid. This includes Rs. 716.49 million from surplus cash available with the Trust on or after acquisition of the SPVs by the Trust.

iii) Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

iv) In accordance with the SEBI circular no SEBI/HO/DDHS-PoD-2/P/CIR/2024/44 dated May 15, 2024, the framework for computation of Net Distributable cash flows ("NDCF") is revised with effect from April 01, 2024. Accordingly NDCF for the periods on or before March 31, 2024 was calculated and presented as per the earlier framework.

Statement of Net Distributable Cash Flows for the half year ended September 30, 2025
(All amounts in Rs. million unless otherwise stated)

Disclosures as required by section F of chapter 3 to the Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2023/115 dated July 06, 2023

Statement of Net Distributable Cash Flows (NDCFs) of the Cube Highways Trust-Contd.

Particulars	**For the year ended March 31, 2024**
Cash flows received from the SPVs in the form of:	
-Interest (net of applicable taxes, if any)	15,558.12
-Dividend (net of applicable taxes, if any)	1,513.26
-Repayment of the debt issued to the SPVs by the Trust or redemption of debentures issued by the SPVs to the Trust	3,054.20
Add: Proceeds from the SPVs for any capital reduction / buy back / redemption subject to Applicable Laws (net of applicable Taxes, if any)	-
Add: Proceeds from sale or transfer or liquidation or redemption or otherwise realization of investments, assets or shares of/interest in SPVs (net of applicable taxes and / or directly attributable transaction costs , if any)	-
Add: Proceeds from sale of assets of the SPVs not distributed pursuant to an earlier plan to re-invest, if such proceeds are not intended to be invested subsequently	-
Add: Any other income accruing at the Trust level and not captured above, including but not limited to interest / return on surplus cash invested by the Trust	119.75
Total cash inflow at the Trust level (A)	**20,245.33**
Less: Any payment of fees, interest and expense incurred at the Trust level, including but not limited to the Investment Manager fees, security trustee fees, annual fees for traffic, technical and other studies and fees for annual valuation.	(8,696.53)
Less: Any capital expenditure at any SPV level where sufficient cash is not available	-
Less: Costs/retention associated with sale of assets of the SPVs, including transaction costs paid on sale of the assets of the SPVs	-
Add: Additional borrowings (including debentures / other securities) adjusted for the following:[(1)]	1,46,176.98
any prepayment of borrowings if deemed necessary by the Investment Manager;	-
any identified end use as specified in the lender agreement or as deemed necessary by the Investment Manager.	-
Less: Repayment of external debt	(3,069.92)
Less: Income tax (if applicable) at the Standalone Trust Level (including capital gains taxes on sale of assets / share in SPVs / other investments) (net of any tax refunds)	(51.17)
Less: Related debts settled or due to be settled from sale proceeds of SPVs	-
Less: Investment in shares or debentures of SPVs or other similar investments or lending to SPVs [(2)]	(1,43,842.92)
Less: Proceeds reinvested or planned to be reinvested in accordance with Regulation 18(7)(a) of the InvIT Regulations	-
Less: Net cash set aside (i) to comply with reserve requirements under the loan agreements (including but not limited to DSRA and MMRA) adjusted for amount released from DSRA/MMRA or any other reserve in lieu of providing bank guarantee, and/or (ii) on a prudential basis for repayments of borrowings etc., as appropriate.	-
Less: Any cash reserve deemed necessary by the IM Board for expenses which may be due but for which there may not be commensurate cash available by the date such expenses become due	-
Less: Any other adjustment to be undertaken by the Investment Manager to ensure that there is no double counting of the same item for the above calculations	-
Total Adjustments (B)	**(9,483.56)**
Net Distributable Cash Flows (C) = (A+B) [(3)]	**10,761.77**

Notes:

(1) Includes proceeds from issue of Ordinary Unit Capital (net of issue expenses) and excludes processing costs.
(2) Includes Subordinate loan of Rs. 3,083.20 million being given to NKTPL (SPV) for maintaining Debt Service Reserve Account (DSRA) at InvIT level.
(3) The difference between SPV level NDCF and InvIT level NDCF is primarily on account of utilization of opening cash at the SPV level.
(4) The Trust has issued units on April 17, 2023, hence the NDCF is not presented for the year ended March 31, 2023.

The above Statement of Net Distributable Cash Flows (NDCFs) should be read in conjunction with the accompanying notes 1 to 73

Cash flow from operating activities as per Cash Flow Statement of SPV	**347.23**	**365.14**	**447.60**	**561.10**	**397.05**	**908.88**	**558.84**
Add: Cash Flows received from SPV's which represent distributions of NDCF computed as per relevant framework	-	-	-	-	-	-	-
Add:Treasury income / income from investing activities (interest income received from FD, tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments. Further clarified that these amounts will be considered on a cash receipt basis)*	59.96	0.99	2.96	9.83	(3.48)	13.97	(7.50)
Add: Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs or Investment Entity adjusted for the following: - Applicable capital gains and other taxes - Related debts settled or due to be settled from sale proceeds - directly attributable transaction costs; - Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations	-	-	-	-	-	-	-
Add: Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs or Investment Entity not distributed pursuant to an earlier plan to re invest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently	-	-	-	-	-	-	-
Less: Finance cost on Borrowings, excluding amortisation of any transaction costs as per Profit and Loss Account and any shareholder debt / loan from Trust	-	-	-	-	(49.63)	-	-
Less: Debt repayment (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments / debt refinanced through new debt, in any form or equity raise as well as repayment of any shareholder debt / loan from Trust)	-	-	-	-	(198.88)	-	-
Less: any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: (i). loan agreement entered with banks / financial institution from whom the Trust or any of its SPVs/ HoldCos have availed debt, or (ii). terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or (iii). terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, (iv). agreement pursuant to which the SPV/ HoldCo operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or (v). statutory, judicial, regulatory, or governmental stipulations;	-	-	-	(155.33)	(120.12)	-	-
Less: any capital expenditure on existing assets owned / leased by the SPV or Holdco, to the extent not funded by debt / equity or from reserves created in the earlier years	(1.58)	(1.62)	(1.17)	(0.31)	(0.30)	(0.68)	(0.44)
Net Distributable Cash Flows	**405.61**	**364.51**	**449.39**	**415.29**	**24.64**	**922.17**	**550.90**

*Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

**For the half year ended September 30, 2025, WUPTPL is not able to declare dividend and therefore not able to make distribution as required by SEBI InvIT Regulations to Trust due to negative free reserves and no outstanding debts to the Trust.

WUPTPL has filed a first motion application with the National Company Law Tribunal (NCLT) for reduction and reorganisation of capital under Section 230 read with Section 66 and Section 52 and other applicable provisions of the Companies Act, 2013 in view of significant accumulated losses which has substantially wiped off the value of the Applicant Company represented by its equity share capital, securities premium, deemed capital contribution and Equity Component NCDs. The petition was filed on 22 August, 2025 and an order dispensing the meetings of the shareholders and the creditors was passed by the NCLT on October 07,2025. A second motion with the NCLT is filed on 14 October 2025 for seeking approval of the proposed scheme of capital reduction and reorganisation; which is yet to be heard as of date.

*Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

**On account of negative NDCF no reserve is created for expected cash outflows towards operating expenses and statutory dues till receipt of next annuity payment from NHAI.

***Expenses amounting to Rs. 216.49 million (forming part of the cash flow from operations) have been incurred from date of acquisition until the receipt of the first annuity post acquisition. Since annuities are received on a semi-annual basis, these expenses have been considered as funded from the surplus cash available with the entity at the time of acquisition and, accordingly, have been paid by the entity to the Trust over and above the Net Distributable Cash Flow (NDCF).

Cube Highways Trust
Notes forming part of Consolidated Financial Statements for the half year ended September 30, 2025

1. Group Information

(i) The Consolidated Financial Statements comprise financial statements of the Cube Highways Trust and its subsidiaries (referred as "SPVs").

Cube Highways and Transportation Assets Advisors Private Limited ("Settlor") set up Cube Highways Trust (the "Trust") by way of the Original Trust Deed dated December 7, 2021 as a contributory irrevocable trust under the provisions of the Indian Trusts Act, 1882. The registered office address of the Trust is B-376, UGF, Nirman Vihar, New Delhi 110092.

On April 5, 2022, the Trust got registered as an infrastructure investment trust under the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, having registration number IN/InvIT/22-23/0022. The Original Trust Deed was amended and restated by way of the Trust Deed dated July 8, 2022. The Trust got its units listed on National Stock Exchange (NSE) and Bombay Stock Exchange (BSE) w.e.f. April 19, 2023. The Trustee to the Trust is Axis Trustee Services Limited (the "Trustee"). The Investment Manager for the Trust is Cube Highways Fund Advisors Private Limited (the "Investment Manager").

The objective of the Trust is to carry on the activities of an infrastructure investment trust, as permissible under the InvIT Regulations. The Trust has been formed to invest in infrastructure assets primarily being in the road sector in India. All the Road projects of entities to be included in the Trust Group held through 27 special purpose vehicles ("SPVs/Project SPV's /Subsidiaries" together with the Trust referred as " Trust Group") including 2 SPV's acquired during the current half year.

(ii) The Trust acquired the following SPVs, which have entered into concession agreements with NHAI or State Authorities on Design, Build, Finance, Operate and Transfer (DBFOT) or Toll Operate Transfer (TOT) or Hybrid Annuity Model (HAM):

Sr. No.	Name of SPVs	Date of incorporation	Date of acquisition	Principal activity	Principal place of business	Percentage of Shareholding acquired by the Trust
1	Western UP Tollway Private Limited (WUPTPL) (formerly known as Western UP Tollway Limited)	20-Apr-05	17-Apr-23	Construction, operation & maintenance of toll roads including toll collection	Uttar Pradesh	100%
2	Andhra Pradesh Expressway Private Limited (APEPL) (formerly known as Andhra Pradesh Expressway Limited)	11-Nov-05	17-Apr-23	Construction, operation & maintenance of toll roads under BOT Annuity Model	Andhra Pradesh	100%

Note: SPVs at Sr.No. 19 to 24 are hereafter being collectively referred as "HAM SPVs".

Since the Trust has acquired various SPVs at different dates as detailed above, the Consolidated Financial Statements for the half year ended September 30, 2025 are not comparable with the previous periods as included in the Consolidated Financial Statements.

2. Basis of preparation and material accounting policies

I. Basis of preparation

The Consolidated Financial Statements of the Trust Group comprising of the Consolidated Balance Sheet as at September 30, 2025, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Cash Flows, the Consolidated Statement of Changes in Unitholders' Equity, the Statement of Net Distributable Cash Flows (NDCFs) of the Trust and each of its subsidiaries for the half year then ended on that date (together referred to as the "Consolidated Financial Statements") and a summary of material accounting policies and other explanatory notes to the Consolidated Financial Statements.

The Consolidated Financial Statements also include the following comparative information:

- Consolidated Balance Sheet as at September 30, 2024, March 31, 2025, March 31, 2024 and March 31, 2023.
- Consolidated Statement of Profit and Loss (including Other Comprehensive Income) for the half year ended September 30, 2024 and for the years ended March 31, 2025, March 31, 2024 and March 31, 2023.
- Consolidated Statement of Cash Flows for the half year ended September 30, 2024 and for the years ended March 31, 2025, March 31, 2024 and March 31, 2023.
- Consolidated Statement of Net Distributable Cash Flows (NDCF) of the Trust and its subsidiaries for the half year months ended September 30, 2024 and for the years ended March 31, 2025, March 31, 2024.

These Consolidated Financial Statements have been prepared in accordance with the Indian Accounting Standard (Ind AS) -34 "Interim Financial Reporting", prescribed under Section 133 of the Companies Act, 2013 (the "Act") to the extent not inconsistent with the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended (the "SEBI InvIT Regulations" or "InvIT Regulations") (Refer note 19(a)(v) of Consolidated Financial Statements on presentation of "Unit capital" as "Equity" instead of compound financial instruments under Ind AS 32- Financial Instruments: Presentation), other relevant provisions relating to disclosures required as per of the SEBI InvIT Regulations, including Chapter 3 of the SEBI InvIT Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025 for Infrastructure Investment Trusts (InvITs) ("Master Circular") and other accounting principles generally accepted in India.

The comparative Consolidated Financial Statements as at and for the years ended March 31, 2025, March 31, 2024, and March 31, 2023 were approved by the Board of Directors of the Investment Manager in their meeting held on May 28, 2025, May 22, 2024 and May 23, 2023 on which auditors had issued unmodified opinion on those Consolidated Financial Statements vide their audit reports dated May 28, 2025, May 22, 2024 and May 23, 2023 respectively. The Management of the Investment Manager has made additional disclosures and changes to presentation (to the extent applicable) in such comparative Consolidated Financial Statements to comply with Master Circular.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

The Consolidated Financial Statements have been prepared on going concern basis in accordance with accounting principles generally accepted in India. Further, the Consolidated Financial Statements have been prepared on historical cost basis using uniform policies as explained in the material accounting policies below for like transactions and other events in similar circumstances, except for certain financial instruments and contingent consideration which are measured at fair value at the end of each reporting period as explained in relevant accounting policies.

The Consolidated Financial Statements are presented in India Rupees which is also the functional currency of the Trust Group, and all values are rounded to the nearest million, unless otherwise stated.

New Accounting Standards issued but not effective /Recent Accounting Developments

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

In May 2025, MCA notified amendments to Ind AS 21 - The Effects of Changes in Foreign Exchange Rates, applicable w.e.f. April 1, 2025. The Trust Group has reviewed the amendment and based on its evaluation has determined that it does not have any impact in its consolidated financial statements.

In August 2025, MCA notified the following amendments to:

1. Ind AS 1, Presentation of Financial Statements, applicable w.e.f April 1, 2025 - The amendment relates to classification of liabilities as current or non -current and non-current liabilities with covenants. In the context of classifying a liability as current, it removes the requirement of existence of a right to defer settlement for at least 12 months after the reporting date and instead requires that the said right should exist on the reporting date and have substance. The amendment also introduces guidance on classification of liabilities with covenants. The Group has no impact of these amendments in its classification criteria of current and non-current liabilities.

2. Ind AS 7, Statement of Cash Flows and Ind AS 107, Financial Instruments - Disclosures, applicable w.e.f April 1, 2025 – The amendment in Ind AS 7 requires to inform users of financial statements of the existence of supplier finance arrangements and explain the nature of the arrangements, the carrying amount of liabilities and the range of payment due dates. Ind AS 107 has been amended to add supplier finance arrangements as a factor that may cause concentration of liquidity risk. The Group has reviewed the amendment and based on its evaluation has determined that it does not have any impact in its consolidated financial statements.

3. Ind AS 12, International Tax Reform – Pillar Two Model Rules applicable immediately - The amendments provide a temporary mandatory relief from deferred tax accounting for top-up tax and disclose that they have applied the relief. This relief is immediate and applies retrospectively. The amendments also require companies to provide new disclosures to compensate for potential loss of information resulting from the relief. Such disclosures are to be provided for annual reporting periods beginning on or after April 1, 2025. The Group has reviewed the amendment and based on its evaluation has determined that it does not have any impact in its consolidated financial statements

II. Statement of Compliance

The Consolidated Financial Statements have been prepared in accordance with the Indian Accounting Standard as defined in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015, as amended, presentation and disclosure requirements of Division II of Schedule III and other accounting principles generally accepted in India to the extent not inconsistent with the SEBI InvIT Regulations as more fully described above and as given in Note 19(a)(v) to the Consolidated Financial Statements and presentation.

III. Summary of Material Accounting Policies

a) Basis of Consolidation

Trust Group consolidates entities which it owns or controls. Control exists when the Trust has power over the entity, is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over the entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. Subsidiaries are Consolidated from the date on which control is transferred to the Trust Group until the date control ceases.

Consolidated Financial Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. The Trust Group combines the financial statements of the Trust and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated.

b) Asset Acquisition

If the acquisition of the asset or a group of assets does not constitute a business, the Trust identifies and recognises the individual identifiable assets acquired (including those assets that meet the definition of, and recognition criteria for, intangible assets in Ind AS 38, Intangible Assets) and liabilities assumed. The cost of

the group is allocated to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of purchase and no goodwill is recognised.

When the consideration transferred by the Trust in the asset acquisition includes a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred. Contingent consideration is remeasured to fair value at subsequent reporting dates with changes in fair value recognised in profit or loss.

c) Current and non-current classification

Based on the time involved between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Trust Group has identified twelve months as its operating cycle for determining current and non- current classification of assets and liabilities in the balance sheet.

d) Critical accounting judgements and key sources of estimation uncertainty

The preparation of these Consolidated Financial Statements requires management to make judgements, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses, and the accompanying disclosures.

The Management believes that the estimates used in preparation of the Consolidated Financial Statements are prudent and reasonable. However, actual results could differ from these estimates. Any revision to accounting estimates is recognised prospectively in the current and future periods.

1. Classification of Unitholders funds:

The Unit Capital has been presented as "Equity" in accordance with the SEBI InvIT Regulations instead of compound financial instrument. Refer note 19(a)(v) of Consolidated Financial Statements on presentation of "Unit capital" as "Equity" instead of compound financial instruments under Indian Accounting Standard (Ind AS) 32- Financial Instruments: Presentation.

2. Fair valuation and disclosures

SEBI Master Circular issued under the SEBI InvIT Regulations require disclosures relating to net assets at fair value and total returns at fair value. In estimating the fair value of investments in subsidiaries (which constitute a substantial portion of the net assets), the Trust engages independent qualified external valuers to perform the valuation. The Investment Manager of the Trust works closely with the valuers to establish the appropriate valuation techniques and inputs to the valuation model. The inputs to the valuation models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as determination of future cash flows, traffic estimates, assessment of the variation in concession period in certain subsidiaries considered on account of Target Traffic subject to approvals from the authorities, discount rates, revenue growth rate and inflation and other economic factors, tax rates, etc. Changes in assumptions about these factors could affect fair value (Refer note 58(5) of Consolidated Financial Statements).

3. Applicability of service concession arrangement (SCA) accounting to the concessionaire arrangements entered into by the SPVs

The Trust Group has determined that Appendix C to Ind AS 115 "Revenue from Contracts with Customers" relating to 'Service Concession Arrangements' is applicable to the SPVs which provides an accounting by the operators of public to private service concession arrangements. The SPVs have entered into concession arrangement with National Highway Authority of India (NHAI) or respective State Highway Authority (the "Authority") as per which the individual SPVs would participate in Design, Build, Finance, Operate and Transfer (DBFOT) or Toll Operate Transfer (TOT) or Hybrid Annuity Model (HAM) of the toll roads infrastructure. After the end of the Concession arrangement, the SPVs have to transfer the infrastructure i.e. toll roads constructed to the Authority.

Accordingly, the SPVs other than APEPL, AJUHPL, QEPL and HAM SPVs have recognized the intangible assets as per the accounting policy mentioned in Note (f) Intangible Assets.

The accounting for Receivables against SCA ("financial assets") requires APEPL, AJUHPL, QEPL and HAM SPVs to allocate the consideration over Construction and Operating & Maintenance (O&M) activities. Revenue is allocated over "Operating & Maintenance (O&M) activities" based on estimated future operating & maintenance cash flows. The estimates of operating & maintenance cash flows require management to make significant judgments and estimates, which include assumptions related to expected future expenses and inflation. The judgments and estimates including assumptions related to expected future expenses, inflation and reliability of forecast of future expenses through the review of actual expenses against previous forecasts are reviewed periodically by the management.

4. Assessment of concession period under Service Concession Arrangements (SCA)

The concession period is specified under the SCA agreement entered into by the respective SPVs with the Grantor (NHAI/ State authorities). However, it may vary based on the terms of the respective SPVs depending upon achievement of conditions relating to Target Traffic or Target revenue generated at Target date specified in the SCA. For the purposes of estimation of variation in the concession period at each reporting period, the Trust evaluates the contractual entitlement to variations in concession period on a case-to-case basis taking into account the provisions of the concession agreement of the respective SPVs, the facts and circumstances giving rise to such variations and the status of the approvals for such variation. Estimating the concession period under Appendix C of Ind AS 115 requires a careful analysis of the specific service concession arrangement. For estimation of the concession period, the Management considers future traffic estimates with the help of an independent expert, assessment of outcomes with respect to disputes/ arbitration with the Grantor for the SPVs claims for variation in concession period on account of Target Traffic, etc. based on the legal advice received, discount rates, revenue growth rate and inflation and other economic factors, as considered relevant. Based on the above, the Management has considered variation in concession period for certain SPVs (Refer Note 52) for the purpose of estimating amortization of Intangible Assets- Toll Road Carriageway, estimating fair value of net assets of SPVs and also for determination of recoverable amounts for Intangible Assets- Toll Road Carriageway of SPVs.

5. Amortisation of Rights under Service Concession Arrangements (SCA) i.e. Intangible Assets- Toll Road Carriageway

Certain SPVs (viz. MBEL, JMTPL, WUPTPL, GAEPL and NAMEL) which has toll collection rights in respect of SCA commenced before April 1, 2014, recognizes the amortization of intangible assets relating to SCA based on proportion of actual revenue earned for the period over the sum of actual revenue for the period and projected revenue from Toll Road Carriageway expected to be earned over the balance concession period as estimated by the management of respective SPVs. The future revenue projections are based on the assumptions made by the Trust Group's management regarding future traffic growth, concession period referred above and inflation factor for assessing user toll fee as supported by the studies from the third-party independent consultant for individual SPV done at reasonable intervals.

For other SPVs which has toll collection rights in respect of SCA commenced after April 1, 2014, the intangible assets relating to Service Concession Agreements is being amortised over the estimated useful life (being the concession period referred above).

The estimated useful life of Rights under Service Concession Arrangement – Intangible assets and the projected revenue is reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

6. Provision for periodic maintenance (overlay expenses)

The Trust Group estimates and provides for contractual obligations as per SCA with NHAI to restore the infrastructure to a specified level of serviceability at periodic intervals during the concession period or before it is handed over to NHAI. These estimates are corroborated through purchase orders/ work orders placed or to be placed by the Trust Group as per the road survey reports issued by an independent field expert and major maintenance strategy/ methodology approved by the Independent Consultant appointed by NHAI. As the estimated cost is based on the various assumptions such as current infrastructure (road, pavements, etc.) condition, expected timings of costs, inflation in material cost, discount rate, government policies etc., hence the Trust Group's

management is required to apply judgement over these factors for revalidating the provision for expenses which is reviewed on annual basis.

7. Provision for Improvement works

Certain SPVs estimates and provides for contract liability in respect of unavoidable obligations to improve/upgrade the infrastructure to be undertaken as per the Concession Agreement with NHAI. These estimates are corroborated through purchase orders/ work orders placed or to be placed by these SPVs as per the road survey reports issued by an independent field expert. As the estimated cost is based on the various assumptions such as current infrastructure (road, pavements, etc.) condition, inflation in material cost etc., hence the Trust Group's management is required to apply judgement over these factors.

8. Income taxes and deferred tax

Judgements are involved in determining the provision for income taxes including judgement on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve interpretation issues, which can only be resolved over extended time periods.

Significant management judgement is also required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Trust Group reviews the carrying amount of deferred tax assets (net) at the end of each reporting period. The Trust Group has recognised the deferred tax assets relating to carried forward losses and minimum alternate tax (MAT) credit to the extent there are sufficient taxable temporary differences available against which the unused tax losses can be utilized. Further, deferred tax assets have been recognised to the extent of deferred tax liabilities, in the absence of reasonable certainty that future taxable amounts will be available to utilize temporary differences.

The Trust Group has not recognised the deferred tax assets and liabilities on deductible temporary differences and tax losses reversing or originating and reversing during tax holiday period under section 80IA of the Income-tax Act, 1961 which have been estimated basis the future projections.

Deferred tax assets and liabilities are classified as non- current assets and liabilities.

9. Accounting for acquisition of Subsidiaries

The Trust Group has applied the optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated in Intangible Assets-Rights under Service Concession Arrangements (other than APEPL, AJUHPL, QEPL and HAM SPVs) and Receivable under Service Concession Arrangements (for APEPL, AJUHPL, QEPL and HAM SPVs), with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition (Refer Note 50).

10. Impairment of financial assets

The impairment provision for financial assets is based on assumptions about risk of default and expected loss rates. The Trust Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the existing market conditions as well as forward looking estimates at the end of each reporting period.

11. Impairment of intangible assets - Rights under Service Concession Arrangements

The Trust Group uses the estimated future cash flows in assessing value in use for intangible assets. Future estimated cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset for which the estimated future cash flows have not been adjusted.

The inputs to the valuation models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The recoverable

amounts for the intangible assets are based on value in use of the underlying SPVs as determined by an independent valuer using discounted cash flow method which involves management judgement in respect of various key assumptions used as inputs such as determination of future cash flows, estimation of concession period considering the relevant terms of the SCA dealing with modification of the concession period, future traffic estimates with the help of an independent expert, assessment of outcomes with respect to disputes/ arbitration with the Grantor for the SPVs claims for variation in concession period on account of Target Traffic, etc. supported by the legal advice, discount rates, revenue growth rate and inflation and other economic factors. The cash flows are derived from forecasts over the remaining SCA period of the SPVs.

12. Accounting of Compound financial instruments

Certain SPVs included in the Trust Group have issued Unsecured, Optionally Convertible Debentures (OCDs) on private placement basis to various related parties (Subscribers) in previous years. During the current year, the OCD Subscribers sought premature redemption of the OCDs at face value with accrued but unpaid interest on the OCDs. The SPVs have allocated the consideration paid for redemption of OCDs to the liability and equity components of the instrument at the date of the redemption.

13. Useful lives of property, plant, and equipment

Management of the Trust Group reviews the useful lives of property, plant and equipment at each reporting date to ensure that the useful lives represent the expected utility of the assets to the Trust Group.

14. Obligations relating to employee benefits

The employee benefit obligation depends on several factors (including applicable laws) that are determined on an actuarial basis using several assumptions. The assumptions used in determining the net cost/ (income) include the discount rate, inflation and mortality assumptions. Any changes in these assumptions will impact upon the carrying amount of employee benefit obligations.

e) Property, plant, and equipment

Property, plant and equipment are stated at historical cost, as applicable, less accumulated depreciation and cumulative impairment losses, if any.

Historical cost includes purchase price, borrowing costs and any cost directly attributable to bringing the assets to its working condition for its intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably. Cost includes expenditure that is directly attributable to qualifying assets and includes borrowing costs capitalised in accordance with the Trust Group's accounting policy. Such properties are classified to the appropriate categories of property, plant, and equipment when completed and ready for intended use.

Depreciation on Plant and Equipment is provided using straight-line method based on estimated useful life. The estimated useful life of all the property, plant and equipment is ascertained by the management using the best estimate on the basis of technical evaluation, which is depreciated based on useful life as prescribed in Schedule II of the Companies Act, 2013. Depreciation on additions/ deductions is calculated pro-rata from/ to the month of additions/ deductions.

The residual values, useful lives and methods of depreciation of Property, plant and equipment are reviewed at each period end and adjusted prospectively, if appropriate.

Non-current assets classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

Gains or losses arising from derecognition of a Property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Consolidated Statement of Profit and Loss when the asset is derecognised.

f) Intangible assets

Intangible assets are recognised when it is probable that future economic benefits that are attributable to the asset will flow to the Trust Group and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, or deemed cost less accumulated amortisation, and cumulative impairment, if any.

Intangible Assets are stated at historical cost/deemed cost in certain SPVs (elected in accordance with Ind AS 101), as applicable, less accumulated amortisation and cumulative impairment losses, if any.

(i) Rights under Service Concession Arrangements (SCA)

Rights under SCA obtained in consideration for concession fee for development of toll roads under Toll-Operate-Transfer (TOT) or Build-Operate-Transfer (BOT) basis respectively represent the right to collect toll revenue during the concession period. The cost also includes corresponding obligations of the SPVs under the Concession Agreement entered with the Authority related to construction /improvements of the Project Highway granted to the SPVs. Rights under SCA are capitalized as intangible assets upon obtaining the commencement of operation certificate from the authorities at cumulative development costs. The revenue from toll collection/other income during the construction period is reduced from cost of development of intangible assets. Till the completion of the construction, the development costs are recognised under intangible assets under development.

Obligation towards negative grants and the cost incurred for work beyond the original scope per SCA (normally referred as "Change of Scope") or upgrade services is capitalized as intangible assets under development as and when incurred. Reimbursement in respect of such amounts from the Authority is reduced from the carrying amount of intangible assets under development to the extent of actual receipts. Any grant from the Authority in connection with project development is reduced from the cost of the intangible assets.

Extension of concession period by the Authority in respect of compensation for claims made by the SPVs are capitalized as part of Toll Collection Rights on acceptance of the claim. Where the SPVs have a contractual right to an extension in the concession period as per the concession agreement, the same is capitalized when the right to extension in the concession period is established at the estimated amounts of eligible claims.

Pre-operative expenses including administrative and other general overhead expenses that are directly attributable to the development or acquisition of intangible assets are allocated and capitalized as part of cost of the intangible assets.

Amortisation of intangible assets (Rights under SCA)

The Rights under SCA in respect of road projects of certain SPVs (viz. MBEL, JMTL, WUPTL, GAEPL and NAMEL) are amortized over the period of concession using the revenue-based amortization method prescribed under Schedule II to the Companies Act, 2013. Under the revenue-based method, amortization is based on proportion of actual revenue earned for the period over the sum of actual revenue for the current period and projected revenue from Toll Road Carriageway expected to be earned over the balance concession period as estimated by the management of respective SPVs. Total projected revenue is reviewed at the end of each period end and is adjusted to reflect the changes in earlier estimate vis-a-vis the actual revenue earned till the end of the period so that the whole of the cost of the intangible asset is amortized over the concession period.

For all the other SPVs, the Rights under SCA is amortised over the shorter of the estimated period of future economic benefits which the intangible assets are expected to generate or the concession period, from the date they are available for use. The estimated useful life is reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

An asset carried under concession arrangements is derecognised on disposal or when no future economic benefits are expected from its future use or disposal.

(ii) Other intangible assets

Other intangible assets comprise of cost of software acquired for in-house use. These assets are stated at cost less accumulated amortization and accumulated impairment losses, if any. Intangible assets are derecognized when no future economic benefits are expected from use or disposal. Amortization is recognized on a straight-line basis over their useful life. The estimated useful life is reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised. Intangible assets that are not ready for the intended use on the date of the Balance Sheet are disclosed as "Intangible assets under development".

g) Foreign currency transactions and translations

The Consolidated Financial Statements are presented in Indian Rupee (INR), which is the Trust Group's functional and presentational currency. Foreign currency transactions are recorded at the exchange rate prevailing on the date of the respective transactions between the functional currency and the foreign currency.

Monetary items

Monetary foreign currency assets and liabilities remaining unsettled at the Balance Sheet date are translated at the rates of exchange prevailing on that date. Gains / losses arising on account of realisation / settlement of foreign currency transactions and on translation of foreign currency assets and liabilities are recognized in the Consolidated Statement of Profit and Loss.

Exchange differences arising on the settlement of monetary items or on reporting date's monetary items at rates different from those at which they were initially recorded during the period, or reported in previous financial Statements, are recognized as income or as expenses in the period in which they arise.

h) Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Trust Group expects to be entitled in exchange for those goods or services. The Trust Group has concluded that it is the principal in its revenue arrangements because it typically controls the services before transferring them to the customer. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Trust Group and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the transaction price of the consideration received or receivable, excluding the estimates of variable consideration that is allocated to that performance obligation, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The specific recognition criteria described below must also be met before revenue is recognised.

Revenue is recognised either at a point in time or over time, when (or as) the Trust Group satisfies performance obligations by transferring the promised goods or services to its customers.

Service concession arrangements - Recognition and measurement

The Trust Group builds, operate and maintain roads and other infrastructure assets under public-to-private Service Concession Arrangements (SCAs), which is an arrangement between the "grantor" (a public sector entity/authority) and the "operator" (a private sector entity/ the Concessionaire) to provide services that give the public access to major economic and social facilities utilizing private-sector funds and expertise.

With respect to SCA, revenue and costs are allocated between those relating to construction services and those relating to operation and maintenance services and are accounted for separately.

Consideration received or receivable is allocated by reference to the relative fair value of services delivered when the amounts are separately identifiable. For operation & maintenance services, such costs are executory in nature and are expensed off as and when incurred.

The Trust Group's revenue is divided into following categories:

A. Toll collections from the users of the infrastructure facility operated or maintained by the Trust Group under the Service Concession Arrangements are accounted for based on actual collection (net of amount charged over and above the normal user fee payable to NHAI). Revenue from electronic toll collection is recognized on accrual basis.

B. Under financial asset model, finance income for SCA is recognized using effective interest method. Revenues from operations and maintenance services and overlay services are recognized in each period as and when services are rendered in accordance with Appendix C to Ind AS 115.

1. Revenue from construction contracts

Contract revenue for fixed price contracts is recognized only to the extent of cost incurred till such time the outcome of the contract cannot be ascertained reliably. When the outcome of the contract is ascertained reliably, contract revenue is recognized at cost of work performed on the contract plus proportionate margin, using the percentage of completion method.

Percentage of completion is determined based on the proportion of actual cost incurred to the total estimated cost of the project. The percentage of completion method is applied on a cumulative basis in each accounting period to the current estimates of contract revenue and contract costs. The effect of a change in the estimate of contract revenue or contract costs, or the effect of a change in the estimate of the outcome of a contract, is accounted for as a change in accounting estimate and the effect of which are recognized in the Consolidated Statement of Profit and Loss in the period in which the change is made and in subsequent periods.

For the purposes of recognising revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that it is probable that they will result in revenue, and they are capable of being reliably measured.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense in the Consolidated Statement of Profit and Loss in the period in which such probability occurs.

2. Interest income

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Trust Group and the amount of income can be measured reliably. Interest is accrued on time proportion basis, by reference to the principle outstanding at the effective interest rate.

i) Government grants

Grants from governments are recognized at fair value where there is reasonable assurance that the Trust Group will comply with the conditions attaching to them and that the grants will be received.

Government grants related to income are deferred and recognized in profit or loss over the periods in which the Trust Group recognizes as expenses the related costs for which the grants are intended to compensate.

Government grants whose primary condition is that the Trust Group should purchase, construct, or otherwise acquire non-current assets are deducted from the carrying amount of such non-current assets.

j) Distribution to unit holders

The Trust recognises a liability to make distribution to Unit holders when the distribution is approved by the Board of Directors of the Investment Manager to the Trust Group and a legal obligation has been created as per the SEBI InvIT Regulations. A corresponding amount is recognised directly in other equity other than Repayment of Capital.

k) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

Identification of segments:

In accordance with Ind AS 108- Operating Segment, the operating segments used to present segment information are identified on the basis of information reviewed by the Chief Operating Decision Maker to allocate resources to the segments and assess their performance. An operating segment is a component of the Trust that engages in business activities from which it earns revenues and incurs expenses, including revenues and expenses that relate to transactions with any of the Trust's Group component.

Based on an analysis of Trust structure and powers conferred to the Investment Manager to Trust, the Board of Directors of the Investment Manager has been identified as the Chief Operating Decision Maker ('CODM'), since they are empowered for all major decisions w.r.t. the management, administration, investment, disinvestment, etc.

As the Trust Group is primarily engaged in the business of toll operations and maintenance in India, CODM reviews the entire business as a single operating in respect of reportable segments are not applicable.

l) Financial Instruments

Financial assets and financial liabilities are recognized when the Trust Group become a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. However, transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL") are recognized immediately in the Consolidated Statement of Profit and Loss.

If the Trust Group determines that the fair value at initial recognition differs from the transaction price, the Trust Group accounts for that instrument at that date as follows:

- at the measurement basis mentioned above if that fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets. The Trust Group recognises the difference between the fair value at initial recognition and the transaction price as a gain or loss.

- in all other cases, at the measurement basis mentioned above, adjusted to defer the difference between the fair value at initial recognition and the transaction price. After initial recognition, the Trust Group recognises that deferred difference as a gain or loss only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability.

Subsequent measurement of financial assets and financial liabilities is described below:

i. Financial assets

All recognized financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification of Financial Assets

Financial Assets that meet the following conditions are subsequently measured at amortised cost (unless the same are designated as fair value through profit or loss (FVTPL)):

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at FVTPL is a residual category for debt instruments and all changes are recognized in profit or loss.

Amortized cost and effective interest method

Income is recognized on an effective interest method as per Ind AS 109 "Financial Instruments" for financial assets other than those financial assets classified as at FVTPL. Interest income is recognized in the Consolidated Statement of Profit and Loss and is included in the "Other income" line item.

Impairment of financial assets (Expected credit loss model)

An impairment loss on financial asset is established when there is objective evidence that the Trust Group will not be able to collect all amounts due according to the original terms of the receivables. Impairment loss if any are recognised in Consolidated Statement of Profit or Loss for the period.

De-recognition of financial assets

The Trust Group derecognize a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On de-recognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in the Consolidated Statement of Profit or Loss on disposal of that financial asset.

Modification of cash flows of financial assets and revision in estimates of cash flows

Modification of cash flows of financial assets and revision in estimates of cash flows when the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the de-recognition of that financial asset in accordance with Ind AS 109, HAM SPV's recalculate the gross carrying amount of the financial asset and recognize a modification gain or loss in the Statement of Profit and loss. The gross carrying amount of the financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate. Any costs or fees incurred are adjusted to the carrying amount of the modified financial asset and are amortized over the remaining term of the modified financial asset. If HAM SPV's revise its estimates of payments or receipts (excluding modifications and changes in estimates of expected credit losses), it adjusts the gross carrying amount of the financial asset or amortized cost of a financial liability to reflect actual and revised estimated contractual cash flows. HAM SPV's re-calculates the gross carrying amount of the financial asset or amortized cost of the financial liability as the present value of the estimated future contractual cash flows that are discounted at the financial instrument's original effective interest rate. The adjustment is recognized in the Statement of Profit and Loss as an income or expense.

ii. Financial Liabilities

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Loans and borrowings are subsequently measured at amortized costs using Effective Interest Rate method. Financial liabilities at fair value through profit or loss (FVTPL) are subsequently measured at fair value.

De-recognition of financial liabilities

Financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of the new liability. The difference in the respective carried amount is recognized in the Consolidated Statement of Profit and Loss.

iii. Classification as debt or equity

Debt and equity instruments issued by Trust Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

iv. Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Trust Group considers the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial Statements is determined on such a basis and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 "Inventory" or value in use in Ind AS 36 "Impairment of Assets".

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that entity can access at measurement date

Level 2 inputs other than quoted prices included in Level 1, that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and

Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

m) Cash and cash equivalents

Cash and cash equivalents in the Consolidated Balance Sheet comprise of cash at banks and on hand and short-term deposits with an original maturity of three months or less and highly liquid instruments (overnight mutual funds) which are subject to an insignificant risk of changes in value.

n) Consolidated Statement of Cash Flows

Consolidated Statement of Cash flows is prepared segregating the cash flows from operating, investing and financing activities. Cash flows from operating activities is reported using indirect method. Under the indirect method, the net profit/(loss) is adjusted for the effects of:

a. transactions of a non-cash nature;
b. any deferrals or accruals of past or future operating cash receipts or payments and,
c. all other items of income or expense associated with investing or financing cash flows.

The cash flows from operating, investing and financing activities of the Trust Group are segregated based on the available Statements. Cash and cash equivalents are reflected as such in the Consolidated Statement of Cash Flow and excludes balances which are not available for general use as on the date of Consolidated Balance with a specific disclosure.

o) Investment property

Property that is held for long-term rental yields or for capital appreciation (including property under construction for such purposes) or both and that is not occupied by the Trust Group, is classified as investment property. Investment property is measured initially at cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalized to the assets carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Trust Group and the cost of the item can be measured reliably.
An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognized.

p) Borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using effective interest method.

The fair value of the liability portion of the optionally convertible debentures is determined by discounting the projected future cashflows of the principal and interest component at coupon rate. The amount is recorded as a liability on an amortized cost basis until extinguished on conversion or redemption of debentures. The reminder of the proceeds is attributable to the equity portion of the compound instrument. This is recognized and included in shareholders' equity, net of income tax effects, and not subsequently remeasured.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other gains/(losses).

Borrowings are classified as current liabilities unless the Trust Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if lender agreed, after the reporting period and before the approval of the financial Statements for issue, not to demand payment as a consequence of the breach.

q) Borrowing costs

Borrowing costs include interest calculated using the effective interest method, amortization of ancillary costs and other costs the Trust Group incurs in connection with the borrowing of funds. General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying assets are capitalized during the period of time that is required to complete and prepare the qualifying asset for its intended use or sale. Capitalization of borrowing costs is suspended and charged to the Consolidated Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.

Income earned on the temporary investment of specific borrowings pending their expenditure on qualifying asset is deducted from the borrowing costs eligible for capitalization.

Other borrowing costs are expensed in the period in which they are incurred.

r) Employee benefits

Employee benefits includes provident fund, gratuity and compensated absences.

Short-term employee benefit

All employee benefits falling due wholly within twelve months of rendering the service are classified as short- term employee benefits. The benefits like salaries, wages, short-term compensated absences etc. and the expected cost of bonus, and ex-gratia are recognised in the period the related service is rendered at undiscounted amount of benefits expected to be paid in exchange for that service.

The cost of short-term compensated absences is accounted as under:
- in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- in case of non-accumulating compensated absences, when the absences occur.

Post-employment benefits

(a) Defined contribution plans:

The Trust Group offers its employees State governed provident fund linked with employee pension scheme as defined contribution plans. The contribution paid/ payable under the scheme is recognised during the period in which the employee renders the related service.

(b) Defined benefit plans:

The SPVs operate an unfunded defined benefit gratuity plan other than two of the SPVs viz. DATRPL and WUPTPL, that make contributions to a separately administered fund through annual contributions to Life Insurance Corporation of India under its Employee Gratuity Scheme. Trust Group's liability towards gratuity is determined at each period end.

For defined benefit gratuity plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re- measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service costs are recognised in profit or loss on the earlier of the date of the plan amendment or curtailment, and the date that the Trust Group recognises related restructuring costs.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Defined benefit costs are categorized as follows:
- service cost (including current service cost, past service cost, as well as gains and losses on curtailments);
- net interest expense or income; and
- re-measurement

The Trust Group presents the first two components of defined benefit costs in Consolidated Statement of Profit and Loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The present value of the defined benefit liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

(c) Other long-term employee benefit
The obligation for other long-term employee benefits such as long-term compensated absences, are measured at the present value of the estimated future cash outflows expected to be made by the Trust Group in respect of services provided by employees up to the reporting date.

Liability with regard to compensated absences is accrued based on actuarial valuations determined using projected unit credit method, at the Balance Sheet date, carried out by an independent actuary. Gains or losses arising out of actuarial valuations are recognised immediately in the Statement of Profit and Loss as income or expense respectively. Long-term incentive plan (LTIP) is structured as a cash-settled scheme, wherein notional LTIP Cash Points ("LCPs") are awarded to participants based on a Board defined performance measure of Cube Highways Trust over future years. Liability with regard to LTIP is accrued based on actuarial valuations determined using projected unit credit method, at the Balance Sheet date, carried out by an independent actuary.

s) Inventories

Inventories include stores and spares used in operation and maintenance of the road highways. Inventories are stated at the lower of cost and net realisable value. Cost of inventories include all costs incurred in bringing the inventories to their present location and condition. Costs are assigned to individual items of inventory based on first-in-first-out basis. Cost of purchased inventory are determined after deducting rebates and discounts.

t) Insurance claims

Insurance claims are accounted for based on claims admitted / expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

u) Leases

The Trust Group assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an sidentified asset, the Trust Group assesses whether: (i) the contract involves the use of an identified asset

(ii) the Trust Group has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Trust Group has the right to direct the use of the asset

At the date of commencement of the lease, the Trust Group recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases, which are accounted for as under.

Short-term leases and leases of low-value assets

Short term leases are leases with a term of twelve months or less. For short-term and low value leases, the Trust Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

Currently, the Trust Group has lease contracts which are short-term leases or leases of low-value assets.

v) Provisions, contingencies and contingent assets

A provision is recognized when the Trust Group has a present obligation (legal or constructive) as a result of past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, in respect of which a reliable estimate can be made of the amount of the obligation.

Contingent liabilities are disclosed in notes in case of a possible obligation arising from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity or a present obligation arising from past events but is not recognized because it is not probable that an outflow of embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

A contingent asset is not recognised unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements. Contingent liabilities and contingent assets are reviewed at each balance sheet date.

w) Taxation

Income tax

Income tax expense or credit for the period is the tax payable on current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. The current income tax charge is calculated based on tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates, positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and provisions are established where appropriate based on amounts expected to be paid to the tax authorities.

Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Tax

Deferred tax is recognised on temporary differences, being the differences between the tax bases of assets and liabilities and their carrying amount in the financial Statements. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all temporary differences. Deferred tax assets are recognised for temporary differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realized. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is reasonable certainty supported by convincing evidence that there will be sufficient future taxable income available to realize the deferred tax assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the entity has a legally enforceable right for such set off. Deferred tax assets are reviewed at each reporting date for their realisability.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the entity will pay normal income tax. Accordingly, MAT is recognised as a deferred tax asset in the Consolidated Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Trust Group.

Current and deferred tax relating to items directly recognised in other comprehensive income and reserves are recognised in other comprehensive income and reserves respectively and not in the Consolidated Statement of Profit and Loss.

x) Impairment of non-financial assets

The carrying values of assets / cash generating units at each reporting date are reviewed for impairment if any indication of impairment exists. If any indication exists, the Trust Group estimates the asset's recoverable amount. use.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the Consolidated Statement of Profit and Loss.

The recoverable amount is the value in use which is based on the estimated future cash flows discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset for which the estimated future cash flows have not been adjusted.

When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Consolidated Statement of Profit and Loss.

y) Provision for periodic maintenance / resurfacing obligations

The Trust Group estimates and provides for contractual obligations as per Service Concession Arrangement (SCA) with the Authority to restore the infrastructure to a specified level of serviceability at periodic intervals or restore the infrastructure to a specified condition before it is handed over to the Authority. Provisions are measured based on management’s estimate required to settle the obligation at the balance sheet date and are discounted using a rate that reflects the time value of money. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost. The same is reviewed at each balance sheet date and adjustments if any to the carrying amount is provided for accordingly.

z) Earnings per Unit

Basic earnings per unit are calculated by dividing the net profit / (loss) for the period attributable to unit holders of the Trust by the weighted average number of units outstanding during the period.

For the purpose of calculating diluted earnings per unit, the profit or loss for the period attributable to unit holders of the Trust and the weighted average number of units outstanding during the period are adjusted for the effects of all dilutive potential units.

Dilutive potential units are deemed converted as of the beginning of the reporting date, unless they have been issued at a later date. In computing diluted earnings per unit, only potential equity units that are dilutive and which either reduces earnings per unit or increase loss per units are included.

Details of the latest fair value of SPV wise investment properties are as under:

Entity	**Valuer [(i)]**	**Dated**	**As at September 30, 2025**	**As at September 30, 2024**	**As at March 31, 2025**	**As at March 31, 2024**	**As at March 31, 2023**
APEPL	External valuer	August 06, 2023	0.72	0.72	0.72	0.72	-
DATRPL	External valuer	August 06, 2023	1.46	1.46	1.46	1.46	-
FRHPL	External valuer	August 06, 2023	0.41	0.41	0.41	0.41	-
JMTPL	External valuer	August 06, 2023	3.59	3.59	3.59	3.59	-
MBEL	External valuer	August 06, 2023	3.80	3.80	3.80	3.80	-

(i) External valuer is registered valuer as defined under rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017.

(ii) The fair value was derived using the market comparable approach based on prevailing market prices without any significant adjustments being made to the market observable data. SPV obtains independent valuation for its respective investment property once in a block of three years. Management considers that the carrying amount of the investment property as reported above approximates its fair value.

(iii) Investment properties of MBEL (September 30, 2024: MBEL ,March 31, 2025: MBEL ,March 31, 2024: APEPL & MBEL, March 31, 2023: NA) is hypothecated as security for borrowings, refer note 21.

(iv) The charges on Investment properties of DATRPL, FRHPL, MBEL, APEPL and JMTPL have been fully satisfied during the year ended March 31, 2024. However, the respective SPVs are in the process of getting the pledge mortgage vacated with the concerned authorities.

(v) The Trust Group acquired an investment property amounting to Rs. 1.82 million as part of the acquisition transaction referred to in note 50A.

(ii) During the year ended March 31, 2024, the Trust alloted 380,259,172 Ordinary Units of Rs. 100 each as Fresh Issue aggregating to Rs. 38,025.92 million. The details of utilisation of fresh proceeds are as follows:-

Particulars	Proposed Utilisation	Actual Utilisation upto March 31, 2024	Unutilised Amount as at March 31, 2024
Providing loans to SPV's for repayment or pre-payment of debt, including any accrued interest, availed by them from certain banks and financial institutions and the Sponsors and its Associates (including all accrued interest), certain capital expenditure and creation of debt service reserve account for the InvIT Loan.	34,742.92	34,742.92	-
General Purposes including funding of expenses of the InvIT (including interest on InvIT Loan) and refinance fees	3,268.00	3,268.00	-
Offer Expense	15.00	15.00	-
Total	**38,025.92**	**38,025.92**	-

(iii) There is reclassification during the half year ended September 30, 2025 of 9.62 million (September 30, 2024: 44.10 million, March 31, 2025: 44.10 million , March 31, 2024: Nil , March 31, 2023: Nil) Subordinate Units to Ordinary Units and extinguishment of 27.87 million (September 30, 2024: 75.90 million, March 31, 2025: 75.90 million, March 31, 2024: Nil, March 31, 2023: Nil) Subordinate Units (Refer note 64 and 65).

(iv) Issue expenses of Rs. 10.94 million incurred during year ended March 31, 2024 in connection with issue of units had been reduced from the Unit capital in accordance with Ind AS 32 Financial Instruments: Presentation.

(v) Under the provisions of the InvIT Regulations, the Trust is required to distribute to Unitholders not less than 90% of the Net Distributable Cash Flows of the Trust for each financial year. Accordingly, a portion of the Unit Capital contains a contractual obligation of the Trust to pay to its Unitholders as cash distributions. Hence, the Unit Capital is a compound financial instrument which contain both equity and liability components in accordance with Ind AS 32 - Financial Instruments: Presentation. However, in accordance with SEBI Circulars issued under the InvIT Regulations, the Unit Capital has been presented as "Equity" in order to comply with the requirements of Chapter 3 to the SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025 (as amended) dealing with the minimum disclosures for key financial information/statements. Consistent with Unit Capital being classified as equity, the distributions to Unitholders is also presented in Consolidated Statement of Changes in Unitholders' Equity when the distributions are approved by the Board of Directors of Investment Manager other than repayment of capital. As per Clause 4.2.8(b) of the SEBI Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, distributions made by an InvIT to its unitholders that represent a repayment of capital should be disclosed as a negative item on the face of the Consolidated Balance Sheet. However, for reporting periods up to March 31, 2025, such distributions were previously reflected as a reduction in retained earnings.

(vi) **Sponsor lock in**

In terms of the SEBI InvIT Regulations, the Sponsors are required to, collectively, hold not less than 15% (fifteen percent) of the Ordinary Units on a post-Offer basis which it shall be locked-in for a period of three years from the date of listing of the Ordinary Units. Further, the unitholding of Ordinary Units of the Sponsors, exceeding 15% (fifteen percent) on a post-Offer basis, shall be locked-in for a period of not less than one year from the date of listing of the Ordinary Units.On April 19, 2023 (listing date) and on March 31, 2024, Cube Highways and Infrastructure III Pte. Ltd. ("CH III") holds 246,578,212 Ordinary Units, aggregating to 19.11% of the Ordinary Units on a post-Offer basis, out of which 193,551,917 Ordinary Units held by CH-III, aggregating to 15% of the Ordinary Units on a post-Offer basis, shall be locked-in for a period of three years from the date of listing of the Ordinary Units. As on March 31, 2025, CH III holds 279,654,900 Ordinary Units, aggregating to 20.96% of the Ordinary Units on a post-Offer basis, out of which 200,167,255 Ordinary Units held by CH-III, aggregating to 15% of the Ordinary Units on a post-Offer basis, are locked-in for a period of three years from the date of listing of the Ordinary Units. Further, the unitholding of Ordinary Units of the Sponsors, exceeding 15% (fifteen percent) on a post-Offer basis, shall be locked-in for a period of not less than one year from the date of listing of the Ordinary Units.

As at September 30, 2025, Cube Highways and Infrastructure III Pte. Ltd. ("CH III") holds 279,654,900 Units, aggregating to 20.81% of the Units on a post-Offer basis, out of which 201,610,464 Units held by CH-III, aggregating to 15% of the Units on a post-Offer basis, are locked-in for a period of three years from the date of listing of the Units (i.e. from April 19, 2023).

(b) Terms and rights attached to unit:

The Trust has two class of units having a par value of Rs. 100 per unit namely Ordinary Unit and Subordinate Unit.

Terms in relation to Ordinary unit: Each unit represents an undivided beneficial interest in the Trust . Each holder of Ordinary unit is entitled to one vote per unit. The Ordinary Unitholders have the right to receive at least 90% of the Net Distributable Cash Flows of the Trust at least once in each financial year in accordance with the SEBI InvIT Regulations. The Board of Directors of the Investment Manager approves distributions. The distribution will be in proportion to the number of units held by the unitholders. The Trust declares and pays distributions in Indian rupees. The distributions will be as per the distribution policy of the Trust.

The Unitholder(s) shall not have any personal liability or obligation with respect to the Trust.

Terms in relation to Subordinate unit: The Subordinate Unitholders shall not be entitled to any distribution rights or other economic rights or any other rights available in relation to the Ordinary Units.

The Subordinate Unitholders shall not be entitled to any voting rights in relation to the Trust and/or its Project SPVs. Further, the Subordinate Unitholders shall not be entitled to receive notices of or participate in, any meeting of the Unitholders holding Ordinary Units, including the annual meeting of Unitholders, in their capacity as holders of the Subordinate Units, unless it is proposed to vary the terms of the Subordinate Units. Further, subject to applicable law and except as required for the purposes of Trust Deed, the Subordinate Unitholders shall not be considered, for the purposes of the rights of unitholders under Regulation 22 of the InvIT Regulations.

The Sponsors shall not transfer the Subordinate Units to any entity which is not a sponsor of the Trust or an Associate of the Sponsors. The Subordinate Units shall remain unlisted at all times unless if mandated under applicable law or by any regulatory and statutory authority.

(1) Entitlement Event A (Refer note 64)

Date of Trigger	June 30, 2024 (Completed reclassification on July 19, 2024)
Underlying Reference Initial Portfolio Asset	DATRPL
Actual Performance Metric	Cumulative actual toll revenues (excluding Overloading Revenue and Penalty Revenue) for financial years ended March 31, 2023 and March 31, 2024, as provided under the audited financials of DATRPL, rounded off to the nearest multiple of one lakh.
Base Performance Metric	Rs. 9,900 million
Entitlement Terms	For every additional Rs. 0.10 million of Actual Performance Metric over and above the Base Performance Metric, number of Initial Tranche Subordinate Units as defined below will be entitled to carry the same rights as Ordinary Units, subject to limit defined under Maximum Entitlement Event A Number of Initial Tranche Subordinate Units = 425,000/ issue price per Ordinary Unit allotted in the Initial Offer
Maximum Entitlement Event A	Maximum number of initial Tranche Subordinate Units that can be entitled to carry the same rights as Ordinary Units based on occurrence of Entitlement Event A = 12,000 million/ issue price per Ordinary Unit allotted in the Initial Offer

(2) Entitlement Event B (Refer note 65)

Date of Trigger	June 30, 2025 (Completed reclassification on July 14, 2025)
Underlying Reference Portfolio Assets	JMTPL & MBEL
Actual Performance Metric	Cumulative actual toll revenues (excluding Overloading Revenue and Penalty Revenue) for the financial years ended March 31, 2023, March 31, 2024 and March 31, 2025, as provided under the audited financials of JMTPL and MBEL, rounded off to the nearest multiple of one lakh.
Base Performance Metric A	Rs. 9,375 million
Base Performance Metric B	Rs. 9,750 million
Entitlement Terms	1. For every additional Rs. 0.1 million of Actual Performance Metric over the Base Performance Metric A and up to Base Performance Metric B, number of Initial Tranche Subordinate Units as defined below will be entitled to carry the same rights as Ordinary Units Number of Initial Tranche Subordinate Units = 1,40,000/ issue price per Ordinary Unit allotted in the Initial Offer. 2. For every additional Rs. 0.1 million of Actual Performance Metric over and above the Base Performance Metric B, number of Initial Tranche Subordinate Units as defined below will be entitled to carry the same rights as Ordinary Units. Number of Initial Tranche Subordinate Units = 220,000/ issue price per Ordinary Unit allotted in the Initial Offer.
Maximum Entitlement Event B	Maximum number of Initial Tranche Subordinate Units that can be entitled to carry the same rights as Ordinary Units based on occurrence of Entitlement Event B = 3,750 million/ issue price per Ordinary Unit allotted in the Initial Offer

Retained earnings
Retained earnings are created from the profits earned by the Trust as adjusted for distribution to the unitholders .The distributions by the Trust to its unitholders are based on the Net Distributable Cash Flows of the Trust under the SEBI InvIT regulations.

Capital Reserve
Capital reserve is created on account of extinguishment of Subordinate Units held by a sponsor(Refer note 64 and 65).

	Closing Balance	**(10,361.08)**	**(3,477.42)**	**(6,840.23)**	**-**	**-**

*As the Trust had reduced the Retained Earnings (under Other Equity) for the amount of NDCF distribution in the nature of repayment of capital in past periods, in terms of Clause 4.2.8(b) of the SEBI Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, the Trust is required to regroup the figures for Retained Earnings (under Other Equity) for prior periods presented in the Consolidated Financial Statements and shown the same as a separate line item on the face of the Consolidated Balance sheet. Accordingly the Trust has regrouped the Repayment of Capital from Retained earnings to Distribution-Repayment of Capital.

Put Option available with the Lenders

At the end of the 10th year and the 15th year from the Initial Drawdown Date (each such date being "Put Option Exercise Date"), each of the Lenders shall have the option to, within a period of 120 days from each such Put Option Exercise Date ("Put Option Exercise Period"), require the Trust to mandatorily prepay the Outstanding Obligations in respect of its Commitment, in full, without any Prepayment Premium (the "Put Option"), by issuing a notice to the Trust requesting for such prepayment ("Put Option Exercise Notice"). Upon exercise of the Put Option, the Trust shall mandatorily prepay the entire Outstanding Obligations in relation to the Commitment of such Lender within 120 days of the date of Put Option Exercise Notice.

* In accordance with clause 5.2.1(b)(i)(B) of the Amended and Reinstated Facility Agreement of ICICI Bank Limited, the Board of Direcors of Investment Manager (acting on behalf of Trust) has passed resolution dated March 27, 2025 to refinance the ICICI Bank's loan. The said loan is refinanced subsequent to the year end on April 25, 2025.

21(ii) Borrowing footnote term loans

For repayment terms and security details of the outstanding non-current borrowings (including current maturities) refer the table below:

Security Terms:

Below are the common security details for the Term loans and Non Convertible Debt Securities:

a)First ranking pari-passu charge, by way of hypothecation on the following (as more stipulated under the Deed of Hypothecation):-

(i) on all moveable assets and the receivables of the Issuer in relation to the Project SPVs, present and future including but not limited to:
(I) all receivables of the Issuer from the Project SPVs;
(II) loans and advances (and all rights, title, security and interest thereunder) made by the Issuer to Project SPVs except for the Excluded SPVs, including the rights under the Substitution Agreement – Project SPVs, Escrow Agreement – Project SPVs and all other Project Documents;
(III) the interest and principal repayment of loans advanced by the Issuer to Project SPVs;
(IV) dividends and any other amounts to be paid or payable by the Project SPVs to the Issuer;
(V) inventories, contractual rights, securities, patents, trademarks, other Intellectual Property and Intellectual Property Rights, equipment and/or insurances (in each instance, if any); and
(VI) all other current assets of the Issuer, including all the Issuer's tangible and intangible assets, including but not limited to its goodwill, undertaking and uncalled capital, both present and future.

(ii) all the Accounts and all other bank accounts of the Issuer in which the Free Cashflows from the Project SPVs owned by the Issuer will be deposited/ credited or any other account opened / maintained by the Issuer in relation to such Project SPVs. It is hereby clarified that bank accounts opened by the Issuer in pursuance to Regulation 9(1) of the Securities and Exchange Board of India (Investment Infrastructure) Regulations, 2014 shall not be included for the purposes of this Section.

(b) A first ranking exclusive Security Interest, by way of hypothecation on the DSR;
(c) An agreement to assign the loans advanced by the Issuer to the Project SPVs (except for the Excluded SPVs) and securities created in favour of the Issuer in respect of such loans (including the right of substitution and termination and invocation of the provisions of Escrow Agreement-Project SPVs in case of default by such Project SPVs except for the Excluded SPVs) in relation to such loans granted by the Issuer. Provided that such assignment shall be effective upon occurrence of an Event of Default;
(d) A pledge of all bonds, non-convertible debentures, or any other securities (except the equity shares) of Project SPVs (other than the Excluded SPVs) held by the Issuer.
(e) A pledge of 100% equity shares (including QEPL which was pledged on October 03, 2025) on a Fully Diluted Basis of all Project SPVs (except for the Excluded SPVs), other than the Nominees' Shares.
(f) A negative lien, other than on Permitted Disposals, on the immovable and movable assets (including current assets and cash flows) of the Project SPVs except for the Excluded SPVs, subject to the rights of the Authorities under the respective Concession Agreements.
(g) In respect of 7.49% Debt Securities, a corporate guarantee and a shortfall undertaking from the Project SPVs except by the Excluded SPVs, in relation to upstreaming of funds and/or direct payment to the Debt Security Holders towards dues owed and payable by the Issuer in relation to the Debt Securities in a form and manner instructed by the Debt Security Holders. The same was waived off w.e.f May 31, 2024.
(h) A pledge of bonds, non-convertible debentures, or any other security (except equity shares) of the Excluded SPVs held by the Issuer and pledge over 100% (one hundred percent) equity shares of APEL and pledge over 99.97% (ninety-nine-point nine seven percent) equity shares of MBEL and a pledge over 100% (one hundred percent) of the equity shares of the other Excluded SPVs, in each case other than the Nominees' Shares.

"Excluded SPVs" referred above shall mean, collectively:
1) Andhra Pradesh Expressways Limited till November 20, 2024*
2) Mahua Bharatpur Expressways Limited; and
3) such other Project SPVs (other than the Tranche I SPVs), in respect of which the Debt Security Holders do not have any Security Interest in accordance with the terms of this Deed.
*Pursuant to the Clause 31.2 (e) and 31.2 (c) of Debt Security Trust Deed dated June 19,2024, and June 14, 2023 respectively, post receipt of no objection certificate for satisfaction of charge for its borrowing from existing lenders by APEPL, Trust has pledged the securities held in APEL in favour of Security Trustee on November 21, 2024.

*Refer note 51 for Revenue from contracts with customers

**Revenue from operations for the half year ended September 30, 2025 includes Rs. 196.50 million being compensation receivable from National Highways Authority of India (NHAI) towards revenue estimated by the Trust SPVs, arising out of Annual Pass with effect from August 15, 2025, priced at Rs. 3,000 for F.Y. 2025-26 which entitles the holder to either 200 Toll-free crossings or One year of Validity which occurs earlier, which is included under Trade receivables as at September 30, 2025.

***Revenue from operations for the half-year ended 30 September 2025, includes Rs. 708.06 million, which was settled pursuant to the order dated 31 July 2025, of the High Court of Judicature at Madras between Tamil Nadu State Transport Corporation (TNSTC) and Trust SPVs (SMTPL, MKTPL, NKTPL, and KETPL) towards toll fees for the period from November 2020 to 17 July 2025. This pertains to TNSTC's buses passing through the four tolls at Madurai-Kanyakumari (MK) stretch. Of this amount, the Trust SPVs received Rs. 293.39 million on 21 August 2025, Rs. 39.28 million on 22 August 2025, and the remaining Rs. 375.39 million (including Rs. 42.71 million for the period from 1 April 2025 until the settlement date of 17 July 2025) on 14 October 2025.

*The Trust Group has instituted a Long-Term Incentive Plan ("LTIP" or the "Plan") effective April 1, 2024, to incentivise and retain key executives of SPVs. The Plan was approved by the Board of Directors of Investment Manager on February 28, 2025, and is applicable to eligible employees as and when determined by the Board. The LTIP is structured as a cash-settled scheme, wherein notional LTIP Cash Points ("LCPs") are awarded to participants based on a defined performance measure of Trust (Cube group entity) over future years. LCPs are granted annually on April 01, from FY 2024 to FY 2027, over four grant cycles. Each grant vests over three years in the ratio of 20% after the first year, 30% after the second year, and 50% after the third year. The Board may extend or modify the Plan beyond 2027 at its discretion with appropriate modifications. The LTIP does not involve the issuance of any shares or units and therefore does not result in equity dilution. Accordingly, the Trust Group has recognized a liability based on an actuarial valuation using a discount rate of 5.90%. The expense recognized for the half year ended September 30, 2025 is Rs. 27.52 million (September 30, 2024: Nil, March 31, 2025: Nil, March 31, 2024: Nil, March 31, 2023: Nil).

38 Earnings per unit (EPU)					
Basic EPU amounts are calculated by dividing the profit /(loss) for the half year/year attributable to unit holders by the weighted average number of units outstanding during the half year / year.					
Diluted EPU amounts are calculated by dividing the profit/ (loss) attributable to unit holders by the weighted average number of units outstanding during the half year/year plus the weighted average number of units that would be issued on conversion of all the dilutive potential units into unit capital.					
The following table reflects the income and unit data used in the basic and diluted EPU computations:					
Profit/(loss) attributable to unit holders:					
Profit/(loss) for the half year/year attributable to owners of the Trust Group for calculating basic EPU (Rs. in million)	406.77	(260.41)	(357.33)	(7,059.22)	(277.88)
Adjustments for reclassification of subordinate units	-	-	-	-	-
Profit/(loss) for the half year/year attributable to owners of the Trust Group for calculating diluted EPU (Rs. in million)	**406.77**	**(260.41)**	**(357.33)**	**(7,059.22)**	**(277.88)**
Calculation of weighted average number of units outstanding (units in Million):					
Weighted average number of Ordinary units outstanding (Units in million)	1,344.07	1,334.45	1,334.45	1,233.94	-
Add:Estimated Subordinate Units to be reclassified to ordinary Units[(i)]	-	-	0.03	0.12	-

Notes:

(i) Subordinate units considered for calculating Basic and Diluted EPU (Refer note 64 & 65)

Particulars	Date considered for Basic and Diluted EPU	Units to be reclassified	Date of reclassification	Units reclassified
DATRPL Subordinate Units (Units in million)	March 31, 2024	44.10	July 19, 2024	44.10
JMTPL & MBEL Subordinate Units (Units in million)	March 31, 2025	9.62	July 14, 2025	9.62

(ii) The Trust has issued units on April 17, 2023, hence, the disclosures in respect of the Earnings per units have not been given for the year ended March 31, 2023.

(iii) There are no other dilutive units to be considered for the purpose of calculating diluted EPU.

(iv) There have been no other transactions involving units or potential units between the reporting date and the date of authorisation of these Consolidated Financial Statements.

(V) Earning per unit for the half year ended September 30, 2025 and September 30, 2024 are not annualised.

39 Tax expense

	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
(i) Income tax expense recognised in Consolidated Statement of Profit and Loss					
Current tax	221.45	164.29	367.11	287.41	-
Tax for earlier years	4.52	-	18.54	5.40	-
Deferred tax	(72.48)	(31.24)	(531.58)	(102.11)	-
	153.49	**133.05**	**(145.93)**	**190.70**	**-**

The major components of income tax expense and the reconciliation of expense based on the respective effective tax rate and the reported tax expense in Consolidated Statement of Profit and Loss are as follows :

Particulars					
Profit/(loss) before tax	560.34	(127.31)	(503.13)	(6,868.45)	(277.88)
Blended Tax Rate [(ii)]	39.98%	37.80%	38.29%	36.68%	42.74%
Expected tax expense [A]	**224.02**	**(48.12)**	**(192.65)**	**(2,519.21)**	**(118.77)**
Tax effect of adjustment to reconcile expected income tax expense to reported income tax expense:					
(a) Effect of transactions that are not considered in determining taxable income	17.11	12.97	(0.27)	27.87	118.77
(b) Impact of income not allowable u/s 10(23FC) and related expenditure including consolidation adjustments not deductible as per Income-tax Act, 1961	(443.47)	(365.45)	(534.23)	1,589.28	-
(c) Effect due to change in tax rate	-	-	-	15.70	-
(d) Effect of income that is exempt from taxation u/s 80IA of the Income-tax Act, 1961	(346.59)	(212.17)	(586.11)	(557.89)	-
(e) Impact of tax adjustments related to earlier years	4.52	-	(330.04)	5.40	-
(f) Others	0.02	0.16	0.07	1.64	-
Effects of recognised deferred tax on temporary differences earlier unrecognised	(176.83)	(292.43)	110.13	(171.80)	-
Effects of unrecognised deferred tax on deductible temporary differences and tax losses including those reversing or originating and reversing during tax holiday period u/s 80IA of the Income tax Act, 1961					
- Difference between carrying value of property, plant and equipment, intangible assets and receivable under service concession arrangement as per books and tax	(130.92)	(37.57)	(130.32)	(4.43)	-
- Effects of unrecognised deferred tax assets/liabilities on deductible temporary differences	-	-	-	-	-
- Income taxable on receipt basis	1.52	(2.37)	2.85	0.16	-
- Expense allowed in tax on payment basis	94.88	(14.54)	213.29	(156.07)	-
- Unamortised processing fees on borrowings	12.45	0.36	(7.26)	3.61	-

- Interest disallowed u/s 94B of the Income-tax Act, 1961 carried forward	(92.04)	-	16.24	(98.35)	-
Total adjustments [B]	**(70.53)**	**181.17**	**46.72**	**2,709.92**	**118.77**
Actual tax expense [C=A+B]	**153.49**	**133.05**	**(145.93)**	**190.70**	**-**

Note:
(i) Trust is a business trust registered under SEBI InvIT Regulations. Hence, the interest and dividend received or receivable by Trust from SPV's is exempt from tax under section 10(23FC) of the Income-tax Act, 1961(Act). Further any expenditure incurred in relation to earning the exempt income is not tax deductible in view of the provisions of section 14A of the Act.

The income of Trust other than exempt income mentioned above, is chargeable to tax at the maximum marginal rates in force of 42.74% (for the half year ended September 30, 2025: 42.74% , for the half year ended September 30, 2024: 42.74%, for the year ended March 31, 2025: 42.74%, for the year ended March 31, 2024: 42.74%) except for the income chargeable to tax on transfer of short term capital assets under section 111A of the Act and long term capital assets under section 112 of the Act.

(ii) Applicable rate to SPV and Cube Highways Trust Standalone wise tax rate ranges between 25.17% - 42.74%. Blended tax rate has been considered for effective tax rate reconciliation.

(iii) In JMTPL, MBEL, WUPTPL, WVEPL, GAEPL, NDEPL, NAMEL, DATRPL and FRHPL - The Company has elected not to exercise the option permitted under section 115BAA of the Income Tax Act, 1961 as introduced by the Taxation Laws (Amendment) Ordinance, 2019.

(ii) Unrecognised deferred tax:

(A) Deferred tax assets/(liability) has not been recognised in respect of following items because the said temporary differences, business losses etc. will reverse during the holiday period u/s 80IA of the Income-tax Act, 1961 and deferred tax assets are not recognised in the absence of reasonable certainty that future taxable amounts will be available to utilize these temporary differences and business losses:

Particulars					
Business losses and unabsorbed depreciation	8,265.01	1,848.72	1,454.45	2,007.53	-
Interest disallowed under section 94B of the Income Tax Act, 1961	2,052.02	-	2,406.02	-	-
Minimum Alternate Tax (MAT) credits	-	-	2.95	-	-
Difference between tax written down value (WDV) and book WDV of intangible assets	(8,159.37)	(2,024.71)	(1,872.73)	(2,189.79)	-
Expense allowed in tax on payment basis	2,932.21	1,217.69	2,664.64	1,490.58	-
Income taxable on receipt basis	(34.69)	(4.31)	(5.37)	(7.28)	-
Total	**5,055.18**	**1,037.39**	**4,649.96**	**1,301.04**	**-**

	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023

(B) Deferred tax assets as at September 30, 2025, September 30, 2024, March 31, 2025 , March 31, 2024 & March 31, 2023 in respect of following deductible temporary items have been restricted only to the extent of deferred tax liabilities in the absence of convincing evidence that future taxable amounts will be available to utilize the temporary differences.

Particulars					
Unabsorbed depreciation	11,257.99	8,983.44	16,112.60	21,232.16	-
Business losses	9,900.30	20,823.30	8,028.93	4,856.05	-
Interest disallowed under section 94B of the Income tax Act, 1961	37.87	681.90	370.10	1,156.79	-
Difference between tax written down value (WDV) and book WDV of intangible assets	8,579.35	(14,463.47)	(6,220.68)	(13,909.74)	-
Amount allowed in tax on actual basis	603.19	556.85	816.97	385.61	-
Total	**30,378.70**	**16,582.02**	**19,107.92**	**13,720.87**	**-**

(C) Deferred income tax liabilities are recognised for all taxable temporary differences except in respect of taxable temporary differences associated with investments in subsidiaries where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future. Accordingly, deferred income tax liabilities on undistributed cumulative earnings of subsidiaries as at September 30, 2025, September 30, 2024, March 31, 2025 and March 31, 2024 has not been recognised. Further, it is not practicable to estimate the amount of the unrecognized deferred tax liabilities for these undistributed earnings.

(iii) Unused business loss and interest u/s 94B can be carried forward based on the year of origination as follows:

Financial year/period of originati	Financial year of expiry	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
March 31, 2021	March 31, 2029	-	-	-	-	-
March 31, 2022	March 31, 2030	488.29	23.61	-	208.23	-
March 31, 2023	March 31, 2031	401.15	658.29	370.10	948.57	-
March 31, 2024	March 31, 2032	5,370.62	4,927.53	4,898.00	4,429.13	-
March 31, 2025	March 31, 2033	3,379.34	2,326.30	3,472.45	-	-
March 31, 2026	March 31, 2034	2,898.86	-	-	-	-

(iv) Minimum alternate tax (MAT):

Tax credits have been recognised on the basis that recovery is probable in the foreseeable future. This recognised MAT credit expires, if unused, based on the year of origination as follows:

Financial year of origination	Financial year of expiry*	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
March 31, 2018	March 31, 2032	5.25	5.25	5.25	5.25	-
March 31, 2019	March 31, 2032	54.56	54.56	54.56	54.56	-
March 31, 2020	March 31, 2032	62.37	62.37	62.37	62.37	-

40 Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits

(a) Defined contribution plan

The Trust Group contribution to Provident Fund amounting to Rs. 13.99 million (September 30, 2024: Rs. 11.09 million, March 31, 2025: Rs. 23.09 million, March 31, 2024: Rs. 18.83 million, March 31, 2023: Nil) has been recognised in the Consolidated Statement of Profit and Loss under the head Employee benefits expense.

(b) Defined benefit plans

The Trust Group provides for gratuity for employees in India as per The Payment of Gratuity Act, 1972. Employees who are in continuous service for 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month completed proportionately for 15 days salary multiplied for number of completed years of service. The gratuity plan is funded plan for 2 SPVs viz. DATRPL and WUPTPL, these 2 SPVs makes contribution to recognised funds with Life Insurance Corporation of India (pension and group schemes department). For other SPVs, the Trust Group operates the unfunded gratuity scheme.

The gratuity scheme covers substantially all regular employees. Commitments are actuarially determined at year-end. The actuarial valuation is done based on "Projected Unit Credit" method. Gains and losses of changed actuarial assumptions are charged to Consolidated Statement of Profit and Loss.

Gratuity

(i) **Amount recognised in the Consolidated Statement of Profit and Loss is as under:**

Description	For the half year ended September 30, 2025	For the half year ended September 30, 2024	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Current Service Cost	5.55	3.80	7.82	5.15	-
Interest cost on defined benefit obligations	1.58	0.94	2.56	1.49	-

Fair value of plan assets at the end of the half year/year	**18.33**	**17.17**	**17.74**	**16.59**	**-**

(vi) **Change in defined benefit obligations**

Description					
Defined benefit liability at the start of the half year/year	46.13	30.05	30.05	-	-
Additions on account of acquisition (refer note 50)	1.06	1.18	7.17	23.96	-
Adjustments related to employees transferred to/from Cube group entities	(0.99)	0.51	0.11	0.41	-
Interest Cost	1.58	0.94	2.56	1.49	-
Current service cost	5.55	3.80	7.82	5.15	-
Re-measurements (gain)/loss for the half year/year	0.36	1.06	(0.70)	(0.35)	-
Benefit paid directly by the Group	(2.31)	(0.09)	(0.88)	(0.61)	-
Defined benefit liability at the end of the half year/year	**51.38**	**37.45**	**46.13**	**30.05**	**-**

(vii) **The amount included in the Consolidated Balance Sheet arising in respect of its defined benefit obligations/plans**

Description					
Present value of defined benefit obligations/ plans	51.38	37.45	46.13	30.05	-
Fair value of plan assets*	(18.33)	(17.17)	(17.74)	(16.59)	-
Net defined benefit obligations	**33.05**	**20.28**	**28.39**	**13.46**	**-**

Bifurcation of Present Benefit Obligations (PBO) and Plan Assets at the end of half year/year in current and non current

Description					
Current provision (Amount due within one year)*	15.32	10.66	12.64	6.63	-
Non-Current provision (Amount due after one year)	36.06	26.79	33.49	23.42	-
Total PBO at the end of half year/year	**51.38**	**37.45**	**46.13**	**30.05**	**-**
Net plan assets at the end of half year/year*	18.33	17.17	17.74	16.59	-
Net PBO at the end of half year/year	**33.05**	**20.28**	**28.39**	**13.46**	**-**

*Plan assets of Rs. 5.60 million (September 30, 2024: Rs. 4.44 million, March 31, 2025 : Rs. 4.78 million, March 31, 2024 : Nil , March 31, 2023 : Nil) is adjusted from current provision.

(viii) **Sensitivity analysis for gratuity liability:**

Description	For the half year ended September 30, 2025	For the half year ended September 30, 2024	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Impact of change in discount rate					
Present value of obligations at the end of the period	**51.38**	**37.45**	**46.13**	**30.05**	-
- Impact due to decrease of 1.00%	2.36	1.61	3.71	2.50	-
- Impact due to increase of 1.00%	(1.81)	(1.40)	(3.19)	(2.17)	-
Impact of change in salary increase					
Present value of obligations at the end of the period	**51.38**	**37.45**	**46.13**	**30.05**	-
- Impact due to decrease of 1.00%	(2.41)	(1.41)	(3.27)	(2.21)	-
- Impact due to increase of 1.00%	1.75	1.56	3.63	2.48	-

The above sensitivity analysis is based on a change an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligations to significant actuarial assumptions the same method (present value of the defined benefit obligations calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligations liability recognised in the Consolidated Balance Sheet.

Sensitivities due to mortality and withdrawals are not material and hence impact of change due to these not calculated.
Sensitivities as rate of increase of pensions in payment, rate of increase of pensions before retirement and life expectancy are not applicable.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

(ix) **Actuarial assumptions:**

Description					
Discount rate range	6.95%	6.95%	6.70%	7.15%	-
Rate of increase in compensation levels range	7.50% for first year, 6.30% thereafter	7.50% for first year, 6.30% thereafter	7.50% for first year, 6.30% thereafter	7.50% for first year, 6.30% thereafter	-
Retirement age	58 years	58 years	58 years	58 years	-
Mortality rate	100% of IALM (2012-14)	100% of IALM (2012-14)	100% of IALM (2012-14)	100% of IALM (2012-14)	-
Attrition at age (Withdrawal rate %)					
Up to 30 Years	9% per annum	9% per annum	9% per annum	9% per annum	-
From 31 to 44 years	9% per annum	9% per annum	9% per annum	9% per annum	-
Above 44 years	9% per annum	9% per annum	9% per annum	9% per annum	-

Notes:
(i) The plan assets are maintained with LIC of India Gratuity scheme. The details of investment maintained by LIC are not available and therefore not been disclosed.

41 Capital and other commitments

Particulars	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
Estimated amount of contracts remaining to be executed on capital account not provided for (Net of Advance) towards:					
- Property, plant and equipment	-	11.45	-	21.82	-
- Intangible assets- Rights under Service Concession Arrangements	100.27	649.60	464.92	753.13	-
Total	**100.27**	**661.05**	**464.92**	**774.95**	**-**

The Trust Group has other commitments for purchase orders which are issued after considering requirements per operating cycle for purchase of goods and services in normal course of business. The Trust Group does not have any other long term commitments or material non-cancellable contractual commitments/contracts, which might have material impact on the Consolidated Financial Statements.

42 Contingent liabilities and claims

i) Particulars	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
Claims against the Trust Group not acknowledged as debt					
a) In respect of Income-tax matters, disputed by SPVs	562.56	519.52	686.83	225.18	-
b) In respect of Indirect tax matters (VAT/Entry tax/Service tax/GST) disputed by SPVs[(i)]	4,361.56	5,399.56	4,309.77	140.05	-
c) Damages/Penalties levied by NHAI/Independent engineer on account of default/deficiencies in terms of the concession agreement	20.61	61.10	20.61	61.10	-
d) Revenue Claim levied by State Authority (In terms of the SPA entered between the SPVs and erstwhile promoters, these matters are covered under specific indemnity from erstwhile promoters)	114.40	-	-	-	-
e) In respect of Stamp Duty matters, disputed by SPVs[(ii)]	932.70	932.70	932.70	932.70	-
f) Civil suits related to accident claim and land encroachment matter at one SPV	7.70	7.70	7.70	7.80	-

Notes:

(i) Includes GST demand of Rs. 3,571.72 million (inclusive of interest and penalty) received by certain HAM SPVs (acquired by the Trust on June 04, 2024) alleging liability to GST on entire Bid Project Cost amount upfront on receipt of completion certificate, in relation to which the SPVs have filed a writ before the High Court/ appeal before the relevant appellate authority/rectification application before the jurisdiction assessing officer . In terms of the SPA entered between the SPVs and erstwhile promoters, these matters are covered under specific indemnity from erstwhile promoters.

(ii) In light of a Supreme Court decision in Rewa Tollway P. Limited v. The State of Madhya Pradesh & ORS., the Trust has reassessed stamp duty obligations (including for stamp duty matters disputed by certain SPVs referred above) for the concession agreements entered into by the SPVs with NHAI/State authorities, considering inter-alia, types of concession agreement (DBFOT/BOT/TOT/HAM/Annuity), rights under terms and conditions of the concession agreements, indemnity under the Share Purchase Agreements entered by the Trust at the time of acquisition of the SPVs, jurisdiction of the relevant authority, and status of ongoing proceedings. Based on the assessment above supported by the legal advice, the Trust group does not expect the ultimate outflow of resources embodying economic benefits, which could materially affect the financial performance and position of the Trust Group.

(iii) The Management of the Group assesses all material claims in the nature of demands and the show cause notices ("SCNs"), including intimation prior to SCNs, relating to Income tax, Indirect taxes and other litigations against the Group and based on legal advice in certain cases, evaluates whether it is probable, possible or remote ("PPR"). The Group discloses matters as contingent liability that are assessed as possible. The relevant SPVs are contesting the aforesaid notices /order before various authorities and are confident that the matters will be decided in Favor of the SPVs and ultimately no liability is likely to be devolved on the respective SPVs. Future ultimate outflow of resources embodying economic benefits in respect of the above matters are uncertain as it depends on the final outcome of the matter involved.

43 Financial instruments by fair value and category

i) Fair values hierarchy

Financial assets and financial liabilities measured at fair value in the Consolidated Balance Sheet are divided into three levels of fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.
Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.
Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Financial assets/(liabilities) measured at fair value - recurring fair value measurements:

As at September 30, 2025	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets at fair value through profit or loss				
Liquid Investments-mutual funds	-	6,478.22	**-**	**6,478.22**

Valuation process and technique used to determine fair value

The fair value of investments in mutual fund units are based on the net asset value ('NAV') as stated by the issuers of these mutual fund units in the published statements as at each reported balance sheet dates. NAV represents the price at which the issuer will issue further units of mutual fund and the price at which issuers will redeem such units from the investors.

(ii) Fair value of instruments measured at amortised cost

Fair value of instruments measured at amortised cost for which fair value is disclosed as follows using Level 3 inputs:

Particulars	As at September 30, 2025		As at September 30, 2024		As at March 31, 2025		As at March 31, 2024		As at March 31, 2023	
	Carrying value	Fair value	Carrying value	Fair value	Carrying value	Fair value	Carrying value	Fair value	Carrying value	Fair value
Financial assets measured at amortised cost:										
Investments	0.01	0.01	0.01	0.01	0.01	0.01	0.01	0.01	-	-
Trade receivables	2,396.51	2,396.51	2,070.31	2,070.31	1,636.71	1,636.71	600.79	600.79	-	-
Cash and cash equivalents*	1,023.06	1,023.06	350.09	350.09	2,027.33	2,027.33	2,416.84	2,416.84	-	-
Bank balance other than cash and cash equivalents	4,667.05	4,667.05	3,470.00	3,470.00	6,091.68	6,091.68	3,593.98	3,593.98	-	-
Other financial assets	44,171.52	44,171.52	18,657.89	18,657.89	15,401.83	15,401.83	1,827.64	1,827.64	-	-
Total financial assets	**52,258.15**	**52,258.15**	**24,548.30**	**24,548.30**	**25,157.56**	**25,157.56**	**8,439.26**	**8,439.26**	**-**	**-**
Financial liabilities (excluding equity component)										
Borrowings	1,78,824.06	1,78,824.06	1,26,850.70	1,26,850.70	1,50,995.86	1,50,995.86	1,07,201.74	1,07,201.74	-	-
Trade payables	2,318.03	2,318.03	1,935.55	1,935.55	2,227.61	2,227.61	1,645.54	1,645.54	265.97	265.97
Other financial liabilities	1,642.93	1,642.93	6,994.65	6,994.65	1,650.71	1,650.71	1,592.40	1,592.40	-	-
Total financial liabilities	**1,82,785.02**	**1,82,785.02**	**1,35,780.90**	**1,35,780.90**	**1,54,874.18**	**1,54,874.18**	**1,10,439.68**	**1,10,439.68**	**265.97**	**265.97**

The management assessed that cash and cash equivalents, bank balances other than cash and cash equivalents, trade receivables, other financial assets, trade payables, borrowings and other financial liabilities are approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

*Excludes liquid investments.

iii) Valuation process and technique used to determine fair value

The Trust is required to present the Statement of Total Assets at Fair Value and Statement of Total Returns at Fair Value as per SEBI Master Circular No.SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025 as a part of these consolidated financial statements (Refer Statement of Net Assets at Fair Value and Statement of Total Returns at Fair Value) and in terms of Ind AS 36 "Impairment of Assets" impairment assessment of Trust's investment in individual SPV, the Trust has used the significant unobservable inputs in the fair value measurement required for these disclosures, categorised within Level 3 of the fair value hierarchy- level 3, together with a quantitative sensitivity analysis is given below:

Particulars	Input for September 30, 2025	Sensitivity of Input to Fair Value	Increase/ (decrease) in fair value as at September 30, 2025
a. WACC	7.30% to11.10%	+ 0.50%	(12,833.00)
		-0.50%	13,645.00
b. Inflation rate (Wholesale Price Index)	2.05% to 5.10%	+ 1%	15,970.00
		-1%	(12,729.00)

Particulars	Input for September 30, 2024	Sensitivity of Input to Fair Value	Increase/ (decrease) in fair value as at September 30, 2024
a. WACC	8.50% to10.60%	+ 0.50%	(11,327.00)
		-0.50%	12,087.00
b. Inflation rate (Wholesale Price Index)	4.10% to 5.10%	+ 1%	12,676.00
		-1%	(11,159.00)

Particulars	Input for March 31, 2025	Sensitivity of Input to Fair Value	Increase/ (decrease) in fair value as at March 31, 2025
a. WACC	8.30% to 11.57%	+ 0.50%	(11,950.00)
		-0.50%	12,724.00
b. Inflation rate (Wholesale Price Index)	4.10% to 5.10%	+ 1%	15,273.00
		-1%	(14,072.00)

Particulars	Input for March 31, 2024	Sensitivity of Input to Fair Value	Increase/ (decrease) in fair value as at March 31, 2024
a. WACC	10.2% to 11.0%	+ 0.50%	(10,690.00)
		-0.50%	11,426.00
b. Inflation rate (Wholesale Price Index)	4.10% to 5.10%	+ 1%	14,550.30
		-1%	(12,516.20)

Sensitivity analysis is not given for March 31, 2023 as the Trust acquired all the SPVs on and after April 17, 2023.

Further, the key assumptions used as inputs for fair valuation includes determination of future cash flows, traffic estimates, assessment of the variation in concession period in certain subsidiaries considering target traffic/ target revenue subject to approvals from the authorities, revenue growth rate, discount rates, inflation rates and other economic factors. [Also, refer Note 2(III)(d)(2), Note 58 and 59 to Consolidated Financial Statement].

44 Financial risk management

i) Risk Management

The Trust Group activities expose it to variety of financial risks : credit risk, liquidity risk and market risk. The Board of Directors of the Investment Manager("IM") has overall responsibility for the establishment and oversight of the Trust Group's risk management framework. The Trust Group's risk management framework is established to identify and analyse the key risks faced by the Trust Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management framework systems are reviewed periodically to reflect changes in market conditions and Trust Group's activities.

The Board of Directors of the IM oversee compliance with Trust Group's risk management policies and procedures, and reviews the risk management framework in relation to the risk faced by the Trust. The Audit committee as assisted by the internal audit undertakes regular reviews of risk management controls and procedure, the results of which are taken on record by Audit committee.

A) Credit risk

Credit risk is the risk of financial loss to the Trust Group if a counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Trust Group's Cash and cash equivalents, other bank balances, trade receivables, unbilled revenue and other financial assets. Trust Group maximum exposure to credit risk is limited to the carrying amount of financial assets.

Credit risk management

The Trust Group establishes an allowance account for impairment that represents its estimate of losses in respect of its financial assets. The main component of this allowance is estimated losses that relate to specific counterparties. The allowance account is used to provide for impairment losses. Subsequently when the Trust Group is satisfied that no recovery of such losses is possible, the financial asset is considered irrecoverable and the amount charged to the allowance account is then written off against the carrying amount of the impaired financial asset.

Credit risk related to cash and cash equivalents and bank deposits is managed by only accepting highly rated banks and diversifying bank deposits and accounts in different banks. Other financial assets measured at amortised cost includes security deposits, annuity receivable, receivable from related parties and other Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously, while at the same time internal control system in place ensure the amounts are within defined limits.

As at the reporting date, there is no significant concentrations of credit risk. The maximum exposure to credit risk is represented by the carrying value of each financial asset on the Balance Sheet.

Reconciliation of loss allowance for trade receivable, unbilled revenue and other assets from beginning to end of reporting period:

Particulars	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
Opening Balance	201.25	183.56	183.56	-	-
Additions on account of acquisition (refer note 50)	-	-	-	143.97	-
Movement in expected credit loss allowance on trade receivables calculated at lifetime expected credit losses	18.11	-	19.20	42.70	-
Reversal in expected credit loss allowance on trade receivables and advances	(21.86)	-	-	-	-
Adjustment against bad debts written off	-	(9.48)	(1.51)	(3.11)	-
Closing Balance	**197.50**	**174.08**	**201.25**	**183.56**	**-**

The Trust Group estimates the expected credit loss based on specific identified basis. In respect of disputed trade receivables as of September 30, 2025 aggregating Rs 523.26 million relating to the pre acquisition period, the Trust Group has withheld amount of Rs 410.54 million payable to erstwhile shareholders and for remaining amount of Rs 112.72 million the Trust Group will be indemnified by the erstwhile shareholders. In case of majority of other Trade Receivables (including those outstanding for more than 1 year) as of September 30, 2025, the counter party being the Government Undertaking as such does not have significant credit risk.

Other financial assets measured at amortised cost includes security deposits, annuity receivable, receivable from related parties and other. Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously, while at the same time internal control system in place ensure the amounts are within defined limits.

B) Liquidity risk

Liquidity risk is the risk that the Trust Group may encounter difficulty in meeting its present and future obligations associated with financial liabilities that are required to be settled by delivering cash or another financial asset. The Trust Group is exposed to liquidity risk due to borrowings, trade and other payables. Trust Group measures risk by forecasting cash flows. The Trust Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking damage to the Trust Group's reputation. The Trust Group ensures that it has sufficient fund to meet expected operational expenses and servicing of financial obligations.

The Trust Group's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral obligations. The Trust Group requires funds both for short-term operational needs as well as long-term investment programs mainly in growth projects. The Trust Group closely monitors its liquidity position and deploys a robust cash management system. It aims to minimize these risks by generating sufficient cashflows from its current operations, which in addition to the available cash and cash equivalents, liquid investments and sufficient committed fund facilities, will provide liquidity.

Consequently, the Trust Group believes its revenue, along with proceeds from financing activities will continue to provide the necessary funds to cover its short term liquidity needs. In addition, the Trust Group projects cash flows and considering the level of liquid assets necessary to meet liquidity requirement.

The Trust Group has no undrawn borrowing facilities as at reporting date.

(a) Maturities of financial liabilities

The tables below analyse the Trust Group's financial liabilities into relevant maturity categories based on their contractual maturities for all non-derivative financial liabilities:
The amounts (undiscounted) disclosed in the table are the carrying value as at the balance sheet date.

As at September 30, 2025	**Less than 1 year**	**1-2 year**	**2-5 year**	**More than 5 years**	**Total**
Borrowings	5,122.29	5,338.63	27,801.08	1,41,497.69	**1,79,759.69**

C) Market risk

(a) Interest rate risk

i) Liabilities

The Trust Group's policy is to minimise interest rate cash flow risk exposures on long-term financing. At the reporting periods end, the Trust Group is exposed to changes in market interest rates through bank borrowings at variable interest rates.

Interest rate risk exposure

Below is the overall undiscounted exposure of the Trust Group to interest rate risk:

Particulars (Undiscounted Basis)	**As at September 30, 2025**	**As at September 30, 2024**	**As at March 31, 2025**	**As at March 31, 2024**	**As at March 31, 2023**
Variable rate borrowings	1,28,297.59	1,09,844.83	1,19,695.00	95,677.28	-
Fixed rate borrowings	51,462.10	17,826.29	32,186.99	12,019.80	-
Total borrowings	**1,79,759.69**	**1,27,671.12**	**1,51,881.99**	**1,07,697.08**	**-**

Sensitivity

Below is the sensitivity of profit or loss and equity changes in interest rates.

Particulars	**For the half year ended September 30, 2025**	**For the half year ended September 30, 2024**	**For the year ended March 31, 2025**	**For the year ended March 31, 2024**	**For the year ended March 31, 2023**
Interest sensitivity					
Interest rates – increase by 50 bps [(i)]	(320.74)	(274.61)	(598.47)	(478.39)	-
Interest rates – decrease by 50 bps [(i)]	320.74	274.61	598.47	478.39	-

(i) Holding all other variables constant

ii) Financial Assets

The Trust Group's fixed deposits are carried at amortised costs and are fixed rate deposits. They are therefore not subject to interest rate risk as defined in Ind AS 107 'Financial Instruments Disclosures', since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

(b) Price risk

i) Exposure

The Trust Group requires for implementation (construction, operation and maintenance) of the projects various commodities such as cement, bitumen, steel and other construction materials which are exposed to price risk. The Trust Group are able to manage its exposure to price increases through bulk purchases and negotiations. Hence, the sensitivity analysis is not required to be provided.

The Trust Group's exposure to price risk arises from investments held and classified at fair value through profit or loss. To manage the price risk arising from investments, the Trust Group diversifies its portfolio of assets through fixed rate investment like deposit with bank and investment in mutual funds (Growth Scheme).

ii) Sensitivity

The table below summarises the impact of increase/decrease of the index on the Trust Group's profit for the half year/ year :

Impact on loss before tax

Particulars	**As at September 30, 2025**	**As at September 30, 2024**	**As at March 31, 2025**	**As at March 31, 2024**	**As at March 31, 2023**
Mutual Funds					
Net assets value – increase by 100 bps	64.78	113.94	64.40	135.28	-
Net assets value – decrease by 100 bps	(64.78)	(113.94)	(64.40)	(135.28)	-

(c) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Trust Group has no significant exposure to the risk of changes in foreign exchange rates.

45 Capital management

For the purpose of the Trust Group's capital management, capital includes issued unit capital and all other reserves attributable to the unit holders of the Trust Group. The primary objective of the Trust Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise unit holder value.

The Trust Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Trust Group may adjust the distribution to unitholders (subject to the provisions of InvIT regulations which require distribution of at least 90% of the net distributable cash flows of the Trust Group to unit holders), return capital to unitholders or issue new units.

The Trust Group monitors capital using a gearing ratio, which is net debt divided by total equity. The Trust Group's policy is to keep the gearing ratio optimum. The Trust Group net debt includes non-current borrowings [including current maturity of non-current borrowings, interest accrued but due on borrowings & interest accrued but not due on debentures less cash and cash equivalent and other bank deposits (net of restricted deposits)].

Debt equity ratio

46 Information on related party transactions

The name of the related parties and nature of relationship are as identified by the management of the Investment Manager with reference to the Trust and its subsidiaries which are considered for the Consolidated Financial Statements pursuant to the InvIT Regulations.

46.1 A) List of related parties as per the requirements of Ind-AS 24- Related Party Disclosures

Cube Group Entities* (with whom transactions have taken place)

Cube Highways and Infrastructure 1D Pte. Ltd.
Cube Highways and Infrastructure II Pte. Ltd.
Cube Mobility Investment Pte. Ltd.
Cube Highways Operations Management Private Limited
Cube Highways Technologies Private Limited
Cube Highways and Infrastructure V Pte. Ltd.
Baharampore Farakka Highways Limited (w.e.f. March 28, 2023)
Cube Highways Growth Advisory Private Limited (w.e.f. December 05, 2023)
Delhi Hapur Meerut Expressway Private Limited (w.e.f. January 02, 2024)
Kokhraj Handia Expressway Private Limited (w.e.f. November 10, 2023)
Malayagiri Highways Private Limited (w.e.f. January 02, 2024)
Western M P Infrastructure & Toll Roads Private Limited (w.e.f. Febraury 14, 2024)

B) List of related parties as per Regulation 2(1) (zv) of the InvIT Regulations

1) Parties to the Trust

Sponsor- Cube Highways and Infrastructure Pte. Ltd. (CHIPL)
Sponsor- Cube Highways and Infrastructure III Pte. Ltd. (CHIPL-III)
Project Manager of the Trust(for all SPVs)- Cube Highways and Transportation Assets Advisors Private Limited (CHATAAPL)
Subsidiary of CHATAAPL- Cube Highways Roots Foundation
Investment Manager of the Trust- Cube Highways Fund Advisors Private Limited (CHFAPL)
Trustee of the Trust- Axis Trustee Services Limited (ATSL)

2) Promoters of the parties to the Trust specified in (1) above

Promoter of CHIPL- ISQ Asia Aggregator Pte. Ltd.
Promoter of CHIPL-III- ISQ Asia Infrastructure Holdings II Pte. Ltd.
Promoter of CHATAAPL- Cube Highways and Infrastructure Pte. Ltd. (upto December 28, 2023) ,Cube Highways Advisory Pte. Ltd. (w.e.f December 29, 2023)
Promoter of CHFAPL- Cube Highways Advisory Pte. Ltd.
Promoter of ATSL- Axis Bank Limited

3) Directors of the parties to the Trust specified in (1) above

i) Directors of CHIPL

Spyros John Mantzavinatos (upto June 22, 2023)
Kenichi Yoshihara (upto February 07, 2024)
George Currie Crawford (upto September 01, 2025)
Siew Hean Meng (upto August 31, 2023)
Harsh Agrawal
Marcus Christopher Hill (upto March 04, 2025)
Tsuneo Kawasaki (w.e.f February 07, 2024)
Lin Le (w.e.f February 07, 2024)
Heng Hong Kiong (upto February 07, 2024)

ii) Directors of CHIPL-III

Kunal Agarwal
Heng Hong Kiong (upto February 07, 2024)
George Currie Crawford (upto September 01, 2025)
Marcus Christopher Hill (upto March 04, 2025)
Harsh Agrawal
Lin Le (w.e.f February 07, 2024)

iii) Directors of CHATAAPL

Pooja Aggarwal (upto June 18, 2024)
Bovin Kumar
Mukul Shastry
Gaurav Malhotra (upto August 18, 2023)
Ankit Jain (w.e.f August 21, 2023)
Harikishan Reddy Koppula (w.e.f. April 02, 2025)
Varun Unnikrishnan (w.e.f. May 16, 2025)
Raviraj Vipul Acharya (w.e.f May 16, 2025)
Angela Mary Bouzanis (w.e.f June 06, 2025)

iv) Directors of CHFAPL

Upendra Kumar Sinha
Surinder Chawla
Fereshte Dhunjishaw Sethna
Jayesh Ramniklal Desai
Sandeep Lakhanpal
Harikishan Reddy Koppula (upto June 07, 2023)
Zaman Velji (w.e.f June 08, 2023 upto November 07, 2023)
Chirdeep Singh Bagga (w.e.f June 08, 2023 upto May 31, 2024)
Helly Bharat Ajmera (w.e.f November 07, 2023)
Raviraj Vipul Acharya (w.e.f July 31, 2024)

v) Directors of ATSL

Rajesh Kumar Dahiya (upto January 15, 2024)
Deepa Rath (upto February 05, 2025)
Ganesh Sankaran (upto January 15, 2024)
Arun Mehta (w.e.f. May 03, 2024)
Pramod Kumar Nagpal (w.e.f. May 03, 2024)
Sumit Bali (w.e.f. January 16, 2024 upto August 16, 2024)
Prashant Joshi (w.e.f. January 16, 2024 upto August 16, 2024)
Rahul Ranjan Choudhary (w.e.f February 06, 2025)
Bipin Saraf Kumar (w.e.f. April 11, 2025)

* Considered as Related Parties although not covered under the definition of Related Parties as per Ind AS 24, Related party disclosures. These have been included as voluntary disclosure, following the best corporate governance practices.

For the year ended March 31, 2023:
No acquisition during the year ended March 31, 2023.

47 Information on segment reporting pursuant to Ind AS 108 - Operating Segments

The Trust group is engaged in the business of setting up of infrastructure facility by way of development of infrastructure projects, operation and maintenance of Infrastructural facilities. As such, all activities undertaken by the SPVs are incidental to the main business. The directors of the SPV and Investment Manager, who have been identified as being the chief operating decision maker (CODM), evaluates the SPVs performance, allocates resources based on the analysis of the previous performance indicators of the SPVs as a single unit. Therefore, there are no separate reportable business segments as per IND AS 108-"Operating Segment".

48 Provisions

(a) Provision for periodic major maintenance work

The Trust Group is required to operate and maintain the project highway during the entire concession period and hand over the project back to the Authority as per the maintenance standards prescribed in Concession agreement.

For this purpose, a regular maintenance along with periodic maintenances is required to be performed. Normally periodic maintenance includes resurface of pavements, repairs of structures and other equipment's and maintenance of service roads.

The maintenance cost/ bituminous overlay may vary based on the actual usage during maintenance period. Accordingly on the grounds of matching cost concept and based on technical estimates, a provision for major maintenance expenses is reviewed and is provided for in the financial statements at each reporting period.

Movement in provisions for periodic major maintenance work

Notes:

(i) The expected period of utilisation of non current provision is within 2-7 years.

(ii) The expected period of utilisation of current provision is within next 1 year.

(iii) Excludes periodic major maintenance at APEPL of Rs. Nil million (September 30, 2024: Rs. 747.00 million, March 31, 2025 : 888.26 million, March 31, 2024 : Nil, March 31, 2023 : Nil) being an annuity concession arrangement.

(b) Provisions for contractual obligation for infrastructure upgrade works

Certain SPVs estimates and provides for contract liability in respect of unavoidable obligations to improve/upgrade the infrastructure to be undertaken as per Concession Agreement with NHAI. These estimates are corroborated through purchase orders/ work orders placed or to be placed by these SPVs as per the road survey reports issued by an independent field expert. As the estimated cost is based on the various assumptions such as current infrastructure (road, pavements, etc.) condition, inflation in material cost etc., hence the Management is required to apply judgement over these factors.

Movement in Provisions for contractual obligation for infrastructure upgrade works

49 Details of dues to Micro, Small and Medium Enterprises

The details of dues to MSMEs as defined under Micro, Small and Medium Enterprises Development Act, 2006 (MSMED Act), and disclosures pursuant to the MSMED Act are as follows:

Particulars	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
(i) Principal amount remaining unpaid to any supplier as at the end of the accounting year / half year	493.40	353.70	688.72	246.86	-
(ii) Interest due thereon remaining unpaid to any supplier as at the end of the accounting year / half year	4.90	0.12	4.88	0.31	-
(iii) The amount of interest paid along with the amounts of the payment made to the supplier beyond the appointed day					
- Principal	66.17	38.55	86.58	134.02	-
- Interest	0.16	0.92	0.42	38.95	-
(iv) The amount of interest due and payable for the year / half year	0.95	2.26	2.47	6.91	-
(v) The amount of interest accrued and remaining unpaid at the end of the accounting year / half year	29.71	28.35	28.75	26.66	-
(vi) The amount of further interest due and payable even in the succeeding year, until such date when the interest dues as above are actually paid	-	-	0.12	-	-

Notes:

(i) Dues to Micro Enterprises and Small Enterprises have been determined to the extent such parties have been identified on the basis of information collected by the Management. This has been relied upon by the auditors.

(ii) The above disclosure excludes Rs. 523.19 million (September 30, 2024: Rs. Nil million, March 31, 2025 : Rs. 219.89 million, March 31, 2024 : Nil million, March 31, 2023 : Nil) towards amount accrued but not yet billed by MSME vendors.

50 Asset Acquisition

A) i) Acquisition of AJUHPL SPV (Half year ended September 30, 2025)

In terms of Share Purchase Agreement (SPA) dated February 7, 2025 entered amongst the Trust (acting through its Investment Manager), Athaang Infrastructure Private Limited, National Investment and Infrastructure Fund (through its Investment Manager) (Seller) and AJUHPL on June 12, 2025 the Trust has acquired the 100% equity holding of AJUHPL for consideration of Rs. 4,145.13 million (including contingent consideration of Rs. 122.99 million) referred to in note 1(ii).

The management applied optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated under Receivable under Service Concession Arrangements , with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition. The management identified and recognized the individual identifiable assets acquired and liabilities assumed; and allocated the purchase consideration to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of acquisition.

The allocated value of the identifiable assets and liabilities as at the date of acquisition were:

Assets	**Amount Rs. Million**
Property, Plant and Equipment (net of accumulated depreciation)	26.34
Intangible assets	545.19
Receivable under service concession arrangements	12,051.38
Assets held for sale	3.66
Trade receivables	3.19
Cash and cash equivalents	5,425.07
Other assets	656.39
Total Assets (A)	**18,711.22**
Liabilities	
Borrowings (including current maturities of Non-current borrowings)	12,933.56
Trade Payables	84.67
Other liabilities	1,547.86
Total Liabilities (B)	**14,566.09**
Net Assets/Consideration (A-B)	**4,145.13**

ii) Acquisition of QEPL SPV (Half year ended September 30, 2025)

In terms of Share Purchase Agreement (SPA) dated February 7, 2025 entered amongst the Trust (acting through its Investment Manager), Quazigund Expressway Private Limited (QEPL) and National Investment and Infrastructure Fund (through its Investment Manager) (Seller) on June 12, 2025 the Trust has acquired the 100% equity holding of QEPL for consideration of Rs. 6,055.10 million referred to in note 1(ii).

The management applied optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated under Receivable under Service Concession Arrangements , with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition. The management identified and recognized the individual identifiable assets acquired and liabilities assumed; and allocated the purchase consideration to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of acquisition.

The allocated value of the identifiable assets and liabilities as at the date of acquisition were:

Assets	**Amount Rs. Million**
Property, Plant and Equipment (net of accumulated depreciation)	16.45
Intangible assets	152.45
Receivable under service concession arrangements	19,032.91
Trade receivables	0.68
Cash and cash equivalents	1,904.97
Other assets	3,312.61
Total Assets (A)	**24,420.07**
Liabilities	
Borrowings (including current maturities of Non-current borrowings)	17,921.71
Trade Payables	58.95
Other liabilities	384.31
Total Liabilities (B)	**18,364.97**
Net Assets/Consideration (A-B)	**6,055.10**

This space has been intentionally left blank

50 Asset Acquisition

B) Acquisition of HAM SPVs (FY 2024-25)

In terms of Share Purchase Agreements (SPAs) dated May 31, 2024 entered amongst Trust (acting through its Investment Manager), Axis Trustee Services Limited (acting in its capacity as Trustee of the Trust), Cube Highways and Infrastructure III PTE. Ltd. ("Seller") and the Hybrid Annuity Model SPVs referred to in note 1(ii). (thereinafter referred to as "the parties"), on June 04, 2024 the Trust completed the acquisition of 51% equity holding of HAM SPVs for consideration of Rs. 5,973.80 million (including contingent consideration of Rs. 578.49 million) and the remaining 49% equity of HAM SPVs for consideration of Rs. 5,735.39 million (including contingent consideration of Rs. 555.80 million) on December 03, 2024. The contingent consideration is mainly towards various remedies and indemnities available to the Trust against money held back from annuities by NHAI, claims related to changes in law, claims for balance work, claims under Singapore International Arbitration Centre (SIAC). Further, one of HAM SPV viz. MHPL has initiated arbitration with NHAI with respect to damages amounting to Rs. 1,347.84 million imposed by NHAI mainly on account of default in performing repair and rectification works and NHAI has withheld Rs. 112.72 million from the annuity payments due to MHPL (included under trade receivables). The management, after reviewing the facts and circumstances of the case supported by the legal opinion, believes that the likelihood of any ultimate outflow is remote. Also, under the terms of the SPA, the Seller is responsible for indemnifying, defending, and holding the Trust and the SPV harmless against any losses related to this dispute with NHAI.

The management applied optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated under Receivable under Service Concession Arrangements , with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition.

The management identified and recognized the individual identifiable assets acquired and liabilities assumed; and allocated the purchase consideration to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of acquisition.

The allocated value of the identifiable assets and liabilities of the 6 HAM SPVs as at the date of acquisition were:

Assets	**Amount Rs. Million**
Property, Plant and Equipment (net of accumulated depreciation)	24.99
Intangible assets	8,599.81
Capital work-in-progress	80.80
Receivable under service concession arrangements	15,231.56
Investments in Mutual Funds	2,099.98
Trade receivables	1,585.60
Cash and cash equivalents	1,400.95
Bank balance other than cash and cash equivalents	710.37
Other assets	3,399.76
Total Assets (A)	**33,133.82**
Liabilities	
Borrowings (including current maturities of Non-current borrowings)	20,093.28
Trade Payables	241.43
Deferred Tax Liability (net)	660.09
Other liabilities	429.83
Total Liabilities (B)	**21,424.63**
Net Assets/Consideration (A-B)	**11,709.19**

This space has been intentionally left blank

50 Asset Acquisition

C) Acquisition of NAMEL (FY 2024-25)

In terms of Share Purchase Agreements (SPAs) dated June 04, 2024 entered amongst the Trust (acting through its Investment Manager), Axis Trustee Services Limited (acting in its capacity as Trustee of the Trust), Cube Highways and Infrastructure PTE. Ltd. ("Seller") and N.A.M. Expressway Limited (NAMEL) (thereinafter referred to as "the parties") referred to in note 1(ii), on February 12, 2025 the Trust completed the acquisition of 100% equity holding of NAMEL for consideration of Rs. 7,176.02 million. Accordingly the financial statements of the aforesaid subsidiary for the period February 12, 2025 to March 31, 2025 have been considered in the consolidated financial statements of the Trust Group.

The management applied optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated in Intangible Assets- Rights under Service Concession Arrangements with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition.

The management identified and recognized the individual identifiable assets acquired and liabilities assumed; and allocated the purchase consideration to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of acquisition.

The allocated value of the identifiable assets and liabilities of the SPV as at the date of acquisition were:

Assets	**Amount Rs. Million**
Property, Plant and Equipment (net of accumulated depreciation)	23.89
Intangible assets	26,248.85
Intangible assets under development	67.07
Current tax assets (net)	4.10
Investments	442.09
Cash and cash equivalents	68.54
Bank balance other than cash and cash equivalents	1,797.24
Other assets	477.64
Total Assets (A)	**29,129.42**
Liabilities	
Borrowings (including current maturities of Non-current borrowings)	19,144.85
Trade Payables	155.46
Provisions	1,079.14
Deferred Tax Liability (net)	1,448.12
Other liabilities	125.83
Total Liabilities (B)	**21,953.40**
Net Assets/Consideration (A-B)	**7,176.02**

This space has been intentionally left blank

50 Asset Acquisition

D) Acquisition of 18 Subsidiaries (FY 2023-24)

Pursuant to the Share Purchase Agreements dated March 30, 2023, the Trust (acting through its Investment Manager) acquired the entire equity share capital (except for 0.03% of the equity share capital of MBEL) of HTPL, JLTPL, JVTPL, KETPL, KMTPL, LRTPL, MKTPL, NKTPL, SMTPL, DATRPL, FRHPL, WVEPL, NDEPL, WUPTPL, JMTPL, APEL, GAEPL, MBEL on April 17, 2023 for an equity consideration of Rs. 106,758.69 million (referred to in note 1(ii)). Accordingly the financial statements of the aforesaid subsidiaries for the period April 17, 2023 to March 31, 2024 have been considered in the consolidated financial statements of the Trust Group.

The management applied optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated in Intangible Assets- Rights under Service Concession Arrangements (other than APEL) and Receivable under Service Concession Arrangements (for APEL), with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition.

The management identified and recognized the individual identifiable assets acquired and liabilities assumed; and allocated the purchase consideration to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of acquisition.

The allocated value of the identifiable assets and liabilities of the 18 SPVs as at the date of acquisition were:

Assets	**Amount Rs. Million**
Property, Plant and Equipment (net of accumulated depreciation)	239.13
Capital work-in-progress	8.87
Investment properties	7.28
Intangible assets- Rights under Service Concession Arrangements (including other intangible assets)	2,33,472.67
Intangible assets under development	2,097.21
Deferred tax assets (net)	341.16
Current tax assets (net)	459.35
Investments	10,325.25
Trade receivables	809.89
Cash and cash equivalents	6,285.17
Bank balance other than cash and cash equivalents	307.80
Assets held for sale	4.67
Other assets	4,340.59
Total Assets (A)	**2,58,699.04**
Liabilities	
Borrowings (including current maturities of Non-current borrowings)	1,32,894.35
Trade Payables	2,035.57
Provisions	5,906.38
Deferred Tax Liability (net)	511.94
Other liabilities	10,591.65
Total Liabilities (B)	**1,51,939.89**
Non-controlling interest (C)	**0.46**
Net Assets (A-B-C)	**1,06,758.69**

3 Performance Obligation

Income from toll collection
The performance obligation in service of toll collection is recorded as per rates notified by the NHAI/State authorities and payment is generally due at the time of providing service.

Contract revenue
The performance obligation under service concession arrangements (SCA) is due on completion of work as per terms of SCA.

4 Refer note 52 for disclosure in accordance with Appendix D: Service Concession Arrangements Disclosures of Ind AS 115: Revenue from Contracts with Customers.

52 Service Concession Arrangement

The details of service concession arrangements of all the SPVs are as follows:

HTPL

Description and right to use specified asset	Toll collection from the users and operation and maintenance of Hazaribagh – Ranchi Section (KM 41.500 – KM 115.290) Road Project on NH-33 in the state of Jharkhand as agreed between the SPV and National Highway Authority of India (NHAI) on Tolling, operation, maintenance and transfer (TOT) basis.
Project	National Highway-33 (NH-33) from KM-41.50 to KM 115.29
Nature of Asset	Intangible
Year when SCA granted	October 20, 2020
Concession Period	30 Years
End of Concession period	October 18, 2050
Stage of Completion	Completed with Commercial Operation Date (COD) as at September 04, 2013
Premature termination	On force majeure event or parties defaulting on their obligation
Operation & Maintenance ("O&M") Handover Date	March 31, 2028
Obligation to provide services:	Operation and routine maintenance of the highway
Major Overlays	In terms of the SCA , the SPV is obligated to carry out overlay of the roads at the end of specified periods from O&M handover date.
Remaining concession period of rights under SCA as at September 30, 2025	25 years and 18 days

JLTPL

Description and right to use specified asset	Toll collection from the users and operation and maintenance of Jhansi-Lalitpur Section (KM 00.00 – KM 49.70) Road Project on NH-25 in the state of Uttar Pradesh as agreed between the Company and National Highway Authority of India (NHAI) on Tolling, operation, maintenance and transfer (TOT) basis.
Project	National Highway-25 (NH-25) from KM-00.00 to KM 49.70
Nature of Asset	Intangible
Year when SCA granted	October 20, 2020
Concession Period	30 Years
Estimated Reduction period	1826 Days
End of Concession period	October 18, 2045 (including estimated reduction period)[(i)]
Stage of Completion	Completed with Commercial Operation Date (COD) as at November 12, 2014
Premature termination	On force majeure event or parties defaulting on their obligation
Operation & Maintenance ("O&M") Handover Date	March 31, 2027
Obligation to provide services:	Operation and routine maintenance of the highway
Major Overlays	In terms of the SCA , the SPV is obligated to carry out overlay of the roads at the end of specified periods from O&M handover date.
Remaining concession period of rights under SCA as at September 30, 2025	20 years and 18 days (including estimated reduction period)

JVTPL

Description and right to use specified asset	Toll collection from the users and operation and maintenance of Jhansi-Lalitpur Section (KM 49.70 – KM 99.00) Road Project on NH-26 in the state of Uttar Pradesh as agreed between the SPV and National Highway Authority of India (NHAI) on Tolling, operation, maintenance and transfer (TOT) basis.
Project	National Highway-26 (NH-26) from KM-49.70 to KM 99.00
Nature of Asset	Intangible
Year when SCA granted	October 20, 2020
Concession Period	30 Years
Estimated Reduction period	1826 Days
End of Concession period	October 18, 2045 (including estimated reduction period)[(i)]
Stage of Completion	Completed with Commercial Operation Date (COD) as at March 19, 2012
Premature termination	On force majeure event or parties defaulting on their obligation
Operation & Maintenance ("O&M") Handover Date	March 31, 2027
Obligation to provide services:	Operation and routine maintenance of the highway
Major Overlays	In terms of the SCA , the SPV is obligated to carry out overlay of the roads at the end of specified periods from O&M handover date.
Remaining concession period of rights under SCA as at September 30, 2025	20 years and 18 days (including estimated reduction period)

KETPL

Description and right to use specified asset	Toll collection from the users and operation and maintenance of Madurai-Kanyakumari Section (KM 52.300 – KM 116.500) Road Project on NH-07 in the state of Tamil Nadu as agreed between the SPV and National Highway Authority of India (NHAI) on Tolling, operation, maintenance and transfer (TOT) basis.
Project	National Highway-07 (NH-07) from KM-52.30 to KM 116.50
Nature of Asset	Intangible
Year when SCA granted	October 20, 2020
Concession Period	30 Years
End of Concession period	October 18, 2050
Stage of Completion	Completed with Commercial Operation Date (COD) as at August 15, 2011
Premature termination	On force majeure event or parties defaulting on their obligation
Obligation to provide services:	Operation and routine maintenance of the highway
Major Overlays	In terms of the SCA , the SPV is obligated to carry out overlay of the roads at the end of specified periods.
Remaining concession period of rights under SCA as at September 30, 2025	25 years and 18 days

52 Service Concession Arrangement

The details of service concession arrangements of all the SPVs are as follows:

KMTPL

Description and right to use specified asset	Toll collection from the users and operation and maintenance of Kotwa-Muzaffarpur Section (KM 440.00 – KM 520.00) Road Project on NH-28 in the state of Bihar as agreed between the SPV and National Highway Authority of India (NHAI) on Tolling, operation, maintenance and transfer (TOT) basis.
Project	National Highway-28 (NH-28) from KM-440.00 to KM 520.00
Nature of Asset	Intangible
Year when SCA granted	October 20, 2020
Concession Period	30 Years
Estimated Reduction period	1644 Days
End of Concession	April 18, 2046 (including estimated reduction period)[(i)]
Stage of Completion	Completed with Commercial Operation Date (COD) as at December 09, 2012
Premature termination	On force majeure event or parties defaulting on their obligation
Obligation to provide services:	Operation and routine maintenance of the highway
Major Overlays	In terms of the SCA , the SPV is obligated to carry out overlay of the roads at the end of specified periods.
Remaining concession period of rights under SCA as at September 30, 2025	20 years, 06 months and 18 days (including estimated reduction period)

LRTPL

Description and right to use specified asset	Toll collection from the users and operation and maintenance of Lucknow-Raibareli Section (KM 12+700 to KM 82+700) Road Project on NH 24B in the state of Uttar Pradesh as agreed between the SPV and National Highway Authority of India (NHAI) on Tolling, operation, maintenance and transfer (TOT) basis.
Project	National Highway-24B (NH-24B) from KM-12+700 to KM 82+700
Nature of Asset	Intangible
Year when SCA granted	October 20, 2020
Concession Period	30 years
End of Concession	October 18, 2050
Stage of Completion	Completed with Commercial Operation Date (COD) as at March 05, 2015
Premature termination	On force majeure event or parties defaulting on their obligation

Appointed date	June 05, 2011
Concession period	20 Years
Commercial Operation Date ("COD")	December 15, 2022
End of Concession period	June 04, 2031
Remaining concession period of rights under SCA as at September 30, 2025	5 Years, 08 months and 04 days

(i) Variation in concession period has been estimated by the management after considering contractual entitlement to variations in concession period on a case-to-case basis taking into account the provisions of the concession agreement of the respective SPVs, the facts and circumstances giving rise to such variations and the status of the approvals for each such variation. The Management has considered variation in concession period for the purpose of estimating amortization of Intangible Assets- Toll Road Carriageway, estimating fair value of net assets of SPVs and also for determination of recoverable amounts for Intangible Assets- Toll Road Carriageway of SPVs [Also, refer note 2(III)(d)(4)].

(ii) In respect of WVEPL, the SPV has invoked arbitration as per the terms of the SCA with respect to reduction of 1.5 years in the concession period by NHAI as against the claims lodged by the SPV with NHAI towards the extension of concession period on account of decrease in target traffic etc. Considering the terms of the Concession Agreement, traffic studies, workings and independent legal advice obtained, the Management is confident that the SPV will be able to succeed in arbitration and will get extension in concession period as claimed. Pending final outcome of the matter under arbitration, the Management has considered the extended concession period for purpose of preparation of these consolidated financial statements.

53 WVEPL has certain potential claims against various third parties inter alia including National Highway Authority of India, state transport authorities, insurance companies and also certain receivables for the period prior to March 31, 2019. The SPV has entered Claims Management Agreement dated January 9, 2020 as amended by the Amendment Agreement dated September 18, 2020 with KNR ("Agreement') wherein the SPV and KNR have commercially agreed that any monetary compensation received by the SPV pursuant to such claims shall be passed through to KNR, net of related costs and expenses, applicable taxes and adjustments as defined under the Agreement. No amounts have been received from third parties referred above and therefore, no adjustments have been made in these Consolidated Financial Statements for the same.

Disclosures pursuant to SEBI Master circular

Additional disclosures as required by paragraph 4 of chapter 3 to the SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025

F. Number of Ordinary units	1,290.35	1,290.35
G. Net Asset Value ("NAV") (E/F) (Rs.)	**100.35**	**131.79**
H. Number of Ordinary units	1,290.35	1,290.35
Add: Estimated Subordinate units to be reclassified to Ordinary units [2(ii)]	52.50	52.50
Total Number of Ordinary and estimated reclassified Subordinate units	1,342.85	1,342.85
I. NAV (including subordinate units) [E/H] (Rs.)	**96.43**	**126.64**

Notes:

1 The above Consolidated Statement of Net Assets at Fair Value (NAV) is prepared and calculated in accordance with SEBI (Infrastructure Investment Trusts) Regulations, 2014 and the Circulars issued there under. The Trust's projected expenses have not been considered for calculating the fair value of assets at the Trust and NAV.

2 (i) Estimated reclassification of Subordinate Units to Ordinary units on achievement of actual performance matrix in respect of JMTPL and MBEL (as per entitlement Event B as defined in note 19).

(ii) Estimated reclassification of Subordinate Units to Ordinary Units on achievement of actual performance matrix in respect of DATRPL (Entitlement Event A as per terms defined in note 19) and projected achievable actual performance matrix in respect of JMTPL and MBEL (Entitlement Event B as per terms defined in note 19).

(iii) Estimated reclassification of Subordinate Units to Ordinary Units based on projected achievable actual performance matrix in respect of JMTPL and MBEL (Entitlement Event B as per terms defined in note 19).

3 The Consolidated Statement of Net Assets at Fair Value is not given for March 31, 2023 as the Trust has acquired all the SPVs on and after April 17, 2023 (Refer note 1(ii)).

4 Fair values of assets of subsidiaries/SPVs are calculated based on their independent fair value done by the expert appointed by the Trust under SEBI (Infrastructure Investments Trust) Regulations, 2014, as amended and after making necessary adjustments to arrive at fair value of all assets. Fair value of liabilities is different from book value of liabilities on account of exclusion of liabilities which have already been considered by the valuer while computing the fair value of assets. Refer Annexure A for adjustments made to the valuation arrived by the independent valuer to compute the fair value of assets presented in the Consolidated Statement of Net Assets at Fair Value.

5 The key assumptions used as inputs for the calculation of Enterprise Value and fair value include determination of future cash flows, traffic estimates, assessment of the variation in concession period in certain subsidiaries, considering target traffic/ target revenue subject to approvals from the authorities, revenue growth rate, discount rates, inflation rates and other economic factors.

During the half year ended September 30, 2025, NHAI, vide its Policy Circular dated September 13, 2025, revised the Wholesale Price Index (WPI) linking factor from 1.641 to 1.561, resulting in a reduction of around 3–5% in base toll rates. The said Circular was challenged before the High Court of Delhi by various parties (including the Highway Operators Association of India) by filing Writ petitions (Civil) and Civil Miscellaneous Applications.

The Hon’ble High Court of Delhi, vide order dated October 17, 2025, has directed that the aforesaid Policy/ Circular dated 13.09.2025 be kept in abeyance. The matter is to be re-examined by the NHAI within a fixed timeline, after considering the representations and submissions of stakeholders, and a reasoned order is to be passed thereafter, taking into account all relevant aspects of the matter.

As of the reporting date, the Enterprise Value, as determined by the independent valuer, has been computed using the WPI linking factor of 1.641.

59 Consolidated Statement of Total Returns at Fair Value

Particulars	Half Year ended		Year ended	
	September 30, 2025 (Audited)	September 30, 2024 (Audited)	March 31, 2025 (Audited)	March 31, 2024 (Audited)
Total comprehensive income/(loss) for the half year/year (as per the Consolidated Statement of Profit and Loss)	406.37	(261.43)	(356.65)	(7,058.70)
Add/Less: Other changes in fair value not recognized in Total Comprehensive Loss[(i)]	21,591.42	13,230.97	23,631.12	40,569.69
Total returns at fair value	**21,997.79**	**12,969.54**	**23,274.47**	**33,510.99**

Notes:

(i) Computed based on difference in fair value based on the valuation done by independent valuer appointed by the Trust and book value of net assets as at September 30, 2025, September 30, 2024, March 31, 2025 and March 31, 2024.

(ii) The Consolidated Statement of Total Returns at Fair Value is not given for March 31, 2023 as the Trust has acquired all the SPVs on and after April 17, 2023 (Refer note 1(ii)).

60 Investment Management and Project Management Fees

(i) Project Management Fees

Pursuant to Project Implementation and Management Agreement dated January 02, 2023 (PM Agreement) in consideration of services to be rendered by Project Manager in accordance with and subject to agreement and applicable law, each project SPV's agree to pay fees ("Fee") from their respective funds, on an arm length basis, to the Project Manager. The fee shall be calculated annually and shall be higher of :-
(a) 1.55% of the standalone revenue of the project SPV based on audited financial statements of Project SPV.
OR
(b) During the terms of relevant Concession Agreement for each Project SPV the Minimum Threshold as specified in Schedule 4 of the PM Agreement in relation to each Project SPV, subject to escalation of 7% per annum.

(ii) Investment Management Fees

In terms of the InvIT Regulations, the Trust has entered into Investment Management Agreement dated March 11, 2022 with Cube Highways Fund Advisors Private Limited ("the Investment Manager"), which got amended on May 30, 2022, on December 16, 2022, March 08, 2024 and on July 24, 2024 (herein after referred to as IM Agreement).

As per Schedule II of the IM Agreement as amended from time to time, the Investment Manager shall be entitled to a fee from the funds of the Trust in accordance with the IM Agreement ("Management Fee") as under:

For the period of March 11, 2022 to May 30, 2022 (in terms IM Agreement dated March 11, 2022)	Higher of: (a) 1% of the consolidated revenue of the Project SPVs ("fee percentage"); or (b) Rs. 210 million subject to an escalation of 9% per annum.
For the period upto December 15, 2022 (in terms of Amended and Restated IM Agreement dated May 30, 2022)	Higher of: (a) Subsequent to the Initial Offer, the Management Fee shall be 0.88% of the revenue of the Initial SPVs ("Fee Percentage"); (b) Rs. 190 million ("Minimum Threshold") subject to an escalation of 7% per annum
For the period upto May 31, 2024 (in terms of Amended and Restated IM Agreement dated December 16, 2022)	Higher of: (a) Subsequent to the Initial Offer, the Management Fee shall be 0.94% of the revenue of the Initial SPVs ("18 SPV's");or (b) Rs. 190 million ("Minimum Threshold") subject to an escalation of 7% per annum from 31 March 2023
For the period from and after June 01, 2024 (in terms of Amended and Restated IM Agreement dated July 24, 2024)	Higher of: (a) 0.81% of the revenue of the Project SPVs ("24 SPV's including 6 HAM SPV's"); or (b) Rs. 190 million ("Minimum Threshold") subject to an escalation of 7% per annum from 31 March 2023
For the period from and after February 12, 2025 (in terms of Amended and Restated IM Agreement dated July 24, 2024)	Higher of: (a) 0.75% of the revenue of the Project SPVs ("27 SPV's including 6 HAM SPV's and NAMEL, QEPL and AJUHPL"); or (b) Rs. 190 million ("Minimum Threshold") subject to an escalation of 7% per annum from 31 March 2023

61 During the half year ended September 30, 2025, the Trust has been assigned/reaffirmed the credit ratings for its borrowings as follows:-

Sr. No.	Nature of Borrowings	Rating Agency	Rating	Date
1	Rupee Term Loan	CRISIL	"CRISIL AAA/Stable"	Reaffirmed on June 04, 2025
		ICRA	"ICRA AAA/Stable"	Reaffirmed on April 17, 2025, August 13, 2025. Assigned/Reaffirmed on August 28, 2025
		India Ratings	"IND AAA/Stable"	Reaffirmed on April 18, 2025, April 22, 2025, June 09, 2025 and August 14, 2025
2	Bank Guarantee	CRISIL	"CRISILA1+"/"CRISIL AAA/Stable"	Reaffirmed on June 04, 2025
		ICRA	"ICRA AAA/Stable"	Reaffirmed on April 17, 2025, August 13, 2025. Assigned/Reaffirmed on August 28, 2025
		India Ratings	"IND AAA/Stable"	Reaffirmed on April 18, 2025, April 22, 2025, June 09, 2025 and August 14, 2025
3	Non-Convertible Debt Securities	ICRA	"ICRA AAA/Stable"	Assigned/Reaffirmed on April 17, 2025, August 13, 2025 and August 28, 2025
		CRISIL	"CRISIL AAA/Stable"	Reaffirmed on June 04, 2025
		India Ratings	"IND AAA/Stable"	Reaffirmed on April 18, 2025, April 22, 2025, and June 09, 2025. Assigned/Reaffirmed on August 14, 2025. Reaffirmed on August 28, 2025
4	Commercial papers	CRISIL	"CRISIL A1+"	Assigned on June 04, 2025
		India Ratings	"IND A1+"	Assigned on June 09, 2025 and affirmed on August 14, 2025

62 At the end of each reporting period, in terms of Ind AS 36 "Impairment of Assets" the Management carries out impairment assessment for Intangible assets Rights Under Service Concession Arrangements in individual subsidiary (cash generating unit) and determine the recoverable amount of non-current investments in subsidiaries as at the reporting date.

An impairment loss is recognised if the carrying amount of the Intangible assets exceeds its recoverable amount. The recoverable amount is determined by the Management based on the value in use approach using an External Independent Valuer. The key judgements in determining the value in use approach included revenue and other cash flow projections for the remaining concession period, changes in interest rates, discount rates, risk premium for market conditions etc. The revenue projection is based on assumptions made by the Management regarding future traffic growth and inflation factor for assessing user toll fee as supported by the studies from the Third-party Independent Consultant.

Based on the aforesaid impairment assessment done by the management of Investment Manager, the Trust has recognized following impairment loss / (reversal) - net in respect of Intangible assets Rights Under Service Concession Arrangements in the Consolidated Statement of Profit and Loss:

(Amounts in Rs. Million)

Particulars	For the half year ended September 30, 2025	For the half year ended September 30, 2024	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Impairment loss / (reversal) - Net	-	-	-	5,871.87	-

For the year ended March 31, 2024

Name of SPV	Impairment Loss	Recoverable Value	Discounting rate (%)
WUPTPL	122.51	1,656.00	10.70
GAEPL	1,421.00	28,525.00	10.60
NDEPL	368.10	4,960.90	10.70
FRHPL	3,039.42	23,530.57	10.60
LRTPL	920.84	6,731.16	10.40
Total	**5.871.87**	**65.403.63**	

The aforesaid recoverable value of these Intangible assets – Rights under Service Concession Arrangements is based on Enterprise Value as determined by the External Independent valuer. For valuation process and technique used to determine fair value refer note 58(4) of Consolidated Financial Statements.

63 Distribution

A) Details of distribution made by the Trust to Unitholders is as under:

(Amounts in Rs. Million)

Particulars	For the half year ended September 30, 2025	For the half year ended September 30, 2024	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Interest (Return on capital)	4,403.17	3,697.55	7,313.90	6,849.16	-
Dividend	427.02	551.65	564.99	1.032.28	-
Other Income on surplus fund at Trust	13.34	26.24	39.59	54.19	-
Repayment of capital	3,520.85	3,477.42	6,840.23	-	-
	8,364.38	**7,752.86**	**14,758.71**	**7,935.63**	**-**

B) Subsequent to the quarter ended September 30, 2025, the Board of Directors of Investment Manager in its meeting dated October 30, 2025 approved a distribution of Rs. 3.60 per unit aggregating Rs. 4,838.65 million for the quarter ended September 30, 2025 to be paid within 5 days from the record date. This distribution is subsequently paid.

64 The Board of Directors of the Investment Manager in its meeting held on July 1, 2024 approved the reclassification of 44.10 million Subordinate Units out of the total 120 million Subordinate Units, issued as part of the initial offer to Cube Highways & Infrastructure III Pte. Ltd. (CH-III), Sponsor of the InvIT, into 44.10 million Ordinary Units, in terms of the performance metrics and the Entitlement Event as defined in the Trust Deed and disclosed in the Final Placement Memorandum dated April 17, 2023. The Board of Directors, accordingly, also approved the extinguishment of the balance 75.90 million Subordinate Units held by CH-III not reclassified into Ordinary Units. These 44.10 million Subordinate Units reclassified into Ordinary Units on July 19, 2024 and got listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE) on July 29, 2024.

65 The Board of Directors of the Investment Manager in its meeting held on July 01, 2025 approved the reclassification of 9.62 million Subordinate Units out of the total 37.50 million Subordinate Units, issued as part of the initial offer to Cube Highways and Infrastructure Pte Ltd (CH-I), Sponsor of the InvIT, in terms of the performance metrics and the Entitlement Event as defined in the Trust Deed. The Board of Directors, accordingly, also approved the extinguishment of the balance 27.87 million Subordinate Units held by CH-I not reclassified into Ordinary Units. These 9.62 million Subordinate Units reclassified into Ordinary Units on July 14, 2025 and got listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE) on July 17, 2025.

66 Subsequent non-adjusting event

The Government of India has announced the implementation of the four Labour Codes - the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020, and the Occupational Safety, Health and Working Conditions Code, 2020, with effect from 21st November 2025, rationalising 29 existing labour laws.
The new labour codes introduce new definitions for wages, classification of employees and workers, expanded social security coverage, revised employment norms and many other changes that will impact the human capital. Certain amendments will also have a retrospective catch-up impact on organisations, e.g., the recomputation of gratuity and other benefits based on the revised definition of wages.

The Government will engage the public and stakeholders in the framing of the corresponding rules, regulations, schemes, etc., under the Codes. During transition, the relevant provisions of the existing labour Acts and their respective rules, regulations, notifications, standards, schemes, etc. will continue to remain in force. The Trust Group is assessing the detailed requirements and potential implications of the new Codes on its existing human resource practices and operating model, particularly regarding wage structuring, compliance obligations, and contractor engagement norms. The assessment will be updated once the rules, clarifications, and implementation framework under the Labour Codes are issued.

In view of this, the financial impact of these changes cannot be reasonably estimated at this stage.

67 The Trust group has reclassified the accruals relating to employees' salaries and wages from "Trade payables" to "Other financial liabilities" in view of the opinion of Expert Advisory Committee of the Institute of Chartered Accountants of India considering the said disclosure could be more relevant to the users of the financial statements. This change doesn't result in any impact on the total current liabilities.

68 The Trust Group has not traded or invested in Cryptocurrency or Virtual Currency during half year ended September 30, 2025, half year ended September 30, 2024 , year ended March 31, 2025 , year ended March 31, 2024 and year ended March 31, 2023.

69 The Trust Group has made transactions with the Companies which were struck off under section 248 of the Companies Act, 2013 or section 560 of Companies Act, 1956, The detail of the same is as follows:

Name of Struck Off companies	Nature of Transaction	For the half year ended September 30, 2025	For the half year ended September 30, 2024	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Tollways Infra Projects Private Limited	COS Contractor	-	0.63	0.63	-	-
Markolines Pavement Technologies Limited	MMR Works-Retention and Holdback	-	-	-	5.48	-
Rousing Trading India Pvt. Ltd.	Boundary Wall Construction-Retention	-	-	-	0.06	-
Kritsnam Technologies Private Limited	Dhaara Smart Ultrasonic Water Flow Meter	0.75	-	-	-	-

70 The Trust Group does not have any transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the half year / year in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961).

71 The Trust Group has not been declared as a wilful defaulter by any bank or financial institution or other lender.

72 The Trust Group does not have any Benami property, where any proceeding has been initiated or pending against the Trust Group for holding any Benami property.

73 The Consolidated Financial Statements have been approved by the Board of Directors of the Investment Manager to the Trust thorugh resolution by circulation dated December 05, 2025.

AUDITORS' REPORT ON PROJECTIONS OF REVENUE FROM OPERATIONS AND CASH FLOWS FROM OPERATING ACTIVITIES

To
The Board of Directors,
Cube Highways Fund Advisors Private Limited (the "Investment Manager") in its capacity as an Investment Manager of the Cube Highways Trust (the "Issuer" or the "Trust")
B-376, UGF, Nirman Vihar,
New Delhi-110092

1. We have examined, the accompanying statement of projections of revenue from operations and cash flows from operating activities and the underlying assumptions of Baharampore-Farakka Highways Limited (the "SPV") in the Projection Information for the years ending March 31, 2026, 2027, 2028 and 2029 (collectively, hereinafter referred to as the "Projection Information"), in accordance with Standard on Assurance Engagement 3400, "The Examination of Prospective Financial Information", issued by the Institute of Chartered Accountants of India. The preparation and presentation of the projections including the underlying assumptions, set out in Note (b) to the Projection Information, is the responsibility of the Investment Manager and has been approved by the Board of Directors of the Investment Manager. Our responsibility is to examine the evidence supporting the assumptions (excluding the hypothetical assumption) and other information in the Projection Information. Our responsibility does not include verification of the accuracy of projections. Therefore, we do not vouch for the accuracy of the same.

2. These projections have been prepared for the proposed conversion of Cube Highways Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust (the "Offer") in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD2/P/CIR/2025/102 dated July 11, 2025, as amended ("InvIT Regulations"). The projections have been prepared using a set of assumptions that include hypothetical assumptions about future events and the Investment Manager's actions that are not necessarily expected to occur, as set out in Note (b) to the Projection Information and has been approved by the Board of Directors of the Investment Manager. Consequently, users are cautioned that this projection may not be appropriate for purposes other than that described above.

3. We have carried out our examination of the Projection Information on a test basis. Based on our examination of the evidence supporting the assumptions (excluding the hypothetical assumptions), nothing has come to our attention which causes us to believe that these assumptions do not provide a reasonable basis for the Projection Information.

4. Further, in our opinion, the Projection Information, read with the basis of preparation and notes therein, is properly prepared on the basis of the assumptions as set out in Note (b) to the Projection Information and consistent with the accounting policies, to the extent applicable, used for preparation of the historical financial statements of the SPV which are included in the draft offer document (the "DOD"). Even if the events anticipated under the hypothetical assumptions described above occur, actual results are still likely to be different from the projection since other anticipated events frequently do not occur as expected and the variation may be material.

5. This report is required by InvIT Regulations requiring the independent auditor to issue a report on the projections and is issued for the sole purpose of the Offer in accordance with the InvIT Regulations. Our work has not been carried out in accordance with auditing or other standards or practices accepted in jurisdictions outside India, including the United States of America, and accordingly should not be relied upon as if it had been carried upon in accordance with those standards and practices. US Securities regulations do not require profit forecast to be reported by a third party. This report should not be relied upon by prospective investors in the United States of America, including persons who are qualified institutional buyers as defined under Rule 144A under the United States Securities Act of 1933, as amended participating in the Issue. We accept no responsibility and deny any liability to any person who seeks to rely on this report and who may seek to make claim in connection with any offering of securities on the basis that they had acted in reliance on such information under the protections accorded by United States of America law and regulation.

6. This report is addressed to and is provided to enable the Investment Manager to include this report in the DOD in connection with the proposed offer for sale of Units of the Trust and that the Projection Information may not be meaningful for any other purpose.

Notes to the Projection Information of Baharampore - Farakka Highways Limited

a) General Information

Cube Highways Trust (the "Trust") was set up on December 7, 2021, as a contributory irrevocable trust under the provision of the Indian Trusts Act, 1882. The Trust was registered as an infrastructure investment trust under the Securities Exchange Board of India ("SEBI") (Infrastructure Investment Trust) Regulations, 2014, as amended read together with circulars and guidelines issued thereunder (the "SEBI InvIT Regulations") on April 5, 2022, having registration number IN/InvIT/22-23/0022. The registered office address of the Trust is B-376, UGF, Nirman Vihar, New Delhi - 110092, India.

The investment objective of the Trust is to carry on the activities of an infrastructure investment trust, as permissible under the SEBI InvIT Regulations. The Trust has been formed to invest in infrastructure assets primarily being in the road sector in India. All the Trust's Road projects are implemented and held through special purpose vehicle ("SPV").

Pursuant to the unitholder resolution of Cube Highways Trust (Trust) dated 20 February 2026, the Trust proposes to acquire from Cube Highways and Infrastructure V Pte. Ltd. (CH-V) 100% of the fully paid-up equity shares of Baharampore-Farakka Highways Limited. In consideration thereof, the Trust proposes to issue and allot ordinary units of the Trust to CH-V.

b) Basis of preparation of Projection Information

The statements of projection of revenue from operations and projection of cash flows from operating activities of the proposed subsidiary for the financial years ending March 31, 2026, 2027, 2028 and 2029 along with the underlying assumptions and other explanatory information (the "Projection Information") have been compiled by Cube Highways Fund Advisors Private Limited in its capacity as an Investment Manager of the Trust solely for the purpose of inclusion in the Draft Offer Document (DOD) in connection with the proposed conversion of the Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, as amended ("SEBI InvIT Regulations") (hereinafter referred to as the "proposed offer of units of the Trust"). Therefore, the Projection Information should not be used or relied upon for any purpose other than described above.

The Projection Information have been prepared based on the accounting policies used for preparation of the historical financial statements of the proposed subsidiary, together with the effect of Qualifications, Emphasis of Matters and Other Comments in the Audit Report on Historical Financial Statements in relation to the Projection Information summarised below, as required by the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended including circulars and guidelines issued thereunder ("SEBI InvIT Regulations"), which are prepared in accordance with accounting principles of Indian Accounting Standards ("Ind AS") as defined in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015, as amended prescribed under Section 133 of the Companies Act, 2013 read with SEBI InvIT Regulations and the Guidance Note issued by the Institute of Chartered Accountants of India. Projected cash flow from operating activities have been calculated using the direct method under Ind AS 7 - Statement of Cash Flows and is computed by deducting the projected expenses and income taxes from the projected revenue from operations and adjusted for working capital changes and projected non-cash expenses (if any). Projected cash flow from operating activities do not include any items pertaining to financing or investing in nature. Though the aforesaid Projections are prepared under the Ind AS framework, they do not provide for all the detailed disclosures as required under Ind AS.

The Projection Information are presented in Indian Rupees which is also the functional currency of the Trust. All values are rounded to the nearest million, unless otherwise indicated.

The proposed subsidiary follows March 31 as its accounting year end. Accordingly, the Projection Information are prepared for the financial years ending March 31, 2026, March 31, 2027, March 31, 2028, and March 31, 2029 ('Projections Period'). However, the assumed date of acquisition (April 01, 2026) may be postponed and accordingly, the actual result in the first financial period of the Trust post-acquisition of the Proposed Subsidiary may be different from the numbers disclosed in the Projection Information. For the year ending March 31, 2026 the Projection information considers actual financial information upto September 30, 2025 which is the latest historical period available for preparation of the Projection Information.

It is clarified that the Projection Information have been prepared using a combination of best-estimate assumptions reflecting management's expectations of future events and actions as at that date.
The Projections have been prepared based on the significant assumptions stated in Note d) below. The Projection Information contain forecasts and projections that relate to future events including hypothetical assumptions, which are, by their nature, subject to significant risks and uncertainties. Events, circumstances and hypothetical assumptions relating to future events and actions that may or may not materialise. Even if the events anticipated under the hypothetical assumptions described in the Projection Information occur, actual results are still likely to be different from those stated in the Projection Information since other anticipated events frequently do not occur as expected and the variation may be material. The actual results may therefore differ materially from those forecasted and projected.

Summary of Qualifications, Emphasis of Matters and Other Comments in the Audit Report on Historical Financial Statements used as base for the preparation of the Projection Information

A. There are no audit qualifications in the auditor report for the year ended March 31, 2025.

B. There are no Emphasis of Matter paragraphs in the auditor report for the year ended March 31, 2025.

C. In addition to the audit opinion on the financial statements, the auditors are required to comment upon the matters included in the Companies (Auditor's Report) Order, 2020 ("the CARO 2020 Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013 on the Financial Statements as at and for the year ended March 31, 2025.

Certain statements/comments included in the CARO in the Auditor's Report are reproduced below in respect of the financial statements presented, along with its impact, if any, on the Projection Statement:

i.) Clause (vii)(b) of Para 3 of the CARO, 2020 Order for FY 2024-25

"There are no statutory dues referred to in sub-clause (a) which have not been deposited on account of any dispute except as given below:

Name of Statute	*Nature of Dues*	*Disputed Amount (Rs in lacs)*	*Period to which the amount relates*	*Forum where dispute is pending*
The West Bengal value Added tax, 2003	*VAT*	*0.65*	*FY 2016-17*	*West Bengal Sales Tax Authority*
Income Tax demand	*Income tax*	*0.34*	*FY 2017-18*	*Matter pending with ITO*
Goods and Services Tax	*GST*	*59.49*	*FY 2022-23*	*West Bengal GST Authority*
Goods and Services Tax	*GST*	*44.50*	*FY 2021-22*	*West Bengal GST Authority*

The above matters are currently sub judice and continue to remain outstanding as on date and will be updated upon final resolution of the litigation. These matters currently do not have any impact on the Projection Information.

ii.) Clause (xi)(c) of Para 3 of the CARO, 2020 Order for FY 2024-25

"We have taken into consideration the whistle blower complaints received by the company during the year while determining the nature, timing and extent of audit procedures."

In terms of the assessment by BFHL's management, there is no impact in respect of the above whistle blower complaints on the Projection Information.

c) Summary of Projections

All figures are in INR million

Particulars	Actual (April'25 to September'25)	Projected (October'25 to March'26)	Total FY26	FY27	FY28	FY29
I. Projected Revenue from Operations	**1,011**	**1,062**	**2,073**	**2,352**	**2,646**	**2,728**
Projected Expenses:						
Operational Expenses	(133)	(160)	(293)	(313)	(335)	(358)

Project Manager Fees	-	-	-	(52)	(58)	(60)
Overloading sharing with Erstwhile seller	(22)	(23)	(45)	(51)	(58)	(58)
Major Maintenance Expense	(290)	(88)	(378)	-	-	-
Taxes	-	(24)	(24)	(27)	(14)	(2)
Working Capital Changes	(152)	-	(152)	-	-	-
II.Projected Cash Flow from Operations	**372**	**753**	**1,125**	**1,865**	**2,120**	**2,186**

d) Significant assumptions

The Projection Information have been prepared based on the significant assumptions including hypothetical assumptions summarised below. The Investment Manager considers the assumptions to be appropriate and reasonable as at the date of the reporting. However, the investors should consider these assumptions as well as the Projection Information and make their own assessment of the future performance of the SPV.

i. Revenue from operations:

The SPV revenue from operations primarily consists of income from toll collection.

Toll income:

The Investment Manager has obtained reports from an independent third-party traffic consultant i.e. Crisil Intelligence ("Traffic Consultant") in assessment of the assumptions, market fundamentals, industry drivers and outlook including the potential impact of loss of revenue arising from alternative diversion routes that may affect the traffic on the SPV's road, among other factors, in connection with the estimation of the projected revenue from operations. These assumptions and factors have been set out in the Traffic Consultant's report.

The revenue projection for the year ending March 31, 2026 is derived from annualizing the base traffic data of 7-months (April'25 to October'25) as adjusted for seasonality and tariff rates for the financial year 2025-26. As per Concession Agreement, toll rates shall increase by fixed base rate increase of 3% plus the impact of 40% of the change in WPI (December).

Key variables for the balance projection period includes traffic growth and WPI, the details of the assumptions are as set forth below:

Assumptions	For the year ending March 31, 2027	For the year ending March 31, 2028	For the year ending March 31, 2029
Traffic growth rate (Note 1)	9.2%	7.3%	-1.8%
WPI (Dec) (Note 2)	2.40%	5.00%	5.10%

Notes

1. Traffic growth rate is based on average Passenger Car Units (PCU) growth rate for both toll plazas (post-diversion).
2. WPI stands here for Wholesale Price Index for all commodities as published by the Ministry of Industry, Government of India.

ii. Projected Expenses:

Major components of projected expenses are as under:

A) Operational and Routine Maintenance Expense

The operational and routine maintenance cost includes routine maintenance, manpower costs and other operational expenses, including, but not limited to, road and site work expenses, and other toll operations cost.

In forecasting these costs, the SPV considers the report provided by the technical consultant i.e. M/s Knight Frank India (KFI) for the SPV (the "Technical Report"). This is further adjusted to reflect the expected operational and routine maintenance costs required to align the target assets with the Trust's operational standards based on management's assessment ("Base Cost"). Refer summary below:

Particulars	OPEX FY 26 (in Mn)	RM FY 26 (in Mn)
Total Operational Expense (OPEX) / Routine Maintenance (RM) Expense as per Technical Report	152	47
Add: Additional Expense as per Management's Estimate	141	9
Base Cost for FY26	**293**	**56**

The following assumptions have been made regarding Operational and Routine Maintenance:

Particulars	Description
Operational Expense (OPEX)	• Operational Expenses: Base Cost Escalation at 1.4 times of WPI of respective year. • Insurance Expenses: Escalation at WPI;
Routine Maintenance (RM) Expenses	• Base Cost Escalation at WPI of the respective year • RM savings during year of Major Maintenance (FY 2026): 25% • RM savings during Defect Liability Period in the following year of completion of Major Maintenance (FY 2027): 25%

B) Project Manager Fees

The Project Manager Fees are mainly projected based on the terms and conditions of the relevant agreements and / or based on Management's experience and judgement. These expenses consist of below:

i) Project manager fee

Based on the agreement to be entered with Cube Highways and Transportation Assets Advisors Private Limited (Project Manager) in relation to the specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

The Project Manager is entitled to a Project Manager fee to be calculated @ 1.55% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

ii) Professional Consultancy Charges

Based on the Expert Services Agreement to be entered with Cube Highways Technologies Private Limited in relation to specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

These charges are calculated @ 0.35% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

C) Overloading Sharing with Erstwhile Seller

BFHL has entered into an Agreement with HCC Concession Limited ("HCon"), under which BFHL has received an upfront lumpsum consideration and in lieu of that agreed to passthrough to HCon over the balance concession period, all amount that will be collected on account of overloading revenue net off 20% of overloading revenue retained for operation, routine and maintenance expenses incurred due to overloaded vehicles. This is estimated based on 80% of the projected overloading revenue.

D) Major Maintenance Expense

Under the terms of the concession agreement, the SPV is required to conduct periodic major maintenance, which consists of restoring the infrastructure to a specified level of serviceability at periodic intervals during the concession period or before it is handed over to NHAI. Major maintenance (MM) is expected to be incurred after every five years, depending on pavement conditions, traffic loads and concession requirements. It involves substantial expenditure on large-scale resurfacing, repair and replacement of road furniture, rehabilitation of structures and restoration of pavement quality.

The periodic overlay and resurfacing cycles require substantial expenditure, with major costs comprising of construction materials such as bitumen and aggregates. These costs are supported by purchase orders or work orders placed or proposed to be placed, based on road survey reports issued by independent field experts and the major maintenance strategy developed by the internal technical team.

For FY 2026, the MM cost reflects the price currently agreed with the contractor for MM work in progress, which is expected to be completed by end of FY 2026. As a result, no major maintenance expenditure is assumed over the balance Projected period, with the next maintenance cycle currently planned for FY 2031.

For the purposes of projected cash flow from operations, the projected periodic / major maintenance expense is considered in the year in which the actual outflow is expected to occur. The projections do not envisage any unanticipated expenses which may be incurred due to any unforeseen circumstances.

WPI escalation (on financial year basis) used for above projected expense is as under :

WPI assumptions	FY26	FY27	FY28	FY29
WPI (FY)	2.4%	5.00%	5.10%	4.90%

Note: WPI stands here for Wholesale Price Index for all commodities as published by the Ministry of Industry, Government of India

iii. Taxes

Current income tax is measured at the amount expected to be paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in India, being the jurisdiction in which the SPV operates and generates taxable income. Projected income tax expense is measured considering the impact of Finance Bill 2026.

As on year ended March 31, 2025, the SPV's has:

1. Carry forwarded business losses to the tune of INR 1,337 million;
2. Carry forwarded Unabsorbed Depreciation to the tune of INR 4 million;
3. Set off available on account of carry forwarded business losses and unabsorbed depreciation as per books of accounts for the calculation of Book Profit under MAT provisions to the tune of INR 958 million and 461 million respectively.

In addition, the SPV is also eligible for deduction under section 80IA of the Income Tax Act, 1961 for ten consecutive years, starting from FY 2024-25.

Considering the above the SPV is not projected to be liable for Income tax on its core operations. The SPV does have interest income on which tax is projected to be paid based on current tax rates.

iv. Changes in working capital

The SPV has considered September 2025 working capital as the base working capital, which is based on the actual changes for the period April 2025 to September 2025. For the balance concession period, it is assumed that since the entire collection of tolls is in cash and routine expenses are in cash or a credit period as available, the effective working capital deployed would be relatively low or negative in certain instances. Further, we believe the working capital is stable and not expected to vary materially over a period. Accordingly, changes in working capital are not significant and no impact of that has been considered in the projected cash flows from operating activities for the balance projected period.

v. Other assumptions

a) Acquisition of SPV and refinancing of external debt through InvIT loan been assumed on 1st April'2026 amounting to INR 6,534 million at the annual interest rate of 13.00% and expected repayment of INR 775 million in Aug'26, INR 2,810 million in Aug'27 and INR 1,440 million in Aug'28. The balance repayment has been assumed post March 31, 2029.

b) It has been assumed that no outflow on account of any litigation related matters including current pending litigations/contingent liabilities is expected to become due during the Projection Period.

c) On November 21, 2025, the Government of India notified the four Labour Codes — The Code on Wages, 2019, The Industrial Relations Code, The Code on Social Security, 2020, and The Occupational Safety, Health and Working Conditions Code, 2020 — consolidating 29 existing labour laws. Based on the draft rules and FAQs issued by the Ministry of Labour and Employment and best available information (including legal assessments and existing contractual arrangements) the SPV has estimated that these Codes have no material financial impact on the Projection Information. The SPV continues to monitor the finalisation of rules by the central/state government and other developments pertaining to labour codes and would provide appropriate accounting effect, if any, on the basis of such developments.

d) The taxation legislation or other applicable legislation is assumed to be same over the Projection Period as per the currently enacted or substantively enacted tax laws at the reporting date in India. The relevant tax exemptions, tax remissions, and preferential tax treatments granted remain valid and applicable and that the terms and conditions thereto are assumed to be complied with.

e) It has been assumed that no liability or liquidated damages on account of default in concession agreement shall devolve upon the SPV during the Projections Period.

f) The Projections are based on assumptions and are subject to several factors. Investors should be aware that future events, including actual traffic growth rates, cannot be predicted with any certainty and there may be deviations from the figures projected in the Projection Information.

g) No gain or loss has been considered on account of changes in foreign exchange rates.

These Projection Information has been adopted by the Board of Director of the Investment Manager on February 27, 2026.

For and on behalf of the Board of Directors of Cube Highways Fund Advisors Private Limited
(in its capacity as an Investment Manager of Cube Highways Trust)

AUDITORS' REPORT ON PROJECTIONS OF REVENUE FROM OPERATIONS AND CASH FLOWS FROM OPERATING ACTIVITIES

To
The Board of Directors,
Cube Highways Fund Advisors Private Limited (the "Investment Manager") in its capacity as an Investment Manager of the Cube Highways Trust (the "Issuer" or the "Trust")
B-376, UGF, Nirman Vihar,
New Delhi-110092

1. We have examined, the accompanying statement of projections of revenue from operations and cash flows from operating activities and the underlying assumptions of Devanahalli Tollway Private Limited (the "SPV") in the Projection Information for the years ending March 31, 2026, 2027, 2028 and 2029 (collectively, hereinafter referred to as the "Projection Information"), in accordance with Standard on Assurance Engagement 3400, "The Examination of Prospective Financial Information", issued by the Institute of Chartered Accountants of India. The preparation and presentation of the projections including the underlying assumptions, set out in Note (b) to the Projection Information, is the responsibility of the Investment Manager and has been approved by the Board of Directors of the Investment Manager. Our responsibility is to examine the evidence supporting the assumptions (excluding the hypothetical assumption) and other information in the Projection Information. Our responsibility does not include verification of the accuracy of projections. Therefore, we do not vouch for the accuracy of the same.

2. These projections have been prepared for the proposed conversion of Cube Highways Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust (the "Offer") in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD2/P/CIR/2025/102 dated July 11, 2025, as amended ("InvIT Regulations"). The projections have been prepared using a set of assumptions that include hypothetical assumptions about future events and the Investment Manager's actions that are not necessarily expected to occur, as set out in Note (b) to the Projection Information and has been approved by the Board of Directors of the Investment Manager. Consequently, users are cautioned that this projection may not be appropriate for purposes other than that described above.

3. We have carried out our examination of the Projection Information on a test basis. Based on our examination of the evidence supporting the assumptions (excluding the hypothetical assumptions), nothing has come to our attention which causes us to believe that these assumptions do not provide a reasonable basis for the Projection Information.

4. Further, in our opinion, the Projection Information, read with the basis of preparation and notes therein, is properly prepared on the basis of the assumptions as set out in Note (b) to the Projection Information and consistent with the accounting policies, to the extent applicable, used for preparation of the historical financial statements of the SPV which are included in the draft offer document (the "DOD"). Even if the events anticipated under the hypothetical assumptions described above occur, actual results are still likely to be different from the projection since other anticipated events frequently do not occur as expected and the variation may be material.

5. This report is required by InvIT Regulations requiring the independent auditor to issue a report on the projections and is issued for the sole purpose of the Offer in accordance with the InvIT Regulations. Our work has not been carried out in accordance with auditing or other standards or practices accepted in jurisdictions outside India, including the United States of America, and accordingly should not be relied upon as if it had been carried upon in accordance with those standards and practices. US Securities regulations do not require profit forecast to be reported by a third party. This report should not be relied upon by prospective investors in the United States of America, including persons who are qualified institutional buyers as defined under Rule 144A under the United States Securities Act of 1933, as amended participating in the Issue. We accept no responsibility and deny any liability to any person who seeks to rely on this report and who may seek to make claim in connection with any offering of securities on the basis that they had acted in reliance on such information under the protections accorded by United States of America law and regulation.

6. This report is addressed to and is provided to enable the Investment Manager to include this report in the DOD in connection with the proposed offer for sale of Units of the Trust and that the Projection Information may not be meaningful for any other purpose.

Notes to the Projection Information of Devanahalli Tollway Private Limited

a) General Information

Cube Highways Trust (the "Trust") was set up on December 7, 2021, as a contributory irrevocable trust under the provision of the Indian Trusts Act, 1882. The Trust was registered as an infrastructure investment trust under the Securities Exchange Board of India ("SEBI") (Infrastructure Investment Trust) Regulations, 2014, as amended read together with circulars and guidelines issued thereunder (the "SEBI InvIT Regulations") on April 5, 2022, having registration number IN/InvIT/22-23/0022. The registered office address of the Trust is B-376, UGF, Nirman Vihar, New Delhi - 110092, India.

The investment objective of the Trust is to carry on the activities of an infrastructure investment trust, as permissible under the SEBI InvIT Regulations. The Trust has been formed to invest in infrastructure assets primarily being in the road sector in India. All the Trust's Road projects are implemented and held through special purpose vehicle ("SPV").

Pursuant to the unitholder resolution of Cube Highways Trust (Trust) dated 20 February 2026, the Trust proposes to acquire from Cube Highways and Infrastructure V Pte. Ltd. (CH-V) 100% of the fully paid-up equity shares of Devanahalli Tollway Private Limited. In consideration thereof, the Trust proposes to issue and allot ordinary units of the Trust to CH-V.

b) Basis of preparation of Projection Information

The statements of projection of revenue from operations and projection of cash flows from operating activities of the proposed subsidiary for the financial years ending March 31, 2026, 2027, 2028 and 2029 along with the underlying assumptions and other explanatory information (the "Projection Information") have been compiled by Cube Highways Fund Advisors Private Limited in its capacity as an Investment Manager of the Trust solely for the purpose of inclusion in the Draft Offer Document (DOD) in connection with the proposed conversion of the Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, as amended ("SEBI InvIT Regulations") (hereinafter referred to as the "proposed offer of units of the Trust").

The Projection Information have been prepared based on the accounting policies used for preparation of the historical financial statements of the proposed subsidiary, together with the effect of Qualifications, Emphasis of Matters and Other Comments in the Audit Report on Historical Financial Statements in relation to the Projection Information summarised below, as required by the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended including circulars and guidelines issued thereunder ("SEBI InvIT Regulations"), which are prepared in accordance with accounting principles of Indian Accounting Standards ("Ind AS") as defined in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015, as amended prescribed under Section 133 of the Companies Act, 2013 read with SEBI InvIT Regulations and the Guidance Note issued by the Institute of Chartered Accountants of India. Projected cash flow from operating activities have been calculated using the direct method under Ind AS 7 - Statement of Cash Flows and is computed by deducting the projected operating expenses and income taxes from the projected revenue from operations and adjusted for working capital changes and projected non-cash expenses (if any). Projected cash flow from operating activities do not include any items pertaining to financing or investing in nature. Though the aforesaid Projections are prepared under the Ind AS framework, they do not provide for all the detailed disclosures as required under Ind AS.

The Projection Information are presented in Indian Rupees which is also the functional currency of the Trust. All values are rounded to the nearest million, unless otherwise indicated.

The proposed subsidiary follows March 31 as its accounting year end. Accordingly, the Projection Information are prepared for the financial years ending March 31, 2026, March 31, 2027, March 31, 2028, and March 31, 2029 ('Projections Period'). However, the assumed date of acquisition (April 01, 2026) may be postponed and accordingly, the actual result in the first financial period of the Trust post-acquisition of the Proposed Subsidiary may be different from the numbers disclosed in the Projection Information. For the year ending March 31, 2026, the Projection information considers actual financial information upto September 30, 2025 which is the latest historical period available for preparation of the Projection Information.

It is clarified that the Projection Information have been prepared using a combination of best-estimate assumptions reflecting management's expectations of future events and actions as at that date.

The Projections have been prepared based on the significant assumptions stated in Note d) below. The Projection Information contain forecasts and projections that relate to future events including hypothetical assumptions, which are, by their nature, subject to significant risks and uncertainties. Events, circumstances and hypothetical assumptions relating to future events and actions that may or may not materialise. Even if the events anticipated under the hypothetical assumptions described in the Projection Information occur, actual results are still likely to be different from those stated in the Projection Information since other anticipated events frequently do not occur as expected and the variation may be material. The actual results may therefore differ materially from those forecasted and projected.

Summary of Qualifications, Emphasis of Matters and Other Comments in the Audit Report on Historical Financial Statements used as base for the preparation of the Projection Information

A. There are no audit qualifications in the auditor report for the year ended March 31, 2025.

B. There are no Emphasis of Matter paragraphs in the auditor report for the year ended March 31, 2025.

C. In addition to the audit opinion on the financial statements, the auditors are required to comment upon the matters included in the Companies (Auditor's Report) Order, 2020 ("the CARO 2020 Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013 on the Financial Statements as at and for the year ended March 31, 2025.

Certain statements/comments included in the CARO in in the Auditor's Report are reproduced below in respect of the financial statements presented, along with its impact, if any, on the Projection Statement:

i.) Clause (iii)(c) of Para 3 of the CARO, 2020 Order for FY 2024-25

"In respect of a loan granted to the group company the schedule of repayment of principal and payment of interest has not been stipulated in the agreement. Hence, we are unable to make a specific comment on the regularity of repayment of principal and payment of interest in respect of such loan."

The above matter does not have any impact on the Projection Information.

ii.) Clause (vii)(b) of Para 3 of the CARO, 2020 Order for FY 2024-25

"According to records of the Company, the dues of income-tax, sales-tax, duty of custom, duty of excise, value added tax, cess and other statutory dues on account of dispute, are as follow

Name of Statute	*Nature of the Dues*	*Amount (Rs. in lakhs)*	*Amount paid under protest (Rs. in lakhs)*	*Period to which the amount relates*	*Forum where the dispute is pending*
Income Tax Act, 1961	*Income tax*	*16.57*	-	*FY - 2011-12 AY – 2012-13*	*Commissioner of Income Tax Appeals (CIT A)*

Income Tax Act, 1961	*Income tax*	*402.15*	*86.06*	*FY - 2011-12 AY – 2012-13*	*Commissioner of Income Tax Appeals (CIT A)*
Income Tax Act, 1961	*Income tax*	*1,034.35*	*-*	*FY - 2011-12 AY – 2012-13*	*Commissioner of Income Tax Appeals (CIT A)"*

The above matters are currently sub judice and continues to remain outstanding as on date and will be updated upon final resolution of the litigation. These matters currently do not have any impact on the Projection Information.

c) Summary of Projections

All figures are in INR million

Particulars	FY 26			FY27	FY28	FY29
	Actual (April'25 to September'25)	Projected (October'25 to March'26)	Total			
I. Projected revenue from operations	**1,747**	**1,845**	**3,592**	**3,962**	**4,281**	**4,668**
Projected Expenses:						
Operational Expenses	(159)	(196)	(355)	(390)	(416)	(445)
Routine Maintenance expenses	(26)	(16)	(42)	(56)	(59)	(46)
Project Management Fees	-	-	-	(89)	(96)	(105)
Upfront Improvement works	-	(430)	(430)	-	-	-
Major Maintenance Expense	-	-	-	-	-	(750)
Taxes	(214)	(138)	(352)	(464)	(492)	(428)
Working Capital Changes	13	-	13			
II. Projected Cash flow from operations	**1,361**	**1,065**	**2,426**	**2,963**	**3,218**	**2,894**

d) Significant assumptions

The Projection Information have been prepared based on the significant assumptions including hypothetical assumptions summarised below. The Investment Manager considers the assumptions to be appropriate and reasonable as at the date of the reporting. However, the investors should consider these assumptions as well as the Projection Information and make their own assessment of the future performance of the SPV.

i. Revenue from operations:

The SPV revenue from operations primarily consists of income from toll collection.

Toll income:

The Investment Manager has obtained reports from an independent third-party traffic consultant i.e. Crisil Intelligence ("Traffic Consultant") in assessment of the assumptions, market fundamentals, industry drivers and outlook including the potential impact of loss of revenue arising from alternative diversion routes that may affect the traffic on the SPV's road, among other factors, in connection with the estimation of the projected revenue from operations. These assumptions and factors have been set out in the Traffic Consultant's report.

The revenue projection for the year ending March 31, 2026 is derived from annualizing the base traffic data of 6 months (April'25 to September'25) as adjusted for seasonality and tariff rates for the financial year 2025-26. As per Concession Agreement, toll rates shall increase by fixed base rate increase of 3% plus the impact of 40% of the change in WPI(December).

Key variables for the balance projection period includes traffic growth and WPI, the details of the assumptions are as set forth below:

Assumptions	For the year ending March 31, 2027	For the year ending March 31, 2028	For the year ending March 31, 2029
Traffic growth rate (Note 1)	6.9%	2.8%	4.5%
WPI (Dec) (Note 2)	2.40%	5.00%	5.10%

Notes

1. Traffic growth rate is based on average Passenger Car Units (PCU)) growth rate for the toll plaza (post-diversion)
2. WPI stands here for Wholesale Price Index for all commodities as published by the Ministry of Industry, Government of India.

ii. Projected Expenses:

Major components of projected expenses are as under:

A) Operational and Routine Maintenance Expense

The operational and routine maintenance cost includes routine maintenance, manpower costs and other operational expenses, including, but not limited to, road and site work expenses, and other toll operations cost.

In forecasting these costs, the SPV considers the report provided by the technical consultant i.e. M/s Knight Frank India (KFI) for the SPV (the "Technical Report"). This is further adjusted to reflect the expected operational and routine maintenance costs based on management's assessment ("Base cost").. Refer summary below:

Particulars	OPEX FY 26 (in Mn)	RM FY 26 (in Mn)
Total Operational Expense (OPEX) / Routine Maintenance (RM) Expense as per Technical Report	131	27
Add: Additional Expense as per Management's Estimate	224	26
Base Cost for FY26	**355**	**53**

The following assumptions have been made regarding Operational and Routine Maintenance:

Particulars	Description
Operational Expense (OPEX)	• Operational Expenses: Base Cost Escalation at 1.4 times of WPI of respective year. • Insurance Expenses: Escalation at WPI;
Routine Maintenance (RM) Expenses	• Base Cost Escalation at WPI of the respective year • RM savings during year of Upfront Improvement Work (FY 2026) / Major Maintenance (FY 2029): 25% • RM savings during Defect Liability Period in the following year of completion of Major Maintenance: 25%

B) Project Manager Fees

The Project Manager Fees are mainly projected based on the terms and conditions of the relevant agreements and / or based on Management's experience and judgement. These expenses consist of below:

i) Project manager fee

Based on the agreement to be entered with Cube Highways and Transportation Assets Advisors Private Limited (Project Manager) in relation to the specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

The Project Manager is entitled to a Project Manager fee to be calculated @ 1.55% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

ii) Professional Consultancy Charges

Based on the Expert Services Agreement to be entered with Cube Highways Technologies Private Limited in relation to specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

These charges are calculated @ 0.35% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

C) Upfront Improvement Works

Additionally, a one-time improvement cost has been estimated for the SPV in FY 2026. As CH-V has acquired this asset in FY26, a detailed technical assessment has been carried out during the takeover of SPV. During the assessment, there are certain deficiency on the project road related to structures repair works, safety improvements and initial maintenance works which required to be carried out.

These costs may not be fully incurred by the end of FY 2026 and could extend into FY 2027 depending on the timing of execution of such works.

D) Major Maintenance Expense

Under the terms of the concession agreement, the SPV is required to conduct periodic major maintenance, which consists of restoring the infrastructure to a specified level of serviceability at periodic intervals during the concession period or before it is handed over to NHAI. Major maintenance (MM) is expected to be incurred after every five years, depending on pavement conditions, traffic loads and concession requirements. It involves substantial expenditure on large-scale resurfacing, repair and replacement of road furniture, rehabilitation of structures and restoration of pavement quality

Major maintenance costs have been derived based on the road surveys and studies conducted by the technical consultant i.e. M/s Knight Frank India (KFI) and in accordance with the assumptions and estimates set out in the technical report (the "Technical Report") provided by the technical consultant for the SPV. It is further adjusted for escalations and on account of any additional cost estimate based on management's assessment. The next major maintenance cycle is planned in FY 2029. Refer to the reconciliation of the same:

Particulars	FY 29 (in Mn)
Major Maintenance Expense as per Technical Report (Without Escalation) (A)	657
Cost estimated for additional measures around traffic and work zone safety	15
WPI impact on the non-bitumen expense out of above (75% of A)	78
Major Maintenance Expense (With Escalation)	**750**

For the purposes of projected cash flow from operations, the projected periodic / major maintenance expense is considered in the year of actual outflow is expected to occur. The projections do not envisage any unanticipated expenses which may be incurred due to any unforeseen circumstances.

The following assumptions have been made regarding the major maintenance expense:

Particulars	Description
Major Maintenance (MM Expense)	• As per Technical Report • Escalation at WPI for Non bitumen expenses (75%). No escalations considered for the bitumen cost (25%).

WPI escalation (on financial year basis) used for operational and routine maintenance expense is as under :

WPI assumptions	FY26	FY27	FY28	FY29
WPI (FY)	2.4%	5.00%	5.10%	4.90%

Note: WPI stands here for Wholesale Price Index for all commodities as published by the Ministry of Industry, Government of India

iii. Taxes

Current income tax is measured at the amount expected to be paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in India, being the jurisdiction in which the SPV operates and generates taxable income. Projected income tax expense is measured considering the impact of Finance Bill 2026.

The SPV is eligible for deduction under section 80IA of the Income Tax Act, 1961 for ten consecutive years, starting from FY 2017-18. The projected income tax expense has been calculated considering the company will opt out of tax holiday period in FY 26-27.

As on year ended March 31, 2025, the SPV has:

Carry forwarded MAT Credit to the tune of INR 579 million.

iv. Changes in working capital

The SPV has considered September 2025 working capital as the base working capital, which is based on the actual changes for the period April 2025 to September 2025. For the balance concession period, it is assumed that since the entire collection of tolls is in cash and routine expenses are in cash or a credit period as available, the effective working capital deployed would be relatively low or negative in certain instances. Further, we believe the working capital is stable and not expected to vary materially over a period. Accordingly, changes in working capital are not significant and no impact of that has been considered on the projected cash flows from operating activities for the balance projected period.

v. Other assumptions

a) Acquisition of SPV and refinancing of external debt through InvIT loan been assumed on 1st April'2026 amounting to INR 4,632 Mn at the annual interest rate of 13.20% and expected repayment of INR 653 Mn in Sep'27. The balance repayment has been assumed post March 31, 2029.

b) It has been assumed that no outflow on account of any litigation related matters including current pending litigations/contingent liabilities is expected to become due during the Projection Period.

c) On November 21, 2025, the Government of India notified the four Labour Codes — The Code on Wages, 2019, The Industrial Relations Code, The Code on Social Security, 2020, and The Occupational Safety, Health and Working Conditions Code, 2020 — consolidating 29 existing labour laws. Based on the draft rules and FAQs issued by the Ministry of Labour and Employment and best available information (including legal assessments and existing contractual arrangements) the SPV has estimated that these Codes have no material financial impact on the Projection Information. The SPV continues to monitor the finalisation of rules by the central/state government and other developments pertaining to labour codes and would provide appropriate accounting effect, if any, on the basis of such developments.

d) The taxation legislation or other applicable legislation is assumed to be same over the Projection Period as per the currently enacted or substantively enacted tax laws at the reporting date in India. The relevant tax exemptions, tax remissions, and preferential tax treatments granted remain valid and applicable and that the terms and conditions thereto are assumed to be complied with.

e) It has been assumed that no liability or liquidated damages on account of default in concession agreement shall devolve upon the SPV during the Projections Period.

f) The Projections are based on assumptions and are subject to several factors. Investors should be aware that future events, including actual traffic growth rates, cannot be predicted with any certainty and there may be deviations from the figures projected in the Projection Information.

g) No gain or loss has been considered on account of changes in foreign exchange rates.

These Projection Information has been adopted by the Board of Director of the Investment Manager on February 27, 2026

For and on behalf of the Board of Directors of Cube Highways Fund Advisors Private Limited
(in its capacity as an Investment Manager of Cube Highways Trust)

AUDITORS' REPORT ON PROJECTIONS OF REVENUE FROM OPERATIONS AND CASH FLOWS FROM OPERATING ACTIVITIES

To
The Board of Directors,
Cube Highways Fund Advisors Private Limited (the "Investment Manager") in its capacity as an Investment Manager of the Cube Highways Trust (the "Issuer" or the "Trust")
B-376, UGF, Nirman Vihar,
New Delhi-110092

1. We have examined, the accompanying statement of projections of revenue from operations and cash flows from operating activities and the underlying assumptions of Chenani Nashri Tunnelway Limited (the "SPV") in the Projection Information for the years ending March 31, 2026, 2027, 2028 and 2029 (collectively, hereinafter referred to as the "Projection Information"), in accordance with Standard on Assurance Engagement 3400, "The Examination of Prospective Financial Information", issued by the Institute of Chartered Accountants of India. The preparation and presentation of the projections including the underlying assumptions, set out in Note (b) to the Projection Information, is the responsibility of the Investment Manager and has been approved by the Board of Directors of the Investment Manager. Our responsibility is to examine the evidence supporting the assumptions (excluding the hypothetical assumption) and other information in the Projection Information. Our responsibility does not include verification of the accuracy of projections. Therefore, we do not vouch for the accuracy of the same.

2. These projections have been prepared for the proposed conversion of Cube Highways Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust (the "Offer") in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD2/P/CIR/2025/102 dated July 11, 2025, as amended ("InvIT Regulations"). The projections have been prepared using a set of assumptions that include hypothetical assumptions about future events and the Investment Manager's actions that are not necessarily expected to occur, as set out in Note (b), to the Projection Information and has been approved by the Board of Directors of the Investment Manager. Consequently, users are cautioned that this projection may not be appropriate for purposes other than that described above.

3. We have carried out our examination of the Projection Information on a test basis. Based on our examination of the evidence supporting the assumptions (excluding the hypothetical assumptions), nothing has come to our attention which causes us to believe that these assumptions do not provide a reasonable basis for the Projection Information.

4. Further, in our opinion, the Projection Information, read with the basis of preparation and notes therein, is properly prepared on the basis of the assumptions as set out in Note (b) to the Projection Information and consistent with the accounting policies, to the extent applicable, used for preparation of the historical financial statements of the SPV which are included in the draft offer document (the "DOD"). Even if the events anticipated under the hypothetical assumptions described above occur, actual results are still likely to be different from the projection since other anticipated events frequently do not occur as expected and the variation may be material.

5. This report is required by InvIT Regulations requiring the independent auditor to issue a report on the projections and is issued for the sole purpose of the Offer in accordance with the InvIT Regulations. Our work has not been carried out in accordance with auditing or other standards or practices accepted in jurisdictions outside India, including the United States of America, and accordingly should not be relied upon as if it had been carried upon in accordance with those standards and practices. US Securities regulations do not require profit forecast to be reported by a third party. This report should not be relied upon by prospective investors in the United States of America, including persons who are qualified institutional buyers as defined under Rule 144A under the United States Securities Act of 1933, as amended participating in the Issue. We accept no responsibility and deny any liability to any person who seeks to rely on this report and who may seek to make claim in connection with any offering of securities on the basis that they had acted in reliance on such information under the protections accorded by United States of America law and regulation.

6. This report is addressed to and is provided to enable the Investment Manager to include this report in the DOD in connection with the proposed offer for sale of Units of the Trust and that the Projection Information may not be meaningful for any other purpose.

Notes to the Projection Information of Chenani Nashri Tunnelway Limited

a) General Information

Cube Highways Trust (the "Trust") was set up on December 7, 2021, as a contributory irrevocable trust under the provision of the Indian Trusts Act, 1882. The Trust was registered as an infrastructure investment trust under the Securities Exchange Board of India ("SEBI") (Infrastructure Investment Trust) Regulations, 2014, as amended read together with circulars and guidelines issued thereunder (the "SEBI InvIT Regulations") on April 5, 2022, having registration number IN/InvIT/22-23/0022. The registered office address of the Trust is B-376, UGF, Nirman Vihar, New Delhi - 110092, India.

The investment objective of the Trust is to carry on the activities of an infrastructure investment trust, as permissible under the SEBI InvIT Regulations. The Trust has been formed to invest in infrastructure assets primarily being in the road sector in India. All the Trust's Road projects are implemented and held through special purpose vehicle ("SPV").

Pursuant to the unitholder resolution of Cube Highways Trust (Trust) dated 20 February 2026, the Trust proposes to acquire from Cube Highways and Infrastructure II Pte. Ltd. (CH-II) upto 100% of the fully paid-up equity shares of Chenani Nashri Tunnelway Limited. In consideration thereof, the Trust proposes to issue and allot ordinary units of the Trust to CH-II.

b) Basis of preparation of Projection Information

The statements of projection of revenue from operations and projection of cash flows from operating activities of the proposed subsidiary for the financial years ending March 31, 2026, 2027, 2028 and 2029 along with the underlying assumptions and other explanatory information (the "Projection Information") have been compiled by the Cube Highways Fund Advisors Private Limited in its capacity as an Investment Manager of the Trust solely for the purpose of inclusion in the Draft Offer Document (DOD) in connection with the proposed conversion of the Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, as amended ("SEBI InvIT Regulations") (hereinafter referred to as the "proposed offer of units of the Trust"). Therefore, the Projection Information should not be used or relied upon for any purpose other than described above.

The Projection Information have been prepared based on the accounting policies used for preparation of the historical financial statements of the proposed subsidiary, together with the effect of Qualifications, Emphasis of Matters and Other Comments in the Audit Report on Historical Financial Statements in relation to the Projection Information summarised below, as required by the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended including circulars and guidelines issued thereunder ("SEBI InvIT Regulations"), which are prepared in accordance with accounting principles of Indian Accounting Standards ("Ind AS") as defined in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015, as amended prescribed under Section 133 of the Companies Act, 2013 read with SEBI InvIT Regulations and the Guidance Note issued by the Institute of Chartered Accountants of India. Projected cash flow from operating activities have been calculated using the direct method under Ind AS 7 - Statement of Cash Flows and is computed by deducting the projected expenses and income taxes from the projected revenue from operations and adjusted for working capital changes and projected non-cash expenses (if any). Projected cash flow from operating activities do not include any items pertaining to financing or investing in nature. Though the aforesaid Projections are prepared under the Ind AS framework, they do not provide for all the detailed disclosures as required under Ind AS.

The Projection Information are presented in Indian Rupees which is also the functional currency of the Trust. All values are rounded to the nearest million, unless otherwise indicated.

The proposed subsidiary follows March 31 as its accounting year end. Accordingly, the Projection Information are prepared for the financial years ending March 31, 2026, March 31, 2027, March 31, 2028, and March 31, 2029 ('Projections Period'). However, the assumed date of acquisition (April 01, 2026) may be postponed and accordingly, the actual result in the first financial period of the Trust post-acquisition of the proposed subsidiary may be different from the numbers disclosed in the Projection Information. For the year ending March 31, 2026 the Projection information considers actual financial information upto September 30, 2025 which is the latest historical period available for preparation of the Projection Information.

It is clarified that the Projection Information have been prepared using a combination of best-estimate assumptions reflecting management's expectations of future events and actions as at that date.

The Projections have been prepared based on the significant assumptions stated in Note d) below. The Projection Information contain forecasts and projections that relate to future events including hypothetical assumptions, which are, by their nature, subject to significant risks and uncertainties. Events, circumstances and hypothetical assumptions relating to future events and actions that may or may not materialise. Even if the events anticipated under the hypothetical assumptions described in the Projection Information occur, actual results are still likely to be different from those stated in the Projection Information since other anticipated events frequently do not occur as expected and the variation may be material. The actual results may therefore differ materially from those forecasted and projected.

Summary of Qualifications, Emphasis of Matters and Other Comments in the Audit Report on Historical Financial Statements used as base for the preparation of the Projection Information

The Statutory auditor's report dated August 18, 2025, on the financial statements of CNTL as at and for the year ended March 31, 2025, issued by the statutory auditors, i.e. M/s Gianender & Associates, Chartered Accountants, contains certain qualifications, emphasis of matter paragraphs and other comments. In accordance with applicable regulatory requirements, the Investment Manager and management of CNTL have assessed the implications of such matters on the Projection Information included in this Draft Offer Document.

The following sets out management's evaluation of the relevance and, if any, the implication of such matters on the Projection Information:

Description	Reference	Implications on the Projection Information
Qualification in the Audit Report: Matter related to impairment loss recognised in the carrying amount of "Receivable under Service Concession Arrangements".	Refer Note 1 of Annexure 1 to the Projection Information.	The audit qualification relates to the impairment loss recognised during FY 2018–19 in respect of the carrying value of the "Receivable under Service Concession Arrangements", representing the right to receive annuity cash flows from NHAI (the "Financial Asset"), where the statutory auditor is of the view that the recognition of impairment is not in accordance with the applicable accounting standards and accounting policy of the Company. The Investment Manager and management of the Company have reassessed the projected revenue from operations without giving effect to the above impairment adjustment recognised in FY 2018–19 to comply with the applicable accounting standards and accounting policy of the Company. Further, the Investment Manager and management of the Company have reassessed the recoverable value of the Financial Asset as on September 30, 2025 and is of the view that no impairment adjustment to the carrying value of the Financial Asset is required.

Description	Reference	Implications on the Projection Information
Emphasis of Matter Paragraph a): Matter related to accrual of interest, default interest, and other similar charges not being accounted for after October 15, 2018.	Refer Note 2 of Annexure 1 to the Projection Information.	Considering the underlying liability was settled in November 2025, the Investment Manager and management of the Company concluded that there is no implication of this matter on the Projection Information.
Emphasis of Matter Paragraph b): matter related to non-compliance with certain provisions of the Companies Act, 2013.	Refer Note 3 of Annexure 1 to the Projection Information.	This matter has been evaluated by the Investment Manager and management of the Company and concluded that there is no implication of this matter on the Projection Information.
Emphasis of Matter Paragraph c): matter related to the investigation initiated by the Serious Fraud Investigation Officer.	Refer Note 4 of Annexure 1 to the Projection Information.	This matter has been evaluated by the Investment Manager and management of the Company and concluded that there is no implication of this matter on the Projection Information.
Material Uncertainty Related to Going Concern: matter related to Going Concern	Refer Note 5 of Annexure 1 to the Projection Information.	The matter has been evaluated by the Investment Manager and management of the Company and concluded that, as on the date of the Projection Information, there is no material uncertainty on the Company's ability to continue as a going concern. Accordingly, no adjustment is required in the Projection Information.
Report as per Paragraphs 3 and 4 of the Companies (Auditor's Report) Order, 2020 ("the CARO 2020 Order"	Refer Note 6 of Annexure 1 to the Projection Information for the following matters included in the CARO 2020 Order: Matter 1 related to unpaid statutory dues: Clause (vii)(a) of Para 3 of the CARO, 2020 Order for FY 2024-25 Matter 2 related to disputed statutory dues: Clause (vii)(b) of Para 3 of the CARO, 2020 Order for 2024-25 Matter 3 related to default in repayment of loans or other borrowings: Clause ix(a) of Para 3 of the CARO, 2020 Order for 2024-25 Matter 4 related to material uncertainty related to Going Concern: Clause xix of Para 3 of the CARO, 2020 Order for 2024-25	This matter has been evaluated by the Investment Manager and management of the Company and concluded that there is no implication of this matter on the Projection Information.

Description	Reference	Implications on the Projection Information
	Matter 5 related to unspent CSR amount: Clause xx(a)of Para 3 of the CARO, 2020 Order for 2024-25	

Note: The Projection Information has been prepared after considering the matters referred to in the auditor's report and reflects management's current assumptions, estimates and expectations regarding future performance.

c) Summary of Projections

All figures are in INR million

Particulars	Actual (April'25 to September'25)	Projected (October'25 to March'26)	Total FY26	FY27	FY28	FY29
I. Projected Revenue from Operations	**1,485**	**2,105**	**3,590**	**2,891**	**2,612**	**2,326**
Projected Expenses:						
Operational Expenses	(445)	(372)	(817)	(517)	(551)	(592)
Routine Maintenance Expense	-	-	-	(85)	(59)	(53)
Project Manager Fees	-	-	-	(142)	(142)	(142)
Upfront Improvement Works	-	(474)	(474)			
Major Maintenance Expense	-	(132)	(132)	-	-	-
Taxes	-		-	-	(95)	(1,080)
Working Capital Changes (Note 1)	1,701	1,070	2,771	3,459	3,738	4,024
II.Projected Cash Flow from Operations	**2,741**	**2,197**	**4,938**	**5,606**	**5,503**	**4,483**

Note 1: Working capital adjustments in the projected statements represent difference between cash revenue and revenue recognised by the SPV as per Appendix D to Ind AS 115 "Revenue from Contracts with Customers- Service Concession Arrangements".

d) Significant assumptions

The Projection Information have been prepared based on the significant assumptions including hypothetical assumptions summarised below. The Investment Manager considers the assumptions to be appropriate and reasonable as at the date of the reporting. However, the investors should consider these assumptions as well as the Projection Information and make their own assessment of the future performance of the Trust.

i Revenue from operations:

The SPV revenue from operations primarily consists of revenue from operations and maintenance services and overlay services and finance income:

CNTL has the right to receive fixed annuity payments from NHAI during the concession period and has adopted financial asset model as prescribed by Appendix D to Ind AS 115 "Revenue from Contracts with Customers"- Service Concession Arrangements". The key inputs of the financial asset model comprise of revenue inflows (annuity), projected expenses to earn the revenue, estimations on cost to build and maintain the asset, interest obligations based on financing pattern and other operational efficiencies. These inputs are based on existing circumstances and management judgement / assumption on the future expectations based on current situations. Judgements include estimates on changes in interest rates, cost inflation, government policy changes, etc. which are reviewed periodically by the management.

ii Projected Expenses:

Major components of projected expenses are as under:

A) Operational and Routine Maintenance Expense

The operational and routine maintenance cost includes routine maintenance, manpower costs and other operational expenses, including, but not limited to, road and site work expenses, and other toll operations cost.

For FY 2026, the actual and projected operational expense (OPEX) and Routine Maintenance (RM) expense is based on the existing composite O&M contract entered by the SPV. Since it is a composite contract, the entire amount is recognized as Operational Expense.

In forecasting costs for FY 2027, the SPV considers the report provided by the technical consultant i.e. M/s Knight Frank India (KFI) for the SPV (the "Technical Report"). This is further adjusted to reflect the expected operational and routine maintenance costs required to align the target assets with the Trust's operational standards based on management's assessment ("Base Cost for FY 2026"), with further adjustments for escalation to arrive at expected expense for the respective years. Refer summary below:

Particulars	OPEX FY 27 (in Mn)	RM FY 27 (in Mn)
Total Operational Expense (OPEX) / Routine Maintenance (RM) Expense as per Technical Report	311	23
Add: Additional Expense as per Management's Estimate	174	14
Base Cost for FY 2027	**485**	**37**
WPI impact considered	32	1
Incremental RM Cost from FY 2027 onwards*	-	47
Total Expected Cost for FY 2027	**517**	**85**

*Incremental RM Cost relating to the MEP (Mechanical, Electrical, and Plumbing) system life cycle cost based on management's internal assessment has been considered at INR 47 Mn, INR 18 Mn and INR 11 Mn for FY 2027, FY 2028 and FY 2029, respectively.

The following assumptions have been made regarding Operational and Routine Maintenance:

Particulars	Description
Operational Expense (OPEX)	• Operational Expenses: Base Cost Escalation at 1.4 times of WPI of respective year. • Insurance Expenses: Escalation at WPI;
Routine Maintenance (RM) Expenses	• Base Cost Escalation at WPI of the respective year • Additional MEP Cost considered from FY 27 onwards.

B) Project Manager Fees

The Project Manager Fees are mainly projected based on the terms and conditions of the relevant agreements and / or based on Management's experience and judgement. These expenses consist of below:

i) Project manager fee

Based on the agreement to be entered with Cube Highways and Transportation Assets Advisors Private Limited (Project Manager) in relation to the specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

The Project Manager is entitled to a Project Manager fee to be calculated @ 1.55% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

ii) Professional Consultancy Charges

Based on the Expert Services Agreement to be entered with Cube Highways Technologies Private Limited in relation to specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

These charges are calculated @ 0.35% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

C) Upfront Improvement Works

Additionally, a one-time improvement cost has been estimated for the SPV in FY 2026. As CH-II acquired this asset in FY26, a detailed technical assessment has been carried out during the takeover of SPV. During the assessment, there are certain deficiency on the project road related to structures repair works, safety improvements and initial maintenance works which required to be carried out.

These costs may not be fully incurred by the end of FY 2026 and could extend into FY 2027 depending on the timing of execution of such works.

D) Major Maintenance Expense

Under the terms of the concession agreement, the SPV is required to conduct periodic major maintenance, which consists of restoring the infrastructure to a specified level of serviceability at periodic intervals during the concession period or before it is handed over to NHAI. Major maintenance (MM) is expected to be incurred after every five years, depending on pavement conditions, traffic loads and concession requirements. It involves substantial expenditure on large-scale resurfacing, repair and replacement of road furniture, rehabilitation of structures and restoration of pavement quality

Major maintenance costs have been derived based on the road surveys and studies conducted by the technical consultant i.e. M/s Knight Frank India (KFI) and in accordance with the assumptions and estimates set out in the technical report (the "Technical Report") provided by the technical consultant for the SPV. It is further adjusted on account of any additional cost estimate based on management's assessment. The next major maintenance cycle is planned in FY 2026 and then FY 2031. Refer summary below:

Particulars	FY 26 (in Mn)
Major Maintenance Expense as per Technical Report (A)	123
Additional Cost estimated considering the geography and nature of the project	9
Major Maintenance Expense	**132**

For the purposes of projected cash flow from operations, the projected periodic / major maintenance expense is considered in the year of actual outflow is expected to occur. The projections do not envisage any unanticipated expenses which may be incurred due to any unforeseen circumstances.

The following assumptions have been made regarding the major maintenance expense:

Particulars	Description
Major Maintenance (MM Expense)	• As per Technical Report • Escalation at WPI for Non bitumen expenses. No escalations considered for the bitumen cost. • Current price of bitumen is considered for unit rates calculation for FY 2026.

WPI escalation (on financial year basis) used for all the above projected expense is as under :

WPI assumptions	FY26	FY27	FY28	FY29
WPI (FY)	2.4%	5.00%	5.10%	4.90%

Note: WPI stands here for Wholesale Price Index for all commodities as published by the Ministry of Industry, Government of India.

iii Taxes

Current income tax is measured at the amount expected to be paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in India, being the jurisdiction in which the SPV operates and generates taxable income. Projected income tax expense is measured considering the impact of Finance Bill 2026.

The SPV has opted for taxation under section 115BAA of the Income tax Act, 1961, under which it is liable to pay tax at the effective rate of 25.168%.

As at year ended March 31, 2025, the SPV's has:

Carry forwarded Unabsorbed Depreciation to the tune of INR 5,282 million.

iv Changes in working capital

The SPV has considered September 2025 working capital as the base working capital, which is based on the actual changes for the period April 2025 to September 2025. For balance projection period, the SPV has considered working capital adjustment as the difference of revenue recognised in accordance with Appendix D to Ind AS 115 "Revenue from Contracts with Customers- Service Concession Arrangements" and the actual annuity receipts as per its contractual arrangement with the NHAI. Other working capital changes are not significant and no impact of that has been considered in the projected cash flows from operating activities for the projected period.

v Other assumptions

a) Acquisition of SPV and refinancing of external debt through InvIT loan been assumed on 1st April'2026 amounting to INR 15,213 Mn at the annual interest rate of 12.00% and expected repayment of INR 3,354 Mn in Aug'26, INR 3,725 Mn in Aug'27 and INR 3,680 Mn in Aug'28. The balance repayment has been assumed post March 31, 2029.

b) It has been assumed that no outflow on account of any litigation related matters including current pending litigations/contingent liabilities is expected to become due during the Projection Period.

c) On November 21, 2025, the Government of India notified the four Labour Codes — The Code on Wages, 2019, The Industrial Relations Code, The Code on Social Security, 2020, and The Occupational Safety, Health and Working Conditions Code, 2020 — consolidating 29 existing labour laws. Based on the draft rules and FAQs issued by the Ministry of Labour and Employment and best available information (including legal assessments and existing contractual arrangements) the SPV has estimated that these Codes have no material financial impact on the Projection Information. The SPV continues to monitor the finalisation of rules by the central/state government and other developments pertaining to labour codes and would provide appropriate accounting effect, if any, on the basis of such developments.

d) There will be no material change in taxation legislation or other applicable legislation.

e) It has been assumed that no liability or liquidated damages on account of default in concession agreement shall devolve upon the Project SPV during the Projections Period.

f) The Projections are based on assumptions and are subject to several factors. Investors should be aware that future events, cannot be predicted with any certainty and there may be deviations from the figures projected in the Projection Information.

g) No gain or loss has been considered on account of changes in foreign exchange rates.

These Projection Information has been adopted by the Board of Director of the Investment Manager on February 27, 2026

For and on behalf of the Board of Directors of Cube Highways Fund Advisors Private Limited
(in its capacity as an Investment Manager of Cube Highways Trust)

Annexure 1

Summary of Qualifications, Emphasis of Matters and Other Comments in the Audit Report on Historical Financial Statements of CNTL used as base for the preparation of the Projection Information

Note 1

Qualifications in the Audit Report

The Basis of Qualified Opinion in the Auditor's report dated August 18, 2025 on the financial statements for the year ended March 31, 2025 issued by the statutory auditors i.e. M/s Gianender & Associates, Chartered Accountants were modified and included the following qualification:

Basis of Qualified Opinion

"During the FY 2018-19, the Company had recognized and during the year continues to recognize thereafter impairment loss of Rs. 7,107.98 Mn. by comparing the carrying amount of the receivables under the head 'Receivable under Service Concession Arrangements' that were measured at amortized cost and bid received from third party for acquisition of entire Company. Thus, the Company had in the FY 2018-19 and continues thereafter to measure the receivables at fair value then recognized to arrive at present amortized carrying value as at the end of the year, which is not in accordance with Ind AS 109 'Financial Instruments' & read with accounting policy 3.7.4. The consequential impact of the above on the balance under the head 'Receivable under Service Concession Arrangements' reported in the balance sheet and on the profit for the year are unascertainable.

Consequently, the unreserved and explicit statement of compliance with Indian Accounting Standards as notified in the Companies (Indian Accounting Standards) Rules, 2015 and further amendments thereto in Note 2.1 is not proper."

Accounting policy referred in above basis of qualified opinion paragraph is reproduced below:

"3.7.4 Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

a) *Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance*
b) *Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18 (referred to as 'contractual revenue receivables' in these illustrative financial statements)*
c) *Loan commitments which are not measured as at FVTPL*

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realized upto one year from the due date, loss for the time value of money is not recognized, since the same is not considered to be material.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition."

Note 2

Emphasis of Matter Paragraph a)

The auditor's report on the financial statements as at and for the year ended March 31, 2025 includes the following Emphasis of Matter paragraph:

"We draw your attention to:

As mentioned in note no. 32 to the accompanying individual Ind AS Financial Statements regarding NCLAT Orders dated 12th March, 2020. In terms of Paragraph 61 (3) on Pg 87 of the orders, the company has not accounted accrued interest, default interest, penal charges or other similar charges after the cut-off date of 15th October,2018.

Our Opinion is not modified in respect of above matters"

Note 32 referred in above emphasis of matter paragraph is reproduced below:

"Note 32: Debt servicing:

National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and Its 348 croup companies, which includes the Company. Further. NCLAT vide its order dated February 11, 2019 had also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, indicating that it is not able to meet all obligations (financial and operational) including the payment obligations to senior secured financial creditors. Accordingly, the Company is permitted to make only those payments necessary to maintain and preserve the going concern status. NCLAT wide its order dated March 12, 2020, had upheld its interim order of October 15, 2018. The said order specifies October 15, 2018 as the date of initiation of the Resolution Process of the Company. Accordingly, the Company has not accrued any interest, default interest, penal interest and any other similar charges after the said cut off date of October 15,2018 until March 31, 2025.

Considering the delay in the resolution process of the Company, and the significant cash lying with the Company, basis the constant demand from the lenders, during the financial year ended March 31, 2023, the Company approved an Interim Distribution to the Senior Secured Lenders of the Company be undertaken, for an amount of Rs 9,200.00 Mn which is equivalent to the principal amount that would have been paid to them under the debt restructuring plan that has been in-principle approved by the CNTL CoC. Out of Rs 9,200 Mn, Company paid Rs 7,796.82 Mn to the senior lenders during the year March, 31, 2023 and Rs 1,403.18 Mn is being paid to one of the secured senior lenders, during the year March 31, 2024.

The banks have debited an amount of Rs 6,844.17 Mn for Interest & Principal (Interest & Principal for the period of October 18 - March 20) from the Escrow accounts of the Company maintained with them. The Company has written to the banks for reversal of same in view of October 15, 2018 Order of NCLT giving moratorium. The banks have not reversed the same till date. The same amount (after reducing interest upto Oct 15, 2018) was shown as recoverable in the financial statements. These amounts have not been handed back to the Company till date. As part of the interim distribution, the company adjusted Rs 119.90 Mn during the financial year March 31, 2024 and Rs. 5,929.42 Mn during the financial year March 31, 2023 out of Rs 6,844.17 Mn against the loan, which was repaid during the financial year March 31, 2024, and the financial year March 31, 2023."

Note 3

Emphasis of Matter Paragraph b)

The auditor's report on the financial statements as at and for the year ended March 31, 2025 includes the following Emphasis of Matter paragraph:

"We draw your attention to:

Note no. 34 to accompanying IND AS financial statements which states that the Company does not comply with certain requirements/provisions of the Companies Act 2013. In view of the above, the Company has estimated possible obligation arising out of these non-compliances and recognized the provision in the books of accounts.

Our Opinion is not modified in respect of above matters."

Note 34 referred in above emphasis of matter paragraph is reproduced below:

"Note 34: Non-compliance of applicable laws and regulations :

The Company is not in compliance with the Companies Act 2013, as applicable to the Company. These non-compliances pertain to appointment of Directors, filings with Regulators, appointment or Key Management personnel and such other regulations. The Company has estimated possible obligations arising out of these non-compliances and recognised the provision in the books of account."

Note 4

Emphasis of Matter Paragraph c)

The auditor's report on the financial statements as at and for the year ended March 31, 2025 includes the following Emphasis of Matter paragraph:

"We draw your attention to:

As mentioned in note no. 39 to the accompanying IND AS financial statements, the Ministry of Corporate Affairs, Government of India, had initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS Ltd and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of its investigation, SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and relevant information is being provided by ITNL to the agency. The company has not received any direct communication from SFIO. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

Our Opinion is not modified in respect of above matters."

Note 39 referred in above emphasis of matter paragraph is reproduced below:

"Note 39: Investigations by Serious Fraud Investigation Office ("SFIO") and other regulatory agencies

The Ministry of Corporate Affairs (MCA}, Government of India, has vide its letter dated October 1. 2018 initiated investigations by Serious Fraud Investigation Office (SFIO) against IL&FS (ultimate holding company) and its group companies under Section 212 (1) of the Companies Act, 2013. As part of investigation of affairs of ITNL (the Holding Company), SFIO has also been seeking from ITNL various information including to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress, and it is understood that the relevant information is being provided by ITNL to the agency. At this stage, no material impact/implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage"

Note 5

Material Uncertainty Related to Going Concern Paragraph in the Audit Report

The auditor's report on the financial statements as at and for the year ended March 31, 2025 includes the following material uncertainty related to going concern paragraph:

"We draw your attention to Note no. 31 to the accompanying Ind AS financial statements which describes that Entire Group is going through liquidity issue and defaulted In repayment of various loan instruments, Union of India has filed petition against IL&FS Limited & its Group Companies in National Company Law Tribunal and superseded earlier Board of the Holding/Ultimate Holding Company.
These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. As per the management, going concern assumption is appropriate for preparation of financial statements, as the company has received a bid from third party and which has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares has also been received.

Our Opinion is not modified in respect of above matter."

Note 31 referred in above material uncertainty related to going concern paragraph is reproduced below:

"Note 31: Going Concern :

Union of India has superseded the earlier board of Holding/Ultimate Holding Company and appointed new Board from October 01, 2018. Entire Group is going through severe financial stress. National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 has also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, which means that the Company Is able to meet only financial obligation towards Senior Lenders and operational creditors. In view of this classification and the moratorium order, the Company has stopped servicing. financial obligations towards all its financial creditors. The Company has received a bid from third party and the same has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares has also been received. Hence on the basis of above, these accounts are prepared on the basis of going concern."

Note 6

Report as per Paragraph 3 of the Companies (Auditor's Report) Order, 2020 ("the CARO 2020 Order").

In addition to the audit opinion on the financial statements, the auditors are required to comment upon the matters included in the Companies (Auditor's Report) Order, 2020 ("the CARO 2020 Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013 on the Financial Statements as at and for the period ended March 31, 2025.

Certain statements/comments included in the CARO in the audit report are reproduced below in respect of the financial statements presented:

Matter 1 related to unpaid statutory dues : Clause (vii)(a) of Para 3 of the CARO, 2020 Order for FY 2024-25

"In respect of statutory dues:

The Company has been generally regular in depositing undisputed statutory dues including goods and services tax, provident fund, employee state insurance, income tax, service tax, value added tax, cess and other statutory dues during the year with the appropriate authorities. As on 31st March 2025, there are no undisputed statutory dues payables for a period exceeding for a period more than six months from the date they become payable except undisputed amounts of INR 54.11 million on account of the tax deducted at source are in arrears since March 31, 2021."

Matter 2 related to disputed statutory dues: Clause (vii)(b) of Para 3 of the CARO, 2020 Order for 2024-25

"In respect of statutory dues:

Details of statutory dues referred to in sub-clause (a) which have not been deposited on account of disputes are given below:

Name of the Statute	*Nature of the Dues*	*Forum where Dispute is pending*	*Amount (in Million)*	*Remarks*
Goods and Services Act, 2017	*GST Demand for the period September 2017 to September 2022*	*ZD0102250003780 office of Joint Commissioner*	*15,164.12*	*Writ petition filed on 07.04.25 having No WP(C)/1389/2025"*

Matter 3 related to default in repayment of loans or other borrowings : Clause ix(a) of Para 3 of the CARO, 2020 Order for 2024-25

"In respect to the borrowings:

The Company has defaulted in repayment of loans or other borrowings. Details of the same is as under:

Default in repayment of loan (Principal & Interest) ***(in Rs. Mn.)***

Name of the Lender	*Nature of Due*	*Amount*	*Due Since*
Aditya Birla Finance Ltd	*Principal*	*550.00*	*20th September 2018*
IL&FS Airport Ltd	*Principal*	*470.00*	*28th August 2018*
SREI INFRASTRUCTURES	*Interest*	*63.63*	*30th September 2018*
IL&FS Airport Ltd	*Interest*	*31.82*	*30th September 2018*
IL&FS Transportation Networks Limited	*Interest*	*372.51*	*30th September 2018*
IL&FS Ltd	*Interest*	*307.00*	*30th September 2018*

Note: Principal repayment & interest payment due after 15th October, 2018 have not been disclosed as default under this clause in view of the NCLAT Orders dated 12th March, 2020."

Matter 4 related to material uncertainty related to Going Concern : Clause xix of Para 3 of the CARO, 2020 Order for 2024-25

"On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, material uncertainty exists as on the date of the audit report that company is capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the Balance sheet date. (Refer "Material Uncertainty Related to Going Concern" paragraph above).

We further state that our reporting is based on the facts up to date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due."

Matter 5 related to unspent CSR amount: Clause xx(a)of Para 3 of the CARO, 2020 Order for 2024-25

"The company has not transferred the amount remaining unspent in respect of other than ongoing projects, to a Fund specified in Schedule VII to the Companies Act, 2013 till the date of our report. However, the time period for such transfer i.e. six months of the expiry of the financial year as permitted under the second proviso to sub-section (5) of section 135 of the Act, has not elapsed till the date of our report."

AUDITORS' REPORT ON PROJECTIONS OF REVENUE FROM OPERATIONS AND CASH FLOWS FROM OPERATING ACTIVITIES

To
The Board of Directors,
Cube Highways Fund Advisors Private Limited (the "Investment Manager") in its capacity as an Investment Manager of the Cube Highways Trust (the "Issuer" or the "Trust")
B-376, UGF, Nirman Vihar,
New Delhi-110092

1. We have examined, the accompanying statement of projections of revenue from operations and cash flows from operating activities and the underlying assumptions of Western M P Infrastructure & Toll Roads Pvt. Ltd. (the "SPV") in the Projection Information for the years ending March 31, 2026, 2027, 2028 and 2029 (collectively, hereinafter referred to as the "Projection Information"), in accordance with Standard on Assurance Engagement 3400, "The Examination of Prospective Financial Information", issued by the Institute of Chartered Accountants of India. The preparation and presentation of the projections including the underlying assumptions, set out in Note (b) to the Projection Information, is the responsibility of the Investment Manager and has been approved by the Board of Directors of the Investment Manager. Our responsibility is to examine the evidence supporting the assumptions (excluding the hypothetical assumption) and other information in the Projection Information. Our responsibility does not include verification of the accuracy of projections. Therefore, we do not vouch for the accuracy of the same.

2. These projections have been prepared for the proposed conversion of Cube Highways Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust (the "Offer") in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD2/P/CIR/2025/102 dated July 11, 2025, as amended ("InvIT Regulations"). The projections have been prepared using a set of assumptions that include hypothetical assumptions about future events and the Investment Manager's actions that are not necessarily expected to occur, as set out in Note (b) to the Projection Information and has been approved by the Board of Directors of the Investment Manager. Consequently, users are cautioned that this projection may not be appropriate for purposes other than that described above.

3. We have carried out our examination of the Projection Information on a test basis. Based on our examination of the evidence supporting the assumptions (excluding the hypothetical assumptions), nothing has come to our attention which causes us to believe that these assumptions do not provide a reasonable basis for the Projection Information.

4. Further, in our opinion, the Projection Information, read with the basis of preparation and notes therein, is properly prepared on the basis of the assumptions as set out in Note (b) to the Projection Information and consistent with the accounting policies, to the extent applicable, used for preparation of the historical financial statements of the SPV which are included in the draft offer document (the "DOD"). Even if the events anticipated under the hypothetical assumptions described above occur, actual results are still likely to be different from the projection since other anticipated events frequently do not occur as expected and the variation may be material.

5. This report is required by InvIT Regulations requiring the independent auditor to issue a report on the projections and is issued for the sole purpose of the Offer in accordance with the InvIT Regulations. Our work has not been carried out in accordance with auditing or other standards or practices accepted in jurisdictions outside India, including the United States of America, and accordingly should not be relied upon as if it had been carried upon in accordance with those standards and practices. US Securities regulations do not require profit forecast to be reported by a third party. This report should not be relied upon by prospective investors in the United States of America, including persons who are qualified institutional buyers as defined under Rule 144A under the United States Securities Act of 1933, as amended participating in the Issue. We accept no responsibility and deny any liability to any person who seeks to rely on this report and who may seek to make claim in connection with any offering of securities on the basis that they had acted in reliance on such information under the protections accorded by United States of America law and regulation.

6. This report is addressed to and is provided to enable the Investment Manager to include this report in the DOD in connection with the proposed offer for sale of Units of the Trust and that the Projection Information may not be meaningful for any other purpose.

Notes to the Projection Information of Western MP Infrastructure and Toll Roads Private Limited

a) General Information

Cube Highways Trust (the "Trust") was set up on December 7, 2021, as a contributory irrevocable trust under the provision of the Indian Trusts Act, 1882. The Trust was registered as an infrastructure investment trust under the Securities Exchange Board of India ("SEBI") (Infrastructure Investment Trust) Regulations, 2014, as amended read together with circulars and guidelines issued thereunder (the "SEBI InvIT Regulations") on April 5, 2022, having registration number IN/InvIT/22-23/0022. The registered office address of the Trust is B-376, UGF, Nirman Vihar, New Delhi - 110092, India.

The investment objective of the Trust is to carry on the activities of an infrastructure investment trust, as permissible under the SEBI InvIT Regulations. The Trust has been formed to invest in infrastructure assets primarily being in the road sector in India. All the Trust's Road projects are implemented and held through special purpose vehicle ("SPV").

Pursuant to the unitholder resolution of Cube Highways Trust (Trust) dated 20 February 2026, the Trust proposes to acquire from Cube Highways and Infrastructure V Pte. Ltd. (CH-V) upto 100% of the fully paid-up equity shares of Western MP Infrastructure and Toll Roads Pvt. Ltd. (to the extent such equity is held by Cube Highways and Infrastructure V Pte Ltd). In consideration thereof, the Trust proposes to issue and allot ordinary units of the Trust to CH-V.

b) Basis of preparation of Projection Information

The statements of projection of revenue from operations and projection of cash flows from operating activities of the proposed subsidiary for the financial years ending March 31, 2026, 2027, 2028 and 2029 along with the underlying assumptions and other explanatory information (the "Projection Information") have been compiled by Cube Highways Fund Advisors Private Limited in its capacity as an Investment Manager of the Investment Manager to the Trust solely for the purpose of inclusion in the Draft Offer Document (DOD) in connection with the proposed conversion of the Trust from a privately listed infrastructure investment trust to a public listed infrastructure investment trust through an offer for sale of Units of the Trust in accordance with the Securities Exchange Board of India (SEBI) (Infrastructure Investment Trusts) Regulations, 2014, read with SEBI Master Circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, as amended ("SEBI InvIT Regulations") (hereinafter referred to as the "proposed offer of units of the Trust"). Therefore, the Projection Information should not be used or relied upon for any purpose other than described above.

The Projection Information have been prepared based on the accounting policies used for preparation of the historical financial statements of the proposed subsidiary as required by the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended including circulars and guidelines issued thereunder ("SEBI InvIT Regulations"), which are prepared in accordance with accounting principles of Indian Accounting Standards ("Ind AS") as defined in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015, as amended prescribed under Section 133 of the Companies Act, 2013 read with SEBI InvIT Regulations and the Guidance Note issued by the Institute of Chartered Accountants of India. Projected cash flow from operating activities have been calculated using the direct method under Ind AS 7 - Statement of Cash Flows and is computed by deducting the projected expenses and income taxes from the projected revenue from operations and adjusted for working capital changes and projected non-cash expenses (if any). Projected cash flow from operating activities do not include any items pertaining to financing or investing in nature. Though the aforesaid Projections are prepared under the Ind AS framework, they do not provide for all the detailed disclosures as required under Ind AS.

The Projection Information are presented in Indian Rupees which is also the functional currency of the Trust. All values are rounded to the nearest million, unless otherwise indicated.

The proposed subsidiary follows March 31 as its accounting year end. Accordingly, the Projection Information are prepared for the financial years ending March 31, 2026, March 31, 2027, March 31, 2028, and March 31, 2029 ('Projections Period'). However, the assumed date of acquisition (April 01, 2026) may be postponed and accordingly, the actual result in the first financial period of the Trust post-acquisition of the proposed subsidiary may be different from the numbers disclosed in the Projection Information. For the year ending March 31, 2026 the Projection information considers actual financial information upto September 30, 2025 which is the latest historical period available for preparation of the Projection Information.

It is clarified that the Projection Information have been prepared using a combination of best-estimate assumptions reflecting management's expectations of future events and actions as at that date.

The Projections have been prepared based on the significant assumptions stated in Note d) below. The Projection Information contain forecasts and projections that relate to future events including hypothetical assumptions, which are, by their nature, subject to significant risks and uncertainties. Events, circumstances and hypothetical assumptions relating to future events and actions that may or may not materialise. Even if the events anticipated under the hypothetical assumptions described in the Projection Information occur, actual results are still likely to be different from those stated in the Projection Information since other anticipated events frequently do not occur as expected and the variation may be material. The actual results may therefore differ materially from those forecasted and projected.

c) Summary of Projections

All figures are in INR million

Particulars	Actual (April'25 to September'25)	Projected (October'25 to March'26)	Total FY26	FY27	FY28	FY29
I. Projected Revenue from operations	**1,530**	**1,423**	**2,953**	**3,173**	**3,391**	**3,572**
Projected Expenses:						
Operational Expenses	(142)	(131)	(273)	(292)	(313)	(333)
Routine Maintenance Expenses	(21)	(34)	(55)	(58)	(81)	(85)
Project Manager Fees	-	-	-	(71)	(76)	(80)
Premium payment to authority	(317)	(296)	(613)	(692)	(777)	(861)
Major Maintenance Expense	(526)	(469)	(995)	-	-	-
Taxes	-	-	-	-	-	(204)
Working Capital Changes	(81)	-	(81)	-	-	-
II. Projected Cash Flow from Operations	**443**	**493**	**936**	**2,060**	**2,144**	**2,009**

d) Significant assumptions

The Projection Information have been prepared based on the significant assumptions including hypothetical assumptions summarised below. The Investment Manager considers the assumptions to be appropriate and reasonable as at the date of the reporting. However, the investors should consider these assumptions as well as the Projection Information and make their own assessment of the future performance of the SPV.

i. Revenue from operations:

The SPV revenue from operations primarily consists of income from toll collection.

Toll income:

The Investment Manager has obtained reports from an independent third-party traffic consultant i.e. Crisil Intelligence ("Traffic Consultant") in assessment of the assumptions, market fundamentals, industry drivers and outlook including the potential impact of loss of revenue arising from alternative diversion routes that may affect the traffic on the SPV's road, among other factors, in connection with the estimation of the projected revenue from operations. These assumptions and factors have been set out in the Traffic Consultant's report.

The revenue projection for the year ending March 31, 2026 is derived from annualizing the base traffic of 3-months (April'25 to Jun'25) as adjusted for seasonality and tariff rates for the financial year 2025-26. As per Concession Agreement, toll rates will increase by fix 7% every year.

Key variables for the balance projection period includes traffic growth and the details of the assumptions are as set forth below:

Assumption	For the year ending March 31, 2027	For the year ending March 31, 2028	For the year ending March 31, 2029
Traffic growth rate (Refer Note below)	1.8%	1.3%	0.6%

Note: Traffic growth rate is based on average Passenger Car Units (PCU) growth rate for both toll plazas (post-diversion).

ii. Projected Expenses

Major components of projected expenses are as under:

A) Operational and Routine Maintenance Expense

The operating and routine maintenance cost includes routine maintenance, manpower costs and other operational expenses, including, but not limited to, road and site work expenses and other toll operations cost.

In forecasting these costs, the SPV considers the report provided by the technical consultant i.e. M/s F P Project Management (FP) for the SPV (the "Technical Report"). This is further adjusted to reflect the expected operational and routine maintenance costs required to align the target assets with the Trust's operational standards based on management's assessment ("Base Cost") Refer summary below:

Particulars	OPEX FY 26 (in Mn)	RM FY 26 (in Mn)
Total Operational Expense (OPEX) / Routine Maintenance (RM) Expense as per Technical Report	253	48
Add: Additional Expense as per Management's Estimate	20	25
Base Cost for FY26	**273**	**73**

The following assumptions have been made regarding Operational and Routine Maintenance:

Particulars	Description
Operational Expense (OPEX)	• Operational Expenses: Base Cost Escalation at 1.4 times of WPI of respective year. • Insurance Expenses: Escalation at WPI; • 1.44% charge of revenue to be paid to acquirer bank
Routine Maintenance (RM) Expenses	• Base Cost Escalation at WPI of the respective year • RM savings during year of Major Maintenance (FY 2026): 25% • RM savings during Defect Liability Period in the following year of completion of Major Maintenance (FY 2027): 25%

B) Project Manager Fees

The Project Manager Fees are mainly projected based on the terms and conditions of the relevant agreements and / or based on Management's experience and judgement. These expenses consist of below:

i) Project manager fee

Based on the agreement to be entered with Cube Highways and Transportation Assets Advisors Private Limited (Project Manager) in relation to the specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

The Project Manager is entitled to a Project Manager fee to be calculated @ 1.55% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

ii) Professional Consultancy Charges

Based on the Expert Services Agreement to be entered with Cube Highways Technologies Private Limited in relation to specialized technical, engineering and operational functions w.e.f. the assumed date of acquisition by the Trust.

These charges are calculated @ 0.35% per annum, exclusive of applicable taxes, of the gross toll revenue of the SPV at the end of the reporting period.

C) Premium Payment to Authority

Premium payment to Authority is fee to be paid to Madhya Pradesh Road Development Corporation ("MPRDC" or the "Authority"), as per the provisions of Concession agreement. This fee is based on toll revenue earned by the SPV and is increased by 1% every year with base year starting from 2010 i.e. 4.672%. Further, it shall be calculated as the higher of (i) the actual PCUs; (ii) 2% greater than the number of PCUs reckoned hereunder in the immediately preceding year.

D) Major Maintenance Expense

Under the terms of the concession agreement, the SPV is required to conduct periodic major maintenance, which consists of restoring the infrastructure to a specified level of serviceability at periodic intervals during the concession period or before it is handed over to NHAI. Major maintenance (MM) is expected to be incurred after every six years depending on pavement conditions, traffic loads and concession requirements. It involves substantial expenditure on large-scale resurfacing, repair and replacement of road furniture, rehabilitation of structures and restoration of pavement quality

The periodic overlay and resurfacing cycles require substantial expenditure, with major costs comprising of construction materials such as bitumen and aggregates. These costs are supported by purchase orders or work orders placed or proposed to be placed, based on road survey reports issued by independent field experts and the major maintenance strategy developed by the internal technical team.

For the FY 2026 ongoing cycle, the MM expense estimate is based on maintenance strategy/ methodology prepared by the management in accordance with the requirements of concession agreement with NHAI and after taking into account road survey reports issued by an independent expert. These estimates are further corroborated through purchase orders/work orders placed or to be placed by management generally close to the maintenance execution period. The projected MM expense is periodically reviewed and updated for factors such as new information and past experience. As the estimated cost is based on the various assumptions such as current infrastructure (road, pavements, etc.) condition, inflation in material cost, government policies etc.

Considering the MM work is in progress, and is expected to be completed by end of FY 2026, as a result, no major maintenance expenditure is assumed over the balance Projected period with the next maintenance cycle currently planned for FY 2032.
For the purposes of projected cash flow from operations, the projected periodic / major maintenance expense is considered in the year of actual outflow is expected to occur. The projections do not envisage any unanticipated expenses which may be incurred due to any unforeseen circumstances.

The following assumptions have been made regarding the major maintenance expense:

Particulars	Description
Major Maintenance (MM Expense)	• Escalation at WPI for Non bitumen expenses. No escalations considered for the bitumen cost. • Current price of bitumen is considered for unit rates calculation for FY 2026.

WPI escalation (on financial year basis) used for all the above projected expense is as under :

WPI assumptions	FY26	FY27	FY28	FY29
WPI (FY)	2.4%	5.00%	5.10%	4.90%

Note: WPI stands here for Wholesale Price Index for all commodities as published by the Ministry of Industry, Government of India

iii. Taxes

Current income tax is measured at the amount expected to be paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in India, being the jurisdiction in which the SPV operates and generates taxable income. Projected income tax expense is measured considering the impact of Finance Bill 2026.

The SPV has opted for taxation under section 115BAA of the Income tax Act, 1961, under which it is liable to pay tax at the effective rate of 25.168%.

As at year ended March 31, 2025, the SPV's has:

Carry forwarded Unabsorbed Depreciation to the tune of INR 4,023 million;

Carry forwarded business losses to the tune of INR 171 million.

iv. Changes in working capital

The SPV has considered September 2025 working capital as the base working capital, which is based on the actual changes for the period April 2025 to September 2025. For the balance concession period, it is assumed that since the entire collection of tolls is in cash and routine expenses are in cash or a credit period as available, the effective working capital deployed would be relatively low or negative in certain instances. Further, we believe the working capital is stable and not expected to vary materially over a period. Accordingly, changes in working capital are not significant and no impact of that has been considered in the projected cash flows from operating activities for the balance projected period.

v. Other assumptions

a) Acquisition of SPV and refinancing of external debt through InvIT loan been assumed on 1st April'2026 amounting to INR 4,235 Mn at the annual interest rate of 13.20% and expected repayment of INR 646 Mn in Aug'26, INR 1,460 Mn in Aug'27 and INR 677 Mn in Aug'28. The balance repayment has been assumed post March 31, 2029.

b) It has been assumed that no outflow on account of any litigation related matters including current pending litigations/contingent liabilities is expected to become due during the Projection Period.

c) On November 21, 2025, the Government of India notified the four Labour Codes — The Code on Wages, 2019, The Industrial Relations Code, The Code on Social Security, 2020, and The Occupational Safety, Health and Working Conditions Code, 2020 — consolidating 29 existing labour laws. Based on the draft rules and FAQs issued by the Ministry of Labour and Employment and best available information (including legal assessments and existing contractual arrangements), the SPV has estimated that these Codes have no material financial impact on the Projection Information. The SPV continues to monitor the finalisation of rules by the central/state government and other developments pertaining to labour codes and would provide appropriate accounting effect, if any, on the basis of such developments.

d) The taxation legislation or other applicable legislation is assumed to be same over the Projection Period as per the currently enacted or substantively enacted tax laws at the reporting date in India. The relevant tax exemptions, tax

remissions, and preferential tax treatments granted remain valid and applicable and that the terms and conditions thereto are assumed to be complied with.

e) It has been assumed that no liability or liquidated damages on account of default in concession agreement shall devolve upon the SPV during the Projections Period.

f) The Projections are based on assumptions and are subject to several factors. Investors should be aware that future events, including actual traffic growth rates, cannot be predicted with any certainty and there may be deviations from the figures projected in the Projection Information.

g) No gain or loss has been considered on account of changes in foreign exchange rates.

These Projection Information has been adopted by the Board of Director of the Investment Manager on February 27, 2026.

For and on behalf of the Board of Directors of Cube Highways Fund Advisors Private Limited

INDEPENDENT AUDITOR'S REPORT ON REVIEW OF CONSOLIDATED UNAUDITED FINANCIAL INFORMATION

To The Board of Directors of
Cube Highways Fund Advisors Private Limited (The "Investment Manager")
(Acting in capacity as the Investment Manager of Cube Highways Trust)

1. We have reviewed the accompanying Statement of Consolidated Unaudited Financial Information of Cube Highways Trust ("the Parent") and its subsidiaries (the Parent and its subsidiaries {as listed} in Note 1(B) of the Consolidated Unaudited Financial Information) together referred to as "the Group") for the quarter ended December 31, 2025 and for the period from April 01, 2025 to December 31, 2025 ("the Statement"), being submitted by the Investment Manager pursuant to the requirement of Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulation, 2014, as amended (the "InvIT Regulations").

2. This Statement, which is the responsibility of the Investment Manager's Board of Directors, has been prepared in accordance with the InvIT Regulations, the recognition and measurement principles laid down in the Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act 2013, read with relevant rules issued thereunder, and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity', issued by the Institute of Chartered Accountants of India ("ICAI"). This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information consists of making inquiries, primarily of the Investment Manager's personnel responsible for financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing ("SA"), issued by the ICAI, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. We have also performed procedures in accordance with Regulation 13(2)(e) of the InvIT Regulations, as amended, to the extent applicable.

4. Based on our review conducted and procedures performed as stated in paragraph 3 above and based on the consideration of the review reports of the other auditors referred to in paragraph 6 below, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in the context of the InvIT Regulations prevailing over certain Indian Accounting Standard ("Ind AS") requirements, as explained in the Emphasis of Matter paragraph 5 below, in accordance with the recognition and measurement principles laid down in the aforesaid Ind AS and other accounting principles generally accepted in India, and has not disclosed the information required to be disclosed in terms of InvIT Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

5. We draw attention to Note 5 of the Consolidated Unaudited Financial Information, which describes the presentation of "Unit Capital" as "Equity" to comply with the InvIT Regulations.

   Our conclusion on the Statement is not modified in respect of this matter.

6. We did not review the financial information of 4 subsidiaries included in the Consolidated Unaudited Financial Information, whose financial information reflect total revenues of Rs. 1,904.53 million and Rs. 4,787.16 million, total net loss after tax of Rs. 230.39 million and Rs. 973.23 million, and total comprehensive loss of Rs. 230.74 million and Rs. 973.42 million, for the quarter ended December 31, 2025, and for the period from April 01, 2025 to December 31, 2025, respectively, as considered in the Consolidated Unaudited Financial Information.
   These financial information have been reviewed by other auditors whose reports have been furnished to us by the Management and our conclusion on the Statement, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, is based solely on the reports of the other auditors and the procedures performed by us as stated above.

   Our conclusion on the Statement is not modified in respect of this matter.

CUBE HIGHWAYS TRUST
Notes forming part of Consolidated Unaudited Financial Information for the quarter and nine months ended December 31, 2025
(All amounts in Rs. million unless otherwise stated)

1 (A) The Consolidated Unaudited Financial Information for the quarter and nine months ended December 31, 2025 comprises of the Consolidated Unaudited Statement of Profit and Loss, Statement of Net Distributable Cash Flows of the Trust and its subsidiaries, explanatory notes thereto and the additional disclosures contained in Chapter 4 of SEBI Master Circular no. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025 (as amended) of Cube Highways Trust ("the Trust") (the " Consolidated Unaudited Financial Information"). The Consolidated Unaudited Financial Information has been prepared by Cube Highways Fund Advisors Private Limited (the "Investment Manager") in accordance with recognition and measurement principles laid down in the Indian Accounting Standard as defined in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015, as amended, and other accounting principles generally accepted in India to the extent not inconsistent with the Securities Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 (as amended) including any guidelines and circulars issued thereunder (the "InvIT Regulations"). (Refer note 5 below on presentation of "Unit capital" as "Equity" instead of compound financial instruments under Indian Accounting Standard (Ind AS) 32- Financial Instruments: Presentation).

1 (B) The Consolidated Unaudited Financial Information comprises financial information of Cube Highways Trust and following of its subsidiaries:

Subsidiaries (w.e.f. April 17, 2023) [where control exists]
Western UP Tollway Private Limited (WUPTPL) (formerly Western UP Tollway Limited)
Andhra Pradesh Expressway Private Limited (APEPL) (formerly Andhra Pradesh Expressway Limited)
Jaipur-Mahua Tollway Private Limited (JMTPL) (formerly Jaipur-Mahua Tollway Limited)
Mahua Bharatpur Expressways Limited (MBEL)
Farakka- Raiganj Highways Private Limited (FRHPL) (formerly Farakka- Raiganj Highways Limited)
DA Toll Road Private Limited (DATRPL)
Ghaziabad Aligarh Expressway Private Limited (GAEPL)
Walayar Vaddakencherry Expressways Private Limited (WVEPL)
Nelamangala Devihalli Expressway Private Limited (NDEPL)
Hazaribagh Tollway Private Limited (HTPL) (formerly Hazaribagh Tollway Limited)
Jhansi-Lalitpur Tollway Private Limited (JLTPL) (formerly Jhansi-Lalitpur Tollway Limited)
Jhansi-Vigakhet Tollway Private Limited (JVTPL) (formerly Jhansi-Vigakhet Tollway Private Limited)
Kanyakumari-Etturavattam Tollway Private Limited (KETPL) (formerly Kanyakumari-Etturavattam Tollway Limited)
Kotwa-Muzaffarpur Tollway Private Limited (KMTPL) (formerly Kotwa-Muzaffarpur Tollway Limited)
Lucknow-Raebareli Tollway Private Limited (LRTPL) (formerly Lucknow-Raebareli Tollway Limited)
Madurai-Kanyakumari Tollway Private Limited (MKTPL) (formerly Madurai-Kanyakumari Tollway Limited)
Nanguneri-Kanyakumari Tollway Private Limited (NKTPL) (formerly Nanguneri-Kanyakumari Tollway Limited)
Salaipudhur-Madurai Tollway Private Limited (SMTPL) (formerly Salaipudhur-Madurai Tollway Limited)

Subsidiaries (w.e.f. June 04, 2024) [where control exists]
Srirangam Infra Private Limited (SIPL) (formerly KNR Srirangam Infra Private Limited)
Shankarampet Projects Private Limited (SPPL) (formerly KNR Shankarampet Projects Private Limited)
Tirumala Highways Private Limited (THPL) (formerly KNR Tirumala Infra Private Limited)
Borgaon Watembare Highways Private Limited (BWHPL)
Mangalwedha Solapur Highways Private Limited (MSHPL)
Mangloor Highways Private Limited (MHPL)

Subsidiaries (w.e.f. February 12, 2025) [where control exists]
N.A.M. Expressway Private Limited (NAMEPL) (formerly N.A.M. Expressway Limited)

Subsidiaries (w.e.f. June 12, 2025) [where control exists]
Quazigund Expressway Private Limited (QEPL)
Jammu Udhampur Highway Private Limited (JUHPL) (formerly Athaang Jammu Udhampur Highway Private Limited)

2 **Basis of Consolidation**
Trust Group consolidates entities which it owns or controls. The Consolidated Unaudited Financial Information comprise the financial information of Cube Highways Trust and its subsidiaries listed in note 1 (B) above. Control exists when the parent has power over the entity, is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over the entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. Subsidiaries are consolidated from the date control commences until the date control ceases. The procedure for preparing Consolidated Financial Results of Cube Highways Trust Group are stated below:
a) The financial information of Cube Highways Trust Group are consolidated for like items and intragroup balances and transactions for assets and liabilities, equity, income, expenses and cash flows between entities of Cube Highways Trust Group are eliminated in full upon consolidation.
b) The figures in the notes to consolidated unaudited financial information have been consolidated line by line and inter-company transactions and balances including unrealized profits are eliminated in full on consolidation.

3(A) In terms of Share Purchase Agreement (SPA) dated February 7, 2025 entered amongst the Trust (acting through its Investment Manager), Athaang Infrastructure Private Limited, National Investment and Infrastructure Fund acting through its Investment Manager National Investment and Infrastructure Fund Limited (Seller) and Jammu Udhampur Highway Private Limited ("JUHPL") (thereinafter referred to as "the parties"), on June 12, 2025 the Trust has acquired the 100% equity holding of JUHPL for consideration of Rs. 4,145.13 million (including contingent consideration of Rs. 122.99 million).

The management applied the optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated under Receivable under Service Concession Arrangements , with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition. The management identified and recognized the individual identifiable assets acquired and liabilities assumed; and allocated the purchase consideration to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of acquisition.

The allocated value of the identifiable assets and liabilities as at the date of acquisition were:

Assets	**(Amounts in Rs. Million)**
Property, Plant and Equipment (net of accumulated depreciation)	26.34
Intangible assets- Rights under Service Concession Arrangements	545.19
Receivable under Service Concession Arrangements	12,051.38
Assets held for sale	3.66
Trade Receivables	3.19
Cash and Cash Equivalents	5,425.07
Other assets	656.39
Total Assets (A)	**18,711.22**
Liabilities	
Borrowings (including current maturities of Non-current borrowings)	12,933.56
Trade Payables	84.67
Other Liabilities	1,547.86
Total Liabilities (B)	**14,566.09**
Net Assets/Consideration (A-B)	**4,145.13**

3(B) In terms of Share Purchase Agreement (SPA) dated February 7, 2025 entered amongst the Trust (acting through its Investment Manager), Athaang Infrastructure Private Limited, National Investment and Infrastructure Fund acting through its Investment Manager National Investment and Infrastructure Fund Limited (Seller) and Quazigund Expressway Private Limited ("QEPL") (thereinafter referred to as "the parties"), on June 12, 2025 the Trust has acquired the 100% equity holding of QEPL for consideration of Rs. 6,055.10 million.

The management applied the optional concentration test, under Ind AS 103 "Business Combination", and concluded that the acquired set of activities and assets is not a business because substantially all of the fair value of the gross assets acquired is concentrated under Receivable under Service Concession Arrangements , with similar risk characteristics. Accordingly, this transaction has been accounted for as an asset acquisition. The management identified and recognized the individual identifiable assets acquired and liabilities assumed; and allocated the purchase consideration to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of acquisition.

The allocated value of the identifiable assets and liabilities as at the date of acquisition were:

Assets	**(Amounts in Rs. Million)**
Property, Plant and Equipment (net of accumulated depreciation)	16.45
Intangible assets- Rights under Service Concession Arrangements	152.45
Receivable under Service Concession Arrangements	19,032.91
Trade Receivables	0.68
Cash and Cash Equivalents	1,904.97
Other assets	3,312.61
Total Assets (A)	**24,420.07**
Liabilities	
Borrowings (including current maturities of Non-current borrowings)	17,921.71
Trade Payables	58.95
Other Liabilities	384.31
Total Liabilities (B)	**18,364.97**
Net Assets/Consideration (A-B)	**6,055.10**

4 During the nine months ended December 31, 2025, the Trust has availed Secured Rupee Term Loan facility from Banks and a Financial Institution of Rs. 22,000 million. This loan has been utilised by the Trust for onward lending to its subsidiaries for refinancing of existing secured loans and subordinate debts of subsidiaries.

5 Under the provisions of the InvIT Regulations, the Trust is required to distribute to Unitholders not less than 90% of the Net Distributable Cash Flows ("NDCF") of the Trust for each financial year. The Trust undertakes quarterly distributions (as per the Distribution Policy adopted by the Trust) such that the first distribution of a financial year is not less than 90% of NDCF and thereafter, for further distributions, the Trust ensures that at least 90% of the NDCF is distributed to the Unitholders on a cumulative basis for such financial year. Accordingly, a portion of the Unit Capital contains a contractual obligation of the Trust to pay to its Unitholders as cash distributions. Hence, the Unit Capital is a compound financial instrument which contain both equity and liability components in accordance with Ind AS 32 - Financial Instruments: Presentation. However, in accordance with SEBI Circulars issued under the InvIT Regulations, the Unit Capital has been presented as "Equity" in order to comply with the requirements of Chapter 3 to the SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025 (as amended) dealing with the minimum disclosures for key financial information/statements.

6 (A) (i) On August 13, 2025, the Trust has allotted 42,000 (Forty two thousand) 6.93% and 40,000 (Forty thousand) 7.3015% Senior, Secured, Rated, Listed, Redeemable, Non-Convertible Debt Securities respectively having a face value of Rs. 1,00,000 (Rupees One Lakh) each aggregating to Rs. 8,200 million (Rupees eighty two hundred million Only) ("Debt Securities") on private placement basis which got listed on Bombay Stock Exchange (BSE). Details of utilisation of these debt securities are as follows:

(Amounts in Rs. Million)

Sr. No.	**Particulars**	**Proposed Utilisation**	**Actual Utilisation upto December 31, 2025**	**Unutilised Amount as at December 31, 2025**
1	For refinancing part or full commercial papers (CPs) issued by the issuer	2,620.00	2,620.00	-
2	For on lending to the tranche III Project SPVs (QEPL and JUHPL) for the purpose of repayment of the existing facilities availed by such Tranche III Project SPVs	5,580.00	5,580.00	-

(ii) On April 25, 2025, the Trust has allotted 55,200 (fifty five thousand two hundred) 7.2503% and 60,000 (Sixty thousand) 7.3006% Senior, Secured, Rated, Listed, Redeemable, Non-Convertible Debt Securities respectively having a face value of Rs. 1,00,000 (Rupees One Lakh) each aggregating to Rs. 11,520 million (Rupees eleven thousand five hundred twenty million Only) ("Debt Securities") on private placement basis which got listed on Bombay Stock Exchange (BSE). Details of utilisation of these debt securities are as follows:

(Amounts in Rs. Million)

Sr. No.	**Particulars**	**Proposed Utilisation**	**Actual Utilisation upto December 31, 2025**	**Unutilised Amount as at December 31, 2025**
1	For part or full repayment of any of outstanding amounts in relation to any one or more of the Senior Debt Facilities.	11,520.00	11,520.00	-

(iii) On June 11, 2025, the Trust allotted 27,000 rated, listed, unsecured Commercial Papers (CPs). Each CP had a maturity value of Rs. 500,000, aggregating to Rs. 13,500 million, bearing a discount rate of 6.25% per annum and a tenure of 91 days, maturing on September 10, 2025. The CPs were listed on BSE Limited on June 12, 2025 and were fully repaid on their maturity date. This CP has been utilised by the Trust for onward lending to its subsidiaries for repaying of existing subordinate debts.

(B) Details of due dates of the Non-Convertible Debt Securities as at December 31, 2025 are as follows:-

Secured/ Unsecured	**Particulars**	**Previous Due Date**		**Next Due Date**

7 In terms of the InvIT Regulations, the Trust has entered into Investment Management Agreement dated March 11, 2022 with Cube Highways Fund Advisors Private Limited ("the Investment Manager"), which got amended on May 30, 2022, on December 16, 2022, March 08, 2024 and on July 24, 2024 (herein after referred to as IM Agreement).

As per Schedule II of the IM Agreement as amended from time to time, the Investment Manager shall be entitled to a fee from the funds of the Trust in accordance with the IM Agreement ("Management Fee") as under:

For the period upto May 31, 2024 (in terms of Amended and Restated IM Agreement dated December 16, 2022)	Higher of: (a) 0.94% of the revenue of the Initial SPVs ("18 SPV's");or (b) Rs. 190 million ("Minimum Threshold") subject to an escalation of 7% per annum from 31 March 2023
For the period from and after June 01, 2024 (in terms of Amended and Restated IM Agreement dated July 24, 2024)	Higher of: (a) 0.81% of the revenue of the Project SPVs ("24 SPV's including 6 HAM SPV's"); or (b) Rs. 190 million ("Minimum Threshold") subject to an escalation of 7% per annum from 31 March 2023
For the period from and after February 12, 2025 (in terms of Amended and Restated IM Agreement dated July 24, 2024)	Higher of: (a) 0.75% of the revenue of the Project SPVs ("27 SPV's including 6 HAM SPV's, NAMEPL, QEPL and JUHPL"); or (b) Rs. 190 million ("Minimum Threshold") subject to an escalation of 7% per annum from 31 March 2023

8 Pursuant to Project Implementation and Management Agreement dated January 02, 2023 (PM Agreement) in consideration of services to be rendered by Project Manager in accordance with and subject to agreement and applicable law, each project SPV's agree to pay fees ("Fee") from their respective funds, on an arm length basis, to the Project Manager. The fee shall be calculated annually and shall be higher of :-
(a) 1.55% of the standalone revenue of the project SPV based on audited financial statements of Project SPV.
OR
(b) During the terms of relevant Concession Agreement for each Project SPV the Minimum Threshold as specified in Schedule 4 of the PM Agreement in relation to each Project SPV, subject to escalation of 7% per annum.

9 The Trust group is engaged in the business of setting up of infrastructure facility by way of development of infrastructure projects, operation and maintenance of Infrastructural facilities. As such, all activities undertaken by the SPVs are incidental to the main business. The directors of the SPV and Investment Manager, who have been identified as being the chief operating decision maker (CODM), evaluates the SPVs performance, allocates resources based on the analysis of the previous performance indicators of the SPVs as a single unit. Therefore, there are no separate reportable business segments as per IND AS 108-"Operating Segment".

10 During the nine months ended December 31, 2025, the Trust has been assigned/reaffirmed the credit ratings for its borrowings as follows:-

Sr. No.	Nature of Borrowings	Rating Agency	Rating	Date
1	Rupee Term Loan	CRISIL	"CRISIL AAA/Stable"	Reaffirmed on June 04, 2025 and September 15, 2025
		ICRA	"ICRA AAA/Stable"	Reaffirmed on April 17, 2025, August 13, 2025. Assigned/Reaffirmed on August 28, 2025
		India Ratings	"IND AAA/Stable"	Reaffirmed on April 18, 2025, April 22, 2025, June 09, 2025 and August 14, 2025
2	Bank Guarantee	CRISIL	"CRISILA1+"/"CRISIL AAA/Stable"	Reaffirmed on June 04, 2025 and September 15, 2025
		ICRA	"ICRA AAA/Stable"	Reaffirmed on April 17, 2025, August 13, 2025. Assigned/Reaffirmed on August 28, 2025
		India Ratings	"IND AAA/Stable"	Reaffirmed on April 18, 2025, April 22, 2025, June 09, 2025 and August 14, 2025
3	Non-Convertible Debt Securities	ICRA	"ICRA AAA/Stable"	Assigned/Reaffirmed on April 17, 2025, August 13, 2025 and August 28, 2025
		CRISIL	"CRISIL AAA/Stable"	Reaffirmed on June 04, 2025
		India Ratings	"IND AAA/Stable"	Reaffirmed on April 18, 2025, April 22, 2025, and June 09, 2025. Assigned/Reaffirmed on August 14, 2025. Reaffirmed on August 28, 2025
4	Commercial Papers	CRISIL	"CRISIL A1+"	Assigned on June 04, 2025
		India Ratings	"IND A1+"	Assigned on June 09, 2025 and affirmed on August 14, 2025

11 On November 21 , 2025, the Government of India notified the four Labour Codes - The Code on Wages, 2019 , The Industrial Relations Code, The Code on Social Security, 2020, and The Occupational Safety, Health and Working Conditions Code, 2020 - consolidating 29 existing Labour Laws. Based on the draft rules and FAQs issued by the Ministry of Labour and Employment and best available information (including legal assessments and existing contractual arrangements), the Trust Group has estimated that these Codes have no material financial impact on the results for the quarter and nine months ended December 31, 2025. The Trust Group continues to monitor the finalisation of rules by the central/state government and other developments pertaining to labour codes and would provide appropriate accounting effect, if any, on the basis of such developments.

12 At the end of each reporting period, in terms of Ind AS 36 "Impairment of Assets" the Management carries out impairment assessment for Intangible assets Rights Under Service Concession Arrangements in individual subsidiary (cash generating unit) and determine the recoverable amount of Intangible assets Rights Under Service Concession in subsidiaries as at the reporting date.

An impairment loss is recognised if the carrying amount of the Intangible assets exceeds its recoverable amount. The recoverable amount is determined by the Management based on the value in use approach using an External Independent Valuer. The key judgements in determining the value in use approach included revenue and other cash flow projections for the remaining concession period of finite life SPVs, changes in interest rates, discount rates, risk premium for market conditions etc. {also refer note 23(4)}. The revenue projection is based on assumptions made by the Management regarding future traffic growth and inflation factor for assessing user toll fee as supported by the studies from the Third-party Independent Consultant.

At each reporting date, the Management has carried out assessment of indicators of impairment and concluded that there are no new internal and external source of information which require further adjustment in the carrying amount of Intangible assets - Rights Under Service Concession Arrangements.

13 Since, the Trust acquired various SPVs at different dates as detailed in 1(B) above, therefore the Consolidated Unaudited Financial Information for the current quarter and nine months ended December 31, 2025 as furnished by the Trust are not comparable with the corresponding quarter and nine months ended December 31, 2024 included in the Consolidated Unaudited Financial Information respectively.

14 Revenue from operations for the quarter and nine months ended December 31, 2025 includes Rs. 752.30 million and Rs. 948.80 million respectively being compensation received/receivable from National Highways Authority of India (NHAI) towards revenue determined by the Trust SPVs, arising out of Annual Pass with effect from August 15, 2025, priced at Rs. 3,000 for F.Y. 2025-26 which entitles the holder to either 200 Toll-free crossings or One year of Validity which occurs earlier.

15 Revenue from operations for the nine months ended December 31, 2025, includes Rs. 708.06 million, which was settled pursuant to the order dated 31 July 2025, of the High Court of Judicature at Madras between Tamil Nadu State Transport Corporation (TNSTC) and Trust SPVs (SMTPL, MKTPL, NKTPL, and KETPL) towards toll fees for the period from November 2020 to July 17, 2025. This pertains to TNSTC's buses passing through the four tolls at Madurai-Kanyakumari (MK) stretch. Of this amount, the Trust SPVs received Rs. 293.39 million on August 21, 2025, Rs. 39.28 million on August 22, 2025, and the remaining Rs. 375.39 million (including Rs. 42.71 million for the period from 1 April 2025 until the settlement date of July 17, 2025) on October 14, 2025.

(-) any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: (i). loan agreement entered with financial institution, or (ii). terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or (iii). terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, or (iv). agreement pursuant to which the Trust operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or (v). statutory, judicial, regulatory, or governmental stipulations; or	-	(126.16)	-	(126.16)	(450.00)	(450.00)
(-) any capital expenditure on existing assets owned / leased by the InvIT, to the extent not funded by debt / equity or from contractual reserves created in the earlier years	-	-	-	-	-	-
NDCF at Trust Level	**4,361.32**	**4,093.38**	**4,349.86**	**11,846.08**	**8,136.88**	**10,823.81**

Notes:

i) This includes Rs. 4,976.02 million received from SPVs after December 31, 2025 but before the date of the Board meeting i.e. January 30, 2026, and excludes Rs. 3,900.89 million received from SPVs during the current quarter which was already considered for computation of NDCF for the quarter ended September 30, 2025.

ii) Subsequent to the quarter ended December 31, 2025, the Board of Directors of Investment Manager, in its meeting dated January 30, 2026, approved a distribution of Rs. 4.10 per unit aggregating Rs. 5,510.51 million for the quarter ended December 31, 2025, to be paid within 5 days from the record date. For the purpose of this distribution, the Management has considered Rs. 1,541.12 million received by the Trust from JUHPL, which represents the expenses appropriated for the period June 12, 2025 (i.e. the acquisition date by the Trust) to December 01, 2025 (being date of receipt of annuity post acquisition) from the SPV's cash balance as on acquisition date as the previous annuity was received prior to SPV's acquisition date.

iii) Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

(All amounts in Rs. million unless otherwise stated)

18 SPV wise statement of net distributable cash flows for the period from October 01, 2025 to December 31, 2025 (contd.)

Particulars	NKTPL	SMTPL	NDEPL	APEPL	MBEL	JMTPL	WUPTPL**
Cash flow from operating activities as per Cash Flow Statement of SPV	**191.20**	**174.16**	**231.43**	**(140.02)**	**198.73**	**398.44**	**63.77**
Add: Cash Flows received from SPV's which represent distributions of NDCF computed as per relevant framework	-	-	-	-	-	-	-
Add:Treasury income / income from investing activities (interest income received from FD, tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments. Further clarified that these amounts will be considered on a cash receipt basis)*	167.02	2.71	0.82	5.87	22.33	(4.17)	6.22
Add: Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs or Investment Entity adjusted for the following: - Applicable capital gains and other taxes - Related debts settled or due to be settled from sale proceeds - directly attributable transaction costs; - Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations	-	-	-	-	-	-	-
Add: Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs or Investment Entity not distributed pursuant to an earlier plan to re invest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently	-	-	-	-	-	-	-
Less: Finance cost on Borrowings, excluding amortisation of any transaction costs as per Profit and Loss Account and any shareholder debt / loan from Trust	-	-	-	-	(21.17)	-	-
Less: Debt repayment (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments / debt refinanced through new debt, in any form or equity raise as well as repayment of any shareholder debt / loan from Trust)	-	-	-	-	(1.12)	-	-
Less: any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: (i). loan agreement entered with banks / financial institution from whom the Trust or any of its SPVs/ HoldCos have availed debt, or (ii). terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or (iii). terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, (iv). agreement pursuant to which the SPV/ HoldCo operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or (v). statutory, judicial, regulatory, or governmental stipulations;	-	-	-	138.88	(62.32)	-	-
Less: any capital expenditure on existing assets owned / leased by the SPV or Holdco, to the extent not funded by debt / equity or from reserves created in the earlier years	(0.31)	-	(0.18)	(0.15)	(2.41)	(0.31)	(1.13)
Net Distributable Cash Flows	**357.91**	**176.87**	**232.07**	**4.58**	**134.04**	**393.96**	**68.86**

*Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

**For the quarter ending 31 December 2025, WUPTPL is unable to declare a dividend or make a distribution to the Trust as required by SEBI InvIT Regulations because of negative free reserves and the absence of outstanding debts to the Trust.

WUPTPL filed an initial application with the National Company Law Tribunal (NCLT) for reduction and reorganisation of capital under Section 230, read with Sections 66 and 52, and other applicable provisions of the Companies Act, 2013, owing to significant accumulated losses ~that have significantly reduced the value of WUPTPL~, represented by its equity share capital, securities premium, deemed capital contribution, and Equity Component on NCDs. The petition was filed on 22 August 2025, and the NCLT passed an order on 7 October 2025, dispensing with the meetings of shareholders and creditors.

Subsequently, a second motion petition was filed with the NCLT on 14 October 2025, seeking final approval of the proposed scheme of capital reduction and reorganisation, which was heard on 12 January 2026. The next hearing is scheduled for 16 February 2026.

**For the quarter ended September 30, 2025, WUPTPL was not able to declare dividend and therefore was not able to make distribution as required by SEBI InvIT Regulations to Trust due to negative free reserves and no outstanding debts to the Trust.

WUPTPL filed a first motion application with the National Company Law Tribunal (NCLT) for reduction and reorganisation of capital under Section 230 read with Section 66 and Section 52 and other applicable provisions of the Companies Act, 2013 in view of significant accumulated losses which has substantially wiped off the value of the Applicant Company represented by its equity share capital, securities premium, deemed capital contribution and Equity Component NCDs. The petition was filed on 22 August, 2025 and an order dispensing the meetings of the shareholders and the creditors was passed by the NCLT on October 07,2025. A second motion with the NCLT is filed on 14 October 2025 for seeking approval of the proposed scheme of capital reduction and reorganisation; which is yet to be heard as of date.

*Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

**For the quarter ending 31 December 2025, WUPTPL is unable to declare a dividend or make a distribution to the Trust as required by SEBI InvIT Regulations because of negative free reserves and the absence of outstanding debts to the Trust.

WUPTPL filed an initial application with the National Company Law Tribunal (NCLT) for reduction and reorganisation of capital under Section 230, read with Sections 66 and 52, and other applicable provisions of the Companies Act, 2013, owing to significant accumulated losses ~that have significantly reduced the value of WUPTPL~, represented by its equity share capital, securities premium, deemed capital contribution, and Equity Component on NCDs. The petition was filed on 22 August 2025, and the NCLT passed an order on 7 October 2025, dispensing with the meetings of shareholders and creditors.

Subsequently, a second motion petition was filed with the NCLT on 14 October 2025, seeking final approval of the proposed scheme of capital reduction and reorganisation, which was heard on 12 January 2026. The next hearing is scheduled for 16 February 2026.

(i) Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

(ii) Expenses incurred during the period June 12, 2025 (i.e. the acquisition date by the Trust) to July 30, 2025 (being date of receipt of annuity post acquisition) aggregating Rs. 216.49 million have been appropriated from the cash balance as on acquisition date as the previous annuity was received prior to acquisition date. Accordingly, these expenses have been adjusted to reflect available distribution for the period.

(iii) Expenses incurred during the period June 12, 2025 (i.e. the acquisition date by the Trust) to December 01, 2025 (being date of receipt of annuity post acquisition) aggregating Rs. 1,541.12 million have been appropriated from the cash balance as on acquisition date as the previous annuity was received prior to acquisition date. Accordingly, these expenses have been adjusted to reflect available distribution for the period.

Add: Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs or Investment Entity adjusted for the following: - Applicable capital gains and other taxes - Related debts settled or due to be settled from sale proceeds - directly attributable transaction costs; - Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations	-	-	-	-
Add: Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs or Investment Entity not distributed pursuant to an earlier plan to re invest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently	-	-	-	-
Less: Finance cost on Borrowings, excluding amortisation of any transaction costs as per Profit and Loss Account and any shareholder debt / loan from Trust	(57.10)	(36.93)	(3.78)	(78.28)
Less: Debt repayment (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments / debt refinanced through new debt, in any form or equity raise as well as repayment of any shareholder debt / loan from Trust)	(9.00)	(10.88)	(9.82)	-
Less: any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: (i). loan agreement entered with banks / financial institution from whom the Trust or any of its SPVs/ HoldCos have availed debt, or (ii). terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or (iii). terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, (iv). agreement pursuant to which the SPV/ HoldCo operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or (v). statutory, judicial, regulatory, or governmental stipulations;	(37.58)	(62.19)	(53.54)	-
Less: any capital expenditure on existing assets owned / leased by the SPV or Holdco, to the extent not funded by debt / equity or from reserves created in the earlier years	(0.46)	(10.94)	(1.86)	(4.40)
Net Distributable Cash Flows	**501.41**	**686.53**	**976.03**	**275.17**

*Unrealised gain on overnight mutual funds considered as "Cash and cash equivalents" is excluded from treasury income as the same is recognised on receipt basis for purpose of NDCF calculation.

19 Commitments

Particulars	December 31, 2025 (Unaudited)	September 30, 2025 (Unaudited)	December 31, 2024 (Unaudited)	March 31, 2025 (Audited)
Estimated amount of contracts remaining to be executed on capital account not provided for (Net of Advance) towards:				
- Property, plant and equipment	50.31	-	-	-
- Intangible assets- Rights under Service Concession Arrangements	126.35	100.27	478.19	464.92

The Trust Group has other commitments for services which are received as per requirements per operating cycle in normal course of business. The Trust Group does not have any other long term commitments or material non-cancellable contractual commitments/contracts, which might have material impact on the Consolidated Unaudited Financial Information.

20 Contingent liabilities and claims

Sr. No.	Particulars	December 31, 2025 (Unaudited)	September 30, 2025 (Unaudited)	December 31, 2024 (Unaudited)	March 31, 2025 (Audited)
	Claims against the Trust Group not acknowledged as debt				
a)	In respect of Income-tax matters, disputed by SPVs	461.83	562.56	743.27	686.83
b)	In respect of Indirect tax matters (VAT/Entry tax/Service tax/GST) disputed by SPVs[(i)]	4,515.21	4,361.56	5,692.05	4,309.77
c)	Damages/Penalties levied by NHAI/Independent engineer on account of default/deficiencies in terms of the concession agreement	20.61	20.61	63.01	20.61
d)	Revenue Claim levied by State Authority (In terms of the SPA entered between the SPVs and erstwhile promoters, these matters are covered under specific indemnity from erstwhile promoters)	114.40	114.40	-	-
e)	In respect of Stamp Duty matters, disputed by SPVs[(ii)]	1,931.80	932.70	932.70	932.70
f)	Civil suits related to accident claim and land encroachment matter at one SPV	7.70	7.70	7.70	7.70

Notes:

(i) Includes GST demand of Rs. 3,480.69 million (inclusive of interest and penalty) received by certain HAM SPVs alleging liability to GST on entire Bid Project Cost amount upfront on receipt of completion certificate, in relation to which the SPVs have filed a writ before the High Court/appeal before the relevant appellate authority. In terms of the SPA entered between the SPVs and erstwhile promoters, these matters are covered under specific indemnity from erstwhile promoters.

(ii) In light of a Supreme Court decision in Rewa Tollway P. Limited v. The State of Madhya Pradesh & ORS., the Trust has reassessed stamp duty obligations (including for stamp duty matters disputed by certain SPVs referred above) for the concession agreements entered into by the SPVs with NHAI, considering inter-alia, types of concession agreement (DBFOT/BOT/TOT/HAM/Annuity), rights under terms and conditions of the concession agreements, indemnity to the extent under the Share Purchase Agreements entered by the Trust at the time of acquisition of the SPVs, jurisdiction of the relevant authority, and status of ongoing proceedings. Based on the assessment above supported by the legal advice, the Trust group does not expect the ultimate outflow of resources embodying economic benefits, which could materially affect the financial performance and position of the Trust Group.

(iii) The management of the Group assesses all material claims in the nature of demands and the show cause notices ("SCNs"), including intimation prior to SCNs, relating to Income tax, Indirect taxes and other litigations against the Group and based on legal advice in certain cases, evaluates whether it is probable, possible or remote ("PPR"). The Group discloses matters as contingent liability that are assessed as possible and The relevant SPVs are contesting the aforesaid notices /order before various authorities and are confident that the matters will be decided in Favor of the SPVs and ultimately no liability is likely to be devolved on the respective SPVs. Future ultimate outflow of resources embodying economic benefits in respect of the above matters are uncertain as it depends on the final outcome of the matter involved.

21 Earnings per Unit (EPU)

The following table reflects the income and share data used in the basic and diluted EPU computations:	Quarter ended			Nine months ended		Year ended
	December 31, 2025 (Unaudited)	September 30, 2025 (Unaudited)	December 31, 2024 (Unaudited)	December 31, 2025 (Unaudited)	December 31, 2024 (Unaudited)	March 31, 2025 (Audited)
Profit/(loss) attributable to unit holders:						
Profit/(loss) for the period attributable to owners of the Trust for calculating basic EPU (Rs. in Million)	410.35	402.18	520.05	817.12	259.64	(357.33)
Adjustments for reclassification of Subordinate Units	-	-	-	-	-	-
Profit/(loss) for the period attributable to owners of the Trust for calculating diluted EPU (Rs. in Million)	**410.35**	**402.18**	**520.05**	**817.12**	**259.64**	**(357.33)**
Calculation of weighted average number of units outstanding (units in Million):						
Weighted average number of Ordinary units outstanding	1,344.07	1,344.07	1,334.45	1,344.07	1,334.45	1,334.45
Add: Estimated Subordinate Units to be reclassified to Ordinary Units[(i)]	-	-	-	-	-	0.03
Weighted average number of units outstanding for calculating basic EPU (units in Million)	**1,344.07**	**1,344.07**	**1,334.45**	**1,344.07**	**1,334.45**	**1,334.48**
Add: Dilutive Units[(ii)]	-	-	-	-	-	-
Weighted average number of units outstanding for calculating diluted EPU (units in Million)	**1,344.07**	**1,344.07**	**1,334.45**	**1,344.07**	**1,334.45**	**1,334.48**
Basic earnings per unit (Rs. absolute amount)	0.31	0.30	0.39	0.61	0.19	(0.27)
Diluted earnings per unit (Rs. absolute amount)	0.31	0.30	0.39	0.61	0.19	(0.27)

(i) Subordinate units considered for calculating Basic and Diluted EPU (Refer note 25 and 26):

Particulars	Date considered for Basic and Diluted EPU	Units to be reclassified (in million)	Date of reclassification	Units reclassified (in million)
DATRPL Subordinate Units	March 31, 2024	44.10	July 19, 2024	44.10
JMTPL & MBEL Subordinate Units	March 31, 2025	9.62	July 14, 2025	9.62

(ii) There are no dilutive units to be considered for the purpose of calculating diluted EPU.

(iii) There have been no transactions involving units or potential units between the reporting date and the date of authorisation of these financial information.

The key assumptions used as inputs for the calculation of Enterprise Value and fair value include determination of future cash flows, traffic estimates, assessment of the variation in concession period in certain subsidiaries, considering target traffic/ target revenue subject to approvals from the authorities, revenue growth rate, discount rates, inflation rates and other economic factors.

During the period, NHAI, vide its Policy Circular dated September 13, 2025, revised the Wholesale Price Index (WPI) linking factor from 1.641 to 1.561, resulting in a reduction of around 3–5% in base toll rates. The said Circular was challenged before the High Court of Delhi by various parties (including the Highway Operators Association of India) by filing Writ petitions (Civil) and Civil Miscellaneous Applications. The Hon'ble High Court of Delhi, vide order dated October 17, 2025, has directed that the aforesaid Policy/ Circular dated 13.09.2025 be kept in abeyance. The matter is to be re-examined by the NHAI within a fixed timeline, after considering the representations and submissions of stakeholders, and a reasoned order is to be passed thereafter, taking into account all relevant aspects of the matter. As of the reporting date, the Enterprise Value, as determined by the independent valuer, has been computed using the WPI linking factor of 1.641.

24 Information on related party transactions

The name of the related parties and nature of relationship are as identified by the management of the Investment Manager with reference to the Trust and its subsidiaries which are considered for the Consolidated Unaudited Financial Information pursuant to the InvIT Regulations.

B) List of related parties as per Regulation 2(1) (zv) of the InvIT Regulations
1) Parties to the Trust
Sponsor- Cube Highways and Infrastructure Pte. Ltd. (CHIPL)
Sponsor- Cube Highways and Infrastructure III Pte. Ltd. (CHIPL-III)
Project Manager of the Trust(for all SPVs)- Cube Highways and Transportation Assets Advisors Private Limited (CHATAAPL)
Subsidiary of CHATAAPL- Cube Highways Roots Foundation
Investment Manager of the Trust- Cube Highways Fund Advisors Private Limited (CHFAPL)
Trustee of the Trust- Axis Trustee Services Limited (ATSL)

2) Promoters of the parties to the Trust specified in (1) above
Promoter of CHIPL- ISQ Asia Aggregator Pte. Ltd.
Promoter of CHIPL-III- ISQ Asia Infrastructure Holdings II Pte. Ltd.
Promoter of CHATAAPL- Cube Highways and Infrastructure Pte. Ltd. (upto December 28, 2023) ,Cube Highways Advisory Pte. Ltd. (w.e.f December 29, 2023)
Promoter of CHFAPL- Cube Highways Advisory Pte. Ltd.
Promoter of ATSL- Axis Bank Limited

3) Directors of the parties to the Trust specified in (1) above
i) Directors of CHIPL
George Currie Crawford (upto September 01, 2025)
Harsh Agrawal
Marcus Christopher Hill (upto March 04, 2025)
Tsuneo Kawasaki (w.e.f February 07, 2024)
Ashutosh Goyal (w.e.f October 01, 2025)
Lin Le (w.e.f February 07, 2024)

ii) Directors of CHIPL-III
Kunal Agarwal
George Currie Crawford (upto September 01, 2025)
Marcus Christopher Hill (upto March 04, 2025)
Harsh Agrawal
Ashutosh Goyal (w.e.f October 01, 2025)
Lin Le (w.e.f February 07, 2024)

iii) Directors of CHATAAPL
Pooja Aggarwal (upto June 18, 2024)
Bovin Kumar (Upto December 23, 2025)
Mukul Shastry (Upto December 26, 2025)
Ankit Jain (w.e.f August 21, 2023 Upto December 23, 2025)
Harikishan Reddy Koppula (w.e.f. April 02, 2025)
Varun Unnikrishnan (w.e.f. May 16, 2025)
Raviraj Vipul Acharya (w.e.f May 16, 2025)
Angela Mary Bouzanis (w.e.f June 06, 2025)

iv) Directors of CHFAPL
Upendra Kumar Sinha
Surinder Chawla
Fereshte Dhunjishaw Sethna#
Jayesh Ramniklal Desai
Sandeep Lakhanpal
Chirdeep Singh Bagga (w.e.f June 08, 2023 upto May 31, 2024)
Helly Bharat Ajmera (w.e.f November 07, 2023)
Raviraj Vipul Acharya (w.e.f July 31, 2024)

v) Directors of ATSL
Deepa Rath (upto February 05, 2025)
Arun Mehta (w.e.f. May 03, 2024)
Pramod Kumar Nagpal (w.e.f. May 03, 2024)
Sumit Bali (w.e.f. January 16, 2024 upto August 16, 2024)
Prashant Ramrao Joshi (w.e.f. January 16, 2024)
Rahul Ranjan Choudhary (w.e.f February 06, 2025)
Bipin Saraf Kumar (w.e.f. April 11, 2025)

4) Entity in which director of the Investment Manager of the Trust is partner
#DMD Advocates

* Considered as Related Parties although not covered under the definition of Related Parties as per Ind AS 24, Related party disclosures. These have been included as voluntary disclosure, following the best corporate governance practices.

24.4 Details in respect of related party transactions involving acquisition of SPVs as required by paragraph 4 of the chapter 3 to the SEBI master circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025

For the nine months ended December 31, 2025: Nil

For the year ended March 31, 2025 (including for the nine months ended December 31, 2024):

A) Summary of the valuation reports (issued by the independent valuer appointed under the InvIT Regulations):

Name of the SPVs	Date of acquisition	Discounting Rate (WACC)	Method of calculation	Enterprise value as at date of acquisition
SIPL	June 04, 2024	8.30%	Discounted Cash flow method	4,486.00
MHPL	June 04, 2024	8.30%		3,383.00
MSHPL	June 04, 2024	8.30%		4,720.00
THPL	June 04, 2024	8.30%		5,389.00
SPPL	June 04, 2024	8.30%		4,645.00
BWHPL	June 04, 2024	8.30%		4,032.00
NAMEPL	February 12, 2025	10.62%		25,267.72

B) Material conditions or obligations in relation to the transactions:

The Share Purchase Agreement dated May 31, 2024 (for HAM SPVs) and June 04, 2024 (for NAMEPL) executed, inter alia, individually between the SPV's and the Trust, prescribing certain terms and conditions as agreed between the parties thereto, including without limitation, indemnification provisions for claims in relation to pre-acquisition period subject to limitations on liability, de-minimis values and claim basket values; representations and warranties; payment(s) to erstwhile sellers etc., governing law etc. (as more particularly stipulated under the Share Purchase Agreements) which govern the transfer of shareholding in the Project SPV's to Cube Highways Trust. Acquisition of shares of N.A.M. Expressway Private Limited ("NAMEPL") has been financed from senior, secured, rated, listed, redeemable, non-convertible debt securities bearing coupon interest rate of 7.67%.

24.5 Pursuant to a resolution passed by the Board of Directors of the Investment Manager acting on behalf of the Trust on November 06, 2025, the Board is evaluating options to explore and evaluate various opportunities, including, inter alia, conversion of the Trust from a privately listed InvIT to a publicly listed InvIT with an offer for sale of its existing units ("Units") subject to necessary approvals. The expenses incurred on various legal advisors and professionals, totalling Rs. 69.47 million upto December 31, 2025, related to the proposed conversion from a privately listed InvIT to a publicly listed InvIT through offer of units of the Trust ("Offer for sale" or "OFS"), will be recoverable from the participating Selling Unitholders (including sponsors such as Cube Highways and Infrastructure III Pte. Ltd (CHIPL-III)). Accordingly, the above expenses of Rs. 69.47 million have been considered by the Management as recoverable as at December 31, 2025.

25 The Board of Directors of the Investment Manager in its meeting held on July 1, 2024 has approved the reclassification of 44.10 million Subordinate Units out of the total 120 million Subordinate Units, issued as part of the initial offer to Cube Highways & Infrastructure III Pte. Ltd. (CH-III), Sponsor of the InvIT, into 44.10 million Ordinary Units, in terms of the performance metrics and the Entitlement Event as defined in the Trust Deed and disclosed in the Final Placement Memorandum dated April 17, 2023. The Board of Directors, accordingly, also approved the extinguishment of the balance 75.90 million Subordinate Units held by CH-III not reclassified into Ordinary Units. These 44.10 million Subordinate Units have been reclassified into Ordinary Units on July 19, 2024 and got listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE) on July 29, 2024.

26 The Board of Directors of the Investment Manager in its meeting held on July 01, 2025 has approved the reclassification of 9.62 million Subordinate Units out of the total 37.50 million Subordinate Units, issued as part of the initial offer to Cube Highways and Infrastructure Pte Ltd (CH-I), Sponsor of the InvIT, into 9.62 million Ordinary units, in terms of the performance metrics and the Entitlement Event as defined in the Trust Deed and disclosed in the Final Placement memorandum. The Board of Directors, accordingly, also approved the extinguishment of the balance 27.88 million Subordinate Units held by CH-I not reclassified into Ordinary Units. These 9.62 million Subordinate Units have been reclassified into Ordinary Units on July 14, 2025 and got listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE) on July 14, 2025.

27 Investors can view the Consolidated Unaudited Financial Information of the Trust on the Trust's website (www.cubehighwaystrust.com) and on the website of BSE Limited (www.bseindia.com) and NSE Limited (www.nseindia.com).

28 The Consolidated Unaudited Financial Information of the Trust have been reviewed and approved by the Audit Committee and Board of Directors of Investment Manager at their respective meetings held on January 30, 2026. The statutory auditors have carried out limited review of the Consolidated Unaudited Financial Information for the quarter and nine months ended December 31, 2025.

INDEPENDENT AUDITOR'S REPORT

To
The Members of
Baharampore Farakka Highways Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the Financial Statements of Baharampore Farakka Highways Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2025, and the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of Material Accounting Policy Information and other explanatory information (hereinafter referred to as "the Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, the loss (including other comprehensive income), changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Financial Statements.

Information Other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the Other Information. The other information comprises the information included in the Board's report, including the Directors Report but does not include the Financial Statements and our Independent Auditors' Report thereon. Our opinion on the Financial Statements does not cover the Other Information and we do not and will not express any form of assurance or conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the Other Information identified above and, in doing so, consider whether the Other Information is materially inconsistent with the Financial Statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this Other Information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an

auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, make it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements

We communicate with those charged with governance regarding, among other matters, the

planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the attached Annexure "A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
    a. We have sought and obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purposes of our audit.
    b. In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books except for the matter stated in paragraph 2(i)(vi) below relating to reporting under rule 11(g) of the Companies (Audit and Auditors) Rule 2014, as amended.
    c. The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
    d. In our opinion, the aforesaid Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
    e. On the basis of the written representations received from the directors as on March 31, 2025 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2025 from being appointed as a director in terms of Section 164 (2) of the Act.
    f. With reference to maintenance of accounts and other matter therewith, reference is invited to paragraph 2(b) above on reporting under section 143(3)(b) and para 2(i)(vi) below relating to reporting under rule 11(g) of the Companies (Audit and Auditors) Rule 2014, as amended.
    g. With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls with reference to financial statements.

h. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:

In our opinion and to the best of our information and according to the explanations given to us, there is no remuneration paid by the Company to its directors during the year to which the provisions of section 197 of the Act apply.

i. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended , in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 43 to the Financial Statements,

ii. The Company did not have any long-term contracts including derivative contracts for which there were material foreseeable losses,

iii. There are no amounts required to be transferred to the Investor Education and Protection Fund by the Company.

iv. a) The management has represented that, to the best of their knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person or entity, including foreign entities ("intermediaries") with the understanding whether recorded in writing or otherwise, that the intermediary shall, whether directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security, or the like on behalf of the Ultimate Beneficiaries.

b) The management has represented that, to the best of its knowledge and belief, no funds have been received by the company from any person or entity including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the company shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries,

c) Based on such audit procedures considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (iv)(a) and (iv)(b) above contain any material misstatement.

v. The Company has not declared or paid dividends during the year and therefore the compliance with Section 123 of the Companies Act, 2013 is not applicable in

respect of dividends declared or paid.

vi. Based on our examination which included test checks, the Company, in respect of financial year commencing on 1 April 2024, has used SAP S/4 HANA accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility, the same has operated with effect from March 28, 2025 for all relevant transactions recorded in the software at application level .

However, the audit trail feature is only enabled at Data Definition Language (DDL) and not at Data Manipulation Language (DML) for direct access changes to database.

Based on above, the preservation of audit trail as per the statutory requirements is available only for the period the feature was enabled and operating.

Annexure A to the Independent Auditors' Report

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of Baharampore Farakka Highways Limited of even date)

To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of audit, and to the best of our knowledge and belief, we state that:

(i) a. (A) The Company has maintained proper records showing full particulars including quantitative details and situation of its Property, Plant and Equipment.

(B) The company has maintained proper records showing full particulars of intangible assets.

b. Property, Plant and Equipment have been physically verified by the management at reasonable intervals and no material discrepancies were noticed on such verification.

c. There is no immovable property as at Balance sheet date other than investment property. We have received confirmation from the erstwhile Security trustees of the Lenders that they are in possession of the title deeds.

d. The company has not revalued its Property, Plant and Equipment and intangible assets during the year.

e. There are no proceedings initiated during the year or are pending against the Company as at March 31, 2025 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 and rules made thereunder.

(ii) (a) The management has conducted physical verification of inventory at reasonable intervals during the year. On the basis of examination of records, we are of the opinion that the coverage and procedure of such verification is appropriate and that no discrepancies of 10% or more in the aggregate for each class of inventory were noticed on such verification.

(b) The Company do not have working capital limits and hence Clause 3(ii)(b) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(iii) The Company has not made investments in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or any other parties. Hence Clause 3(iii)(a), 3(iii)(b), 3(iii)(c), 3(iii)(d), 3(iii)(e) & 3(iii)(f) of the Companies (Auditor's Report) Order, 2020 are not applicable to the Company.

(iv) The Company has not given any loans, or made any investments, or given any

guarantees and security to which section 185 or section 186 of the Companies Act, 2013 applies.

(v) The Company has not accepted deposits from the public or amounts that are deemed to be deposits pursuant to sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and rules framed thereunder. As informed to us, there is no order that has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other tribunal in respect of the said sections.

(vi) As informed to us, the maintenance of the cost records under the sub-section (1) of section 148 of the Companies Act, 2013 has been prescribed and we are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. We have not, however, carried out a detailed examination of the records to ascertain whether they are accurate or complete.

(vii) (a) The Company is generally regular in depositing undisputed statutory dues including Goods and Services Act, Provident fund, Employees State Insurance, Income Tax, Sales Tax, Service Tax, duty of Customs, duty of Excise, Value Added Tax, Cess and other statutory dues to the appropriate authorities during the year. According to the information and explanations given to us, no undisputed amount payable in respect of the aforesaid dues were outstanding as at March 31, 2025 for a period of more than six months from the date they became payable

(b) There are no statutory dues referred to in sub-clause (a) which have not been deposited on account of any dispute except as given below:

Name of statute	Nature of dues	Disputed Amount (Rs in lacs)	Period to which the amount relates	Forum where dispute is pending
The West Bengal value Added tax, 2003	VAT	0.65	FY 2016-17	West Bengal Sales Tax Authority
Income Tax demand	Income Tax	0.34	FY 2017-18	Matter pending with ITO
Goods and Service Tax	GST	59.49	FY 2022-23	West Bengal GST Authority
Goods and Service Tax	GST	44.50	FY 2021-22	West Bengal GST Authority

(viii) There are no transactions that were not recorded in the books of account, and

which has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961).

(ix) (a) The company has not defaulted in repayment of loans or other borrowings or the payment of interest thereon to any lender also there is no continuing default as at Balance Sheet Date.

In respect of interest payable on Non-convertible debentures to related party the interest is payable on quarterly basis subject to restricted payment clause in Common Loan Agreement (CLA), hence due to restricted payment clause in CLA , the interest which is accrued and not paid as at March 31, 2025 is not considered as default.

(b) The Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

(c) The company has applied the money obtained by way of term loans during the year for the purposes for which they were obtained.

(d) On an overall examination of the financial statements of the Company, we report that funds raised on short-term basis have, prima facie, not been used during the year for long-term purposes by the Company.

(e) The Company does not have any subsidiaries, joint ventures or associates and hence clause 3(ix)(e) & 3(ix)(f) of the Companies (Auditor's Report) Order, 2020 are not applicable to the Company.

(x) (a) The company has not raised any money by way of initial public offer / further public offer (including debt instruments) during the year and hence clause 3(x)(a) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(b) The Company has not made private placement or preferential allotment of equity shares or convertible debentures (fully, partially or optionally convertible) during the year under audit.

(xi) (a) No fraud by the Company or any fraud on the Company has been noticed or reported during the year.

(b) No report under sub-section (12) of section 143 of the Companies Act has been filed by us in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government and hence clause 3(xi)(b) of the Companies (Auditors Report) Order 2020 is not applicable to the Company.

(c) We have taken into consideration the whistle blower complaints received by the

company during the year while determining the nature, timing and extent of audit procedures.

(xii) The Company is not a Nidhi Company and hence clauses 3(xii)(a), 3(xii) (b) and 3(xii)(c) of the Companies (Auditors Report) Order 2020 is not applicable to the Company.

(xiii) The provisions of section 177 are not applicable to the Company. All transactions with the related parties are in compliance with sections 188 of the Companies Act, 2013 in so far as our examination of the proceedings of the meetings of the Board of Directors are concerned. The details of related party transactions have been disclosed in the Financial Statements as required by the applicable Accounting Standards.

(xiv) (a) In our opinion and based on our examination, the company has an internal audit system commensurate with the size and nature of its business.

(b) We have considered the internal audit reports of the company issued till the date of auditor's report.

(xv) The Company has not entered into any non-cash transactions with its directors or persons connected with its directors hence clause 3(xv) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(xvi) The nature of business and the activities of the Company are such that the Company is not required to obtain registration under section 45-IA of the Reserve Bank of India Act 1934 and hence sub-clause 3(xvi)(a), 3(xvi)(b), 3(xvi)(c) and 3(xvi)(d) of the Companies (Auditors Report) Order, 2020 is not applicable to the

(xvii) On an examination of the Statement of Profit and Loss account, we are of the opinion that the Company has not incurred cash losses during the current financial year and in the immediately previous financial year.

(xviii) There has been no resignation of the statutory auditors during the year and accordingly clause (3)(xviii) Companies (Auditors Report) Order 2020 is not applicable to the Company.

(xix) On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions , nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that the company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within

a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

(xx) (a) The company was not required to spend any amount towards Corporate Social Responsibility obligation and hence there are no unspent amounts towards Corporate Social Responsibility (CSR) on other than ongoing projects requiring a transfer to a Fund specified in Schedule VII to the Companies Act in compliance with second proviso to sub-section (5) of Section 135 of the said Act. Accordingly, reporting under clause 3(xx)(a) of the Order is not applicable for the year.

(b) There are no ongoing projects in respect of CSR activities and therefore clause 3(xx)(b) of The Companies (Auditors Report) Order 2020 is not applicable to the Company

ANNEXURE - B TO THE AUDITORS' REPORT

(Referred to in paragraph 2(g) under Report on Other Legal and Regulatory Requirements' section of our report to the Members of Baharampore Farakka Highways Limited of even date)

Report on the Internal Financial Controls with reference to Financial Statements under 143 (3)(i) of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to Financial Statements of Baharampore Farakka Highways Limited ("the Company") as of March 31, 2025 in conjunction with our audit of the Financial Statement of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Financial Statements included obtaining an understanding of internal financial controls with reference to Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to Financial Statements.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial control with reference to Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements.

Because of the inherent limitations of Financial controls with reference to Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Financial Statements to future periods are subject to the risk that the internal financial control with reference to Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to Financial Statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Statement of Cash Flow Statement for the year ended 31 March 2025
(All amounts are in Rs. lakh, unless stated otherwise)

Particulars		Year ended March 31, 2025	Year ended March 31, 2024
A Cash Flow from operating activities			
Profit before income tax		(4,917.55)	(4,758.77)
Adjustments for			
Add:			
Depreciation and amortisation expenses		6,338.34	6,413.27
Finance costs		8,620.95	8,454.34
Amortisation of Corporate guarantee		-	269.75
Upfront Fees Amortisation		44.02	127.28
Interest on delayed payment of statutory dues		-	0.48
Other Receivable w/off		31.00	11.51
Fair value loss/(gains) from financial instruments measured at fair value through profit or loss		364.21	
Less:			
Interest Income on Income tax refund		-	(47.91)
Interest received		(597.26)	(825.38)
Fair Valuation on Sale of Investments		(70.88)	-
Change in operating assets and liabilities			
(Increase)/decrease in Inventory		(39.86)	(118.02)
(Increase)/decrease in other financial assets		(128.40)	745.35
(Increase)/decrease in other non-current assets		80.62	137.19
(Increase)/decrease in other non-current financial assets		(1,418.87)	-
(Increase)/decrease in other trade receivable		85.02	(155.36)
(Increase)/decrease in other current assets		2,840.73	(1,691.74)
Increase/(decrease) in other non-current financial liabilities		466.64	-
Increase/(decrease) in trade payables		7.68	(4,287.21)
Increase/(decrease) in other financial liabilities		(1,040.70)	461.81
Increase/(decrease) in provisions		(10,490.26)	(4,063.57)
Increase/(decrease) in other current liabilities		(153.93)	(1,068.70)
Cash generated from operations		(94.66)	(374.65)
Income taxes (paid) / refund		494.70	(89.03)
Net cash inflow/(outflow) from operating activities		400.04	(463.68)
B Cash flow from investing activities:			
Purchase of property, plant and equipment/ amount spent on intangible asset including intangible assets under development.		(221.26)	(8,226.81)
Investment in fixed deposits		(1,402.10)	(1,037.90)
Investment in investments		(7,597.49)	
Interest received		737.39	698.99
Net cash outflow from investing activities		(8,663.46)	(8,565.75)
C Cash flow from financing activities			
Proceeds from borrowings			-
Proceeds from Subordinate Debt			
Proceeds/repayment of Subordinate Debt (Refer Note 15 G)		-	(568.00)
Proceeds from non convertible debentures		-	22,890.00
Proceeds of long term borrowings (including processing fees)		9,466.67	63,714.26
Repayment of long term borrowings		(2,440.57)	(66,129.60)
Interest/Other Borrowing Cost paid (Refer Note (i) below)		(6,119.06)	(6,908.98)
Net cash inflow from financing activities		907.04	12,997.68
Net increase/(decrease) in cash and cash equivalents		(7,356.38)	3,968.25
Add: Cash and cash equivalents at the beginning of the financial year	13	7,496.61	3,528.36
Cash and cash equivalents at the end of the year	13	240.23	7,496.61
Component of Cash and Cash Equivalent			
Cash on hand		20.69	22.75
Balances with Banks		219.54	1,073.86
Term deposits with original maturity of less than three months		-	6,400.00

C ***As per the Amendment to INDAS 7 " Statement of Cash Flow "***
An entity shall provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes.

Particulars	Non Current Borrowing	Current Borrowing	Interest Payable	Total of Borrowings and Interest
Net Debt as at April 01, 2023	56,103.77	7,371.10	187.48	63,662.35
Repayment of Borrowings	(66,129.60)	-	-	(66,129.60)
Loan taken during the year	66,604.26	-	-	66,604.26
Interest Expenses	-	-	-	-
Interest Paid	-	-	8,580.85	8,580.85
Transferred to Current Liabilities	-	-	(6,908.98)	(6,908.98)
Other Non Cash Movements (Reclassification)	4,981.82	(4,981.82)	-	-
Net Debt as at 31 March 2024	61,560.25	2,389.28	1,859.35	65,808.88
Repayment of Borrowings	(2,440.57)	-	-	(2,440.57)
Loan taken during the year	9,466.67	-	-	9,466.67
Interest Expenses	-	-	8,565.45	8,565.45
Interest Paid	-	-	(6,119.06)	(6,119.06)
Transferred to Current Liabilities	-	-	-	-
Other Non Cash Movements (Reclassification)	(1,347.08)	1,347.08	-	-
Net Debt as at 31 March 2025	67,239.27	3,736.36	4,305.74	75,281.37

Note

The above cash flows has been prepared under the 'Indirect Method' as set out in Ind AS 7, 'Statement of Cash Flows'.

Baharampore-Farakka Highways Limited

Statement of Material Accounting Policy Information and Other Explanatory Notes for financial statements for the year ended March 31, 2025.

(All amounts are in Rs. lakh, unless stated otherwise)

1 **Corporate information**

Baharampore-Farakka Highways Limited was incorporated under the Companies Act, 1956, on 11th March, 2010 as a Special Purpose Vehi for Design, Build, Finance, Operate & Transfer (DBFOT) Toll basis of 4 lanes from Kms 191.416 to 294.684 between Baharampore a Farakka in the state of West Bengal under NHDP Phase III.

NHAI has granted concession period of 25 years to the company for the project. Provisional Certificate under Article 14.3.2 (Schedule - J) of t concession Agreement has been obtained for 75.45 kms for the following stretch - 204.550 to 229.300 KMS - 24.75 KMS / 230.600 to 254.8 KMS - 24.20 KMS / 258.350 to 284.850 KMS - 26.50 KMS. Company has started to collect toll from 14th May, 2014 on receipt of provisio certificate of commencement from Independent consultant appointed by National Highway Authority of India. The Company achiev Commerical Operations Date (COD) on June 22, 2024 (Refer Note 40).

W.e.f. from March 29, 2023, the entire shareholding of the Company has been transferred to Cube Highways and Infrastructure V Pte Ltd.

2 **Statement of Compliances**

The Standalone Financial Statements comply in all material aspects with Indian Accounting Standards ("Ind AS") prescribed under Section 1 of the Companies Act, 2013 ("the Act"), the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions the Act.

2 **Basis of Preparation, Accounting judgements, estimates and assumptions and Material Accounting Policy Information:**

2.1 **Basis of preparation**

The Financial Statement of the Company comprises of the Balance Sheet, the Statement of Profit and Loss (including other comprehensi income), the Statement of Changes in Equity, and the Summary Statement of Significant Accounting Policies, and other explanatory informati (Collectively, the "Financial Statement").

The financial statements are prepared on an accrual basis of accounting and in accordance with the Indian Accounting Standards (Ind A notified under the companies (Indian Accounting standards) Rules, 2015 as amended by the companies (Indian Accounting standard) Rul 2016.

These financial statements are prepared under the historical cost convention on the accrual basis except for certain financial instruments, whi are measured at fair values, which are disclosed in the Financial Statements viz;

- certain financial assets and liabilities (including derivative instruments) and contingent consideration that is measured at fair value

- assets under service concession arrangement

The classification of assets and liabilities of the Company is done into current and non-current based on the operating cycle of the business the Company. The operating cycle of the business of the Company is less than twelve months and therefore all current and non-curr classifications are done based on the status of reliability and expected settlement of the respective asset and liability within a period of twel months from the reporting date as required by Schedule III to the Companies Act, 2013.

Accounting policies have been consistently applied except whereas newly issued accounting standard is initially adopted or a revision to existing accounting standard requires a change in the accounting policy hitherto in use.

The financial statements are presented in Indian Rupees ('INR') and all values are rounded to the nearest lakh, except otherwise indicat Impact of the initial application of new and amended IND ASs that are effective for current year.

2.2 **Significant accounting judgments, estimates and assumptions**

The preparation of financial statements requires management's judgments, estimates and assumptions that impacts the reported amounts revenues, expenses, assets and liabilities, and the accompanying notes thereon. Uncertainty about these assumptions and estimates co result in outcomes that might require a material adjustment to the carrying amount of assets or liabilities in future periods.

i) **Estimates:**

The preparation of the financial statements in conformity with IND AS requires management to make estimates, judgments and assumptio These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, t disclosures of contingent assets and liabilities at the date of financial statements and reported amounts of revenues and expenses during t period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes estimates are made as management becomes aware of circumstances surrounding the estimates. Changes in estimates are reflected in t financial statement in the period in which changes are made and if material, their effects are disclosed in the notes to the financial statements.

ii) **Judgments:**

The Company's management has made the following judgments, which have the most significant effect on the amounts recognised in t separate financial statements, while formulating the Company's accounting policies:

iii) **Taxes:**

The Company is eligible for 100% tax holiday under section 80-IA of the Income Tax Act, 1961. As a result, timing differences arising a reversing during the tax holiday period are not recognized by the Company.

iv) **Recognition and measurement of other Provisions**

The recognition and measurement of other provisions is based on the assessment of the probability of an outflow of resources, and on pa experience and circumstances known at the closing date. The actual outflow of resources at a future date may therefore, vary from the amou included in other provisions.

v) **Useful lives of property, plant and equipment**

The company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result change in depreciation expense in future periods.

vi) **Impairment of property, plant and equipment**

For property, plant and equipment and intangibles an assessment is made at each reporting date to determine whether there is an indication th the carrying amount may not be recoverable or previously recognised impairment losses no longer exist or have decreased. If such indicati exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there h been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised.

vii) **Applicability of service concession arrangement accounting to toll roads concessionaire arrangements**

Appendix A "Service concession arrangements" applies to "public- to-private" service concession arrangements, which can be defined contracts under which the grantor transfers to a concession holder the right to deliver public services that give access to the main public faciliti for a specified period of time in return for managing the infrastructure used to deliver those public services.

More specifically, Appendix C applies to public-to-private service concession arrangements if the grantor:
i. Controls or regulates what services the operator must provide with the infrastructure, to whom it must provide them, and at what price; and
ii. Controls through ownership or otherwise – any significant residual interest in the infrastructure at the end of the term of the arrangement.

In assessing the applicability the management has exercised significant judgement in relation to the underlying ownership of the assets, t ability to enter into power purchase arrangements with any customer, ability to determine prices etc. in concluding that the arrangements do meet the criteria for recognition as service concession arrangements.

viii) **Impairment of concession intangible assets:**

The Company tests intangible assets and cash generating units have suffered any impairment, in accordance with the accounting policy. T recoverable amount of each cash generating unit has been determined based on the greater of value-in-use and fair value less costs to s calculations. Calculations are prepared on the basis of management's assumptions and estimates.

ix) **Fair valuation of Provision for periodic maintenance (overlay expense)**

The Company records the resurfacing obligation for its present obligation as per the concession arrangement to maintain the toll roads duri the concession period. The provision is included in the financial statements at the present value of the expected future payments. T calculations to discount these amounts to their present value are based on the estimated timing of expenditure occurring on the roads.

2.3 **Recent pronouncements**

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounti Standards) Rules as issued from time to time. For the year ended March 31, 2025, MCA has notified Ind AS – 117 Insurance Contracts a amendments to Ind AS 116 – Leases, relating to sale and leaseback transactions, applicable to the Company w.e.f. April 1, 2024. T Company has reviewed the new pronouncements and based on its evaluation has determined that it does not have any significant impact in financial statements.

2.4 **Material Accounting Policy Information**

(a) **Current & Non Current classification**

Current Asset :

An asset shall be classified as current when it satisfies any of the following criteria:
(a) it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
(b) it is held primarily for the purpose of being traded
(c) it is expected to be realized within twelve months after the reporting date, or
(d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets shall be classified as non-current.

Current Liabilities:
A liability shall be classified as current when it satisfies any of the following criteria:
i (a) it is expected to be settled in the company's normal operating cycle;
ii (b) it is held primarily for the purpose of being traded;
iii (c) it is due to be settled within twelve months after the reporting date : or
iv (d) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Ter of a liability that could at the option of the counterparty, result in its settlement by the issue of equity instruments do not effect its classification.

All other liabilities shall be classified as non-current.

(b) **Accounting of intangible assets under Service Concession arrangement:**

Company has Toll Road Concession rights where it Designs, Build, Finances, Operates and transfer (DBFOT) infrastructure used to provi public service for a specified period of time. These arrangements may include Infrastructure used in a public-to-private service concessi arrangement for its entire useful life.
These arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that t Company receives a right (a license) to charge users of the public service. The financial asset model is used when the Company has unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction servic When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for ea component. If the Company performs more than one service (i.e., construction or upgrade services and operation services) under a sin contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the services delivered, wh the amounts are separately identifiable.

Intangible asset model:
The Company recognises an intangible asset arising from a service concession arrangement when it has a right to charge for usage of t concession infrastructure. An intangible asset received as Consideration for providing construction or upgrade services in a service concessi arrangement is measured at fair value on initial recognition by reference to the fair value of the services provided. Subsequent to init recognition, the intangible asset is measured at cost, which includes capitalised borrowing costs, less accumulated amortisation.

The estimated useful life of an intangible asset in a service concession arrangement is the period from when the Company is able to charge t public for the use of the infrastructure to the end of the concession period.

Amortization of concession intangible assets:
Amortization is charged on a straight-line basis over the estimated useful lives . The estimated useful life and amortization method are review at the end of each annual reporting period, with the effect of any changes in the estimate being accounted for on a prospective basis.

(c) **Property, plant and equipment:**
All items of property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is direc attributable to the acquisition of the items. The Company follow Cost Model for Property Plant and Equipment.
Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable th future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carryi amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged profit or loss during the reporting period in which they are incurred.
Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within oth gains/(losses).

Depreciation methods, estimated useful lives and residual value:
Depreciation is provided as per the useful lives of the assets as per schedule II of Companies Act, 2013 using Straight Line Method (SLM).

(d) **Investment property:**
Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowi costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associat with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs a expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

(e) **Financial Instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another enti

a Financial Assets

i) Initial Recognition

In the case of financial assets not recorded at fair value through profit or loss, financial assets are recognised initially at fair value pl transaction costs that are directly attributable to the acquisition of the financial asset. Purchases or sales of financial assets that requ delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on t trade date, i.e., the date that the Company commits to purchase or sell the asset.

ii) Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

Financial Assets at Amortised Cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income from these financial asse is included in finance income using the effective rate interest ("EIR") method. Impairment gains or losses arising on these assets a recognised in Statement of Profit and Loss.

Financial Assets Measured at Fair Value at Other Comprehensive Income

A financial asset that meets the following two conditions is measured at Fair Value through Other Comprehensive Income unless the ass is designated at fair value through profit or loss under the fair value option.

• Business model test: The financial asset is held within a business model whose objective is achieved by both collecting contracti cash flows and selling financial assets.

• Cash flow characteristics test: The contractual terms of the financial asset give rise on specified dates to cash flows that are sol payments of principal and interest on the principal amount outstanding.

Financial Assets Measured at Fair Value at Fair value through Profit and Loss

All the Financial instruments which do not fall under amortised cost or Other Comprehensive Income are carried at fair value through Pr and loss

Derivative financial instruments and hedge accounting Initial recognition and subsequent measurement

The Company uses derivative financial instruments in the form of entering in to a contract of Overloading with the third party for securing t risk of future overloading income and eliminating the risk of traffic of overloading for the balance concesion period.

The upfront payment received in consideration to the said overloading agreement is carried as financial liability carried at Fair value throu Profit and loss. All the overloading collections will be debited to this financial liability. Simultaneously financial asset is created for 20% C of recovery which is carried as financial asset carried at Fair value through Profit and loss and all cost of recovery will be credited to this.

Both the financial liability and financial assets are fair value at each reporting date.

iii) Impairment of Financial Assets

In accordance with Ind AS 109, the Company applies the expected credit loss ("ECL") model for measurement and recognition impairment loss on financial assets and credit risk exposures.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. Simplified approach does r require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECL at each reporti date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has beer significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of t instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts recognising impairment loss allowance based on 12-month ECL.

iv) De-recognition of Financial Assets

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers t financial asset and substantially all risks and rewards of ownership of the asset to another entity.

If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferr asset, the Company recognizes its retained interest in the assets and an associated liability for amounts it may have to pay.

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

b Equity Instruments and Financial Liabilities

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangemer entered into and the definitions of a financial liability and an equity instrument.

i) Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equ instruments which are issued for cash are recorded at the proceeds received, net of direct issue costs. Equity instruments which are issu for consideration other than cash are recorded at fair value of the equity instrument.

ii) Financial Liabilities

1) Initial Recognition

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings a payables as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payabl net of directly attributable transaction costs.

2) Subsequent Measurement

The measurement of financial liabilities depends on their classification, as described below

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initi recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder fo loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financ guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to t issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as p impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation. Amortisation is recognised as finan income in the Statement of Profit and Loss.

Financial liabilities at amortised cost

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the Effective Inter Rate(EIR) method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings recognised over the term of the borrowings in the Statement of Profit and Loss.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of t EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

Financial Liabilities are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before t end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify t liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not demand payment as a consequence of the breach.

3) De-recognition of Financial Liabilities

Financial liabilities are de-recognised when the obligation specified in the contract is discharged, cancelled or expired. When an existi financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability a substantially modified, such an exchange or modification is treated as de-recognition of the original liability and recognition of a new liabili The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

c Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceal legal right to offset the recognised amounts and there is an intention to settle on a net basis to realise the assets and settle the liabiliti simultaneously.

(f) **Cash and cash equivalents:**

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call w financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are sho within borrowings in current liabilities in the balance sheet.

(g) **Income Tax:**

i **Current Income Tax**

Current income tax is recognised based on the estimated tax liability computed after taking credit for allowances and exemptions in accordan with the Income Tax Act, 1961. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, the reporting date.

Minimum Alternative Tax ("MAT") credit is recognised as an asset only when and to the extent there is convincing evidence that the Compa will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asse created by way of a credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at ea Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to t effect that the Company will pay normal Income Tax during the specified period.

ii **Deferred Tax**

Deferred Tax Asset shall be recognised for the carryforward of unused tax losses and unused tax credits to the extent that it is probable th future taxable profit will be available against which the unsused tax losses and unused tax credits can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when t deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a lega enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(h) **Impairment of Assets:**

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asse carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and val in use. For the purposes of assessing impairment, assets are companyed at the lowest levels for which there are separately identifiable ca inflows which are largely independent of the cash inflows from other assets or companys of assets (cash-generating units). Non-financial asse other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

(i) **Segment reporting:**

The Company's operations constitutes a single business segment namely "Infrastructure Development" as per Ind As 108, further the Company's operation are within single geographical segment which is India.

(j) **Borrowings Cost:**
General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset a capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are ass that necessarily take a substantial period of time to get ready for their intended use or sale.
Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted fr the borrowing costs eligible for capitalisation.
Other borrowing costs are expensed in the period in which they are incurred.

(k) **Other Financial Asset - Financial guarantee contract:**
Under Ind AS, the financial guarantee given by a holding company to lender on behalf of the Company for its borrowings are recognised initi at fair value which is subsequently amortised as an interest expense to the Statement of Profit and Loss. This transaction was not record under the previous GAAP.
The fair value of financial guarantees is determined as the present value of the difference in net cash flows between the contractual payme under the debt instrument and the payments that would be required without the guarantee.

(l) **Provisions and Contingent Liabilities and Contingent Assets:**

Provisions
Provisions for legal claims are recognised when the Company has a present legal or constructive obligation as a result of past events, it probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are r recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at t end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as inter expense.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at t end of the reporting period. The discount rate used to determine the present value is a discount rate that reflects current market assessments the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as inter expense.

Contingent liability is disclosed in the case of :
a) a present obligation arising from a past event, when it is not probable that an outflow of resources will happen to settle the obligation
b) a possible obligation, unless the probability of outflow of resources is remote.

Contingent asset are disclosed (if any), where an inflow of economic benefits are probable.

Contingent Assets
A contingent asset is not recognised unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements. Contingent liabilities and contingent assets are reviewed at each balance sheet date.

(m) **Earnings per share:**
Basic Earnings per share is calculated by dividing the net profit / (loss) after tax for the period attributable to equity shareholders of the Compa by the weighted average number of equity in issue during the period. Diluted earnings per share is calculated by dividing the net profit after t for the year attributable to equity shareholders of the company by the weighted average number of equity shares determined by assumi conversion on exercise of conversion rights for all potential dilutive securities.

(n) **Revenue Recognition:**
Revenue is measured at the fair value of the consideration received or receivable. The Company recognizes revenue when the amount revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when specific criteria have be met for each of the Company's activities, as described below.

Toll revenue
The Income from toll revenue from operations of the facility is accounted on receipt basis.

Contract revenue (construction contracts)
The Company has adopted Ind AS 115 " Revenue from Contracts with Customers " for recognising revenue. The Company derives reven primarily from construction contracts. To recognize revenue, the Company applies the following five step approach: (1) identify the contract w a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to t performance obligation in the contract, and (5) recognize revenue when a performance obligation is satisfied.

At contract inception, the Company assesses its promise to transfer services to a customer to identify separate performance obligations.. T Company applies judgment to determine whether each service promised to a customer are capable of being distinct, and are distinct in t context of the contract, if not, the promised services are combined and accounted as a single performance obligation. For performan obligations where control is transferred over time, revenue are recognized by measuring progress towards completion of the performan obligation. The selection of the method to measure progress towards completion requires judgment and is based on the nature of the services be provided. The method for recognizing revenues and cost depends on the nature of the services rendered.

Other Income
Insurance and other claims are recognized as revenue on certainty of receipt basis.
Dividend income is recognized when the right to receive is established. Other items of income are accounted as and when the right to recei arises and recovery is certain.

(o) **Employee Benefits**

Employee benefits includes provident fund, superannuation fund, employee state insurance scheme, gratuity, compensated absences, long service awards and post-employment medical benefits.

a. Short-term Employee Benefit

All employee benefits falling due wholly within twelve months of rendering the service are classified as short-term employee benefits. The benefits like salaries, wages, short-term compensated absences etc. and the expected cost of bonus, and ex-gratia are recognised in the perio the related service is rendered at undiscounted amount of benefits expected to be paid in exchange for that service.

The cost of short-term compensated absences is accounted as under:
- in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- in case of non-accumulating compensated absences, when the absences occur.

b. Post-employment benefits

1) Defined contribution plans:

The Company offers its employees State governed provident fund linked with employee pension scheme as defined contribution plans. The contribution paid/ payable under the scheme is recognised during the period in which the employee renders the related service.

2) Defined benefit plans:

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re- measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected

immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit o loss. Past service costs are recognised in profit or loss on the earlier of the date of the plan amendment or curtailment, and the date that the Company recognises related restructuring costs.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Defined benefit costs are categorized as follows:
- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and
- net interest expense or income; and
- re-measurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The present value of the defined benefit liability is calculated using a discount rate which is determined by reference to market yields at the en of the reporting period on government bonds.

c. Other long-term employee benefit

The obligation for other long-term employee benefits such as long-term compensated absences, are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

(p) **Inventory**

Inventories are stated at the lower of cost and net realisable value. Cost of inventories include all costs incurred in bringing the inventories their present location and condition. Costs are assigned to individual items of inventory based on first-in-first-out basis. Cost of purchas inventory are determined after deducting rebates and discounts.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimat costs necessary to make the sales.

	Provision for major maintenance	3776.16	14,276.22
	Total	**3,778.61**	**14,277.29**

Major maintenance

I) Major maintenance is to preserve the structural integrity of the road i.e. to achieve its original expected operational life. The wear and tear for each year is computed based on the technical report. The maintenance cost / bituminous overlay may vary based on the actual usage during maintenance period. Accordingly on the grounds of matching cost concept and based on technical estimates, a provision for major maintenance expenses is reviewed and is provided for in the accounts annually.

As per the concession agreement, Company has the contractual obligation to carry out resurfacing operation. Provision of Major maintenance are reviewed on yearly basis and based on the technical reports taken during the previous year, resurfacing operation has been estimated as at March 31, 2025. The overlay work is currently being executed and is expected to complete by 31.12.2025

ii) During the year ended March 31 2023, the Company has entered in to Major Maintainence Agreement with HCC Concession Limited vide agreement dated March 20, 2023 for Execution Of Rehabilitation And Overlay At Project Highway for Rs 18,349.88 lakhs. As per the Contract the contractor needs to complete the work of major maintainance within 12 months (excluding 4 months of monsoon). Thus the entire provision amount lying as at March 28, 2023 has been shown as current in the financial statements.
The amount to be incurred for major maintenance is increased by Rs 2,626.12 lakhs which has been taken as provision during the financial year 2024-25.

iii) Movement during the financial year is set out below

Other payable	-	1,277.47
Total	**4,990.38**	**3,585.17**

(*) **Interest accrued on borrowings**

Interest accrued payable is on Non Convertible Debentures, payable to related party i.e., Cube Highways and Infrastructure V Pte. Ltd. as per the terms of Non Convertible Debenture, Interest needs to be accrued and paid at every quarter end , i..e, June 2024, September 2024, December 31, 2024 and March 31, 2025.

However the above interest will be paid only if there is no restricted payment clause in Common Loan Agreement (CLA).

In view of the CLA, the Company is restricted to pay the interest to its related party on account of interest accrued on Non Convertible Debentures and hence due to this restricted payment clause in CLA , the interest which is accrued throughout the year and not paid as at March 31, 2025 is not considered as default.

24 Deferred tax liabilities (Net)

(a) The Company is eligible for deduction under Section 80- IA of the Income Tax Act, 1961 and the concession period of the Company's project falls within the tax holiday period as defined in Section 80-IA. Since deferred tax on timing differences between Accounting income and Taxable income that arise during the year is reversing during such tax holiday period, no deferred tax asset or liability arises and accordingly no DTA /DTL is created in the accounts.

MMR Expenses		
Miscellaneous Expenses	57.91	27.53
Total	**1,169.74**	**2,187.80**

(a) Breakup of Auditors' remuneration

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024
Legal, Professional and Consultancy Charges include:		
Auditors' remuneration and expenses (including GST)		
Statutory Audit fees	6.20	3.25
Certification Fees	0.18	-

(b) Consumption of stores and spares are added to the below mentioned heads of expenses

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024
Operation, Repairs & Maintenance	(459.59)	(351.43)
IT maintenance	(19.08)	(0.34)
Miscellaneous Expenses	(2.36)	(0.25)

(c) Fair value loss from financial instruments measured at fair value through profit or loss

Particulars	For the year ended March 31, 2025
Gain on Recognition of Financial Asset (Receivable against overloading cost recovery agreement)	(1,973.21)
Loss on recognistion of Financial Liability (Additional Liability towards overloading agreement)	2,337.42
Fair value loss from financial instruments measured at fair value through profit or loss (Net)	**364.21**

34 Earnings per share (EPS)

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024
The following reflects the profit and share data used in the basic & diluted computations:		
Net profit/ (loss) for calculation of basic EPS	(5,130.25)	(4,748.14)
Number of share outstanding as on March 31	21,72,53,000	21,72,53,000
Weighted Average number of equity shares for calculating basic EPS	21,72,53,000	21,72,53,000
Basic EPS (not annualised)	(2.36)	(2.19)
Weighted average number of equity shares for diluted EPS (refer note 16 a)	21,72,53,000	21,72,53,000
Diluted EPS (not annualised)	(2.36)	(2.19)

Reconcillation of Equity Shares		
Number of shares at the beginning	21,72,53,000	21,72,53,000
Issued during the year		-
Number of shares at the end	21,72,53,000	21,72,53,000

Note :
There have been no other transactions involving Equity shares or potential Equity shares between the reporting date and the date of authorisation of these Financial Statement

35 Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits

(a) Defined benefit plans (unfunded):

The Company provides for gratuity for employees in India as per Payment of Gratuity Act, 1972.
Employees who are in continuous service for 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month completed proportionately for 15 days salary multiplied fo number of completed years of service.

The gratuity scheme covers substantially all regular employees. Commitments are actuarially determined at year-end. The actuarial valuation is done based on "Projected Unit Credit" method. Gains and losses of changed actuarial assumptions are charged to Statement of Profit and Loss.

(A) Disclosure of Gratuity

(i) **Amount recognised in the Statement of Profit and Loss is as under:**

Description	**March 31, 2025**	**March 31, 202**
Current service cost	4.58	3.4
'Interest cost on defined benefit obligations	0.57	0.0
Total Service Cost	**5.15**	**3.4**

(iii) **Bifurcation of Actuarial Gain/Loss on obligations:**

Description	**March 31, 2025**	**March 31, 202**
Actuarial Loss/(Gain) on arising from change in demographic assumption		-
Actuarial Loss/(Gain) on arising from change in financial assumption	0.14	0.2
Actuarial Loss/(Gain) on arising from experience adjustment	0.59	4.2
Actuarial Loss/(Gain) on for the year on obligations	**0.73**	**4.5**

(iv) **Other Comprehensive Income (OCI)**

Description	**March 31, 2025**	**March 31, 202**
Actuarial Loss/(Gain) for the year on DBO	0.73	4.5
Unrecognized actuarial Loss/(Gain) for the year	**0.73**	**4.5**

(v) **Bifurcation of Present Benefit Obligations (PBO) at the end of year in current and non current**

Description	**March 31, 2025**	**March 31, 202**
Current liability (Amount due within one year)	0.97	0.1
Non-Current liability (Amount due over one year)	13.37	7.8
Total PBO at the end of year	**14.34**	**7.9**

(vi) **Change in defined benefit obligations**

Description	**March 31, 2025**	**March 31, 202**
Defined benefit liability at the start of the year	7.98	-
Adjustments related to employees transferred to/from fellow subsidiaries	-	-
Interest Cost	0.57	0.0
Current service cost	4.58	3.4
Re-measurements (gain)/loss for the year	0.73	4.5
Benefit paid directly by the Company	-	-
Transfer In / (Out)*	0.48	
Defined benefit liability at the end of the year	**14.34**	**7.9**

(vii) **The amount included in the balance sheet arising in respect of its defined benefit obligations/plans**

Description	**March 31, 2025**	**March 31, 202**
Present value of defined benefit obligations/ plans	14.34	7.9
Net defined benefit obligations	**14.34**	**7.9**

Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits (Continued.)

(viii) **Sensitivity analysis for gratuity liability:**

Description	**March 31, 2025**	**March 31, 202**
Impact of change in discount rate		
Present value of obligations at the end of the period/year	**14.34**	**7.9**
- Impact due to decrease of 1%	1.31	0.7
- Impact due to increase of 1%	(1.15)	(0.6
Impact of change in salary increase		
Present value of obligations at the end of the period/year	**14.34**	**7.9**
- Impact due to decrease of 1%	(1.17)	(0.6
- Impact due to increase of 1%	1.31	0.7

The above sensitivity analysis is based on a change an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligations to significant actuarial assumptions the same method (present value of the defined benefit obligations calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligations liability recognised in the Balance Sheet.

Sensitivities due to mortality and withdrawals are not material and hence impact of change due to these not calculated.

Sensitivities as rate of increase of pensions in payment, rate of increase of pensions before retirement and life expectancy are not applicable.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

(ix) **Actuarial assumptions:**

Description	**March 31, 2025**	**March 31, 202**
Discount rate range	6.70%	7.15
Rate of increase in compensation levels range	7.0% for the first year and 5.84% thereafter	7.5% for the first ye and 6.3% thereaft
Retirement age	58 years	58 year
Mortality rate	100% of IALM 2012-14	100% of IALM 2012-1
Attrition at age (Withdrawal rate %)		
- Up to 30 Years	9.00%	9.00
- From 31 to 44 years	9.00%	9.00
- Above 44 years	9.00%	9.00

(x) **Maturity profile of defined benefit obligation**

Discription	**March 31, 2025**	**March 31, 2024**
Weighted average duration (based on discounted cashflows)	9 Years	9 Years

Expected cash flows over the next (valued on undiscounted basis):	**(₹ in Lacs)**	**(₹ in Lacs)**
1 year	0.97	0.1
2 to 5 years	5.07	2.9
6 to 10 years	6.69	4.0
More than 10 years	15.71	10.1

36 Fair Value Heirarchy and Financial Risk Management Note

I Financial Instruments

A Financial Instruments by category

i) The carrying value and fair value of financial instruments by categories as at March 31, 2025 were as follows:

Rs. in lakh

Particulars	Amortised cost	Financial assets/ liabilities at fair value through		Total carrying value	Fair Valu
		Profit or Loss	OCI		
Assets:					
Trade receivables	38.74	-	-	38.74	
Cash and cash equivalents	240.23	-	-	240.23	2
Bank balances other than cash and cash equivalents	6,125.31	-	-	6,125.31	6,1
Others financial assets					
Receivable against overloading cost recovery agreement	-	1,543.85		1,543.85	1,5
Others financial assets	3.62	-	-	3.62	
Investment	-	7,668.37	-	7,668.37	7,6
Liabilities:					
Borrowings	90,975.63	-	-	90,975.63	90,9
Trade payables	3,868.81	-	-	3,868.81	3,8
Other financial liabilities					
Financial liability towards overloading income	-	7,717.74	-	7,717.74	7,7
Others financial liabilities	4,355.50	-	-	4,355.50	4,3

ii) The carrying value and fair value of financial instruments by categories as at March 31, 2024 were as follows:

Rs. in lakh

Particulars	Amortised cost	Financial assets/ liabilities at fair value through		Total carrying value	Fair Valu
		Profit or Loss	OCI		
Assets:					
Investments	-	-	-	-	
Trade receivables	154.76	-	-	154.76	1
Cash and cash equivalents	7,496.61	-	-	7,496.61	7,4
Bank balances other than cash and cash equivalents	4,643.21	-	-	4,643.21	4,6
Others financial assets	142.32	-	-	142.32	1
Liabilities:					
Borrowings	83,949.54	-	-	83,949.54	83,9
Trade payables	3,861.22	-	-	3,861.22	3,8
Other financial liabilities	-				
Others financial liabilities	3,585.17	-	-	3,585	4,3

B Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities
Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs)
(i) Reconciliation of fair value measurement of the investment categorised at level 3
(ii) Sensitivity of level 3 financial instrument's fair value to changes in significant unobservable inputs used in their fair valuation:

The following table presents fair value hierarchy of assets and liabilities measured at fair value on a recurring basis as of :

Particulars	Date of Valuation	Fair Value measurement using			Total
		Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	
Financial assets measured at fair value					
Measured at FVTPL					
Mutual funds	March 31, 2025	7,668.37	-	-	**7,668.37**
Receivable against overloading cost recovery agreement	March 31, 2025	-	-	1,543.85	**1,543.85**
Financial Liabilities measured at fair value					
Measured at FVTPL					-
Financial liability towards overloading income	March 31, 2025	-	-	7,717.74	**7,717.74**

There are no Assets and Liabilities carried at FVTPL or at FVTOCI as at March 31, 2024

C Overloading Agreement

Background on the transaction

Under the agreement, the Company received an upfront amount of Rs. 6250.00 lakhs, against which the company will be transferring all of it's overloading revenue to HCC, and HCC will p company 20% of the overloading revenue (i.e. in effect 80% of the overloading revenue will be assigned to HCC against the upfront amount). Since condition preceedent of the Overlc Agreement was not completed as at March 31, 2024 , the said advance received was shown as Other Non Current Liabilities.

During the year, the Company has concluded the condition precedent wrt overloading agreement with HCC during the year. Under the terms of the agreement, the Company shall pass on 10 toll revenue from overloading vehicle after recovery of 20% cost against the same. The Company has entered in to this arrangement as a hedge against the future risk connected with overlc revenue. The Company has received upfront payment of Rs 62.5 crs from HCC which it has accounted as financial liability carried at fair value through profit and loss. 80% of net overlc collection is adjusted against this financial liability. The Company has simultaneously recognised financial asset towards the 20% Cost of recovery which is carried as financial asset carried a value through Profit and loss. Both the financial liability and financial assets are fair value at each reporting date.

Valuation

These balances are valued by an independent 3rd party valuer at each year end. The valuation of these balances includes significant estimation. The key assumptions used in the valuation incl a)forecasted overloading revenue for future years
b)discount rate to be applied on the cash flows

Movement of Balances During the year

	For the year ended March 31, 2025			For the year ended March 31, 2024		
Description	**Financial Asset**	**Financial Liability**	**Net Balance**	**Financial Asset**	**Financial Liability**	**Net Balan**
Balance At the beginning of the year	-	-	-	-	-	
Additional Liability towards overloading agreement*		7,527.47	7,527.47		-	
Payments (made) / received during the year	429.36	(2,147.16)	(1,717.80)	-	-	
Fair Value (Gains) / Losses (Refer Note 33)	(1,973.21)	2,337.42	364.21	-	-	
Balance At the end of the year (Refer Note 15 & 23)	**1,543.85**	**7,717.74**	**6,173.89**	-	-	

	Financial Asset	Financial Liability
Particulars	**Receivable against overloading cost recovery**	**Additional Liability towards overloading agreement**
- Non Current	1,416.87	7,082.85
- Current	126.98	634.88
Total	**1,543.85**	**7,717.74**

ii Financial risk management

The companies activities exposes it to market risk, liquidity risk and credit risk.
This note explains the source of risk which the entity is exposed to and how the entity is manage the risk.

The company is exposed to several financial risks, including credit risk, market risk related to interest rates, and liquidity risk. Credit risk arises from cash and cash equivalents, as well as financ assets measured at amortized cost. To manage this, the company diversifies its bank deposits and sets credit limits. Market risk, specifically interest rate risk, is associated with long-term borrowings that carry floating interest rates. This risk is actively managed by the company. Liquidity risk stems from trade payables, borrowings, and other financial liabilities. The company addresses this by maintaining access to committed credit lines and borrowing facilities.

The Company`s risk management is carried out by a project finance team and treasury team group under policies approved by board of directors. Company treasury identifies, evaluate hedges financial risk in close co-operation with the group`s operating units. The Management of the Company provides principles for overall risk management, as well as policies covering sp areas, such as , interest rate risk, and credit risk and investments of excess liquidity.

(a) Credit Risk

The company engaged in infrastructure development and construction business under BOT. Credit risk is the risk that counterparty will not meet its obligations leading to a financial loss. Fin assets that are potentially subject to concentrations of credit risk and failures by counter-parties to discharge their obligations in full or in a timely manner consist principally of cash, cash equiv and trade and other accounts receivable. Credit risk on cash balances with Bank are limited because the counterparties are entities with acceptable credit ratings.

(b) Market Risk - Interest rate risk

The exposure of the Company's borrowing is linked to Bank base rate plus fixed spread ,base rate are subject to change in market condition to interest rate changes at the end of the reporting are as follows:

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Floating Rate borrowings	68,085.63	61,059.54
Fixed rate borrowings	22,890.00	22,890.00
Total borrowings	**90,975.63**	**83,949.54**

(c) Risk of Overloading Collection

The risk of overloading traffic is hedged by entering in to an overloading arrangement with third party, where all the risk associated with the overloading traffic is transferred to the third party.

(ii) Sensitivity analysis

Profit or loss is sensitive to higher/lower interest income from borrowings as a result of changes in interest rates.

Impact on Profit after Tax	Year ended March 31, 2025	Year ended March 31, 2024
Interest rates - increase by 50 basis points	(340.43)	(305.30)
Interest rates - decrease by 50 basis points	340.43	305.30

(b) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to obligations when due and to close out market positions. The Company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flow

(i) Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for:

As At March-2025

	Less than 1 year	1 to 2 Years	2 to 5 Years	Over 5 Years	Total
Borrowings	3,736.36	4,818.92	21,946.15	60,474.20	90,9
Other Financial liabilities	4,990.38	-	-	7,082.85	12,0
Trade and other payables	3,868.81	-	-	-	3,8
Total	**12,595.56**	**4,818.92**	**21,946.15**	**67,557.06**	**1,06,9**

As At March-2024

	Less than 1 year	1 to 2 Years	2 to 5 Years	Over 5 Years	Total
Borrowings	2,389.28	3,185.71	15,609.99	62,764.56	83,9
Other Financial liabilities	3,585.17	-	-	-	3,5
Trade and other payables	3,861.22	-	-	-	3,8
Total	**9,835.67**	**3,185.71**	**15,609.99**	**62,764.56**	**91,3**

37 Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareh value.

The Company monitors capital using a gearing ratio, which is net debt divided by total equity. The Company's policy is to keep the gearing ratio optimum. Net debt includes non-current borro (including current maturity of non-current borrowings less cash and cash equivalents and other bank deposits (net of restricted deposits)).

A ***Net Debt Summary***

Particulars	As at March 31, 2025	As at March 31, 2024
Non Current Borrowings (including Current Maturities)	90,975.63	83,949.54
Interest Payable	4,305.74	1,859.35
	95,281.38	**85,808.89**
Less:		
Investment in Mutual funds	7,668.37	-
Cash and Cash Equivalents	240.23	7,496.61
Bank balances other than cash and cash equivalents	2,489.11	2,743.21
	10,397.71	**10,239.82**
Net Debt	**84,883.67**	**75,569.07**
Total Equity	**5,672.18**	**10,802.43**
Capital and net debt gearing ratio (in times)	**14.96**	**7.00**

Baharampore-Farakka Highways Limited

38 Notes to the financial statements for the year ended March 31, 2025

Sr. No.	Ratio	Numerator	Denominator	Unit of measurement	March 31, 2025	March 31, 2024	Variation	Remarks for Variation in the ratio by more than 25% as compared to previous year
					Ratio	Ratio		
1	Current ratio	Current Asset	Current Liabilities	Times	0.85	0.62	36.99%	The variation is due to increase in current assets and decrease in current liability during the year.
2	Debt-Equity ratio	Total Debts	Shareholders Equity	Times	16.04	7.77	106.39%	The variation is due to increase in total debts during the year.
3	Debt Service Coverage ratio	Earnings for debt service = Net profit after taxes + Non-cash operating expenses (Depreciation & amortisation) + Finance costs	Debt service = Interest + Lease Payments + Principal Repayments	Times	1.14	0.11	946.99%	The variation is due to increase in earnings and total debts during the year.
4	Return on Equity ratio (ROE)	Net Profits after taxes – Preference Dividend	Average Shareholder's Equity	Percentage	(0.62)	(0.36)	72.97%	The variation is due to increase in earnings and decrease in shareholders equity during the year.
5	Inventory Turnover Ratio*	Cost of goods sold OR sales	Average Inventory	Times	NA	NA	-	Not Applicable
6	Trade Receivables turnover ratio*	Net credit sales = Gross credit sales - sales return	Average Trade Receivable	Times	NA	NA	-	Not Applicable
7	Trade payables turnover ratio	Net credit purchases = Gross credit purchases - purchase return	Average Trade Payables	Times	2.63	5.58	-52.89%	The variation is due to balance work expenses incurred in previous year and decrease in Trade payable during the year.
8	Net capital turnover ratio	Revenue from operations	Working capital = Current assets - Current liabilities	Times	(3.55)	(1.29)	174.45%	Variation is due to increase in earnings and decrease in average working capital during the year.
9	Net profit ratio	Net Profit after Tax	Revenue from operations	Times	(0.25)	(0.19)	26.72%	The variation is due to increase in earnings and decrease in net sales during the year.
10	Return on Capital employed (ROCE)	Earning before interest and taxes	Capital Employed = Tangible Net Worth + Total Debt + Deferred Tax Liability	Percentage	0.04	0.04	-13.02%	Variation is due to increase in operational earnings in current year on account of reduced cost of construction.
11	Return on Investment (ROI)	Income generated from investments	Weighted average value of investments	Percentage	0.42	NA	-	Not Applicable

*Since the Company is toll road Company operating under Toll, Operate, Transfer Model basis and is not in the nature of manufacturing or a trading concern, accordingly Inventory turnover ratio and debtors turnover ratio are considered as not applicable.

44 **Relationship with struck-off companies:** The information about transaction with struck off companies (defined under section 248 of the companies Act 2013 or section 560 of the Companies Act 1956) has been determined to the extent such parties have been identified on the basis of information available with the company and the same is relied upon by the auditor.

45 The balance sheet, statement of profit and loss, statement of changes in equity, statement of material accounting policy information and the other explanatory notes forms an integral part of the financial statements of the Company for the year ended March 31, 2025.

46 The Code on Social Security, 2020 ('Code') relating to employee benefits during employment and post employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified. Company will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective.

47 There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

48 The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.

49 The Company does not have any transactions with struck-off companies under Section 248 of the Companies Act, 2013.

50 The Company is not declared wilful defaulter by any bank or financial institution or other lender.

51 The Company does not have any charges or satisfaction which is yet to be registered with ROC beyond the statutory period.

52 The Company have not traded or invested in Crypto currency or Virtual Currency during the financial year.

53 The Company has not advanced or loaned or invested funds to any other person or entity, including foreign entities (Intermediaries) with the understanding that the Intermediary shall: directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company (Ultimate Beneficiaries); or provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.

54 The Company has not received any fund from any person or entity, including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall: directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries); or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

55 The Company does not have any transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961).

56 The Company has not availed any working capital facilities from banks on the basis of security of current assets.

57 The company did not have any long term contracts including derivative contracts for which there were any material foreseeable losses.

58 The provision of section 135 of the Companies Act, 2013 in relation to corporate social responsibility does not apply to the Company during the year.

59 As per the requirements of Rule 3(1) of the Companies (Accounts) Rules 2014, the Company uses SAP S/4 HANA as its accounting software for recording all the accounting transactions which has a feature of recording audit trail (edit log) facility and the same has operated with effect from March 28, 2025, for all relevant transactions recorded in the software at application level.

The audit trail feature in respect of the aforesaid accounting software(s) is not being tampered with for the period for which the audit trail feature was enabled and operating.

However, the audit trail feature is only enabled at Data Definition Language (DDL) and not at Data Manipulation Language (DML) for direct access changes to database.

Based on above, the preservation of audit trail as per the statutory requirements is available only for the period the feature was enabled and operating.

60 Pursuant to requirement of the companies (Accounts) fourth Amendment rules, 2022 notified on August 05, 2022. The Company maintains backup on daily basis of the books of account and other relevant books and papers maintained in electronic mode and the same is accessible on servers, physically located in India at all time.

61 The financial statements of the Company were approved for issue by the Board of Directors on September 12, 2025.

INDEPENDENT AUDITOR'S REPORT

To
The Members of
Baharampore Farakka Highways Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the Financial Statements of Baharampore Farakka Highways Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2024, and the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of Material Accounting Policy Information and other explanatory information (hereinafter referred to as "the Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, the loss (including other comprehensive income), changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Financial Statements.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

Information Other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the Other Information. The other information comprises the information included in the Board's report, including the Directors Report but does not include the Financial Statements and our Independent Auditors' Report thereon. Our opinion on the Financial Statements does not cover the Other Information and we do not and will not express any form of assurance or conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the Other Information identified above and, in doing so, consider whether the Other Information is materially inconsistent with the Financial Statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this Other Information, we are required to report that fact.

With regard to other information that has not been obtained by the us prior to the date of the auditor's report, that management intends to prepare and issue such other information after issuance of our auditor's report. We have nothing to report in this regard.

Responsibilities of Management and those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, make it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the attached Annexure "A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
    a. We have sought and obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purposes of our audit.
    b. In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books except for the matter stated in paragraph 2(i)(vi) below relating to reporting under rule 11(g) of the Companies (Audit and Auditors) Rule 2014, as amended.
    c. The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
    d. In our opinion, the aforesaid Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
    e. On the basis of the written representations received from the directors as on March 31, 2024 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2024 from being appointed as a director in terms of Section 164 (2) of the Act.
    f. With reference to maintenance of accounts and other matter therewith, reference is invited to paragraph 2(b) above on reporting under section 143(3)(b) and para 2(i)(vi) below relating to reporting under rule 11(g) of the Companies

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

(Audit and Auditors) Rule 2014, as amended.

g. With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls with reference to financial statements.

h. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:

In our opinion and to the best of our information and according to the explanations given to us, there is no remuneration paid by the Company to its directors during the year to which the provisions of section 197 of the Act apply.

i. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended , in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 41 to the Financial Statements,

ii. The Company did not have any long-term contracts including derivative contracts for which there were material foreseeable losses,

iii. There are no amounts required to be transferred to the Investor Education and Protection Fund by the Company.

iv. a) The management has represented that, to the best of their knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person or entity, including foreign entities ("intermediaries") with the understanding whether recorded in writing or otherwise, that the intermediary shall, whether directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security, or the like on behalf of the Ultimate Beneficiaries.

b) The management has represented that, to the best of its knowledge and belief, no funds have been received by the company from any person or entity including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the company shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

guarantee, security or the like on behalf of the Ultimate Beneficiaries,

c) Based on such audit procedures considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (iv)(a) and (iv)(b) above contain any material misstatement.

v. The Company has not declared or paid dividends during the year and therefore the compliance with Section 123 of the Companies Act, 2013 is not applicable in respect of dividends declared or paid.

vi. Based on our examination which included test checks, the Company, in respect of financial year commencing on 1 April 2023, has used SAP S/4 HANA accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility , however the audit log (edit log) feature has not been enabled in the aforesaid software throughout the year. Further the audit trail feature is not enabled for direct changes to data as described in note 46 to the financial statements.

As proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable from April 01, 2023, reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules,2014 on preservation of audit trail as per the statutory requirements. Since the Company do not have audit log (edit log) feature enabled at application and at database level for the year under review there is no preservation of audit trail by the Company.

Annexure A to the Independent Auditors' Report (Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of Baharampore Farakka Highways Limited of even date)

To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of audit, and to the best of our knowledge and belief, we state that:

(i) a. (A) The Company has maintained proper records showing full particulars including quantitative details and situation of its Property, Plant and Equipment.

(B) The company has maintained proper records showing full particulars of intangible assets.

b. Property, Plant and Equipment have been physically verified by the management at reasonable intervals and no material discrepancies were noticed on such verification.

c. There is no immovable property as at Balance sheet date other than investment property. We have received confirmation from the Security trustees of the Lenders that they are in possession of the title deeds.

d. The company has not revalued its Property, Plant and Equipment and intangible assets during the year.

e. There are no proceedings initiated during the year or are pending against the Company as at March 31, 2024 for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 and rules made thereunder.

(ii) (a) The management has conducted physical verification of inventory at reasonable intervals during the year. On the basis of examination of records, we are of the opinion that the coverage and procedure of such verification is appropriate and that no discrepancies of 10% or more in the aggregate for each class of inventory were noticed on such verification.

(b) The Company do not have working capital limits and hence Clause 3(ii)(b) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(iii) The Company has not made investments in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or any other parties. Hence Clause 3(iii)(a), 3(iii)(b), 3(iii)(c), 3(iii)(d), 3(iii)(e) & 3(iii)(f) of the Companies (Auditor's Report) Order, 2020 are not applicable to the Company.

(iv) The Company has not given any loans, or made any investments, or given any guarantees and security to which section 185 or section 186 of the Companies Act, 2013 applies.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

(v) The Company has not accepted deposits from the public or amounts that are deemed to be deposits pursuant to sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and rules framed thereunder. As informed to us, there is no order that has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other tribunal in respect of the said sections.

(vi) As informed to us, the maintenance of the cost records under the sub-section (1) of section 148 of the Companies Act, 2013 has been prescribed and we are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. We have not, however, carried out a detailed examination of the records to ascertain whether they are accurate or complete.

(vii) (a) The Company is generally regular in depositing undisputed statutory dues including Goods and Services Act, Provident fund, Employees State Insurance, Income Tax, Sales Tax, Service Tax, duty of Customs, duty of Excise, Value Added Tax, Cess and other statutory dues to the appropriate authorities during the year. According to the information and explanations given to us, no undisputed amount payable in respect of the aforesaid dues were outstanding as at March 31, 2024 for a period of more than six months from the date they became payable except for Rs 0.04 lacs in case of Provident fund and Rs 0.00 in case of Labour welfare fund.

(b) There are no statutory dues referred to in sub-clause (a) which have not been deposited on account of any dispute except as given below:

Name of statute	Nature of dues	Disputed Amount (Rs in lacs)	Period to which the amount relates	Forum where dispute is pending
The West Bengal value Added tax, 2003	Entry tax	0.97	FY 2015-16	West Bengal Sales Tax Authority
The West Bengal value Added tax, 2003	VAT	0.65	FY 2016-17	West Bengal Sales Tax Authority
Income Tax demand	Income Tax	0.37	FY 2017-18	Matter pending with ITO
Goods and Service Tax	GST	59.49	FY 2022-23	West Bengal GST Authority

(viii) There are no transactions that were not recorded in the books of account, and which has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961).

(ix) (a) The company has not defaulted in repayment of loans or other borrowings or the payment of interest thereon to any lender also there is no continuing default as at Balance Sheet Date.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

In respect of interest payable on Non-convertible debentures to related party the interest is payable on quarterly basis subject to restricted payment clause in Common Loan Agreement (CLA), hence due to restricted payment clause in CLA , the interest which is accrued and not paid as at March 31, 2024 is not considered as default.

(b) The Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

(c) The company has applied the money obtained by way of term loans during the year for the purposes for which they were obtained.

(d) On an overall examination of the financial statements of the Company, we report that funds raised on short-term basis have been used for long-term purposes by the Company amounting to Rs 6,914.79 lacs for the year 2023-2024.

(e) The Company does not have any subsidiaries, joint ventures or associates and hence clause 3(ix)(e) & 3(ix)(f) of the Companies (Auditor's Report) Order, 2020 are not applicable to the Company.

(x) (a) The company has not raised any money by way of initial public offer / further public offer (including debt instruments) during the year and hence clause 3(x)(a) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(b) The Company has not made private placement or preferential allotment of equity shares or convertible debentures (fully, partially or optionally convertible) during the year under audit.

(xi) (a) No fraud by the Company or any fraud on the Company has been noticed or reported during the year.

(b) No report under sub-section (12) of section 143 of the Companies Act has been filed by us in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government and hence clause 3(xi)(b) of the Companies (Auditors Report) Order 2020 is not applicable to the Company.

(c) No whistle-blower complaints have been received during the year by the Company.

(xii) The Company is not a Nidhi Company and hence clauses 3(xii)(a), 3(xii) (b) and 3(xii)(c) of the Companies (Auditors Report) Order 2020 is not applicable to the Company.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

(xiii) The provisions of section 177 are not applicable to the Company. All transactions with the related parties are in compliance with sections 188 of the Companies Act, 2013 in so far as our examination of the proceedings of the meetings of the Board of Directors are concerned. The details of related party transactions have been disclosed in the Financial Statements as required by the applicable Accounting Standards.

(xiv) (a) In our opinion and based on our examination, the company has an internal audit system commensurate with the size and nature of it business.

(b) We have considered the internal audit reports of the company issued till the date of auditor's report.

(xv) The Company has not entered into any non-cash transactions with its directors or persons connected with its directors hence clause 3(xv) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(xvi) The nature of business and the activities of the Company are such that the Company is not required to obtain registration under section 45-IA of the Reserve Bank of India Act 1934 and hence sub-clause 3(xvi)(a), 3(xvi)(b), 3(xvi)(c) and 3(xvi)(d) of the Companies (Auditors Report) Order, 2020 is not applicable to the

(xvii) On an examination of the Statement of Profit and Loss account, we are of the opinion that the Company has not incurred cash losses during the current financial year however there was cash loss on immediate previous financial year amounting to Rs 4593.71 lacs.

(xviii) There has been no resignation of the statutory auditors during the year and accordingly clause (3)(xviii) Companies (Auditors Report) Order 2020 is not applicable to the Company.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions there is excess of current liabilities over current assets by Rs 9,304.08 lacs as at March 31, 2024. The management expects in its cash flow projections future cashflows from tolling operations on the basis of which they intent to service the excess current liabilities. nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that the company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date unless the cash flows from future tolling operations as projected are not achieved. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

(xx) (a) The company was not required to spend any amount towards Corporate Social Responsibility obligation and hence there are no unspent amounts towards Corporate Social Responsibility (CSR) on other than ongoing projects requiring a transfer to a Fund specified in Schedule VII to the Companies Act in compliance with second proviso to sub-section (5) of Section 135 of the said Act. Accordingly, reporting under clause 3(xx)(a) of the Order is not applicable for the year.

(b) There are no ongoing projects in respect of CSR activities and therefore clause 3(xx)(b) of The Companies (Auditors Report) Order 2020 is not applicable to the Company

ANNEXURE - B TO THE AUDITORS' REPORT

(Referred to in paragraph 2(g) under Report on Other Legal and Regulatory Requirements' section of our report to the Members of Baharampore Farakka Highways Limited of even date)

Report on the Internal Financial Controls with reference to Financial Statements under 143 (3)(i) of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to Financial Statements of Baharampore Farakka Highways Limited ("the Company") as of March 31, 2024 in conjunction with our audit of the Financial Statement of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Financial Statements was established and maintained and if such controls operated effectively in all material respects.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Financial Statements included obtaining an understanding of internal financial controls with reference to Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to Financial Statements.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial control with reference to Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements.

Because of the inherent limitations of Financial controls with reference to Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Financial Statements to future periods are subject to the risk that the internal financial control with reference to Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to Financial Statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

BAHARAMPORE FARAKKA HIGHWAYS LTD.

Baharampore-Farakka Highways Limited
Statement of Material Accounting Policy Information and Other Explanatory Notes for financial statements for the year ended March 31, 2024.

(All amounts are in Rs. lakh, unless stated otherwise)

1 **Corporate information**

Baharampore-Farakka Highways Limited was incorporated under the Companies Act, 1956, on 11th March, 2010 as a Special Purpose Vehicle for Design, Build, Finance, Operate & Transfer (DBFOT) Toll basis of 4 lanes from Kms 191.416 to 294.684 between Baharampore and Farakka in the state of West Bengal under NHDP Phase III

NHAI has granted concession period of 25 years to the company for the project. Provisional Certificate under Article 14.3.2 (Schedule - J) of the concession Agreement has been obtained for 75.45 kms for the following stretch - 204.550 to 229.300 KMS - 24.75 KMS / 230.600 to 254.800 KMS - 24.20 KMS / 258.350 to 284.850 KMS - 26.50 KMS. Company has started to collect toll from 14th May, 2014 on receipt of provisional certificate of commencement from Independent consultant appointed by National Highway Authority of India.

Baharampore-Farakka Highways Limited has entered into an Agreement with the Purchaser Cube Highways and Infrastructure V PTE LTD, being a company based in Singapore and incorporated with the objective of acquiring and operating transportation projects to purchase the shares from Baharampore-Farakka Highways Limited (including the purchase of seller nominee shares by the purchaser nominees from the seller nominees) and Baharampore-Farakka Highways Limited has agreed to sell the shares to the Purchaser (including the sale of such portion of the sale shares which are held by the seller nominees to purchaser nominees).

2 **Statement of Compliances**

The Standalone Financial Statements comply in all material aspects with Indian Accounting Standards ("Ind AS") prescribed under Section 133 of the Companies Act, 2013 ("the Act"), the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Act.

2 **Basis of Preparation, Accounting judgements, estimates and assumptions and Material Accounting Policy Information:**

2.1 **Basis of preparation**

The Financial Statement of the Company comprises of the Balance Sheet, the Statement of Profit and Loss (including other comprehensive income), the Statement of Changes in Equity, and the Summary Statement of Significant Accounting Policies, and other explanatory information (Collectively, the "Financial Statement").

The financial statements are prepared on an accrual basis of accounting and in accordance with the Indian Accounting Standards (Ind AS) notified under the companies (Indian Accounting standards) Rules, 2015 as amended by the companies (Indian Accounting standard) Rules 2016.

These financial statements are prepared under the historical cost convention on the accrual basis except for certain financial instruments, which are measured at fair values, which are disclosed in the Financial Statements viz;

These financial statements are prepared under the historical cost convention on the accrual basis except for certain financial instruments, which are measured at fair values, which are disclosed in the Financial Statements viz;

- certain financial assets and liabilities (including derivative instruments) and contingent consideration that is measured at fair value

- assets under service concession arrangement

The classification of assets and liabilities of the Company is done into current and non-current based on the operating cycle of the business of the Company. The operating cycle of the business of the Company is less than twelve months and therefore all current and non-current classifications are done based on the status of reliability and expected settlement of the respective asset and liability within a period of twelve months from the reporting date as required by Schedule III to the Companies Act, 2013.

Accounting policies have been consistently applied except whereas newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

The financial statements are presented in Indian Rupees ("INR") and all values are rounded to the nearest lakh, except otherwise indicated.

2.2 **Significant accounting judgments, estimates and assumptions**

The preparation of financial statements requires management's judgments, estimates and assumptions that impacts the reported amounts of revenues, expenses, assets and liabilities, and the accompanying notes thereon. Uncertainty about these assumptions and estimates could result in outcomes that might require a material adjustment to the carrying amount of assets or liabilities in future periods.

i) **Estimates:**

The preparation of the financial statements in conformity with IND AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of circumstances surrounding the estimates. Changes in estimates are reflected in the financial statement in the period in which changes are made and if material, their effects are disclosed in the notes to the financial statements.

ii) **Judgments:**

The Company's management has made the following judgments, which have the most significant effect on the amounts recognised in the separate financial statements, while formulating the Company's accounting policies.

iii) **Taxes:**

The Company is eligible for 100% tax holiday under section 80-IA of the Income Tax Act, 1961. As a result, timing differences arising and reversing during the tax holiday period are not recognized by the Company.

iv) **Recognition and measurement of other Provisions**

The recognition and measurement of other provisions is based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the closing date. The actual outflow of resources at a future date may therefore, vary from the amounts included in other provisions.

v) **Useful lives of property, plant and equipment**

The company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

vi) **Impairment of property, plant and equipment**

For property, plant and equipment and intangibles an assessment is made at each reporting date to determine whether there is an indication that the carrying amount may not be recoverable or previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised.

vii) **Applicability of service concession arrangement accounting to toll roads concessionaire arrangements**
Appendix A "Service concession arrangements" applies to "public- to-private" service concession arrangements, which can be defined as contracts under which the grantor transfers to a concession holder the right to deliver public services that give access to the main public facilities for a specified period of time in return for managing the infrastructure used to deliver those public services.

More specifically, Appendix C applies to public-to-private service concession arrangements if the grantor:
i. Controls or regulates what services the operator must provide with the infrastructure, to whom it must provide them, and at what price; and
ii Controls through ownership or otherwise – any significant residual interest in the infrastructure at the end of the term of the arrangement.
In assessing the applicability the management has exercised significant judgement in relation to the underlying ownership of the assets, the ability to enter into power purchase arrangements with any customer, ability to determine prices etc. in concluding that the arrangements don't meet the criteria for recognition as service concession arrangements.

viii) **Impairment of concession intangible assets:**
The Company tests intangible assets and cash generating units have suffered any impairment, in accordance with the accounting policy. The recoverable amount of each cash generating unit has been determined based on the greater of value-in-use and fair value less costs to sell calculations. Calculations are prepared on the basis of management's assumptions and estimates.

ix) **Fair valuation of other financial instruments:**
The Company records the resurfacing obligation for its present obligation as per the concession arrangement to maintain the toll roads during the concession period. The provision is included in the financial statements at the present value of the expected future payments. The calculations to discount these amounts to their present value are based on the estimated timing of expenditure occurring on the roads.

2.3 **Recent pronouncements**
There has been no recent accounting pronouncements made by Ministry of Corporate Affairs relating to the Companies (Indian Accounting Standards) Rules, 2015.

2.4 **Material Accounting Policy Information**

(a) **Current & Non Current classification**

Current Asset :

An asset shall be classified as current when it satisfies any of the following criteria.
(a) it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
(b) it is held primarily for the purpose of being traded
(c) It is expected to be realized within twelve months after the reporting date, or
(d) It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets shall be classified as non-current.

Current Liabilities:
A liability shall be classified as current when it satisfies any of the following criteria.
i (a) it is expected to be settled in the company's normal operating cycle;
ii (b) it is held primarily for the purpose of being traded;
iii (c) it is due to be settled within twelve months after the reporting date ; or
iv (d) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could at the option of the counterparty, result in its settlement by the issue of equity instruments do not effect its classification.
All other liabilities shall be classified as non-current

(b) **Accounting of intangible assets under Service Concession arrangement:**

Company has Toll Road Concession rights where it Designs, Build, Finances, Operates and transfer (DBFOT) infrastructure used to provide public service for a specified period of time. These arrangements may include infrastructure used in a public-to-private service concession arrangement for its entire useful life.
These arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that the Company receives a right (a license) to charge users of the public service. The financial asset model is used when the Company has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component. If the Company performs more than one service (i.e., construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable.

Intangible asset model:
The Company recognises an intangible asset arising from a service concession arrangement when it has a right to charge for usage of the concession infrastructure. An intangible asset received as Consideration for providing construction or upgrade services in a service concession arrangement is measured at fair value on initial recognition by reference to the fair value of the services provided. Subsequent to initial recognition, the intangible asset is measured at cost, which includes capitalised borrowing costs, less accumulated amortisation.

The estimated useful life of an intangible asset in a service concession arrangement is the period from when the Company is able to charge the public for the use of the infrastructure to the end of the concession period.

All items of property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. The Company follow Cost Model for Property Plant and Equipment.
Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.
Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/(losses).

Depreciation methods, estimated useful lives and residual value:
Depreciation is provided as per the useful lives of the assets as per schedule II of Companies Act, 2013 using Straight Line Method (SLM).

BAHARAMPORE FARAKKA HIGHWAYS LTD.

(d) **Investment property:**

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

(e) **Financial Instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a Financial Assets

i) Initial Recognition

In the case of financial assets not recorded at fair value through profit or loss, financial assets are recognised initially at fair value plus transaction costs that are directly attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

ii) Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

Financial Assets at Amortised Cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income from these financial assets is included in finance income using the effective rate interest ("EIR") method. Impairment gains or losses arising on these assets are recognised in Statement of Profit and Loss.

Financial Assets Measured at Fair Value

Financial assets are measured at fair value through other comprehensive income ("OCI") if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows or to sell these financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in the Statement of Profit and Loss.

In respect of equity investments (other than for investment in subsidiaries and associates) which are not held for trading, the Company has made an irrevocable election to present subsequent changes in the fair value of such instruments in OCI. Such an election is made by the Company on an instrument by instrument basis at the time of transition for existing equity instruments/ initial recognition for new equity instruments.

Financial asset not measured at amortised cost or at fair value through OCI is carried at fair value through profit or loss.

iii) Impairment of Financial Assets

In accordance with Ind AS 109, the Company applies the expected credit loss ("ECL") model for measurement and recognition of impairment loss on financial assets and credit risk exposures.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. Simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECL at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

iv) De-recognition of Financial Assets

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset to another entity.

If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the assets and an associated liability for amounts it may have to pay.

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

b Equity Instruments and Financial Liabilities

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

i) Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments which are issued for cash are recorded at the proceeds received, net of direct issue costs. Equity instruments which are issued for consideration other than cash are recorded at fair value of the equity instrument.

ii) Financial Liabilities

1) Initial Recognition

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings and payables as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

2) **Subsequent Measurement**
The measurement of financial liabilities depends on their classification, as described below

Financial liabilities at fair value through profit or loss
Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation. Amortisation is recognised as finance income in the Statement of Profit and Loss

Financial liabilities at amortised cost
After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the Effective Interest Rate(EIR) method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in the Statement of Profit and Loss.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

Financial Liabilities are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach

3) **De-recognition of Financial Liabilities**

Financial liabilities are de-recognised when the obligation specified in the contract is discharged, cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as de-recognition of the original liability and recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

c **Offsetting Financial Instruments**
Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis to realise the assets and settle the liabilities simultaneously.

(f) **Cash and cash equivalents:**
For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet

(g) **Income Tax:**
i **Current Income Tax**
Current income tax is recognised based on the estimated tax liability computed after taking credit for allowances and exemptions in accordance with the Income Tax Act, 1961. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Minimum Alternative Tax ("MAT") credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal Income Tax during the specified period.

ii **Deferred Tax**
Deferred Tax Asset shall be recognised for the carryforward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unsused tax losses and unused tax credits can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(h) **Impairment of Assets:**
Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are companyed at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or companys of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

(i) **Segment reporting:**
The Company's operations constitutes a single business segment namely "Infrastructure Development" as per Ind As 108, further the Company's operation are within single geographical segment which is India.

(j) **Borrowings Cost:**
General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale
Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation
Other borrowing costs are expensed in the period in which they are incurred.

(k) **Other Financial Asset - Financial guarantee contract:**
Under Ind AS, the financial guarantee given by a holding company to lender on behalf of the Company for its borrowings are recognised initially at fair value which is subsequently amortised as an interest expense to the Statement of Profit and Loss. This transaction was not recorded under the previous GAAP.
The fair value of financial guarantees is determined as the present value of the difference in net cash flows between the contractual payments under the debt instrument and the payments that would be required without the guarantee.

(l) **Provisions and Contingent Liabilities and Contingent Assets:**

Provisions
Provisions for legal claims are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent liability is disclosed in the case of :
a) a present obligation arising from a past event, when it is not probable that an outflow of resources will happen to settle the obligation
b) a possible obligation, unless the probability of outflow of resources is remote.

Contingent asset are disclosed (if any), where an inflow of economic benefits are probable.

Contingent Assets
A contingent asset is not recognised unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements. Contingent liabilities and contingent assets are reviewed at each balance sheet date.

(m) **Earnings per share:**
Basic Earnings per share is calculated by dividing the net profit / (loss) after tax for the period attributable to equity shareholders of the Company by the weighted average number of equity in issue during the period. Diluted earnings per share is calculated by dividing the net profit after tax for the year attributable to equity shareholders of the company by the weighted average number of equity shares determined by assuming conversion on exercise of conversion rights for all potential dilutive securities.

(n) **Revenue Recognition:**
Revenue is measured at the fair value of the consideration received or receivable. The Company recognizes revenue when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when specific criteria have been met for each of the Company's activities, as described below

Toll revenue
The income from toll revenue from operations of the facility is accounted on receipt basis.

Contract revenue (construction contracts)
The Company has adopted Ind AS 115 " Revenue from Contracts with Customers " for recognising revenue. The Company derives revenue primarily from construction contracts. To recognize revenue, the Company applies the following five step approach: (1) identify the contract with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligation in the contract, and (5) recognize revenue when a performance obligation is satisfied.

At contract inception, the Company assesses its promise to transfer services to a customer to identify separate performance obligations., The Company applies judgment to determine whether each service promised to a customer are capable of being distinct, and are distinct in the context of the contract, if not, the promised services are combined and accounted as a single performance obligation. For performance obligations where control is transferred over time, revenue are recognized by measuring progress towards completion of the performance obligation. The selection of the method to measure progress towards completion requires judgment and is based on the nature of the services to be provided. The method for recognizing revenues and cost depends on the nature of the services rendered.

Other Income
Insurance and other claims are recognized as revenue on certainty of receipt basis.
Dividend income is recognized when the right to receive is established. Other items of income are accounted as and when the right to receive arises and recovery is certain.

(o) **Employee Benefits**

Employee benefits includes provident fund, superannuation fund, employee state insurance scheme, gratuity, compensated absences, long service awards and post-employment medical benefits.

a. Short-term Employee Benefit

All employee benefits falling due wholly within twelve months of rendering the service are classified as short-term employee benefits. The benefits like salaries, wages, short-term compensated absences etc. and the expected cost of bonus, and ex-gratia are recognised in the period the related service is rendered at undiscounted amount of benefits expected to be paid in exchange for that service.

The cost of short-term compensated absences is accounted as under:
- in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- in case of non-accumulating compensated absences, when the absences occur.

b. Post-employment benefits

1) Defined contribution plans:

The Company offers its employees State governed provident fund linked with employee pension scheme as defined contribution plans. The contribution paid/ payable under the scheme is recognised during the period in which the employee renders the related service.

2) Defined benefit plans:

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re- measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service costs are recognised in profit or loss on the earlier of the date of the plan amendment or curtailment, and the date that the Company recognises related restructuring costs.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Defined benefit costs are categorized as follows:
- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and
- net interest expense or income; and
- re-measurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The present value of the defined benefit liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

c. Other long-term employee benefit

The obligation for other long-term employee benefits such as long-term compensated absences, are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

(p) **Inventory**

Inventories are stated at the lower of cost and net realisable value. Cost of inventories include all costs incurred in bringing the inventories to their present location and condition. Costs are assigned to individual items of inventory based on first-in-first-out basis. Cost of purchased inventory are determined after deducting rebates and discounts.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimated costs necessary to make the sales.

BAHARAMPORE FARAKKA HIGHWAYS LTD

5 Investment Property

Particulars	As at March 31, 2024	As at March 31, 2023
Land		
Carrying Value	14.47	14.47
Total	**14.47**	**14.47**

i The Fair Value of the Land as at the Balance Sheet date is Rs. 18.90 Lakh

ii The land is under lien by way of mortgage to SBI Cap Trustee Company Limited by way of charge dated 3rd March,2011 and further modified dated 30th May 2016.

iii The Company has fair valued its Investment Property vide report dated 15th April 2022, however the valuation is not done by the registered valuer as defined under rule 2 of the Companies (Registered Valuers and Valuation) Rules . 2017.

iv Estimation of fair value

The company obtains independent valuations for its investment properties at least annually. The best evidence of fair value is current prices in an active market for similar properties. Where such information is not available, the company consider information from a variety of sources including:

The fair values of investment properties have been determined by an accredited Independent Valuer. The main inputs used are the rental growth rates, expected vacancy rates, terminal yields and discount rates based on comparable transactions and industry data. The resulting fair value estimates for investment property are included in level 3.

a current prices in an active market for properties of different nature or recent prices of similar properties in less active markets, adjusted to reflect those differences.

b discounted cash flow projections based on reliable estimates of future cash flows.

c capitalised income projections based upon a property's estimated net market income, and a capitalisation rate derived from an analysis of market evidence.

20 Provisions

	Particulars	As at March 31, 2024	As at March 31, 2023
20a	**Non-current**		
	Provision for gratuity	7.82	
	Provision for leave encashment	5.73	
	Provision for major maintenance	-	-
	Total	**13.55**	**-**
20b	**Current**		
	Provision for gratuity	0.16	
	Provision for leave encashment	0.91	
	Provision for major maintenance	14,276.22	18,349.88
	Total	**14,277.29**	**18,349.88**

Major maintenance

i) Major maintenance is to preserve the structural integrity of the road i.e. to achieve its original expected operational life. The wear and tear for each year is computed based on the technical report. The maintenance cost / bituminous overlay may vary based on the actual usage during maintenance period. Accordingly on the grounds of matching cost concept and based on technical estimates, a provision for major maintenance expenses is reviewed and is provided for in the accounts annually.

As per the concession agreement, Company had contractual obligation to carry out resurfacing operation. Provision of Major maintenance are reviewed on yearly basis and Based on the technical reports taken during the previous year, resurfacing operation has been estimated as at March 31, 2024.

ii) During the previous year the Company has entered in to Major Maintainence Agreement with HCC Concession Limited vide agreement dated March 20, 2023 for Execution Of Rehabilitation And Overlay At Project Highway for Rs 18349.88 lacs. As per the Contract the contractor needs to complete the work of major maintainance within 12 months (excluding 4 months of monsoon). Thus the entire provision amount lying as at March 28, 2023 is shown as current in the financial statements including the provision made during the previous year amounting to Rs 7098.56 lacs.

iii) Movement during the financial period is set out below

Particulars	As at March 31, 2024	As at March 31, 2023
Movements in provisions		
Opening Balance	18,349.88	11,586.59
Charged/ (credited) to profit and loss		
Additional Provision	-	7,098.56
Actual Incurred	(4,073.66)	(335.28)
Closing Balance	**14,276.22**	**18,349.88**

21 Other liabilities

	Particulars	As at March 31, 2024	As at March 31, 2023
21a	**Non-Current**		
	Advance towards Overloading Agreement (Refer note (i) below)	6,250.00	6,250.00
	Total	**6,250.00**	**6,250.00**
21b	**Current**		
	Statutory Dues	335.17	266.35
	Advances from NHAI (Refer Below Foot Note)	291.70	1,037.39
	Payable to NHAI	9.03	398.86
	Total	**635.90**	**1,702.60**

i) The company has entered into the Overloading agreement with its erstwhile holding company " HCC Concessions Limited" for transfer of cash proceeds of overloading revenue with effect from 1st October 2022 for a consideration as per third party Valuation report. The consideration towards the same is an amount of Rs. 6250.00 lacs which is shown as a non-current liability. One of the conditions precedent pertaining to opening Escrow account jointly by both the parties with the approval of NHAI is pending as on date and therefore the company has not given accounting treatment of such transactions in the financial statements and the advance of Rs. 6,250 lacs received against the aforesaid agreement is shown as non-current liabilities.

However the Company has accounted for the receipt of Overloading income from October 1, 2022 to March 31, 2024 to HCC Concession Limited in these financial statements as a liability to be discharged to the erstwhile holding company. The Amount of Overloading for the period April 1, 2023 to March 31, 2024 amounting to Rs 1001.83 lacs is reduced from the Toll Revenue shown under Revenue from Operations and Rs 595.01 lacs pertaing to October 1, 2022 to March 31, 2023 is shown as Overloading charges in Other Expenses.

In terms of the agreement with the erstwhile holding company , Additionally the Company will get reimbursement of 20% of the overloading revenue collected as part of recovery of cost. The said reimbursement is shown as other income during the year as the services of collecting the revenue has been rendered for such overloading transaction amounting to Rs 319.27 lacs.

Foot Note

a Advance from NHAI is against change of scope

22 Other financial liabilities

Particulars	As at March 31, 2024	As at March 31, 2023
Current		
Unsecured		
Subordinate loan (Refer Note 17)	-	568.00
Interest accrued		
- Related Party - HCC Concessions Limited (refer note 17)	-	85.68

- Others (Other Than MSME)	424.21	-
Employee Liability	18.33	-
Interest accrued on borrowings*	1,859.35	101.80
Other payable	1,277.47	-
Total	**3,585.17**	**2,018.23**

(*) **Interest accrued on borrowings**

Interest accrued payable is on Non Convertible Debentures, payable to related party i.e., Cube Highways and Infrastructure V Pte. Ltd. as per the terms of Non Convertible Debenture, Interest needs to be accrued and paid at every quarter end , i. e, June 2023, September 2023, December 31, 2023 and March 31, 2024.

However the above interest will be paid only if there is no restricted payment clause in Common Loan Agreement (CLA).

In view of the CLA, the Company is restricted to pay the interest to its related party on account of interest accrued on Non Convertible Debentures and hence due to this restricted payment clause in CLA , the interest which is accrued throughout the year and not paid as at March 31, 2024 is not considered as default.

23 Deferred tax liabilities (Net)

(a) The Company is eligible for deduction under Section 80- IA of the Income Tax Act, 1961 and the concession period of the Company's project falls within the tax holiday period as defined in Section 80-IA. Since deferred tax on timing differences between Accounting income and Taxable income that arise during the year is reversing during such tax holiday period, no deferred tax asset or liability arises and accordingly no DTA /DTL is created in the accounts.

There are no amount spent in other than ongoing project	-	-

f) The provision of Sec 135 of The Companies Act ,2013 is not applicable to the Company for the current year

BAHARAMPORE FARAKKA HIGHWAYS LTD.

34 Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits

(a) Defined benefit plans (unfunded):

The Company provides for gratuity for employees in India as per Payment of Gratuity Act, 1972. Employees who are in continuous service for 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month completed proportionately for 15 days salary multiplied for number of completed years of service.

The gratuity scheme covers substantially all regular employees. Commitments are actuarially determined at year-end. The actuarial valuation is done based on "Projected Unit Credit" method. Gains and losses of changed actuarial assumptions are charged to Statement of Profit and Loss.

(A) Disclosure of Gratuity

(i) Amount recognised in the Statement of Profit and Loss is as under:

Description	**March 31, 2024**
Current service cost	3.45
Total Service Cost	**3.45**

(ii) Net Interest Cost

Description	**March 31, 2024**
Interest cost on defined benefit obligations	0.00
Net Interest Cost	**0.00**

(iii) Bifurcation of Actuarial Gain/Loss on obligations:

Description	**March 31, 2024**
Actuarial Loss/(Gain) on arising from change in demographic assumption	-
Actuarial Loss/(Gain) on arising from change in financial assumption	0.27
Actuarial Loss/(Gain) on arising from experience adjustment	4.26
Actuarial Loss/(Gain) on for the year on obligations	**4.53**

(iv) Other Comprehensive Income (OCI)

Description	**March 31, 2024**
Actuarial Loss/(Gain) for the year on DBO	4.53
Unrecognized actuarial Loss/(Gain) for the year	**4.53**

(v) Bifurcation of Present Benefit Obligations (PBO) at the end of year in current and non current

Description	**March 31, 2024**
Current liability (Amount due within one year)	0.16
Non-Current liability (Amount due over one year)	7.82
Total PBO at the end of year	**7.98**

(vi) Change in defined benefit obligations

Description	**March 31, 2024**
Defined benefit liability at the start of the year	-
Adjustments related to employees transferred to/from fellow subsidiaries	-
Interest Cost	0.00
Current service cost	3.45
Re-measurements (gain)/loss for the year	4.53
Benefit paid directly by the Company	-
Defined benefit liability at the end of the year	**7.98**

(vii) The amount included in the balance sheet arising in respect of its defined benefit obligations/plans

Description	**March 31, 2024**
Present value of defined benefit obligations/ plans	7.98
Net defined benefit obligations	**7.98**

Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits (Continued.)

(viii) Sensitivity analysis for gratuity liability:

Description	**March 31, 2024**
Impact of change in discount rate	
Present value of obligations at the end of the	**7.98**
- Impact due to decrease of 1%	0.77
- Impact due to increase of 1%	(0.67)
Impact of change in salary increase	
Present value of obligations at the end of the	**7.98**

BAHARAMPORE FARAKKA HIGHWAYS LTD.

- Impact due to decrease of 1%	(0.68)
- Impact due to increase of 1%	0.77

The above sensitivity analysis is based on a change an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligations to significant actuarial assumptions the same method (present value of the defined benefit obligations calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligations liability recognised in the Balance Sheet.

Sensitivities due to mortality and withdrawals are not material and hence impact of change due to these not calculated.
Sensitivities as rate of increase of pensions in payment, rate of increase of pensions before retirement and life expectancy are not applicable.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

(ix) **Actuarial assumptions:**

Description	**March 31, 2024**
Discount rate range	7.15%
Rate of increase in compensation levels range	7.5% for the first year and 6.3% thereafter
Retirement age	58 years
Mortality rate	100% of IALM 2012-14
Attrition at age (Withdrawal rate %)	
- Up to 30 Years	9.00%
- From 31 to 44 years	9.00%
- Above 44 years	9.00%

(x) **Maturity profile of defined benefit obligation**

Weighted average duration (based on discounted cashflows)	9 Years

Expected cash flows over the next (valued on undiscounted basis):	**(₹ in Lacs)**
1 year	0.16
2 to 5 years	2.92
6 to 10 years	4.05
More than 10 years	10.12

BAHARAMPORE FARAKKA HIGHWAYS LTD.

35 Fair Value Heirarchy and Financial Risk Management Note

Other financial liabilities	2,018.23	-	-	2,018.23

B Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities
Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs)

The following table presents fair value hierarchy of assets and liabilities measured at fair value on a recurring basis as of :
There are no Financial Asset / Liability which are carried through FVTPL or FVTOCI and therfore the Fair value hirerachy details is not given

ii Financial risk management

The companies activities exposes it to market risk, liquidity risk and credit risk.
This note explains the source of risk which the entity is exposed to and how the entity is manage the risk.

Risk	Exposure arising from	Management
Credit risk	Cash and cash equivalents, financial assets measured at amortised cost.	Diversification of bank deposits and credit limits
Market risk — interest rate	Longterm borrowings at Floating rate	Actively managed
Liquidity risk	Trade Payables,borrowings and other liabilities	Availability of committed credit lines and borrowing facilities

The Company's risk management is carried out by a project finance team and treasury team group under policies approved by board of directors. Company treasury identifies, evaluates and hedges financial risk in close co-operation with the group's operating units. The Management of the Company provides principles for overall risk management, as well as policies covering specific areas, such as . interest rate risk, and credit risk and investments of excess liquidity.

(a) Credit Risk
The company engaged In infrastructure development and construction business under BOT. Credit risk is the risk that counterparty will not meet its obligations leading to a financial loss. Financial assets that are potentially subject to concentrations of credit risk and failures by counter-parties to discharge their obligations in full or in a timely manner consist principally of cash, cash equivalents and trade and other accounts receivable. Credit risk on cash balances with Bank are limited because the counterparties are entities with acceptable credit ratings.

35 Fair Value Heirarchy and Financial Risk Management Note

(b) Market Risk - Interest rate risk

The exposure of the Company's borrowing is linked to Bank base rate plus fixed spread .base rate are subject to change in market condition to interest rate changes at the end of the reporting period are as follows:

Particulars	Year ended March 31, 2024	Year ended March 31, 2023
Floating Rate borrowings	61,059.54	63,474.87
Fixed rate borrowings	22,890.00	-
Total borrowings	**83,949.54**	**63,474.87**

(ii) Sensitivity analysis

Profit or loss is sensitive to higher/lower interest income from borrowings as a result of changes in interest rates.

Impact on Profit after Tax	Year ended March 31, 2024	Year ended March 31, 2023
Interest rates - increase by 50 basis points	(305.30)	(317.37)
Interest rates - decrease by 50 basis points	305.30	317.37

(b) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. The Company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flows.

(i) Maturities of financial liabilities

		Rs	Rs
a	**Contingent liabilities**		
	Income Tax Demand raised by Income Tax Authority - (FY 2017-18)	0.34	0.34
	Entry Tax Demand raised by Sales Tax Authority - West Bengal (FY 2015-16)	0.97	0.97
	Entry Tax Demand raised by Sales Tax Authority - West Bengal (FY 2016-17)	0.65	0.65
	Mismacth GSTR-3 and GSTR-7	59.49	-
b	**Commitment**		
i	**Capital Commitment**		
	Estimated amount of contracts remaining to be executed on capital account not provided for (Net of Advance)	-	22,500

42 Contingent Asset

i Due to delay in issuance of Completion Certificate for Non-PCOD & Non-Bypass stretches to the Concessionaire it has the resulted in Revenue loss for such use of project highway since 01-Apr-21 to 13-May-21. The Concessionaire has incurred the revenue losses till 13-May-2021 at Rs. 405.79 Lakhs NHAI has requested IE for its comments on this claim letters of BFHL.

ii On account of Force Majeure Event/ Change in Law occurred due to COVID-19 pandemic BFHL has submitted claim to the NHAI for reimbursement of loss incurred from time to time. Numerous letters are issued on this account, recent letter being dated 08.10.2020 vide which it has claimed Rs. 2613 Lakhs + extension of concession period of 71.4 days towards this loss. However, IE or NHAI is yet to reply to these claim letters of BFHL.

iii Company has collected fees for non compliance with FASTag rules and even under the original terms of the Concession Agreement (CA), the Company (Concessionaire) is entitled to retain.However for the purpose of availing NOC for stake sale the company has paid Fastag fees along with interest amounting to Rs 374.85 lakhs to NHAI in the year 22-23 pursuant to compliance against various letters received from NHAI demanding Fastag fees. The Company contests that the said amount stands receivable from NHAI.

43 Company has collected fees for non compliance with FASTag rules and even under the original terms of the Concession Agreement (CA), the Company (Concessionaire) is entitled to retain all Fees collected under the CA, and the said provision remains unchanged even after the fee structure for non compliance with FASTag rules and the fees payable there on. Accordingly, the Concessionaire is legitimately entitled to collect and retain the additional Fee collected from the vehicles not fitted with FASTag or vehicle without valid, functional FASTag entering into FASTag lane of the Fee plazas.
In addition, Sub-rule (1) para 3 of Rule 7 (Remittance and appropriation of fee) of the National Highways Fee (Determination of Rates and collection) Rules, 2008, states that "Provided further that in case of a private investment projects, the fee collected under the provisions of these rules shall be appropriated by the Concessionaire in accordance with the provisions of and for the performance of its obligations under the agreement entered into by such Concessionaire". Thus, any fee, which is collected from the users shall be appropriated by the Concessionaire for fulfilling its obligations.
Accordingly the Company has accounted the entire collection as toll revenue and has responded to NHAI letter.

During the year ended 31 March 2023, the Company has received the letter from NHAI dated 20 September 2022 addressed to Independent Engineer(IE) asking to submit its report upon fast-tag recovery from concessioner Independent Engineer; In its report dated 30 September 2022 IE stated Fasttag recovery of Rs 305.28 Lakhs along with interest of Rs 40.76 Lakhs. Letters for Fasttag recovery where also received by the Company from NHAI in previous year ended 31 March 2022 dated September 7, 2021 and September 22, 2021 for depositing the FASTag and TCS on Fastag with in a week, and interest @ 5% for non-submission of aforesaid amount. In response to the same the Company had written letter clarifying the its position vide Concession Agreement. However during the year ended 31 March 2023, for the purpose of availing NOC for stake sale, the company has paid Fastag fees along with interest amounting to Rs 374.84 lakhs to NHAI under protest as Fasttag fees pursuant to compliance against various letters received from NHAI demanding Fastag fees. However the company still continues to recover the amount paid under protest from NHAI.

44 In previous year, the Company has entered into an Agreement with the Purchaser Cube Highways and Infrastructure V PTE LTD, being a company based in Singapore and incorporated with the objective of acquiring and operating transportation projects to purchase the shares from the Company (including the purchase of seller nominee shares by the purchaser nominees from the seller nominees) and the Company has sell the shares to the Purchaser (including the sale of such portion of the sale shares which are held by the seller nominees to purchaser nominees).

45 Relationship with struck-off companies: The information about transaction with struck off companies (defined under section 248 of the companies Act 2013 or section 560 of the Companies Act 1956) has been determined to the extent such parties have been identified on the basis of information available with the company and the same is relied upon by the auditor.

46 Audit Trail

The Ministry of Corporate Affairs (MCA) by the Companies (Accounts) Amendment Rules 2021 and vide notification dated 24 March 2021 has issued the "Companies (Audit and Auditors) Amendment Rules, 2021 has prescribed a new requirement for companies under the proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 inserted requiring companies, which uses accounting software for maintaining its books of account, shall use only such accounting software which has a feature of recording audit trail of each and every transaction, creating an edit log of each change made in the books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled.

The Company uses an Enterprise Resources Planning System – SAP S/4 HANA accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility , however the audit log (edit log) feature has not been enabled in the aforesaid software throughout the year. Further the audit trail feature is not enabled for direct changes to database. Since the software is having preventive controls measures inbuilt , the audit log (edit log) facility is not enabled in the system. Since there is no audit log (edit log) feature enabled at application and at database level for the year under review there is no preservation of audit trail as at March 31, 2024.

47 Previous years figures

Previous years figures have been regrouped/reclassified/recasted wherever necessary including to conform current year classification.

48 The balance sheet, statement of profit and loss, statement of changes in equity, statement of material accounting policy information and the other explanatory notes forms an integral part of the financial statements of the Company for the year ended March 31, 2024.

INDEPENDENT AUDITOR'S REPORT

To
The Members of
Baharampore Farakka Highways Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the Financial Statements of Baharampore Farakka Highways Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2023, and the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of Significant Accounting Policies and other explanatory information (hereinafter referred to as "the Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2023, the loss (including other comprehensive income), changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Financial Statements.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

Information Other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the Other Information. The other information comprises the information included in the Board's report including the Directors Report but does not include the Financial Statements and our Independent Auditors' Report thereon. Our opinion on the Financial Statements does not cover the Other Information and we do not and will not express any form of assurance or conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the Other Information identified above and, in doing so, consider whether the Other Information is materially inconsistent with the Financial Statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this Other Information, we are required to report that fact.

With regard to other information that has not been obtained by the us prior to the date of the auditor's report, that management intends to prepare and issue such other information after issuance of our auditor's report. We have nothing to report in this regard.

Responsibilities of Management and those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, make it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the attached Annexure "A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
    a. We have sought and obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purposes of our audit.
    b. In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
    c. The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
    d. In our opinion, the aforesaid Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
    e. On the basis of the written representations received from the directors as on March 31, 2023 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2023 from being appointed as a director in terms of Section 164 (2) of the Act.
    f. With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls with reference to

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

financial statements.

g. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:

In our opinion and to the best of our information and according to the explanations given to us, there is no remuneration paid by the Company to its directors during the year to which the provisions of section 197 of the Act applies.

h. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 38 to the Financial Statements,

ii. The Company did not have any long-term contracts including derivative contracts for which there were material foreseeable losses,

iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

iv. a) The management has represented that, to the best of their knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person or entity, including foreign entities ("intermediaries") with the understanding whether recorded in writing or otherwise, that the intermediary shall, whether directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security, or the like on behalf of the Ultimate Beneficiaries.

b) The management has represented that, to the best of its knowledge and belief, no funds have been received by the company from any person or entity including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the company shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries,

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

c) Based on such audit procedures considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (iv)(a) and (iv)(b) above contain any material misstatement.

v. The Company has not declared or paid dividend during the year and therefore the compliance with Section 123 of the Companies Act, 2013 is not applicable in respect of dividends declared or paid.

vi. Proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 for maintaining books of account using accounting software which has a feature of recording audit trail (edit log) facility is applicable to the Company with effect from April 1, 2023, and accordingly, reporting under Rule 11(g) of Companies (Audit and Auditors) Rules, 2014 is not applicable for the financial year ended March 31, 2023.

ANNEXURE A TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 1 under Report on Other Legal and Regulatory Requirements' section of our report to the Members of Baharampore Farakka Highways Limited of even date)

(i) a. (A) The Company has maintained proper records showing full particulars including quantitative details and situation of its Property, Plant and Equipment.

(B) The company has maintained proper records showing full particulars of intangible assets.

b. Property, Plant and Equipment have been physically verified by the management at reasonable intervals and no material discrepancies were noticed on such verification.

c. There is no immovable property as at Balance sheet date other than investment property. We were provided with the photo-copies of title deeds for verification w.r.t the immovable property, however we have not verified the original title deeds since the same are lying at different location.

d. The company has not revalued its Property, Plant and Equipment and intangible assets during the year.

e. On the basis of information and explanation given, no proceedings have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibition) Act,1988 (45 of 1988) and rules made thereunder.

(ii) (a) The Company is engaged in the business of Infrastructure development, Operations and its maintenance and there is no inventory in hand at any point of time, hence Clause 3(ii)(a) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(b) In our opinion and on the basis of examination of books and records and on the basis of information and explanation given to us the Company do not have working capital limits and hence Clause 3(ii)(b) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(iii) In our opinion and on the basis of examination of books and records and on the basis of information and explanation given to us the Company has not made investments in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or any other parties. Hence Clause 3(iii)(a), 3(iii)(b), 3(iii)(c), 3(iii)(d), 3(iii)(e) & 3(iii)(f) of the Companies (Auditor's Report) Order, 2020 are not applicable to the Company.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

(iv) In our opinion and according to the information and explanations given to us, the company has not given any loans, or made any investments, or given any guarantees and security to which section 185 or section 186 of the Companies Act, 2013 applies.

(v) The Company has not accepted deposits from the public or amounts that are deemed to be deposits pursuant to sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and rules framed thereunder. As informed to us, there is no order that has been passed by Company Law Board or National Company Law Tribunal or Reserve Bank of India or any Court or any other tribunal in respect of the said sections.

(vi) As informed to us, the maintenance of the cost records under the sub-section (1) of section 148 of the Companies Act, 2013 has been prescribed and we are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. We have not, however, carried out a detailed examination of the records to ascertain whether they are accurate or complete.

(vii) (a) The Company is generally regular in depositing undisputed statutory dues including Goods and Services Act, Provident fund, Employees State Insurance, Income Tax, Sales Tax, Service Tax, duty of Customs, duty of Excise, Value Added Tax, Cess and other statutory dues to the appropriate authorities during the year. According to the information and explanations given to us, no undisputed amount payable in respect of the aforesaid dues were outstanding as at March 31, 2023 for a period of more than six months from the date they became payable

(b) According to the information and explanations given to us, there are no statutory dues referred to in sub-clause (a) which have not been deposited on account of any dispute except as given below:

Name of statute	Nature of dues	Disputed Amount (Rs in lacs)	Paid under protest (Rs in lacs)	Period to which the amount relates	Forum where dispute is pending
The West Bengal value Added tax, 2003	Entry tax	0.97	0.42	FY 2015-16	West Bengal Sales Tax Authority
The West Bengal value Added tax, 2003	VAT	0.65	NIL	FY 2016-17	West Bengal Sales Tax Authority
Income Tax demand	Income Tax	0.37	NIL	FY 2017-18	Matter pending with ITO

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

(viii) According to the information and explanations given to us and to the best of our knowledge and belief there are no transactions that were not recorded in the books of account, and which has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961.

(ix) (a) According to the information and explanations given to us and based on the audit procedures performed by us, we are of the opinion that the company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender also there is no continuing default as at Balance Sheet Date.

(b) According to the information and explanations given to us and on the basis of our audit procedures, we report that the company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

(c) In our opinion and according to the information and explanations given to us, the company has not raised any money by way of term loans during the year and hence Clause 3(ix)(c) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(d) According to the information and explanations given to us, and the audit procedures performed by us, and on an overall examination of the financial statements of the company, we report that no funds raised on short-term basis have been used for long-term purposes by the Company.

(e) The Company does not have any subsidiaries, joint ventures or associates and hence clause 3(ix)(e) & 3(ix)(f) of the Companies (Auditor's Report) Order, 2020 are not applicable to the Company.

(x) (a) The company has not raised any money by way of initial public offer / further public offer (including debt instruments) during the year and hence clause 3(x)(a) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(b) During the year, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) and hence reporting under clause 3(x)(b) of the Order is not applicable.

(xi) (a) According to the information and explanations given to us and to the best of our knowledge and belief no fraud by the Company or any fraud on the Company has been noticed or reported during the year.

(b) No report under sub-section (12) of section 143 of the Companies Act has been filed by us in Form ADT-4 as prescribed under rule 13 of

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

Companies (Audit and Auditors) Rules, 2014 with the Central Government and hence clause 3(xi)(b) of the Companies (Auditors Report) Order 2020 is not applicable to the Company.

(c) According to the information and explanations given to us and to the best of our knowledge and belief no whistle-blower complaints have been received during the year by the company.

(xii) The Company is not a Nidhi Company and hence clauses 3(xii)(a), 3(xii) (b) and 3(xii)(c) of the Companies (Auditors Report) Order 2020 is not applicable to the Company.

(xiii) All transactions with the related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 in so far as our examination of the proceedings of the meetings of the Audit Committee and Board of Directors are concerned. The details of related party transactions have been disclosed in the Financial Statements as required by the applicable Accounting Standards.

(xiv) (a) In our opinion and based on our examination, the company has an internal audit system commensurate with the size and nature of it business.

(b) We have considered the internal audit reports of the company issued till the date of auditor's report.

(xv) According to the information and explanations given to us, in our opinion during the year the company has not entered into any non-cash transactions with its directors or persons connected with its directors hence clause 3(xv) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

(xvi) The nature of business and the activities of the Company are such that the Company is not required to obtain registration under section 45-IA of the Reserve Bank of India Act 1934 and hence sub-clause 3(xvi)(a), 3(xvi)(b), 3(xvi)(c) and 3(xvi)(d) of the Companies (Auditors Report) Order, 2020 is not applicable to the

(xvii) On an examination of the Statement of Profit and Loss account, we are of the opinion that the Company has incurred cash losses during the current financial year amounting to Rs 4593.71 lacs, however there was no cash loss in the immediate previous financial year.

(xviii) There has been no resignation of the statutory auditors during the year and accordingly clause (3)(xviii) Companies (Auditors Report) Order 2020 is not applicable to the Company.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

evidence supporting the assumptions including the representation from the Board of the Company that the parent i.e., Cube Highways and Infrastructure V PTE LTD has agreed to give support in the form of funding to meets its current obligations , nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that the company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date unless the plans for funding by the Cube Highways and Infrastructure V PTE LTD as represented by the Board of the Company is not fulfilled. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due

(xx) (a) On the basis of our review of the minutes of the CSR committee and other documents made available to us, there are no unspent amounts towards Corporate Social Responsibility (CSR) on other than ongoing projects requiring a transfer to a Fund specified in Schedule VII to the Companies Act in compliance with second proviso to sub-section (5) of Section 135 of the said Act. Accordingly, reporting under clause 3(xx)(a) of the Order is not applicable for the year.

(b) On the basis of our review of the minutes of the CSR committee and other documents made available to us, in respect of ongoing projects of the current year, there are no unspent amount as March 31, 2023, requiring transfer of such amount to a Special account within a period of 30 days from the end of the current financial year in compliance with the provision of section 135(6) of the Act.

The unspent amount of previous year was transferred to unspent CSR account (on April 28, 2022) within 30 days from the Balance sheet date. i.e., March 31, 2022

ANNEXURE - B TO THE AUDITORS' REPORT

(Referred to in paragraph 2(f) under Report on Other Legal and Regulatory Requirements' section of our report to the Members of Baharampore Farakka Highways Limited of even date)

Report on the Internal Financial Controls with reference to Financial Statements under 143 (3)(i) of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to Financial Statements of Baharampore Farakka Highways Limited ("the Company") as of March 31, 2023 in conjunction with our audit of the Financial Statement of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Financial Statements was established and maintained and if such controls operated effectively in all material respects.

903-904, 9th Floor, Raheja Chambers, 213, Nariman Point, Mumbai 400 021. Tel. : 6752 7100 Fax : 6752 7101 E-mail : nvc@nvc.in

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Financial Statements included obtaining an understanding of internal financial controls with reference to Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to Financial Statements.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial control with reference to Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements.

Because of the inherent limitations of Financial controls with reference to Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Financial Statements to future periods are subject to the risk that the internal financial control with reference to Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to Financial Statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

CIN No : U45200MH2010PLC200748
Statement of Cash Flow Statement for the year ended 31 March 2023
(All amounts are in Rs lakh, unless stated otherwise)

Particulars	Note	Year ended March 31, 2023	Year ended March 31, 2022
A Cash Flow from operating activities			
Profit before income tax		(9,936.85)	(2,338.54)
Adjustments for			
Add:			
Depreciation and amortisation expenses		5,343.10	4,856.27
Unwinding of Major Maintenance		-	-
Finance costs		7,480.51	7,504.01
Amortisation of Corporate guarantee		36.12	36.05
Interest on delayed payment of statutory dues		7.05	31.33
Interest on delayed payment of IE fees		39.57	-
Provision for Major Maintenance Expenditure		7,098.57	-
Other Receivable w/off		298.80	-
Less:			
Profit on sale of assets (Net)		(58.32)	-
Interest income on income tax refund		(111.90)	-
Interest received		(621.12)	(1,050.28)
Change in operating assets and liabilities			
(Increase)/decrease in other financial assets		(747.54)	31,761.47
(Increase)/decrease in other non-current assets		(174.53)	385.88
(Increase)/decrease in other trade receivable		17.24	-
(Increase)/decrease in other current assets		919.60	4,731.47
Increase/(decrease) in trade payables		4,616.15	2,757.84
Increase/(decrease) in other financial liabilities		1,018.82	(2,220.89)
Increase/(decrease) in provisions		(335.28)	(2,206.83)
Increase/(decrease) in other current liabilities		6,886.84	365.65
Cash generated from operations		21,776.82	44,613.43
Income taxes (paid) / refund		213.54	(4,689.79)
Net cash inflow/(outflow) from operating activities		**21,990.36**	**39,923.64**
B Cash flow from investing activities:			
Purchase of property, plant and equipment/ amount spent on Intangible asset including Intangible assets under development.		(26,793.00)	(11,693.34)
Sale proceeds of property, plant and equipment		119.75	-
Investment in fixed deposits		12,015.61	(15,620.89)
Interest received		675.42	982.25
Net cash inflow/(outflow) from investing activities		**(13,982.22)**	**(26,331.98)**
C Cash flow from financing activities			
Proceeds from Subordinate Debt (Refer Note 15 G)		400.00	-
Repayment of long term borrowings		(4,360.01)	(1,288.28)
Interest/Other Borrowing Cost paid (Refer Note (ii) below)		(7,406.48)	(7,789.83)
Net cash inflow/(outflow) from financing activities		**(11,366.49)**	**(9,078.11)**
Net increase/(decrease) in cash and cash equivalents		**(3,358.35)**	**4,513.55**
Add: Cash and cash equivalents at the beginning of the financial year	11a	6,886.71	2,373.15
Cash and cash equivalents at the end of the year	11a	**3,528.36**	**6,886.71**
Component of Cash and Cash Equivalent			
Cash on hand		30.17	30.80
Balances with Banks		998.20	359.92
With Collection Agencies		-	0.01
Term deposits with original maturity of less than three months		2,500.00	6,495.98
		3,528.36	**6,886.71**

Notes:
(i) Figure in brackets denote outflows
(ii) Interest Cost includes Interest capitalised to Intangible Asset under development Rs Nil (PY - Rs 377.71 Lakhs)
The accompanying notes are an integral part of these financial statements.

1 **Corporate information**

Baharampore-Farakka Highways Limited was incorporated under the Companies Act, 1956, on 11th March, 2010 as a Special Purpose Vehicle for Design, Build, Finance, Operate & Transfer (DBFOT) Toll basis of 4 lanes from Kms 191.416 to 294.684 between Baharampore and Farakka in the state of West Bengal under NHDP Phase III.

NHAI has granted concession period of 25 years to the company for the project. Provisional Certificate under Article 14.3.2 (Schedule - J) of the concession Agreement has been obtained for 75.45 kms for the following stretch - 204.550 to 229.300 KMS - 24.75 KMS / 230.600 to 254.800 KMS - 24.20 KMS / 258.350 to 284.850 KMS - 26.50 KMS. Company has started to collect toll from 14th May, 2014 on receipt of provisional certificate of commencement from Independent consultant appointed by National Highway Authority of India.

Baharampore-Farakka Highways Limited has entered into an Agreement with the Purchaser Cube Highways and Infrastructure V PTE LTD, being a company based in Singapore and incorporated with the objective of acquiring and operating transportation projects to purchase the shares from Baharampore-Farakka Highways Limited (including the purchase of seller nominee shares by the purchaser nominees from the seller nominees) and Baharampore-Farakka Highways Limited has agreed to sell the shares to the Purchaser (including the sale of such portion of the sale shares which are held by the seller nominees to purchaser nominees).

2 **Basis of Preparation, Accounting judgements, estimates and assumptions and significant Accounting Policies:**

2.1 **Basis of preparation**

The Financial Statement of the Company comprises of the Balance Sheet as at March 31, 2023, the Statement of Profit and Loss (including other comprehensive income), the Statement of Changes in Equity, and the Summary Statement of Significant Accounting Policies, and other explanatory information (Collectively, the "Financial Statement"), as approved by the board of directors of the company at their meeting held on 14 September 2023.

The financial statements are prepared on an accrual basis of accounting and in accordance with the Indian Accounting Standards (Ind AS) notified under the companies (Indian Accounting standards) Rules, 2015 as amended by the companies (Indian Accounting standard) Rules 2016.
These financial statements are prepared under the historical cost convention on the accrual basis except for certain financial instruments, which are measured at fair values, which are disclosed in the Financial Statements viz;

These financial statements are prepared under the historical cost convention on the accrual basis except for certain financial instruments, which are measured at fair values, which are disclosed in the Financial Statements viz;

- certain financial assets and liabilities (including derivative instruments) and contingent consideration that is measured at fair value

- assets under service concession arrangement

The classification of assets and liabilities of the Company is done into current and non-current based on the operating cycle of the business of the Company. The operating cycle of the business of the Company is less than twelve months and therefore all current and non-current classifications are done based on the status of reliability and expected settlement of the respective asset and liability within a period of twelve months from the reporting date as required by Schedule III to the Companies Act, 2013.

Accounting policies have been consistently applied except whereas newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

The financial statements are presented in Indian Rupees ('INR') and all values are rounded to the nearest lakh, except otherwise indicated.

2.2 **Significant accounting judgments, estimates and assumptions**

The preparation of financial statements requires management's judgments, estimates and assumptions that impacts the reported amounts of revenues, expenses, assets and liabilities, and the accompanying notes thereon. Uncertainty about these assumptions and estimates could result in outcomes that might require a material adjustment to the carrying amount of assets or liabilities in future periods.

i) **Estimates:**

The preparation of the financial statements in conformity with IND AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of circumstances surrounding the estimates. Changes in estimates are reflected in the financial statement in the period in which changes are made and if material, their effects are disclosed in the notes to the financial statements.

ii) **Judgments:**

The Company's management has made the following judgments, which have the most significant effect on the amounts recognised in the separate financial statements, while formulating the Company's accounting policies:

iii) **Taxes:**

The Company is eligible for 100% tax holiday under section 80-IA of the Income Tax Act, 1961. As a result, timing differences arising and reversing during the tax holiday period are not recognized by the Company.

iv) **Recognition and measurement of other Provisions**

The recognition and measurement of other provisions is based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the closing date. The actual outflow of resources at a future date may therefore, vary from the amount included in other provisions.

v) **Useful lives of property, plant and equipment**

The company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

vi) **Impairment of property, plant and equipment**

For property, plant and equipment and intangibles an assessment is made at each reporting date to determine whether there is an indication that the carrying amount may not be recoverable or previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised.

2 3 **Summary of significant accounting policies**

(a) **Current & Non Current classification**

Current Asset :

An asset shall be classified as current when it satisfies any of the following criteria:
(a) it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
(b) it is held primarily for the purpose of being traded
(c) It is expected to be realized within twelve months after the reporting date, or
(d) It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets shall be classified as non-current.

Current Liabilities:

A liability shall be classified as current when it satisfies any of the following criteria:
i (a) it is expected to be settled in the company's normal operating cycle;
ii (b) it is held primarily for the purpose of being traded;
iii (c) it is due to be settled within twelve months after the reporting date : or
iv (d) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could at the option of the counterparty, result in its settlement by the issue of equity instruments do not effect its classification.

All other liabilities shall be classified as non-current.

(b) **Government grant**

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.
Government grants relating to income are deferred and recognised in the profit or loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.
Government grants relating to the purchase of property, plant and equipment (if any) are included in non-current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

(c) **Accounting of intangible assets under Service Concession arrangement:**

Company has Toll Road Concession rights where it Designs, Build, Finances, Operates and transfer (DBFOT) infrastructure used to provide public service for a specified period of time. These arrangements may include Infrastructure used in a public-to-private service concession arrangement for its entire useful life.
These arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that the Company receives a right (a license) to charge users of the public service. The financial asset model is used when the Company has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component. If the Company performs more than one service (i.e., construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable

Intangible asset model:

The Company recognises an intangible asset arising from a service concession arrangement when it has a right to charge for usage of the concession infrastructure. An intangible asset received as Consideration for providing construction or upgrade services in a service concession arrangement is measured at fair value on initial recognition by reference to the fair value of the services provided. Subsequent to initial recognition, the intangible asset is measured at cost, which includes capitalised borrowing costs, less accumulated amortisation.

The estimated useful life of an intangible asset in a service concession arrangement is the period from when the Company is able to charge the public for the use of the infrastructure to the end of the concession period.

Amortization of concession intangible assets:

Amortization is charged on a straight-line basis over the estimated useful lives . The estimated useful life and amortization method are reviewed at the end of each annual reporting period, with the effect of any changes in the estimate being accounted for on a prospective basis.

Finanacial Asset Model:

The Company recognises a financial asset arising from a service concession arrangement when it has an unconditional contractual right to receive cash or another financial asset from grantor for the construction or upgrade services provided. Such financial assets are measured at fair value on initial recognition and classified as loans and receivables.
Subsequent to initial recognition, the financial assets are measured at amortised cost. Under this model financial asset will be reduced as an when grant has received from grantor.

(d) **Property, plant and equipment:**

All items of property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items
Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.
Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/(losses).

Transition to Ind AS:
On transition to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1st April 2015 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.
Depreciation methods, estimated useful lives and residual value:
Depreciation is provided as per the useful lives of the assets as per schedule II of Companies Act, 2013 using Straight Line Method (SLM).

(e) **Investment property:**

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Transition to Ind AS

Company has classified its freehold land under Investment property which were earlier classified under Fixed Asset under previous GAAP.

(f) **Financial Instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity

a Financial Assets

i) Initial Recognition

In the case of financial assets not recorded at fair value through profit or loss, financial assets are recognised initially at fair value plus transaction costs that are directly attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

ii) Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

Financial Assets at Amortised Cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income from these financial assets is included in finance income using the effective rate interest ("EIR") method. Impairment gains or losses arising on these assets are recognised in Statement of Profit and Loss.

Financial Assets Measured at Fair Value

Financial assets are measured at fair value through other comprehensive income ("OCI") if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows or to sell these financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in the Statement of Profit and Loss.

In respect of equity investments (other than for investment in subsidiaries and associates) which are not held for trading, the Company has made an irrevocable election to present subsequent changes in the fair value of such instruments in OCI. Such an election is made by the Company on an instrument by instrument basis at the time of transition for existing equity instruments/ initial recognition for new equity instruments.

Financial asset not measured at amortised cost or at fair value through OCI is carried at fair value through profit or loss.

iii) Impairment of Financial Assets

In accordance with Ind AS 109, the Company applies the expected credit loss ("ECL") model for measurement and recognition of impairment loss on financial assets and credit risk exposures

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. Simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECL at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

iv) De-recognition of Financial Assets

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset to another entity

If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the assets and an associated liability for amounts it may have to pay

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

b Equity Instruments and Financial Liabilities

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

i) Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments which are issued for cash are recorded at the proceeds received, net of direct issue costs. Equity instruments which are issued for consideration other than cash are recorded at fair value of the equity instrument.

ii) Financial Liabilities

1) Initial Recognition

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings and payables as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

2) Subsequent Measurement

The measurement of financial liabilities depends on their classification, as described below

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the profit or loss

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation. Amortisation is recognised as finance income in the Statement of Profit and Loss.

Financial liabilities at amortised cost

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the Effective Interest Rate(EIR) method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in the Statement of Profit and Loss.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

Financial Liabilities are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

3) De-recognition of Financial Liabilities

Financial liabilities are de-recognised when the obligation specified in the contract is discharged, cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as de-recognition of the original liability and recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

c Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis to realise the assets and settle the liabilities simultaneously.

(g) Cash and cash equivalents:

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

(h) Income Tax:

i Current Income Tax

Current income tax is recognised based on the estimated tax liability computed after taking credit for allowances and exemptions in accordance with the Income Tax Act, 1961. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Minimum Alternative Tax ("MAT") credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal Income Tax during the specified period.

ii **Deferred Tax**

Deferred Tax Asset shall be recognised for the carryforward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unsused tax losses and unused tax credits can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The Company is eligible for deduction under Section 80- IA of the Income Tax Act, 1961 and the concession period of the Company's project falls within the tax holiday period as defined in Section 80-IA. Since deferred tax on timing differences between Accounting income and Taxable income that arise during the year is reversing during such tax holiday period, no deferred tax asset or liability arises and accordingly no provision is made in the accounts.

(i) **Leases**

The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether

(i) the contract involves the use of an identified asset

(ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and
(iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The right-of use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses

Right-of-use assets are depreciated from the commencement date on a straight line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e.the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset b.asis unless the asset does not generate cashflows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option. Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

(j) **Impairment of Assets:**

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are companyed at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or companys of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

(k) **Segment reporting:**

The Company's operations constitutes a single business segment namely "Infrastructure Development" as per Ind As 108, further the Company's operation are within single geographical segment which is India.

(l) **Borrowings Cost:**

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.
Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.
Other borrowing costs are expensed in the period in which they are incurred

(m) **Other Financial Asset - Financial guarantee contract:**

Under Ind AS, the financial guarantee given by a holding company to lender on behalf of the Company for its borrowings are recognised initially at fair value which is subsequently amortised as an interest expense to the Statement of Profit and Loss. This transaction was not recorded under the previous GAAP.
The fair value of financial guarantees is determined as the present value of the difference in net cash flows between the contractual payments under the debt instrument and the payments that would be required without the guarantee.

(n) **Provisions and Contingent Liabilities and Contingent Assets:**

Provisions

Provisions for legal claims are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent liability is disclosed in the case of :

a) a present obligation arising from a past event, when it is not probable that an outflow of resources will happen to settle the obligation
b) a possible obligation, unless the probability of outflow of resources is remote.

Contingent asset are disclosed (if any), where an inflow of economic benefits are probable.

Contingent Assets

A contingent asset is not recognised unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements. Contingent liabilities and contingent assets are reviewed at each balance sheet date.

(o) **Earnings per share:**

Basic Earnings per share is calculated by dividing the net profit / (loss) after tax for the period attributable to equity shareholders of the Company by the weighted average number of equity in issue during the period. Diluted earnings per share is calculated by dividing the net profit after tax for the year attributable to equity shareholders of the company by the weighted average number of equity shares determined by assuming conversion on exercise of conversion rights for all potential dilutive securities.

(p) **Revenue Recognition:**

Revenue is measured at the fair value of the consideration received or receivable. The Company recognizes revenue when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when specific criteria have been met for each of the Company's activities, as described below

Toll revenue

The income from toll revenue from operations of the facility is accounted on receipt basis.

Contract revenue (construction contracts)

The Company has adopted Ind AS 115 " Revenue from Contracts with Customers " for recognising revenue. The Company derives revenue primarily from construction contracts. To recognize revenue, the Company applies the following five step approach: (1) identify the contract with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligation in the contract, and (5) recognize revenue when a performance obligation is satisfied.

At contract inception, the Company assesses its promise to transfer services to a customer to identify separate performance obligations.. The Company applies judgment to determine whether each service promised to a customer are capable of being distinct, and are distinct in the context of the contract, if not, the promised services are combined and accounted as a single performance obligation. For performance obligations where control is transferred over time, revenue are recognized by measuring progress towards completion of the performance obligation. The selection of the method to measure progress towards completion requires judgment and is based on the nature of the services to be provided. The method for recognizing revenues and cost depends on the nature of the services rendered.

Other Income

Insurance and other claims are recognized as revenue on certainty of receipt basis.
Dividend income is recognized when the right to receive is established. Other items of income are accounted as and when the right to receive arises and recovery is certain.

(q) **Critical accounting estimates and judgements:**

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities are disclosed below

Applicability of service concession arrangement accounting to toll roads concessionaire arrangements

Appendix A "Service concession arrangements" applies to "public- to-private" service concession arrangements, which can be defined as contracts under which the grantor transfers to a concession holder the right to deliver public services that give access to the main public facilities for a specified period of time in return for managing the infrastructure used to deliver those public services.

More specifically, Appendix C applies to public-to-private service concession arrangements if the grantor:
i. Controls or regulates what services the operator must provide with the infrastructure, to whom it must provide them, and at what price; and
ii. Controls through ownership or otherwise – any significant residual interest in the infrastructure at the end of the term of the arrangement.

In assessing the applicability the management has exercised significant judgement in relation to the underlying ownership of the assets, the ability to enter into power purchase arrangements with any customer, ability to determine prices etc. in concluding that the arrangements don't meet the criteria for recognition as service concession arrangements.

(ii) Impairment of concession intangible assets:
The Company tests intangible assets and cash generating units have suffered any impairment, in accordance with the accounting policy. The recoverable amount of each cash generating unit has been determined based on the greater of value-in-use and fair value less costs to sell calculations. Calculations are prepared on the basis of management's assumptions and estimates.

(iii) Fair valuation of other financial instruments:
The Company records the resurfacing obligation for its present obligation as per the concession arrangement to maintain the toll roads during the concession period. The provision is included in the financial statements at the present value of the expected future payments. The calculations to discount these amounts to their present value are based on the estimated timing of expenditure occurring on the roads.

The discount rate used 10.75% to value the resurfacing provision at its present value is determined through reference to the nature of provision and risk associated with the expenditure.

Total	**14.47**	**14.47**

i The Fair Value of the Land as at the Balance Sheet date is Rs. 18.90 Lakh

ii The land is under lien by way of mortgage to SBI Cap Trustee Company Limited by way of charge dated 3rd March,2011 and further modified dated 30th May 2016.

iii The Company has fair valued its Investment Property vide report dated 15th April 2022, however the valuation is not done by the registered valuer as defined under rule 2 of the Companies (Registered Valuers and Valuation) Rules , 2017.

iv Estimation of fair value

The company obtains independent valuations for its investment properties at least annually. The best evidence of fair value is current prices in an active market for similar properties. Where such information is not available, the company consider information from a variety of sources including:

The fair values of investment properties have been determined by an accredited Independent Valuer. The main inputs used are the rental growth rates, expected vacancy rates, terminal yields and discount rates based on comparable transactions and industry data. The resulting fair value estimates for investment property are included in level 3.

a current prices in an active market for properties of different nature or recent prices of similar properties in less active markets, adjusted to reflect those differences.

b discounted cash flow projections based on reliable estimates of future cash flows.

c capitalised income projections based upon a property's estimated net market income, and a capitalisation rate derived from an analysis of market evidence.

	Total	**-**	**6,793.42**
19b	**Current**		
	Provision for major maintenance	18,349.88	4,793.17
	Total	**18,349.88**	**4,793.17**

Major maintenance

i Major maintenance is to preserve the structural integrity of the road i.e. to achieve its original expected operational life. The wear and tear for each year is computed based on the technical report. The maintenance cost / bituminous overlay may vary based on the actual usage during maintenance period. Accordingly on the grounds of matching cost concept and based on technical estimates, a provision for major maintenance expenses is reviewed and is provided for in the accounts annually.

As per the concession agreement, Company had contractual obligation to carry out resurfacing operation. Provision of Major maintenance are reviewed on yearly basis and Based on the technical reports taken during the previous year, resurfacing operation has been estimated as at March 28,2023.

ii) During the current year the Company has entered in to Major Maintainence Agreement with HCC Concession Limited vide agreement dated March 20, 2023 for Execution Of Rehabilitation And Overlay At Project Highway for Rs 18349.88 lacs. As per the Contract the contractor needs to complete the work of major maintainance within 12 months (excluding 4 months of monsoon). Thus the entire provision amount lying as at March 28, 2023 is shown as current in the financial statements including the provision made during the year amounting to Rs 7098.56 lacs.

ii Movement during the financial period is set out below

B Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities
Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs)

The following table presents fair value hierarchy of assets and liabilities measured at fair value on a recurring basis as of :
There are no Financial Asset / Liability which are carried through FVTPL or FVTOCI and therfore the Fair value hirerachy details is not given

ii Financial risk management

The companies activities exposes it to market risk, liquidity risk and credit risk.
This note explains the source of risk which the entity is exposed to and how the entity is manage the risk.

Risk	Exposure arising from	Management
Credit risk	Cash and cash equivalents, financial assets measured at amortised cost.	Diversification of bank deposits and credit limits
Market risk — interest rate	Longterm borrowings at Floating rate	Actively managed
Liquidity risk	Trade Payables,borrowings and other liabilities	Availability of committed credit lines and borrowing facilities

The Company's risk management is carried out by a project finance team and treasury team group under policies approved by board of directors. Company treasury identifies, evaluates and hedges financial risk in close co-operation with the group's operating units. The Management of the Company provides principles for overall risk management, as well as policies covering specific areas, such as , interest rate risk, and credit risk and investments of excess liquidity.

(a) Credit Risk
The company engaged In infrastructure development and construction business under BOT Credit risk is the risk that counterparty will not meet its obligations leading to a financial loss. Financial assets that are potentially subject to concentrations of credit risk and failures by counter-parties to discharge their obligations in full or in a timely manner consist principally of cash, cash equivalents and trade and other accounts receivable. Credit risk on cash balances with Bank are limited because the counterparties are entities with acceptable credit ratings.

31 Fair Value Heirarchy and Financial Risk Management Note

(b) Market Risk - Interest rate risk

The exposure of the Company's borrowing is linked to Bank base rate plus fixed spread .base rate are subject to change in market condition to interest rate changes at the end of the reporting period are as follows:

Particulars	Year ended March 31, 2023	Year ended March 31, 2022
Floating Rate borrowings	63,474.87	67,816.06
Total borrowings	**63,474.87**	**67,816.06**

(ii) Sensitivity analysis

Profit or loss is sensitive to higher/lower interest income from borrowings as a result of changes in interest rates.

Impact on Profit after Tax	Year ended March 31, 2023	Year ended March 31, 2022
Interest rates - increase by 50 basis points	(317.37)	(339.08)
Interest rates - decrease by 50 basis points	317.37	339.08

(b) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. The Company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flows.

(i) Maturities of financial liabilities

39 Contingent Asset

i Due to delay in issuance of Completion Certificate for Non-PCOD & Non-Bypass stretches to the Concessionaire it has the resulted in Revenue loss for such use of project highway since 01-Apr-21 to 13-May-21. The Concessionaire has incurred the revenue losses till 13-May-2021 at Rs. 405.79 Lakhs NHAI has requested IE for its comments on this claim letters of BFHL.

ii On account of Force Majeure Event/ Change in Law occurred due to COVID-19 pandemic BFHL has submitted claim to the NHAI for reimbursement of loss incurred from time to time. Numerous letters are issued on this account, recent letter being dated 08.10.2020 vide which it has claimed Rs. 2613 Lakhs + extension of concession period of 71.4 days towards this loss. However, IE or NHAI is yet to reply to these claim letters of BFHL.

iii Company has collected fees for non compliance with FASTag rules and even under the original terms of the Concession Agreement (CA), the Company (Concessionaire) is entitled to retain.However for the purpose of availing NOC for stake sale the company has paid Fastag fees along with interest amounting to Rs 374.85 lakhs to NHAI pursuant to compliance against various letters received from NHAI demanding Fastag fees. The Company contests that the said amount stands receivable from NHAI.

iii Company has collected fees for non compliance with FASTag rules and even under the original terms of the Concession Agreement (CA), the Company (Concessionaire) is entitled to retain.However for the purpose of availing NOC for stake sale the company has paid Fastag fees along with interest amounting to Rs 374.85 lakhs to NHAI pursuant to compliance against various letters received from NHAI demanding Fastag fees. The Company contests that the said amount stands receivable from NHAI.

40 Company has collected fees for non compliance with FASTag rules and even under the original terms of the Concession Agreement (CA), the Company (Concessionaire) is entitled to retain all Fees collected under the CA, and the said provision remains unchanged even after the fee structure for non compliance with FASTag rules and the fees payable there on. Accordingly, the Concessionaire is legitimately entitled to collect and retain the additional Fee collected from the vehicles not fitted with FASTag or vehicle without valid, functional FASTag entering into FASTag lane of the Fee plazas.
In addition, Sub-rule (1) para 3 of Rule 7 (Remittance and appropriation of fee) of the National Highways Fee (Determination of Rates and collection) Rules, 2008, states that "Provided further that in case of a private investment projects, the fee collected under the provisions of these rules shall be appropriated by the Concessionaire in accordance with the provisions of and for the performance of its obligations under the agreement entered into by such Concessionaire". Thus, any fee, which is collected from the users shall be appropriated by the Concessionaire for fulfilling its obligations.
Accordingly the Company has accounted the entire collection as toll revenue and has responded to NHAI letter.

During the year ended 31 March 2023, the Company has received the letter from NHAI dated 20 September 2022 addressed to Independent Engineer(IE) asking to submit its report upon fast-tag recovery from concessioner Independent Engineer; In its report dated 30 September 2022 IE stated Fasttag recovery of Rs 305.28 Lakhs along with interest of Rs 40.76 Lakhs. Letters for Fasttag recovery where also received by the Company from NHAI in previous year ended 31 March 2022 dated September 7, 2021 and September 22, 2021 for depositing the FASTag and TCS on Fastag with in a week, and interest @ 5% for non-submission of aforesaid amount. In response to the same the Company had written letter clarifying the its position vide Concession Agreement. However during the year ended 31 March 2023, for the purpose of availing NOC for stake sale, the company has paid Fastag fees along with interest amounting to Rs 374.84 lakhs to NHAI under protest as Fasttag fees pursuant to compliance against various letters received from NHAI demanding Fastag fees. However the company still continues to recover the amount paid under protest from NHAI.

41 The Company has entered into an Agreement with the Purchaser Cube Highways and Infrastructure V PTE LTD, being a company based in Singapore and incorporated with the objective of acquiring and operating transportation projects to purchase the shares from the Company (including the purchase of seller nominee shares by the purchaser nominees from the seller nominees) and the Company has agreed to sell the shares to the Purchaser (including the sale of such portion of the sale shares which are held by the seller nominees to purchaser nominees).

42 **Relationship with struck-off companies:** The information about transaction with struck off companies (defined under section 248 of the companies Act 2013 or section 560 of the Companies Act 1956) has been determined to the extent such parties have been identified on the basis of information available with the company and the same is relied upon by the auditor.

42 **Previous years figures**
Previous years figures have been regrouped/reclassified/recasted wherever necessary including to conform current year classification.

43 The balance sheet, statement of profit and loss, statement of changes in equity, statement of significant accounting policies and the other explanatory notes forms an integral part of the financial statements of the Company for the year ended March 31, 2023.

INDEPENDENT AUDITOR'S REPORT

To
The Members of,
Western MP Infrastructure & Toll Roads Pvt. Ltd.

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of **Western MP Infrastructure & Toll Roads Pvt. Ltd.**("the Company"), which comprise the Balance Sheet as at March 31, 2025, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, notes to the financial statement and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, the **Profit** and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence on the Standalone Financial Statement obtained by us is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The company has made major maintenance work during the current financial year.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Corporate Governance and Shareholder's Information, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and those charged with governance for the Standalone Financial Statements

The Company's Management and Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance, including other comprehensive income, changes in equity and cash flows of the Company in accordance with accounting principles generally accepted in India, including Indian Accounting Standards (Ind AS) prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management and Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the **"Annexure A"** a statement on the matters specified in paragraphs 3 and 4 of the Order to the extent applicable.

2. As required by section 143 (3) of the Act, we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;

   b) In our opinion, proper books of account, as required by law and having regard to the nature of the business of company have been kept by the Company so far as it appears from our examination of those books, as also reported in point no 6 of this report:

   c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income and the Statement of Cash Flows and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account:

   d) In our opinion, the aforesaid financial statements comply with the Indian Accounting Standards (IND AS) specified under section 133 of the Act and rules made there under, as applicable;

   e) On the basis of written representations received from management as on March 31, 2025 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2025 from being appointed as a director in terms of Section 164(2) of the Act.

   f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in **"Annexure B"**.

g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

1. The Company does not have any pending litigations which would have impact on its financial position.

2. The Company does not have any long-term contracts including derivative contracts against which there are any material foreseeable losses.

3. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

4. (i). Based on the representation received from the Management, other than those disclosed in the notes to the financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries")with the understanding that the intermediary shall lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company/ funding party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

(ii) Based on the representation received from the Management, that, to the best of it's knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been received by the company from any person(s) or entity(ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

(iii) Based on audit procedures we have considered reasonable and appropriate in the circumstances; nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) contain any material mis-statement.

5. The Company has neither declared nor paid any dividend during the year.

6. Based on our examination which included test checks, and as per the requirements of Rule 3(1) of the Companies (Accounts) Rules 2014, the Company uses:

a) SAP S/4 HANA as its accounting software operated for recording all the accounting transactions which has a feature of recording audit trail (edit log) facility for all relevant transactions recorded in the software;
b) A third-party software for maintaining revenue records, and in absence of an independent service auditor's report covering the requirement of audit trail, the Company is unable to conclude whether audit trail feature of this software was enabled and operated throughout the year or whether there were any instances of the audit trail feature been tampered with.
c) A third-party software for maintaining payroll records, for which the independent service auditor's report specified that the said software has a feature of recording audit trail (edit log) facility and the same has operated throughout the year.

The audit trail feature in respect of the aforesaid accounting software(s) is not being tampered with for the period for which the audit trail feature was enabled and operating. Additionally, the audit trail that was enabled and operated for the year ended March 31, 2024, has been preserved by the Company as per the statutory requirements for record retention.

The Company has established and maintained an adequate internal control framework and based on its assessment, believes that this was effective as of March 31, 2025.

ANNEXURE A

To the Independent Auditors' Report on

Financial Statements of Western MP Infrastructure & Toll Roads Pvt. Ltd.

(Referred to our report of even date)

The Annexure referred to in our Independent Auditors' Report to the members of the Company on the financial statements for the year ended March 31, 2025, we report that:

i. In respect of Property, Plant & Equipment

a) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant & Equipment and Intangible assets.

b) According to information and explanations given to us and on the basis of our examination of the records of the company, the Property, Plant & Equipment have been physically verified during the year by the management under a regular programme of verification by rotation over a period of three years, which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed.

c) According to information and explanations given to us and on the basis of our examination of the records of the company, the title deeds of immovable properties forming part of the Property, Plant & Equipment are held in the name of the Company.

d) According to information and explanations given to us and on the basis of our examination of the records of the company, the company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets or both during the year.

e) According to information and explanations given to us and on the basis of our examination of the records of the company, there are no proceedings initiated or are pending against the company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and rules made thereunder.

ii. In respect of Inventory

The Company holds inventories. In our opinion, physical verification of inventories has been conducted at reasonable intervals by the management. The coverage and procedure of such verification are, in our opinion, appropriate having regard to the size of the Company and the nature of its business. On the basis of our examination of the records of the Company, no discrepancies of 10% or more in the aggregate for each class of inventory were noticed on such verification and the discrepancies, if any, have been properly dealt with in the books of account.

iii. In respect of loan granted:

According to information and explanations given to us and on the basis of our examination of the records of the company, the company has made any investments, provided guarantee or security or granted any advance in nature of loans, secured or unsecured to Companies, Firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Companies Act, The Amount taken as unsecured loan is amounting to Rs. Nil (Previous Year Rs. Nil).

iv. In respect of compliance of section 185 and 186 of The Companies Act, 2013

According to information and explanations given to us and on the basis of our examination of the records of the company, in our opinion the company has not advanced any loans, made investments, gave guarantees, and provided security prescribed in provisions of section 185 and 186 of the companies Act, 2013.

v. In respect of public deposits

In our opinion and according to the information and explanations given to us and on the basis of our examination, the Company has not accepted any deposit from the public within the meaning of the provisions of sections 73 to 76 or any relevant provisions of the Companies Act, 2013 and the rules framed there under.

vi. In respect of Cost Records:

According to the information and explanations given to us, the maintenance of cost records has been specified by the central government under the section 148(1) of the Companies Act, 2013 related to road tolling business under BOT basis activities carried out by the company. And are of the opinion that prima facie, the specified accounts and records have been made and maintained.

vii. In respect of statutory dues:

a) According to the records of the Company, the Company is generally regular in depositing with appropriate authorities undisputed statutory dues including provident fund, employees' state insurance, income-tax, duty of custom, goods & service tax, cess and other statutory dues applicable to it. As per the records of the Company, as at March 31, 2025, the Company does not have any undisputed statutory dues which are outstanding for a period of more than six months from the date they became payable.

b) According to the information and explanations given to us and on the basis of examination of records of the company there is no dispute in respect of income tax or sales tax or service tax or value added tax or GST or any other cess.

viii. In respect of undisclosed Income

In our opinion and according to the information and explanations given to us and based on our examination of the records of the company, there were no such unrecorded transaction in the books of account which were surrendered or disclosed as income during the year in tax assessments under Income Tax Act, 1961 (43 of 1961).

ix. In respect of repayment of loan

According to the information and explanations given to us, based on our examination of the records of the company and on the basis of overall examination of the Balance Sheet of the Company,

a) The company has not defaulted in repayment of loans or borrowing to a financial institution or bank.
b) The company has not been declared willful defaulter by any bank or financial institution.
c) In our opinion the term loan were applied for the purpose for which the loan was obtained.
d) No such short term loan funds have been utilized for long term purpose.
e) The company has not raised any fund from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
f) The company has not raised any loan during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies.

x. In respect of funds raised through IPO/FPO/Debt finance

a) On the basis of overall examination of the Balance Sheet of the Company, according to the information and explanations provided to us and based on our examination of the records of the company we report that monies raised by way of term loans were applied for the purposes for which those were raised. The Company did not raise any money by way of initial public offer or further public offer (including debt instrument).
b) In our opinion and according to the information and explanations given to us as well as based on our examination of the records of the company, the company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year under section 42 and section 62 of the Companies Act, 2013.

xi. In respect of fraud reporting

a) According to the information and explanations given to us and based on our examination of the records of the company, no material fraud by the Company or on the Company by its officers or employees was noticed or reported during the year.
b) According to the information and explanations given to us and based on our examination of the records of the company, no report under sub-section (12) of section 143 of the Companies Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.
c) According to the information and explanations given to us and based on our examination of the records of the company, there are no whistle blower complaints received by the Company during the year.

xii. In respect of Nidhi Company

According to the information and explanations given to us, the Company is not a Nidhi Company. Accordingly, paragraph 3(xii) of the Order is not applicable.

xiii. In Respect of Transactions With Related Parties

According to the information and explanations given to us, transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and details of such transactions have been disclosed in the financial statements as required by the applicable accounting standards.

xiv. In Respect of Internal Audit System

According to the information and explanations given to us and based on our examination of the records of the Company, the company has appropriate internal audit system commensurate with the size and nature of its business and the reports of the Internal Auditors for the period under audit were considered by us.

xv. In respect of Non-Cash Transactions

According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with him. Accordingly, paragraph 3(xv) of the Order are not applicable.

xvi. In respect of compliance of section 45IA of the RBI Act, 1934

a) The Company is not required to be registered under section 45 IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi)(a)of the Order is not applicable.
b) The Company is not required to be registered under section 45 IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi)(b)of the Order is not applicable.
c) The Company is not a core investment company (CIC) as defined in the regulations made by the reserve Bank of India. Accordingly, clause 3(xvi)(c) of the order is not applicable.
d) According to information and explanations given to us during the course of audit, there is no core investment company within the Group (as defined in the Core Investment Companies (Reserve Bank) Directions, 2016) and accordingly reporting under clause 3(xvi)(d) of the Order is not applicable.

xvii. In respect of Cash losses

The company has not incurred any cash losses in the current financial year and in the immediately preceding financial year.

xviii. In respect of resignation of statutory auditors

There has been no resignation of the statutory auditors during the year.

xix. In respect of any material uncertainty to meet liability

In our opinion and according to the information and explanations given to us and based on our examination of the records of the Company, on the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements ,our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which cause us to believe that any material uncertainty exists as on the date of the audit report that the company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

xx. In Respect of Unspent Amount Under Section 135(5) of The Companies Act, 2013

a. In our opinion and according to the information and explanations given to us and based on our examination of the records of the Company, there was no such unspent amount to be transferred to fund specified in Schedule VII to the Companies Act. Accordingly, paragraphs 3(xx)(a) of the Order are not applicable.

b. The Company have ongoing projects under section 135 of the Companies Act. Accordingly, paragraphs 3(xx)(b) of the Order are applicable.

ANNEXURE B

To the Independent Auditors' Report on

Financial Statements of Western MP Infrastructure & Toll Roads Pvt. Ltd.

(Referred to our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Western MP Infrastructure & Toll Roads Pvt. Ltd.**("the Company") as of March 31, 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal finance controls system over financial reporting and such internal financial controls over financial reporting with reference to Standalone Financial Statements were operating effectively as at 31st March 2025, based on the Internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting with reference to Standalone Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial control over financial reporting based on our audit with reference to Standalone Financial Statements. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the Guidance Note) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accoutering principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

(3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future period are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Statement of Cash Flows for the year ended March 31, 2025
(All amounts in ₹ lacs unless otherwise stated)

	For the Year Ended March 31, 2025	For the Year ended March 31, 2024
A. Cash flows from operating activities		
Profit/Loss before tax	**1,413.69**	**(911.14)**
Adjustments for:		
Depreciation and amortisation expense	2,730.32	2,219.77
Loss/ (Gain) on sale of property, plant and equipment (net)	34.59	-
Liabilities no longer required written back	(22.91)	(17.83)
Net Gain on sale of mutual fund	(90.09)	-
Net gain on investments measured at fair value through profit and loss	(1.35)	-
Interest income	(26.90)	(62.38)
Bad Debts written off	7.82	46.52
Provision for doubtful debt	349.93	
Finance cost	5,458.31	6,561.28
Operating Profit before working capital changes and other adjustments	**9,853.43**	**7,836.22**
Working capital changes and other adjustments:		
Decrease/(Increase) in inventories	(68.66)	-
Decrease/(Increase) in trade receivables	13.90	(89.52)
Decrease/(Increase) in other financial assets	(413.58)	(273.00)
Decrease/(Increase) in other assets	(58.08)	275.74
(Decrease)/Increase in trade payables	1,457.67	501.21
(Decrease)/Increase in provisions	(4,991.55)	1,696.07
(Decrease)/Increase in other financial liabilities	174.11	-
(Decrease)/Increase in other liabilities	58.83	8.90
Cash flow from operating activities post working capital changes	**6,026.06**	**9,955.62**
Income tax (paid) / refund	2.07	278.52
Net cash flow from operating activities (A)	**6,028.13**	**10,234.14**
B. Cash flows from investing activities		
Payment for purchase of property, plant and equipment, investment properties and intangible assets	(114.89)	(83.99)
Maturity/ (investment) in bank deposits other than cash and cash equivalents including deposit under lien (net)	(99.81)	207.59
Investment/(net redemption) from mutual funds (net)	(138.11)	(0.27)
Interest received	16.96	61.79
Net cash from in investing activities (B)	**(335.85)**	**185.12**
C. Cash flows from financing activities		
Proceeds from long term borrowings	44,173.44	-
Payment of long term borrowings	(49,004.50)	(6,484.07)
Payment of processing fee	(301.50)	-
Proceeds from non convertible debentures	4,100.00	1,400.00
Interest paid	(4,651.22)	(5,391.32)
Net cash used in financing activities (C)	**(5,683.79)**	**(10,475.39)**
D. Net decrease in Cash and cash equivalents (A+B+C)	**8.49**	**(56.13)**
E. Cash and cash equivalents at the beginning of the year	283.49	339.62
Cash and cash equivalents at the end of the year (D+E) (Refer reconciliation below)	**291.98**	**283.49**
Reconciliation of Cash and cash equivalents as per Statement of cash flow		
Cash and cash equivalents as per above comprise of following:		
Cash and cash equivalents (Refer note 11)	291.98	283.49
Balance as per Statement of cash flow	**291.98**	**283.49**

Note:
The above cash flows has been prepared under the 'Indirect Method' as set out in Ind AS 7, 'Statement of Cash Flows'.

Changes in liabilities arising from financing activities

Particulars	Balance as at April 01, 2024	Cash flows from financing activities		Finance cost (Non-cash adjustment)	Balance as at March 31, 2025
		Inflow	Outflow		
Term loan	48,249.13	44,173.44	(49,004.50)	178.67	43,596.74
Non convertible debentures from related party	1,400.00	4,100.00	-	-	5,500.00
Total liabilities from financing activities	**48,249.13**	**48,273.44**	**(49,004.50)**	**178.67**	**49,096.74**

Western M P Infrastructure & Toll Roads Private Limited
Notes to financial statements for the year ended March 31, 2025

1. Corporate Information

The Company Western M P Infrastructure & Toll Roads Private Limited (the 'Company') has been awarded road project in the state of Madhya Pradesh for development of Lebad-Jaora section from km.0.00 to km.125.00 on SH-31 by Madhya Pradesh Road Development Corporation Limited (MPRDC) on Built Operate Transfer (BOT) basis. The concession period is 30 years (including 5 year extension). The registered office is located at A/15, Mahavir Nagar, CHS Factory Lane, Boriwali West, Mumbai Suburban, Maharashtra-400092, India.

2. Material Accounting Policies

(i) Statement of Compliance

The Financial Statements of the Company have been prepared in accordance with the Indian Accounting Standards (Ind AS) prescribed under section 133 of the Companies Act , 2013 ("the Act") read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, presentation and disclosure requirements of Division II of Schedule III to the Companies Act, 2013, and other accounting principles generally accepted in India.

(ii) Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

The Company maintains its accounts on accrual basis following the historical cost convention except for the following:

- certain financial assets and liabilities measured at fair value

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard required a change in accounting policy hitherto in use. Amounts in the financial statements are presented in Indian Rupees rounded off to Lacs until unless otherwise stated.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company considers the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that entity can access at measurement date.

- Level 2 inputs other than quoted prices included in Level 1, that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and

- Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Impact of the initial application of new and amended IND ASs that are effective for current year:

a. The Ministry of Corporate Affairs (MCA) notified the Ind AS 117, Insurance Contracts, vide notification dated 12 August 2024, under the Companies (Indian Accounting Standards) Amendment Rules, 2024, which is effective from annual reporting periods beginning on or after 1 April 2024. The Company does not have any contracts that meets the definition of an insurance contract under IND AS 117 and hence the amendments do not have any impact on the Company's financial statements

b. The MCA notified the Companies (Indian Accounting Standards) Second Amendment Rules, 2024, which amend Ind AS 116, Leases, with respect to Lease Liability in a Sale and Leaseback. The amendment is effective for annual reporting periods beginning on or after 1 April 2024 and must be applied retrospectively in accordance with IND AS 8 to sale and leaseback transactions entered into after the date of initial application of Ind AS 116. The amendments do not have any impact on the Company's financial statements.

(iii) Current and non-current classification

Based on the time involved between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has identified twelve months as its operating cycle for determining current and non-current classification of assets and liabilities in the balance sheet.

(iv) Foreign currency translation

The financial statements are presented in Indian Rupee (INR), which is the company's functional and presentational currency. Foreign currency transactions are recorded at the exchange rate prevailing on the date of the respective transactions between the functional currency and the foreign currency.

Monetary items

Monetary foreign currency assets and liabilities remaining unsettled at the Balance Sheet date are translated at the rates of exchange prevailing on that date. Gains / losses arising on account of realisation / settlement of foreign currency transactions and on translation of foreign currency assets and liabilities are recognized in the Statement of Profit and Loss.

Exchange differences arising on the settlement of monetary items or on reporting date's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise.

(v) Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has concluded that it is the principal in its revenue arrangements because it typically controls the services before transferring them to the customer. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the transaction price of the consideration received or receivable, excluding the estimates of variable consideration that is allocated to that performance obligation, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The specific recognition criteria described below must also be met before revenue is recognised.

Revenue is recognised either at a point in time or over time, when (or as) the Company satisfies performance obligations by transferring the promised goods or services to its customers.

The Company's revenue is divided into following categories:

a). Service Concession Arrangements
The Company operate and maintain roads and other infrastructure assets under public-to-private Service Concession Arrangements (SCAs), which is an arrangement between the "grantor" (a public sector entity/authority) and the "operator" (a private sector entity) to provide services that give the public access to major economic and social facilities utilizing private-sector funds and expertise.
With respect to SCA, revenue and costs are allocated between those relating to construction services, if any and those relating to operation and maintenance services and are accounted for separately. Consideration received or receivable is allocated by reference to the relative fair value of services delivered when the amounts are separately identifiable.

Toll collections from the users of the infrastructure facility operated or maintained by the Company under the Service Concession Arrangements are accounted for based on actual collection (net of amount charged over and above the normal user fee payable to MPRDC). Revenue from electronic toll collection is recognized on accrual basis.

b). Revenue from construction contracts

Contract revenue for fixed price contracts is recognized only to the extent of cost incurred that it is probable will be recoverable till such time the outcome of the job cannot be ascertained reliably. When the outcome of the contract is ascertained reliably, contract revenue is recognized at cost of work performed on the contract plus proportionate margin, using the percentage of completion method.

Percentage of completion is determined based on the proportion of actual cost incurred to the total estimated cost of the project. The percentage of completion method is applied on a cumulative basis in each accounting period to the current estimates of contract revenue and contract costs. The effect of a change in the estimate of contract revenue or contract costs, or the effect of a change in the estimate of the outcome of a contract, is accounted for as a change in accounting estimate and the effect of which are recognized in the Statement of Profit and Loss in the period in which the change is made and in subsequent periods.

For the purposes of recognising revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that it is probable that they will result in revenue and they are capable of being reliably measured. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense in the Statement of Profit and Loss in the period in which such probability occurs.

c). Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest is accrued on time proportion basis, by reference to the principle outstanding at the effective interest rate. All other income is recognized on accrual basis when no significant uncertainty exists on their receipt.

(vi) Intangible assets

Intangible assets are recognized when it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortization, and cumulative impairment, if any.

Rights under Service Concession Arrangements (SCA)

Toll collection rights are stated at cost, less accumulated amortisation, impairment losses, if any. Cost includes fair value of upfront payments towards acquisition and incidental expenses related thereto, and of corresponding obligations of the Company under the Concession Agreement entered with MPRDC related to construction /improvements of the Project Highway granted to the Company.

Toll collection rights are capitalized as intangible assets on the Appointed Date in terms of the Concession Agreement.

Amortization of Rights under SCA

Toll collection rights in respect of road projects are amortized over the period of concession using the revenue-based amortization method prescribed under Schedule II to the Companies Act, 2013. Under the revenue-based method, amortization is based on proportion of actual revenue earned for the year over the sum of actual revenue for the current year and projected revenue from Toll Road Carriageway expected to be earned over the balance concession period as estimated by the management. Total projected revenue is reviewed at the end of each financial year and is adjusted to reflect the changes in earlier estimate vis-a-vis the actual revenue earned till the end of the year so that the whole of the cost of the intangible asset is amortized over the concession period.

(vii) Cash and cash equivalents

Cash and cash equivalents in the balance sheet and as considered for purpose of the statement of cash flows comprise of cash at banks and on hand, and short-term deposits with an original maturity of three months or less. For purpose of statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

(viii) Statement of Cash Flows

Statement of Cash Flows is prepared segregating the cash flows from operating, investing and financing activities. Cash flow from operating activities is reported using indirect method. Under the indirect method, the net profit/(loss) is adjusted for the effects of:

(a) transactions of a non-cash nature;
(b) any deferrals or accruals of past or future operating cash receipts or payments and,
(c) all other items of income or expense associated with investing or financing cash flows.

The cash flows from operating, investing and financing activities of the Group are segregated based on the available information. Cash and cash equivalents are reflected as such in the Statement of Cash Flows and excludes balances which are not available for general use as on the date of Balance Sheet with a specific disclosure.

(ix) Borrowings

Borrowings are initially recognized at fair value, net of transaction cost incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using effective interest method.

The fair value of the liability portion of the optionally convertible debentures is determined using a market interest rate for equivalent instrument. The amount is recorded as a liability on an amortized cost basis until extinguished on conversion or redemption of debentures. The reminder of the proceeds is attributable to the equity portion of the compound instrument. This is recognized and included in shareholders' equity, net of income tax effects, and not subsequently remeasured.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other gains/(losses).

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if lender agreed, after the reporting period and before the approval of the financial statement for issue, not to demand payment as a consequence of the breach.

Classification as debt or equity
Debt and equity instruments issued by Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

(x) Borrowing costs

Borrowing costs include interest calculated using the effective interest method, amortization of ancillary costs and other costs the Company incurs in connection with the borrowing of funds.
Other borrowing costs are expensed in the period in which they are incurred.

(xi) Leases

Leases are recognized as a right-to-use assets and corresponding liability at the date at which the leased asset is available for use by the Company. The Company currently has only short-term leases and leases of low-value assets, which are accounted for as under.

Short-term leases and leases of low-value assets
Short term leases are leases with a term of twelve months or less. For short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

(xii) Provisions, contingent liabilities, and contingent assets

A provision is recognized when the Company has a present obligation (legal or constructive) as a result of past events and it is probable that the Company will be required to settle the obligation in respect of which a reliable estimate can be made.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that the reimbursement will be received, and the amount of the receivable can be measured reliably.

Contingent liabilities are disclosed in notes in case of a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation or a present obligation arising from past events, when no reliable estimate is possible.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. Contingent assets are not recognised but disclosed only when an inflow of economic benefits is probable.

(xiii) Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. However, transaction costs directly attributable to the

acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL") are recognized immediately in the Statement of Profit and Loss.

If the Company determines that the fair value at initial recognition differs from the transaction price, the Company accounts for that instrument at that date as follows:

- at the measurement basis mentioned above if that fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets. Company recognises the difference between the fair value at initial recognition and the transaction price as a gain or loss.
- in all other cases, at the measurement basis mentioned above, adjusted to defer the difference between the fair value at initial recognition and the transaction price. After initial recognition, the Company recognises that deferred difference as a gain or loss only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability.

Subsequent measurement of financial assets and financial liabilities is described below.

a) Financial Assets

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets

(i) Classification of Financial Assets

Financial assets that meet the following conditions are subsequently measured at amortised cost (unless the same are designated as fair value through profit or loss (FVTPL)):

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at FVTPL is a residual category and all changes are recognized in profit or loss.

(ii) Amortized cost and effective interest method

Income is recognized on an effective interest method as per Ind AS 109 for financial assets other than those financial assets classified as at FVTPL. Interest income is recognized in the Statement of Profit and Loss and is included in the "Other income" line item.

(iii) Impairment of financial assets (Expected credit loss model)

An impairment loss on financial asset is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. Impairment loss if any are recognised in Statement of Profit and Loss for the period.

(iv) De-recognition of financial assets

The Company derecognize a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On de-recognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in the Statement of Profit or Loss on disposal of that financial asset.

b) Financial Liabilities

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Loans and borrowings are subsequently measured at amortized costs using Effective Interest Rate method.

Financial liabilities at fair value through profit or loss (FVTPL) are subsequently measured at fair value.

De-recognition of financial liabilities

Financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of the new liability. The difference in the respective carried amount is recognized in the Statement of Profit and Loss.

c) Classification as debt or equity

Debt and equity instruments issued by Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

(xiv) Earnings per share

i. *Basic earnings per share* is computed by dividing the profit / (loss) for the year by the weighted average number of equity shares outstanding during the year.

ii. *Diluted earnings per share* is computed by dividing the profit / (loss) for the year as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

(xv) Income tax

The income tax expense or credit for the year is the tax payable on current year's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. The current income tax charge is calculated based on tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates, positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and provisions are established where appropriate based on amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However deferred income tax is not accounted if it arises from the initial recognition of an asset or liability that at the time of the transaction affects neither the accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset/liability is realized or settled.

Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity wherein the related tax is also recognized in other comprehensive income or directly in equity, respectively.

(xvi) Impairment of non-financial assets

The carrying values of assets / cash generating units at each reporting date are reviewed for impairment if any indication of impairment exists. If any indication exists, the Company estimates the asset's recoverable amount.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the Statement of Profit and Loss.

The recoverable amount is the higher of the fair value less costs of disposal and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset for which the estimated future cash flows have not been adjusted.
When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognized.

(xvii) Employee benefits

Employee benefits includes provident fund, gratuity and compensated absences.

i. Short term Employee Benefit

All employee benefits falling due wholly within twelve months of rendering the service are classified as short-term employee benefits. The benefits like salaries, wages, short term compensated absences etc. and the expected cost of bonus, and ex-gratia are recognized in the period the related service is rendered at undiscounted amount of benefits expected to be paid in exchange for that service.
The cost of short-term compensated absences is accounted as under:
(a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
(b) in case of non-accumulating compensated absences, when the absences occur.

ii. Post-employment benefits

(a) Defined contribution plans:

The Company offers its employees State governed provident fund linked with employee pension scheme as defined contribution plans. The contribution paid/ payable under the scheme is recognized during the period in which the employee renders the related service.

(b) Defined benefit plans:

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re- measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service

costs are recognized in profit or loss on the earlier of the date of the plan amendment or curtailment, and the date that the Company recognizes related restructuring costs.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.
Defined benefit costs are categorized as follows:
• service cost (including current service cost, past service cost, as well as gains and losses on curtailments) and
• net interest expense or income; and
• re-measurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

(c) Other long-term employee benefits

The obligation for other long-term employee benefits such as long term compensated absences, are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

(xviii) Segment reporting:

The Company has only one reportable segment, which is operation and maintenance of Toll road projects on a Built Operate Transfer (BOT) basis. The Chief Operational Decision Maker monitors the operating results as one single segment for the purpose of making decisions about resource allocation and performance assessment. Considering the nature of Company's business and operations, there are no separate reportable segments (business and/or geographical) in accordance with the requirements of Indian Accounting Standard 108 'Segment Reporting'.

(xix) Provision for periodic major maintenance

The Company provides for contractual obligations as per Service Concession Arrangement (SCA) with MPRDC to restore the infrastructure to a specified level of serviceability at periodic intervals or restore the infrastructure to a specified condition before it is handed over to MPRDC. Provisions are measured based on management's estimate required to settle the obligation at the balance sheet date and are discounted using a rate that reflects the time value of money. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost. The same is reviewed at each balance sheet date and adjustments if any to the carrying amount is provided for accordingly.

(xx) Earnings before Interest, Tax, Depreciation and Amortization

Earnings before Interest, Tax, Depreciation and Amortization disclosed in the Statement of Profit and Loss are computed as under:

Total income less Company's expenses other than finance costs, tax expenses, depreciation and amortization, as appearing in the Statement of Profit and Loss.

(xxi) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost of inventories include all costs incurred in bringing the inventories to their present location and condition. Costs are assigned to individual items of inventory based on first-in-first-out basis. Cost of purchased inventory are determined after deducting rebates and discounts.

(xxii) Insurance claims

Insurance claims are accounted for based on claims admitted/expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

(xxiii) Recent Accounting Pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. There is no such notification which would have been applicable from April 01,2025.

(xxiv) Critical accounting judgements and key sources of estimation uncertainty

The preparation of these financial statements in conformity with Ind AS requires the management to make judgements, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses, and the accompanying disclosures, and the disclosure of contingent liabilities.

The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates and the differences between the actual results and the estimates are recognized in the periods in which the results are known / materialize.

1) Applicability of service concession arrangement accounting to toll roads concessionaire arrangements

The Company has determined that Appendix C of Ind AS 115 'Service concession arrangements' is applicable to the Company which provides on accounting by the operators for public to private service concession arrangements. The Company has entered into concession arrangement with Madhya Pradesh Road Development Corporation Limited (MPRDC) as per which the Company would participate in the built Operate Transfer (BOT) basis the toll roads infrastructure. After the end of the Concession arrangement, the Company has to transfer the infrastructure i.e. toll roads constructed to MPRDC.

2) Useful lives of property, plant and equipment

The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. The useful lives and residual values of Company's assets are determined by management at the time the asset is acquired and reviewed at each financial year end.

3) Obligations relating to employee benefits

The employee benefit obligation depends on several factors that are determined on an actuarial basis using several assumptions. The assumptions used in determining the net cost/ (income) include the discount rate, inflation and mortality assumptions. Any changes in these assumptions will impact upon the carrying amount of employment benefit obligations.

4) Provision for income taxes and deferred tax

Judgements are involved in determining the provision for income taxes including judgement on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve interpretation issues, which can only be resolved over extended time periods.

Significant management judgement is also required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company reviews the carrying amount of deferred tax assets at the end of each reporting period.

5) Impairment of intangible assets - Rights under Service Concession Arrangements

Management uses the estimated future cash flows in assessing value in use for intangible assets. Future estimated cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset for which the estimated future cash flows have not been adjusted.

The inputs to the valuation models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as Traffic growth rates, WACC, Tax rates, Inflation rates etc.

6) Amortisation of intangible assets - Rights under Service Concession Arrangements

The Company amortise the intangible assets - Rights under Service Concession Arrangements over the balance concession period. The concession period as per the Concession Agreement (refer note 1) is subject to the certain extensions dependent on achieving certain revenue targets in future. The Company uses revenue projections for estimating the extensions in concession period in terms of the Concession. The revenue projections are based on assumptions made by the management regarding future traffic growth and inflation factor for assessing user toll fee as supported by the studies from the third-party independent consultant.

7) Provision for periodic major maintenance

The Company estimates and provides for contractual obligations as per Service Concession Arrangement (SCA) with NHAI to restore the infrastructure to a specified level of serviceability at periodic intervals during the SCA period or before it is handed over to NHAI. These estimates are corroborated through purchase orders/ work orders placed or to be placed by the Company as per the road survey reports issued by an independent field expert and major maintenance strategy/ methodology approved by the Independent Consultant appointed by NHAI. As the estimated cost is based on the various assumptions such as current infrastructure (road, pavements, etc.) condition, inflation in material cost, government policies etc., hence the Management is required to apply judgement over these factors for revalidating the provision expenses which is reviewed on annual basis.

31 Earnings per share (EPS)

The following table reflects the income and share data used in the basic and diluted EPS computations:

Profit/ (loss) attributable to equity holders:		
Profit/(loss) for the year attributable to owners of the Company for calculating basic earnings per share	894.98	(3,084.04)
Profit/(loss) for the year attributable to owners of the Company for calculating diluted earnings per share	894.98	(3,084.04)
Weighted average number of equity shares outstanding for calculating basic earnings per share	2,91,34,648	2,91,34,648
Weighted average number of equity shares outstanding for calculating diluted earnings per share	2,91,34,648	2,91,34,648
Earnings per share (Face value of ₹ 10 each)		
Basic earnings per share (₹ in absoulute amount)	3.07	(10.59)
Diluted earnings per share (₹ in absoulute amount)	3.07	(10.59)

There have been no other transactions involving Equity shares or potential Equity shares between the reporting date and the date of authorisation of these financial statements.

(All amounts in ₹ lacs unless otherwise stated)

32 Tax expense	**As at March 31, 2025**	**As at March 31, 2024**
(i) Income tax expense recognised in Statement of Profit and Loss		
Deferred tax expense/(income)	518.71	2,172.91
	518.71	**2,172.91**

The major components of income tax expense and the reconciliation of expense based on the domestic effective tax rate and the reported tax expense in profit or loss are as follows :

Particulars		
Profit/ (Loss) before tax	1,413.69	(911.14)
Income tax using the Company's domestic tax rate	25.17%	25.17%
Expected tax expense [A]	**355.80**	**(229.32)**
Tax effect of adjustment to reconcile expected income tax expense to reported income tax expense:		
Impact due to restatements	-	2,389.76
Effect of transactions that are not considered in determining taxable profit	6.51	12.47
Effects of deferred tax assets/liabilities on deductible temporary differences not recognised in earlier year	120.85	-
Effect due to true up adjustment of timing differences of earlier years	35.55	-
Total adjustments [B]	**162.91**	**2,402.23**
Actual tax expense [C=A+B]	**518.71**	**2,172.91**

(This space has been intentionally left blank)

33 Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits

(a) Defined contribution plan

The Company's contribution to Provident Fund amounts to ₹6.95 lacs (March 31, 2024: ₹9.85 lacs) has been recognised in the Statement of Profit and Loss under the head Employee benefit expenses.

(b) Defined benefit plans (unfunded):

The Company provides for gratuity for employees in India as per Payment of Gratuity Act, 1972. Employees who are in continuous service for 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month completed proportionately for 15 days salary multiplied for number of completed years of service.

The gratuity scheme covers substantially all regular employees. Commitments are actuarially determined at year-end. The actuarial valuation is done based on "Projected Unit Credit" method. Gains and losses of changed actuarial assumptions are charged to Statement of Profit and Loss.

Gratuity

(i) **Amount recognised in the Statement of Profit and Loss is as under:**

Description	**March 31, 2025**	**March 31, 2024**
Current service cost	2.29	0.29
Past service cost including curtailment (Gains)/Losses	-	-
Total Service Cost	**2.29**	**0.29**

(ii) **Net Interest Cost**

Description	**March 31, 2025**	**March 31, 2024**
Interest cost on defined benefit obligation	0.02	1.15
Interest income on plan assets	-	-
Net Interest Cost	**0.02**	**1.15**

(iii) **Bifurcation of Actuarial (Gain)/Loss on Obligation:**

Description	**March 31, 2025**	**March 31, 2024**
Actuarial Loss/(Gain) on arising from change in demographic assumption	0.38	-
Actuarial Loss/(Gain) on arising from change in financial assumption	0.41	0.02
Actuarial Loss/(Gain) on arising from experience adjustment	9.41	11.15
Actuarial (Loss)/Gain on for the year on obligation	**10.20**	**11.17**

(iv) **Other Comprehensive Income (OCI)**

Description	**March 31, 2025**	**March 31, 2024**
Actuarial Loss/(Gain) for the year on DBO	10.20	11.17
Actuarial Loss/(Gain) for the year on plan asset	-	-
Unrecognized actuarial Loss/(Gain) for the year	**10.20**	**11.17**

(v) **Bifurcation of PBO at the end of year in current and non current.**

Description	**March 31, 2025**	**March 31, 2024**
Current liability (Amount due within one year)	0.94	0.01
Non-Current liability (Amount due over one year)	8.09	0.30
Total PBO at the end of year	**9.03**	**0.31**

(vi) **Change in defined benefit obligation**

Description	**March 31, 2025**	**March 31, 2024**
Defined benefit liability at the start of the year	0.30	15.35
Interest Cost	0.02	1.15
Current service cost	2.29	0.29
Re-measurements (gain)/loss for the year	10.20	11.17
Benefit paid directly by the Company	(4.05)	(27.66)
Transfer in/out	0.27	-
Defined benefit liability at the end of the year	**9.03**	**0.30**

(vii) **The amount included in the balance sheet arising in respect of its defined benefit obligation/plans**

Description	**March 31, 2025**	**March 31, 2024**
Present value of defined benefit obligations/ plans	9.03	0.30
Fair value of plan assets	-	-
Net defined benefit obligation	**9.03**	**0.30**

(viii) **Sensitivity analysis for gratuity liability:**

Description	**March 31, 2025**	**March 31, 2024**
Impact of change in discount rate		
Present value of obligation at the end of the period/year	**9.03**	**0.30**
- Impact due to decrease of 1%	0.76	0.05
- Impact due to increase of 1%	(0.66)	(0.04)
Impact of change in salary increase		
Present value of obligation at the end of the period/year	**9.03**	**0.30**
- Impact due to decrease of 1%	(0.67)	(0.04)
- Impact due to increase of 1%	0.76	0.05

The above sensitivity analysis is based on a change an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligation liability recognised in the Balance Sheet.

Sensitivities due to mortality and withdrawals are not material and hence impact of change due to these not calculated.

Sensitivities as rate of increase of pensions in payment, rate of increase of pensions before retirement and life expectancy are not applicable.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

(ix) **Actuarial assumptions:**

Description	**March 31, 2025**	**March 31, 2024**
Discount rate range	6.70	7.15
Rate of increase in compensation levels range	7.00% for the first 1 year, and 5.84% thereafter	7.5% for the first year and 6.3% thereafter
Retirement age	60.00	60.00
Mortality rate	100% of IALM 2012-14	100% of IALM 2012-14
Attrition at age (Withdrawal rate %)		
- Up to 30 Years	9%	2%
- From 31 to 44 years	9%	2%
- Above 44 years	9%	2%

(x) **Maturity profile of defined benefit obligation**

Weighted average duration (based on discounted cashflows)	8 Years	17 Years

Expected cash flows over the next (valued on undiscounted basis):	**(₹ in Lacs)**	**(₹ in Lacs)**
1 year	0.94	0.01
2 to 5 years	3.44	0.04
6 to 10 years	3.64	0.06
More than 10 years	8.81	1.07

34 Contingent liabilities and claims

i) Claims against the Company not acknowledged as liability amount to Rs. 25.11 lacs for GST demand, pertaining to excess Input Tax Credit availed and short payment of tax under the Reverse Charge Mechanism. (31 March 2024: Nil)

ii) As per Clause 26 of the Concession Agreement, the Company is required to pay an additional concession fee equivalent to 4.762% of the realisable fees earned during the year following the Scheduled Commercial Operation Date (SCOD), with an incremental increase of 1% annually thereafter.

Madhya Pradesh Road Development Corporation (MPRDC), via its letter dated 16 November 2021, has raised a demand of Rs 2,952 lacs towards additional concession fees.

The Company, based on its interpretation of the Concession Agreement and subsequent developments, has recognized a provision of Rs 810 lakhs as of 31 March 2024 under "Other Financial Liabilities".

The Company had referred the matter to conciliation under Article 44.2 of the Concession Agreement. As per the Conciliation Order dated 10 August 2022, the calculation of realisable fees for additional concession fee purposes should be based on comparing current year actual PCUs with 2% higher PCUs over the immediately preceding year, rather than applying a cumulative 2% increase each year from the peak traffic levels for the entire contract period.

However, this interpretation has been further disputed and the matter remains pending final resolution by the Board of MPRDC.

Accordingly, the remaining amount of Rs 2,142 lacs (i.e. Rs 2,952 lacs less the Rs 810 lacs already recognized) is disclosed as a contingent liability, pending final determination of the methodology for calculation.

On the basis of the current status of the individual case and as per legal advice obtained by the Company, wherever applicable, the Company in confident of winning the above cases and is of view that no further provision is required in this regard.

35 Fair value disclosures

i) Fair values hierarchy

Financial assets and financial liabilities measured at fair value in the Balance Sheet are divided into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.
Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.
Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Financial assets/(liabilities) are measured at fair value - recurring fair value measurements:

As at March 31, 2025	Level 1	Level 2	Level 3	Total
Assets at fair value				
Investments measured at fair value through profit and loss		234.82	-	**234.82**

As at March 31, 2024	Level 1	Level 2	Level 3	Total
Assets at fair value				
Investments measured at fair value through profit and loss	-	5.28	-	**5.28**

Valuation process and technique used to determine fair value
The fair value of investments in mutual fund units are based on the net asset value ('NAV') as stated by the issuers of these mutual fund units in the published statements as at each reported balance sheet dates. NAV represents the price at which the issuer will issue further units of mutual fund and the price at which issuers will redeem such units from the investors.

(ii) Fair value of instruments measured at amortised cost

Fair value of instruments measured at amortised cost for which fair value is disclosed as follows:

Particulars	As at March 31, 2025		As at March 31, 2024	
	Carrying value	Fair value	Carrying value	Fair value
Financial assets measured at amortised cost:				
Trade receivables	75.62	75.62	89.52	89.52
Cash and cash equivalents	291.98	291.98	283.49	283.49
Bank balance other than cash and cash equivalents	1,400.00	1,400.00	1,300.19	1,300.19
Other financial assets	414.55	414.55	350.52	350.52
Total financial assets	**2,182.16**	**2,182.16**	**2,023.72**	**2,023.72**
Financial liabilities				
Borrowings	49,096.74	49,096.74	49,649.13	49,649.13
Trade payables	2,160.91	2,160.91	725.87	725.87
Other financial liabilities	2,908.98	2,908.98	2,400.21	2,400.21
Total financial liabilities	**54,166.63**	**54,166.63**	**52,775.21**	**52,775.21**

The management assessed that cash and cash equivalents, bank balances other than cash and cash equivalents, trade receivables, other current financial assets, trade payables, current borrowings and other current financial liabilities (except current maturities of long term borrowings, deferred payment liabilities and current portion of annuity receivable) is approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

36 Financial risk management

ii) Risk Management

The Company's activities expose it to variety of financial risks : credit risk, liquidity risk and market risk. Company's focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The Board of Directors of the Company has overall responsibility for the establishment and oversight of Company's risk management framework. The Board of Directors of the Company have established a risk management policy to identify and analyse the risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management systems are reviewed periodically to reflect changes in market conditions and Company's activities. The Board of Directors of the Company's oversee compliance with Company risk management policies and procedures, and reviews the risk management framework.

A) Credit risk management

Credit risk is the risk of financial loss to Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from Company's receivables from customers; loans and investments in debt securities. Company maximum exposure to credit risk is limited to the carrying amount of following types of financial assets:

- cash and cash equivalents,
- trade receivables,
- other financial assets, and

The Company has credit risk on trade receivables related change of scope and other claims from NHAI and ETC receivable. In case of majority of Trade Receivable, the counter party being the Government Undertaking as such does not have significant credit risk. However, Company estimates the expected credit loss based on specific identified basis.

Reconciliation of loss allowance provision for trade receivable from beginning to end of reporting period:

Particulars	As at March 31, 2025	As at March 31, 2024
Opening Balance	-	-
Movement in expected credit loss allowance on trade receivables calculated at lifetime expected credit losses	349.93	-
Adjustment against bad debts written off	-	-
Closing Balance	**349.93**	**-**

Other financial assets measured at amortised cost

Other financial assets measured at amortised cost includes security deposits, annuity receivable, receivable from related parties and other Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously, while at the same time internal control system in place ensure the amounts are

B) Liquidity risk

Liquidity risk is the risk that the Company may encounter difficulty in meeting its present and future obligations associated with financial liabilities that are required to be settled by delivering cash or another financial asset. Company is exposed to liquidity risk due to borrowings and trade and other payables. Company measures risk by forecasting cash flows. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking damage to the Company's reputation. The Company ensures that it has sufficient fund to meet expected operational expenses, servicing of financial obligations.

There are no undrawn borrowing facilities at the end of the reporting period.

(a) Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity categories based on their contractual maturities for all non-derivative financial liabilities: The amounts disclosed in the table are the contractual undiscounted cash flows net of processing fees.

As at March 31, 2025	Less than 1 year	1-2 year	2-5 year	More than 5 years	Total
Borrowings	1,554.91	2,442.79	7,999.81	37,397.64	**49,395.15**
Trade payables	2,160.91	-	-	-	**2,160.91**
Other financial liabilities	2,908.98	-	-	-	**2,908.98**
Total	**6,624.80**	**2,442.79**	**7,999.81**	**37,397.64**	**54,465.04**

As at March 31, 2024	Less than 1 year	1-2 year	2-5 year	More than 5 years	Total
Borrowings	6,070.36	6,070.36	22,762.77	15,222.72	**50,126.21**
Trade payables	725.87	-	-	-	**725.87**
Other financial liabilities	2,400.21	-	-	-	**2,400.21**
Total	**9,196.44**	**6,070.36**	**22,762.77**	**15,222.72**	**53,252.29**

C) Market risk

(a) Interest rate risk

i) Liabilities

The Company's policy is to minimise interest rate cash flow risk exposures on long-term financing. At the reporting periods end, the Company is exposed to changes in market interest rates through bank borrowings at variable interest rates. The Company's investments in fixed deposits pay fixed interest rates.

Interest rate risk exposure

Below is the overall exposure of the Company to interest rate risk:

Particulars	As at March 31, 2025	As at March 31, 2024
Variable rate borrowing	43,895.15	48,726.21
Fixed rate borrowing	5,500.00	1,400.00
Total borrowings	**49,395.15**	**50,126.21**

Sensitivity

Below is the sensitivity of profit or loss and equity changes in interest rates.

Particulars	As at March 31, 2025	As at March 31, 2024
Interest sensitivity*		
Interest rates – increase by 50 bps*	(219.48)	(243.63)
Interest rates – decrease by 50 bps*	219.48	243.63

** Holding all other variables constant*

ii) Assets

The Company's fixed deposits are carried at amortised cost and are fixed rate deposits. They are therefore not subject to interest rate risk as defined in Ind AS 107 'Financial Instruments Disclosures', since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

(b) Price risk

i) Exposure

The Company requires for implementation (construction, operation and maintenance) of the projects various commodities such as cement, bitumen, steel and other construction materials which are exposed to price risk. The Company are able to manage its exposure to price increases through bulk purchases and better negotiations. Hence, the sensitivity analysis is not required to be provided.

The Company is not exposed to price risk as on March 31, 2025

The Company's exposure to price risk arises from investments held and classified in the Balance Sheet at fair value through profit or loss. To manage the price risk arising from investments, the Company diversifies its portfolio of assets through fixed rate investment like deposit with bank and investment in mutual funds (Growth Scheme).

ii) Sensitivity

The table below summarises the impact of increase/decrease of the NAV of mutual funds on the Company's profit/(loss) for the year :

Impact on profit before tax

Particulars	**As at March 31, 2025**	**As at March 31, 2024**
Mutual Funds		
Net assets value – increase by 100 bps	2.35	0.05
Net assets value – decrease by 100 bps	(2.35)	(0.05)

(c) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company has no significant exposure to the risk of changes in foreign exchange rates.

37 Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value.

The Company monitors capital using a gearing ratio, which is net debt divided by total equity. The Company's policy is to keep the gearing ratio optimum. Net debt includes non-current borrowings (including current maturity of non-current borrowings less cash and cash equivalents and other bank deposits (net of restricted deposits).

Debt equity ratio

Particulars	**As at March 31, 2025**	**As at March 31, 2024**
Debts	49,096.74	49,649.13
Less : Cash & cash equivalents and Bank balances other than cash and cash equivalents (net of restricted deposits)	(291.98)	(283.49)
Net Debt	**48,804.76**	**49,365.64**
Total equity	11,866.89	10,979.54
Net debt to equity ratio (in times)	**4.11**	**4.50**

41 Provisions

The Company is required to operate and maintain the project highway during the entire concession period and hand over the project back to the Authority (MPRDC).

For this purpose, a regular maintenance along with periodic maintenances is required to be performed. Normally periodic maintenance includes resurface of pavements, repairs of structures and other equipment's and maintenance of service roads.

The maintenance cost/ bituminous overlay may vary based on the actual usage during maintenance period. Accordingly on the grounds of matching cost concept and based on technical estimates, a provision for major maintenance expenses is reviewed and is provided for in the accounts annually.

The overlay work to be executed by financial year 2025-26 for current periodic maintanance cycle.

Movement in provisions for periodic major maintenance work

Particulars	As at March 31, 2025	As at March 31, 2024
Opening balance	9,910.11	7,026.56
Add : Provision charged to profit and loss	4,118.62	3,710.47

Description and right to use specified asset:	The Company has been awarded road project in the state of Madhya Pradesh for development of Lebad-Jaora section from km.0.00 to km.125.00 on SH-31 by Madhya Pradesh Road Development Corporation Limited (MPRDC) on built Operate Transfer (BOT) basis. The concession period is 25 years.
Project	Road project in the state of Madhya Pradesh for development of Lebad-Jaora section from km.0.00 to km.125.00 on SH-31 by Madhya Pradesh Road Development Corporation Limited (MPRDC) on built Operate Transfer (BOT) basis.
Nature of Asset	Intangible (Rights under Service Concession Arrangements (SCA) for Toll Road Carriageway)
Year when SCA granted	August 30, 2007
Period	25 Years
Extension of Period	1825 Days
End of Concession period	27-Apr-2038 (Including estimated extension period)
Obligation to provide services:	The Company shall conduct normal maintenance activities of road and other assets to maintain uninterrupted service as per the prescribed arrangement.
Major Overlays	In terms of the SCA , the Companies obligation to carry out overlay of the roads has not been defined. However, basis quality parameters to be maintained as per SCA, the management is expecting to carry out the overlay of the roads at interval of six to seven years.
Additional Concession Fee	4.762% (as on COD) of total realisable fee for the year as increased by 1% every year

44 Ratio Analysis and its elements

The following are analytical ratios for the year ended March 31, 2025 and March 31, 2024:

Ratio	Numerator	Denominator	Unit of measurement	March 31, 2025 Ratio	March 31, 2024 Ratio	Variation	Remarks for Variation in the ratio by more than 25% as compared to previous year
Current ratio	Current Assets	Current Liabilities	Times	**0.23**	**0.23**	**-1.45%**	NA
Debt- Equity Ratio	Total Debt	Shareholder's Equity	Times	**4.14**	**4.52**	**-8.51%**	NA
Debt Service Coverage ratio	Earnings for debt service = Net profit after taxes + Non-cash operating expenses (Depreciation & amortisation) + Finance costs	Debt service = Interest + Lease Payments + Principal Repayments	Times	**0.19**	**73.78**	**-99.74%**	Variation is on account of profit during current year
Return on Equity ratio	Net Profits after taxes - Preference Dividend	Average Shareholder's Equity	Percentage	**7.83%**	**-27.86%**	**128.12%**	Variation is on account of profit during current year
Inventory Turnover ratio*	Cost of goods sold or Sales	Average Inventory	Times	**-**	**-**	**-**	-
Trade Receivable Turnover Ratio*	Net credit sales = Gross credit sales - sales return	Average Trade Receivable	Times	**-**	**-**	**-**	-
Trade Payable Turnover Ratio	Net credit purchases = Gross credit purchases - purchase return	Average Trade Payables	Times	**8.77**	**3.92**	**123.79%**	Variation in trade payable turnover ratio is due to increase in net credit purchase due to major maintanance work and improvement of tollways.
Net Capital Turnover Ratio	Net sales = Total sales - sales return	Working capital = Current assets - Current liabilities	Times	**(2.63)**	**(2.69)**	**-2.09%**	NA
Net Profit ratio	Net Profit	Net sales = Total sales - sales return	Times	**3.79%**	**-16.17%**	**-123.43%**	Variation is due to increase in net profit and revenue during the year
Return on Capital Employed	Earnings before interest and taxes	Capital Employed = Tangible Net Worth* + Total Debt + Deferred Tax Liability	Percentage	**13.97%**	**9.32%**	**49.86%**	Variation is due to increase in earnings before interest and tax.
Return on Investment	Income generated from investments	Weighted average value of investments	Percentage	**76.17%**	**0.00%**	**0.00%**	NA

*Since the Company is toll road Company operating under Design, Build, Finance, Operate and Transfer (DBFOT) basis and is not in the nature of manufacturing or a trading concern, accordingly Inventory turnover ratio and debtors turnover ratio are considered as not applicable.

*The amounts capitalised as intangible assets being the right of the Company under the Concession Agreement (to collect toll fees from the users of the Project Highway) is included as part of tangible net worth.

Note: The above Non-GAAP measures presented may not be comparable to similarly titled measures reported by other companies. Further, it should be noted that these are not a measure of operating performance or liquidity defined by generally accepted accounting principles.

(All amounts in ₹ lacs unless otherwise stated)

45 Impairment of assets

Based on a review of the future discounted cash flows of the project facility, the recoverable amount is higher than the carrying amount and hence no provision for impairment is required for the year. The inputs to the valuation models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as Traffic growth rates, WACC, Tax rates and Inflation rates etc.

46 The Code on Social Security,2020 ('Code') relating to employee benefits during employment and post employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified. Company will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective.

47 There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

48 The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.

49 The Company does not have any transactions with struck-off companies under section 248 of the Companies Act, 2013..

50 The Company does not have any charges or satisfaction which is yet to be registered with ROC beyond the statutory period.

51 The Company has not traded or invested in Crypto currency or Virtual Currency during the financial year.

52 The Company is not deemed wilfull defaulter by any bank or financial institution or other lender.

53 The Company has not advanced or loaned or invested funds to any other person or entity, including foreign entities (Intermediaries) with the understanding that the Intermediary shall: directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company (Ultimate Beneficiaries); or provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.

54 The Company has not received any fund from any person or entity, including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall: directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries); or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

55 The Company has not any transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income tax Act, 1961).

56 The Company has not availed any working capital facilities from banks on the basis of security of current assets.

57 During the previous year, Expressway Developers Limited (erstwhile Holding Company) has entered into an Agreement with Cube Highways and Infrastructure V PTE LTD (Purchaser), being a company based in Singapore and incorporated with the objective of acquiring and operating transportation projects to purchase the shares from the erstwhile Holding Company (including the purchase of seller nominee shares by the purchaser nominees from the seller nominees) and the erstwhile Holding Company has agreed to sell the shares to the Purchaser (including the sale of such portion of the sale shares which are held by the seller nominees to purchaser nominees).

58 As per the requirements of Rule 3(1) of the Companies (Accounts) Rules 2014, the Company uses:

a) SAP S/4 HANA as its accounting software operated for recording all the accounting transactions which has a feature of recording audit trail (edit log) facility for all relevant transactions recorded in the software;

b) A third-party software for maintaining revenue records, and in absence of an independent service auditor's report covering the requirement of audit trail, the Company is unable to conclude whether audit trail feature of this software was enabled and operated throughout the year or whether there were any instances of the audit trail feature been tampered with.

c) A third-party software for maintaining payroll records, for which the independent service auditor's report specified that the said software has a feature of recording audit trail (edit log) facility and the same has operated throughout the year.

The audit trail feature in respect of the aforesaid accounting software(s) is not being tampered with for the period for which the audit trail feature was enabled and operating. Additionally, the audit trail that was enabled and operated for the year ended March 31, 2024, has been preserved by the Company as per the statutory requirements for record retention.

The Company has established and maintained an adequate internal control framework and based on its assessment, believes that this was effective as of March 31, 2025.

59 The company did not have any long term contracts including derivative contracts for which there were any material foreseeable losses.

60 During the year, the Company has reclassified the accruals relating to employees' salaries and wages from "Trade payables" to "Other financial liabilities" in view of the opinion of Expert Advisory Committee of the Institute of Chartered Accountants of India considering the said disclosure could be more relevant to the users of the financial statements. This change doesn't result in any impact on the total current liabilities.

61 The financial statements were approved for issue by the Board of Directors on September 02, 2025.

INDEPENDENT AUDITOR'S REPORT

To
The Members of,
Western MP Infrastructure & Toll Roads Pvt. Ltd.
Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of **Western MP Infrastructure & Toll Roads Pvt. Ltd.** ("the Company"), which comprise the Balance Sheet as at March 31, 2024, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, notes to the financial statement and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, the Loss and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The company has made major maintenance work during the year.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Corporate Governance and Shareholder's Information, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the **"Annexure A"** a statement on the matters specified in paragraphs 3 and 4 of the Order to the extent applicable.

2. As required by section 143 (3) of the Act, we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;

   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books:

   c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income and the Statement of Cash Flows and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account:

   d) In our opinion, the aforesaid financial statements comply with the Indian Accounting Standards (IND AS) specified under section 133 of the Act and rules made there under, as applicable;

   e) On the basis of written representations received from management as on March 31, 2024 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2024 from being appointed as a director in terms of Section 164(2) of the Act.

   f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report **in "Annexure B"**.

g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended: In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

h) Based on our examination which included test checks, the company has used an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with.

As the proviso to Rule 3(1) of the Companies (Accounts) Rules 2014 is applicable from 1st April 2023, reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules 2014 on preservation of audit trail as per statutory requirements for record retention is not applicable for the financial year ending 31st March 2023.

i) The financial statements which states that the management has restated the comparative information in accordance with "Indian Accounting Standard 8: Accounting Policies, Change in Accounting Estimates and Error" in relation to non-recognition of periodic major maintenance in earlier years.

j) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigations which would impact on its financial position in its financial statements;

ii. The company did not have any long term contracts including derivative contracts for which there were any foreseeable losses.

iii. there has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

iv.iv.

a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall:

- directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of the Company or

- Provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.

b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall:

- directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of the Funding Party or

- provide any guarantee, security or the like from or on behalf of the Ultimate Beneficiaries; and

c. Based on such audit procedures as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub clause (iv)(a) and (iv)(b) contain any material mis-statement.

v. No Dividend is declared or paid by the company during the year.

ANNEXURE A

To the Independent Auditors' Report on

Financial Statements of Western MP Infrastructure & Toll Roads Pvt. Ltd.

(Referred to our report of even date)

The Annexure referred to in our Independent Auditors' Report to the members of the Company on the financial statements for the year ended March 31, 2024, we report that:

i. In respect of Property, Plant & Equipment

a) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant & Equipment.

b) According to information and explanations given to us and on the basis of our examination of the records of the company, the Property, Plant & Equipment have been physically verified during the year by the management under a regular programme of verification by rotation over a period of three years, which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed.

c) According to information and explanations given to us and on the basis of our examination of the records of the company, the title deeds of immovable properties forming part of the Property, Plant & Equipment are held in the name of the Company.

d) According to information and explanations given to us and on the basis of our examination of the records of the company, the company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets or both during the year.

e) According to information and explanations given to us and on the basis of our examination of the records of the company, there are no proceedings initiated or are pending against the company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and rules made thereunder.

ii. In respect of Inventory

The Company does not hold any physical inventories. Accordingly, reporting under clause 3(II) of the order not applicable to the company.

iii. In respect of loan granted:

According to information and explanations given to us and on the basis of our examination of the records of the company, the company has made any investments, provided guarantee or security or granted any advance in nature of loans, secured or unsecured to Companies, Firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Companies Act, The Amount taken as unsecured loan is amounting to Rs. Nil (Previous Year Rs. Nil).

iv. In respect of compliance of section 185 and 186 of The Companies Act, 2013

According to information and explanations given to us and on the basis of our examination of the records of the company, in our opinion the company has not advanced any loans, made investments, gave guarantees, and provided security prescribed in provisions of section 185 and 186 of the companies Act, 2013.

v. In respect of public deposits

In our opinion and according to the information and explanations given to us and on the basis of our examination, the Company has not accepted any deposit from the public within the meaning of the provisions of sections 73 to 76 or any relevant provisions of the Companies Act, 2013 and the rules framed there under.

vi. In respect of Cost Records:

According to the information and explanations given to us, the maintenance of cost records has been specified by the central government under the section 148(1) of the Companies Act, 2013 related to road tolling business under BOT basis activities carried out by the company. And are of the opinion that prima facie, the specified accounts and records have been made and maintained.

vii. In respect of statutory dues:

a) According to the records of the Company, the Company is generally regular in depositing with appropriate authorities undisputed statutory dues including provident fund, employees' state insurance, income-tax, duty of custom, goods & service tax, cess and other statutory dues applicable to it. As per the records of the Company, as at March 31, 2024, the Company does not have any undisputed statutory dues which are outstanding for a period of more than six months from the date they became payable.

b) According to the information and explanations given to us and on the basis of examination of records of the company there is no dispute in respect of income tax or sales tax or service tax or value added tax or GST or any other cess.

viii. In respect of undisclosed Income

In our opinion and according to the information and explanations given to us and based on our examination of the records of the company, there were no such unrecorded transaction in the books of account which were surrendered or disclosed as income during the year in tax assessments under Income Tax Act, 1961 (43 of 1961).

ix. In respect of repayment of loan

According to the information and explanations given to us, based on our examination of the records of the company and on the basis of overall examination of the Balance Sheet of the Company,

a) The company has not defaulted in repayment of loans or borrowing to a financial institution or bank.
b) The company has not been declared willful defaulter by any bank or financial institution.
c) In our opinion the term loan were applied for the purpose for which the loan was obtained.
d) No such short term loan funds have been utilized for long term purpose.

e) The company has not raised any fund from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
f) The company has not raised any loan during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies.

x. In respect of funds raised through IPO/FPO/Debt finance

a) On the basis of overall examination of the Balance Sheet of the Company, according to the information and explanations provided to us and based on our examination of the records of the company we report that monies raised by way of term loans were applied for the purposes for which those were raised. The Company did not raise any money by way of initial public offer or further public offer (including debt instrument).
b) In our opinion and according to the information and explanations given to us as well as based on our examination of the records of the company, the company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year under section 42 and section 62 of the Companies Act, 2013.

xi. In respect of fraud reporting

a) According to the information and explanations given to us and based on our examination of the records of the company, no material fraud by the Company or on the Company by its officers or employees was noticed or reported during the year.
b) According to the information and explanations given to us and based on our examination of the records of the company, no report under sub-section (12) of section 143 of the Companies Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.
c) According to the information and explanations given to us and based on our examination of the records of the company, there are no whistle blower complaints received by the Company during the year.

xii. In respect of Nidhi Company

According to the information and explanations given to us, the Company is not a Nidhi Company. Accordingly, paragraph 3(xii) of the Order is not applicable.

xiii. In Respect of Transactions With Related Parties

According to the information and explanations given to us, transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and details of such transactions have been disclosed in the financial statements as required by the applicable accounting standards.

xiv. In Respect of Internal Audit System

According to the information and explanations given to us and based on our examination of the records of the Company, the company has appropriate internal audit system commensurate with the size and nature of its business and the reports of the Internal Auditors for the period under audit were considered by us.

xv. In respect of Non-Cash Transactions

According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with him. Accordingly, paragraph 3(xv) of the Order are not applicable.

xvi. In respect of compliance of section 45IA of the RBI Act, 1934

a) The Company is not required to be registered under section 45 IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi)(a)of the Order is not applicable.
b) The Company is not required to be registered under section 45 IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi)(b)of the Order is not applicable.
c) The Company is not a core investment company (CIC) as defined in the regulations made by the reserve Bank of India. Accordingly clause 3(xvi)(c) of the order is not applicable.
d) According to information and explanations given to us during the course of audit, there is no core investment company within the Group (as defined in the Core Investment Companies (Reserve Bank) Directions, 2016) and accordingly reporting under clause 3(xvi)(d) of the Order is not applicable.

xvii. In respect of Cash losses

The company has not incurred any cash losses in the current financial year and in the immediately preceding financial year.

xviii. In respect of resignation of statutory auditors

There has been no resignation of the statutory auditors during the year.

xix. In respect of any material uncertainty to meet liability

In our opinion and according to the information and explanations given to us and based on our examination of the records of the Company, on the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements ,our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which cause us to believe that any material uncertainty exists as on the date of the audit report that the company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

xx. In Respect of Unspent Amount Under Section 135(5) of The Companies Act, 2013

a. In our opinion and according to the information and explanations given to us and based on our examination of the records of the Company, there was no such unspent amount to be transferred to fund specified in Schedule VII to the Companies Act. Accordingly, paragraphs 3(xx)(a) of the Order are not applicable.

b. The Company have ongoing projects under section 135 of the Companies Act. Accordingly, paragraphs 3(xx)(b) of the Order are applicable.

ANNEXURE B

To the Independent Auditors' Report on
Financial Statements of Western MP Infrastructure & Toll Roads Pvt. Ltd.
(Referred to our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Western MP Infrastructure & Toll Roads Pvt. Ltd.** ("the Company") as of March 31, 2024 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Western M P Infrastructure & Toll Roads Private Limited
Statement of Material Accounting Policy Information and Other Explanatory Notes for financial statements for the year ended March 31, 2024
CIN: U45203MH2007PTC173577

1 CORPORATE INFORMATION

The Company Western M P Infrastructure & Toll Roads Private Limited (the 'Company') has been awarded road project in the state of Madhya Pradesh for development of Lebad-Jaora section from km.0.00 to km.125.00 on SH-31 by Madhya Pradesh Road Development Corporation Limited (MPRDC) on built Operate Transfer (BOT) basis. The concession period is 25 years.
The registered office is located at 513/A, 5th Floor, Kohinoor City, Kirol Road Kurla (West), Mumbai, Mumbai City MH 400070, India.

2 BASIS OF PREPARATION AND PRESENTATION

2.01 Basis of preparation of financial statements

These Financial Statements are prepared on accrual basis of accounting and all principal accounting policies applied in the preparation of these Financial Statements are set out below. These policies have been consistently applied to all the financial years presented.

The financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, and relevant amendment rules issued there after.

2.02 Functional and presentation currency

Items included in the financial statements Company are measured using the currency of the primary economic environment in which the Company operates (“the functional currency”). Indian rupee is the functional currency of the Company.
The financial statements are presented in Indian Rupees which is the Company’s presentation in Indian Rupees has been rounded up to the nearest lakhs except where otherwise indicated.

2.03 Use of estimates

The preparation of financial statements in conformity of Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, the disclosures of contingent assets and contingent liabilities at the date of financial statements, income and expenses during the period. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions to accounting estimates are recognized in the period in which the estimates are revised and in future periods which are affected.
Application of accounting policies that require critical accounting estimates and assumption having the most significant effect on the amounts recognized in the financial statements are:

Valuation of financial instruments
Useful life of property, plant and equipment
Useful life of intangible assets
Provisions

2.04 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification in accordance with Division II of Scheule III of The Companies Act, 2013.

2.05 Recent pronouncements

There has been no recent accounting pronouncements made by Ministry of Corporate Affairs relating to the Companies (Indian Accounting Standards) Rules, 2015.

3 MATERIAL ACCOUNTING POLICIES

3.01 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

In the principal market for the asset or liability, or
In the absence of a principal market, in the most advantageous market for the asset or liability
The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.
A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.
The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.
All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2- Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 -Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.
The Company's Management determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for distribution in discontinued operations.
At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's accounting policies. For this analysis, the Management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.
The Management also compares the change in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.
For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.
This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

3.02 Service concession arrangements:

The Company constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time.
These arrangements may include infrastructure used in a public-to-private service concession arrangement for its entire useful life.

Under Appendix A to Ind AS 11 - Service Concession Arrangements, these arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that the Company receives the right (i.e. a franchise) to charge users of the public service. The financial asset model is used when the Company has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component. If the Company performs more than one service (i.e., construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable.

The Company manages concession arrangements which include constructing road projects. The Company maintains and services the infrastructure during the concession period. These concession arrangements set out rights and obligations related to the infrastructure and the service to be provided.

The right to consideration gives rise to an intangible asset and financial receivable and accordingly, both the intangible asset and financial assets models are applied. Income from concession arrangements earned under the intangible asset model consists of the i) fair value of contract revenue, which is deemed to be fair value of consideration transferred to acquire the asset; and ii) payments actually received from the users. The intangible assets is amortized over its expected useful life in a way that reflects the pattern in which the assets economy benefits are consumed by the Company, starting from the date when the right to operate starts to be used. Based on these principles, the intangible assets is amortized in line with the actual usage of the specific public facility, with the maximum of the duration of the concession.

Financial receivable is recorded at the fair value of guaranteed residual value to be received at the end of the concession period. This receivable is subsequently measured at amortized cost.

Any asset carried under concession arrangements is derecognized on disposal or when no future economic benefits are expected from its future use or disposal or when the contractual rights to the financial asset expire.

3.03 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

The specific recognition criteria described below must also be met before revenue is recognised.

Toll collections

Toll collections from users of facility are accounted for as and when the amount is due and recovery is certain.

Interest income

Interest income is recognised on accrual basis.

3.04 Taxes

Income tax expense for the year comprises of current tax and deferred tax. It is recognised in the Statement of Profit and Loss except to the extent it relates to a business combination or to an item which is recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable/receivable on the taxable income/ loss for the year using applicable tax rates at the Balance Sheet date, and any adjustment to taxes in respect of previous years. Interest income/ expenses and penalties, if any, related to income tax are included in current tax expense.

Deferred tax is recognised in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes.

A deferred tax liability is recognised based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted, or substantively enacted, by the end of the reporting period. Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities; and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

3.05 Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and where applicable accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of shelf-constructed assets includes the cost of materials, direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal with the carrying amount of Property, Plant and Equipment and are determined by comparing the proceeds from disposal with the carrying amount of Property, Plant and Equipment and are recognized net within "other income/other expenses" in the Statement of Profit and Loss.

Subsequent Cost

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is de-recognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in the Statement of Profit and Loss.

Depreciation is calculated on a WDV basis using useful lives of the assets as prescribed under Schedule II to the Companies Act 2013:

Asset class	Useful life
Plant and machinery	15 years
Furniture and fixtures	10 years
Office equipment	5 years
Vehicles	8 years
Computers and printer	3 years

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

3.06 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Concessionaire Rights are amortised over the period of concession, using revenue based amortisation in respect of concessionaire rights recognised in the financial statements for the period ending immediately before the beginning of the first Ind AS reporting period. Under this method, the carrying value of the rights is amortised in the proportion of actual toll income for the year to expected revenue for the balance concession period, to reflect the pattern in which the assets economic benefits will be consumed. At each balance sheet date, the projected revenue for the balance concession period is reviewed by the Management. If there is any change in the projected revenue from previous estimates, the amortisation of concessionaire rights is changed prospectively to reflect any changes in the estimates.

Intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

3.07 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is itended to compensate, are expensed. When the grant relates to an asset, it is recognised on a systematic basis over the expected useful life of the related asset.

3.08 Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The contingent liability is not recognised in books of account but its existence is disclosed in financial statements.

3.09 Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset. unless the asset does not generate cash inflows that are largely independent of those from other assets or Companys of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

3.10 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

3.11 Financial instruments

Financial assets

Financial assets are recognised when the Company becomes a party to the contractual provisions of the instrument.

On initial recognition, a financial asset is recognised at fair value, in case of Financial assets which are recognised at fair value through profit and loss (FVTPL), its transaction cost are recognised in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

Financial assets are subsequently classified as measured at

- **amortised cost**: Financial assets that are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows that are solely payments of principal and interest, are subsequently measured at amortised cost using the effective interest rate ('EIR') method less impairment, if any. The amortisation of EIR and loss arising from impairment, if any is recognised in the Statement of Profit and Loss.
- **fair value through profit and loss (FVTPL):** A financial asset not classified as either amortised cost or FVOCI, is classified as FVTPL. Such financial assets are measured at fair value with all changes in fair value, including interest income and dividend income if any, recognised as 'other income' in the Statement of Profit and Loss.
- **fair value through other comprehensive income (FVOCI):** Financial assets that are held within a business model whose objective is achieved by both, selling financial assets and collecting contractual cash flows that are solely payments of principal and interest, are subsequently measured at fair value through other comprehensive income. Fair value movements are recognized in the other comprehensive income (OCI). Interest income measured using the EIR method and impairment losses, if any are recognised in the Statement of Profit and Loss. On derecognition, cumulative gain or loss previously recognised in OCI is reclassified from the equity to 'other income' in the Statement of Profit and Loss.

Financial assets are not reclassified subsequent to their recognition, except if and in the period the Company changes its business model for managing financial assets.

Loans:

Loans are initially recognised at fair value. Subsequently, these assets are held at amortised cost, using the effective interest rate (EIR) method net of any expected credit losses. The EIR is the rate that discounts estimated future cash income through the expected life of financial instrument.

Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the contractual rights to receive the cash flows from the asset.

Impairment of Financial Asset

Expected credit losses are recognized for all financial assets subsequent to initial recognition other than financials assets in FVTPL category.

For financial assets other than trade receivables, as per Ind AS 109, the Company recognises 12 month expected credit losses for all originated or acquired financial assets if at the reporting date the credit risk of the financial asset has not increased significantly since its initial recognition. The expected credit losses are measured as lifetime expected credit losses if the credit risk on financial asset increases significantly since its initial recognition. The Companys trade receivables do not contain significant financing component and loss allowance on trade receivables is measured at an amount equal to life time expected losses i.e. expected cash shortfall.
The impairment losses and reversals are recognised in Statement of Profit and Loss.

Financial Liabilities:
Initial recognition and measurement
Financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial liabilities are initially measured at the amortised cost unless at initial recognition, they are classified as fair value through profit and loss. In case of trade payables, they are initially recognised at fair value and subsequently, these liabilities are held at amortised cost, using the effective interest method.

Subsequent measurement
Financial liabilities are subsequently measured at amortised cost using the EIR method. Financial liabilities carried at fair value through profit or loss are measured at fair value with all changes in fair value recognised in the Statement of Profit and Loss.

Derecognition
A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expires.

3.12 Cash and cash equivalents
Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.
For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

3.13 Employee Benefits

i) Short term benefits
Employee benefits includes provident fund, superannuation fund, employee state insurance scheme, gratuity, compensated absences, long service awards and post-employment medical benefits.

a. Short-term Employee Benefit

All employee benefits falling due wholly within twelve months of rendering the service are classified as short-term employee benefits. The benefits like salaries, wages, short-term compensated absences etc. and the expected cost of bonus, and ex-gratia are recognised in the period the related service is rendered at undiscounted amount of benefits expected to be paid in exchange for that service.

The cost of short-term compensated absences is accounted as under:
- in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- in case of non-accumulating compensated absences, when the absences occur.

b. Post-employment benefits

1) Defined contribution plans:
The Company offers its employees State governed provident fund linked with employee pension scheme as defined contribution plans. The contribution paid/ payable under the scheme is recognised during the period in which the employee renders the related service.

2) Defined benefit plans:
For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re- measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service costs are recognised in profit or loss on the earlier of the date of the plan amendment or curtailment, and the date that the Company recognises related restructuring costs.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Defined benefit costs are categorized as follows:
- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and
- net interest expense or income; and
- re-measurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The present value of the defined benefit liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

c. Other long-term employee benefit

The obligation for other long-term employee benefits such as long-term compensated absences, are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

3.14 Lease

Operating lease:

Lease of assets under which all the risk and rewards of ownership are effectively retained by the lessor are classified as operating lease. Lease payments / revenue under operating leases are recognized as an expense / income on accrual basis in accordance with the respective lease agreements.

3.15 Earnings per share
Basic earnings per share is computed by dividing the net profit for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.
For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

30 Earnings per share (EPS)

The following table reflects the income and share data used in the basic and diluted EPS computations:

Profit/ (loss) attributable to equity holders:		
Profit/(loss) for the year attributable to owners of the Company for calculating basic earnings per share	(3,081.23)	914.95
Profit/(loss) for the year attributable to owners of the Company for calculating diluted earnings per share	(3,081.23)	914.95
Weighted average number of equity shares outstanding for calculating basic earnings per share	23,35,10,000	23,35,10,000
Weighted average number of equity shares outstanding for calculating diluted earnings per share	23,35,10,000	23,35,10,000
Earnings per share (Face value of ₹ 10 each)		
Basic earnings per share (₹ in absoulute amount)	(1.32)	0.39
Diluted earnings per share (₹ in absoulute amount)	(1.32)	0.39

There have been no other transactions involving Equity shares or potential Equity shares between the reporting date and the date of authorisation of these financial statements.

31 Tax expense	**As at March 31, 2024**	**As at March 31, 2023**
(i) Income tax expense recognised in Statement of Profit and Loss		
Deferred tax expense/(income)	2,170.10	(140.18)
	2,170.10	**(140.18)**

The major components of income tax expense and the reconciliation of expense based on the domestic effective tax rate and the reported tax expense in profit or loss are as follows :

Particulars		
Profit/ (Loss) before tax	(911.14)	774.78
Income tax using the Company's domestic tax rate	25.17%	25.17%
Expected tax expense [A]	**(229.32)**	**195.00**
Tax effect of adjustment to reconcile expected income tax expense to reported income tax expense:		
Impact due to restatements	2,386.95	(335.18)
Disallowance due to CSR expense	12.47	-
Total adjustments [B]	**2,399.42**	**(335.18)**
Actual tax expense [C=A+B]	**2,170.10**	**(140.18)**

32 Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits

(a) Defined contribution plan

The Company's contribution to Provident Fund amounts to ₹9.85 lacs (March 31, 2023: ₹13.43 lacs) has been recognised in the Statement of Profit and Loss under the head Employee benefit expenses.

(b) Defined benefit plans (unfunded):

The Company provides for gratuity for employees in India as per Payment of Gratuity Act, 1972. Employees who are in continuous service for 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month completed proportionately for 15 days salary multiplied for number of completed years of service.

The gratuity scheme covers substantially all regular employees. Commitments are actuarially determined at year-end. The actuarial valuation is done based on "Projected Unit Credit" method. Gains and losses of changed actuarial assumptions are charged to Statement of Profit and Loss.

Gratuity

(i) **Amount recognised in the Statement of Profit and Loss is as under:**

Description	**March 31, 2024**	**March 31, 2023**
Current service cost	0.29	2.77
Past service cost including curtailment (Gains)/Losses	-	-
Total Service Cost	**0.29**	**2.77**

(ii) **Net Interest Cost**

Description	**March 31, 2024**	**March 31, 2023**
Interest cost on defined benefit obligation	1.15	0.99
Interest income on plan assets	-	-
Net Interest Cost	**1.15**	**0.99**

(iii) **Bifurcation of Actuarial Gain/Loss on Obligation:**

Description	**March 31, 2024**	**March 31, 2023**
Actuarial (Loss)/Gain on arising from change in demographic assumption	-	-
Actuarial (Loss)/Gain on arising from change in financial assumption	0.02	(0.49)
Actuarial (Loss)/Gain on arising from experience adjustment	11.16	2.21
Actuarial (Loss)/Gain on for the year on obligation	**11.17**	**1.73**

(iv) **Other Comprehensive Income (OCI)**

Description	**March 31, 2024**	**March 31, 2023**
Actuarial (Loss)/Gain for the year on DBO	11.17	1.73
Actuarial (Loss)/Gain for the year on plan asset	-	-
Unrecognized actuarial (Loss)/Gain for the year	**11.17**	**1.73**

(v) **Bifurcation of PBO at the end of year in current and non current.**

Description	**March 31, 2024**	**March 31, 2023**
Current liability (Amount due within one year)	0.01	0.45
Non-Current liability (Amount due over one year)	0.30	14.90
Total PBO at the end of year	**0.30**	**15.36**

(vi) **Change in defined benefit obligation**

Description	**March 31, 2024**	**March 31, 2023**
Defined benefit liability at the start of the year	15.35	13.80
Adjustments related to employees transferred to/from fellow subsidiaries	-	-
Interest Cost	1.15	0.99
Current service cost	0.29	2.77
Re-measurements (gain)/loss for the year	11.17	1.73
Benefit paid directly by the Company	(27.66)	(3.93)
Transfer in/out	-	
Defined benefit liability at the end of the year	**0.30**	**15.35**

(vii) **The amount included in the balance sheet arising in respect of its defined benefit obligation/plans**

Description	**March 31, 2024**	**March 31, 2023**
Present value of defined benefit obligations/ plans	0.30	15.35
Fair value of plan assets	-	-
Net defined benefit obligation	**0.30**	**15.35**

Disclosure relating to employee benefits pursuant to Ind AS 19 - Employee Benefits (Continued.)

(viii) **Sensitivity analysis for gratuity liability:**

Description	**March 31, 2024**	**March 31, 2023**
Impact of change in discount rate		
Present value of obligation at the end of the period/year	**0.30**	**15.35**
- Impact due to decrease of 1%	0.05	2.07
- Impact due to increase of 1%	(0.04)	(1.76)
Impact of change in salary increase		
Present value of obligation at the end of the period/year	**0.30**	**15.35**
- Impact due to decrease of 1%	(0.04)	(1.53)
- Impact due to increase of 1%	0.05	1.47

The above sensitivity analysis is based on a change an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligation liability recognised in the Balance Sheet.

Sensitivities due to mortality and withdrawals are not material and hence impact of change due to these not calculated.

Sensitivities as rate of increase of pensions in payment, rate of increase of pensions before retirement and life expectancy are not applicable.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

(ix) **Actuarial assumptions:**

Description	**March 31, 2024**	**March 31, 2023**
Discount rate range	7.15	7.50
Rate of increase in compensation levels range	7.5% for the first year and 6.3% thereafter	7.5% for the first year and 6.3% thereafter
Retirement age	60.00	60.00
Mortality rate	100% of IALM 2012-14	100% of IALM 2012-14
Attrition at age (Withdrawal rate %)		
- Up to 30 Years	9%	9%
- From 31 to 44 years	9%	9%
- Above 44 years	9%	9%

(x) **Maturity profile of defined benefit obligation**

Weighted average duration (based on discounted cashflows)	17 Years

Expected cash flows over the next (valued on undiscounted	**(₹ in Lacs)**
1 year	0.01
2 to 5 years	0.04
6 to 10 years	0.06
More than 10 years	1.07

33 Contingent liabilities and claims

i) Claims against the Company not acknowledged as liability is of Nil. (31 March 2023 - Rs. 192.44 Lakhs and 31 March 2022- Rs. 1,283 Lakhs)

On the basis of the current status of the individual case and as per legal advice obtained by the Company, wherever applicable, the Company in confident of winning the above case and is of view that no further provision is required in this regard.

(This space has been intentionally left blank)

34 Fair value disclosures

i) Fair values hierarchy

Financial assets and financial liabilities measured at fair value in the Balance Sheet are divided into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.
Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.
Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Financial assets/(liabilities) measured at fair value - recurring fair value measurements:

As at March 31, 2024	Level 1	Level 2	Level 3	Total
Assets at fair value				
Investments measured at fair value through profit and loss	-	5.28	**-**	**5.28**
Derivative financial assets	**-**	-	**-**	**-**

As at March 31, 2023	Level 1	Level 2	Level 3	Total
Assets at fair value				
Investments measured at fair value through profit and loss	-	5.01	**-**	**5.01**
Derivative financial assets	**-**	-	**-**	**-**

As at April 01, 2022	Level 1	Level 2	Level 3	Total
Assets at fair value				
Investments measured at fair value through profit and loss	**-**	4.73	**-**	**4.73**
Derivative financial assets	**-**	-	**-**	**-**

Valuation process and technique used to determine fair value
The fair value of investments in mutual fund units are based on the net asset value ('NAV') as stated by the issuers of these mutual fund units in the published statements as at each reported balance sheet dates. NAV represents the price at which the issuer will issue further units of mutual fund and the price at which issuers will redeem such units from the investors.

(ii) Fair value of instruments measured at amortised cost

Fair value of instruments measured at amortised cost for which fair value is disclosed as follows:

Particulars	As at March 31, 2024		As at March 31, 2023		As at April 01, 2022	
	Carrying value	Fair value	Carrying value	Fair value	Carrying value	Fair value
Financial assets measured at amortised cost:						
Investments	5.28	5.28	5.01	5.01	4.73	4.73
Security deposits	0.38	0.38	-	-	-	-
Trade receivables	89.52	89.52	-	-	-	-
Cash and cash equivalents	283.49	283.49	339.62	339.62	634.33	634.33
Bank balance other than cash and cash equivalents	1,300.19	1,300.19	1,507.78	1,507.78	2,070.99	2,070.99
Other financial assets	325.54	325.54	52.33	52.33	91.24	91.24
Total financial assets	**2,004.40**	**2,004.40**	**1,904.74**	**1,904.74**	**2,801.29**	**2,801.29**
Financial liabilities						
Borrowings	49,649.13	49,649.13	54,669.11	54,669.11	60,024.38	60,024.38
Trade payables	3,123.54	3,123.54	2,639.95	2,639.95	2,915.56	2,915.56
Other financial liabilities	2.55	2.55	-	-	-	-
Total financial liabilities	**52,775.22**	**52,775.22**	**57,309.06**	**57,309.06**	**62,939.94**	**62,939.94**

The management assessed that cash and cash equivalents, bank balances other than cash and cash equivalents, trade receivables, other current financial assets, trade payables, current borrowings and other current financial liabilities (except current maturities of long term borrowings, deferred payment liabilities and current portion of annuity receivable) is approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

ii) Risk Management

The Company's activities expose it to variety of financial risks : credit risk, liquidity risk and market risk. Company's focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The Board of Directors of the Company has overall responsibility for the establishment and oversight of Company's risk management framework. The Board of Directors of the Company have established a risk management policy to identify and analyse the risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management systems are reviewed periodically to reflect changes in market conditions and Company's activities. The Board of Directors of the Company's oversee compliance with Company risk management policies and procedures, and reviews the risk management framework.

A) Credit risk management

Credit risk is the risk of financial loss to Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from Company's receivables from customers; loans and investments in debt securities. Company maximum exposure to credit risk is limited to the carrying amount of following types of financial assets:
- cash and cash equivalents,
- trade receivables,
- other financial assets, and
- deposits with banks

The Company has credit risk on trade receivables related change of scope and other claims from NHAI and ETC receivable. In case of majority of Trade Receivable, the counter party being the Government Undertaking as such does not have significant credit risk. However, Company estimates the expected credit loss based on specific identified basis.

Reconciliation of loss allowance provision for trade receivable from beginning to end of reporting period:

Particulars	As at March 31, 2024	As at March 31, 2023	As at April 01, 2022
Opening Balance	-	-	-
Movement in expected credit loss allowance on trade receivables calculated at lifetime expected credit losses	46.52	159.46	-
Adjustment against bad debts written off	(46.52)	(159.46)	-
Closing Balance	**-**	**-**	**-**

Other financial assets measured at amortised cost

Other financial assets measured at amortised cost includes security deposits, annuity receivable, receivable from related parties and other Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously, while at the same time internal control system in place ensure the amounts are within defined limits.

B) Liquidity risk

Liquidity risk is the risk that the Company may encounter difficulty in meeting its present and future obligations associated with financial liabilities that are required to be settled by delivering cash or another financial asset. Company is exposed to liquidity risk due to borrowings and trade and other payables. Company measures risk by forecasting cash flows. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking damage to the Company's reputation. The Company ensures that it has sufficient fund to meet expected operational expenses, servicing of financial obligations.

There are no undrawn borrowing facilities at the end of the reporting period.

(a) Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity categories based on their contractual maturities for all non-derivative financial liabilities:
The amounts disclosed in the table are the contractual undiscounted cash flows net of processing fees.

As at March 31, 2024	Less than 1 year	1-2 year	2-5 year	More than 5 years	Total
Borrowings	6,070.36	6,070.36	22,762.77	15,222.72	**50,126.21**
Trade payables	3,123.54	-	-	-	**3,123.54**
Other financial liabilities	2.55	-	-	-	**2.55**
Total	**9,196.45**	**6,070.36**	**22,762.77**	**15,222.72**	**53,252.30**

As at March 31, 2023	Less than 1 year	1-2 year	2-5 year	More than 5 years	Total
Borrowings	6,070.36	6,070.36	22,762.77	20,287.62	**55,191.11**
Trade payables	2,639.95	-	-	-	**2,639.95**
Other financial liabilities	-	-	-	-	**-**
Total	**8,710.31**	**6,070.36**	**22,762.77**	**20,287.62**	**57,831.06**

As at April 01, 2022	Less than 1 year	1-2 year	2-5 year	More than 5 years	Total
Borrowings	5,400.00	6,070.36	16,692.41	32,392.59	**60,555.36**
Trade payables	2,915.56	-	-	-	**2,915.56**
Other financial liabilities	-	-	-	-	**-**
Total	**8,315.56**	**6,070.36**	**16,692.41**	**32,392.59**	**63,470.92**

C) Market risk

(a) Interest rate risk

i) Liabilities

The Company's policy is to minimise interest rate cash flow risk exposures on long-term financing. At the reporting periods end, the Company is exposed to changes in market interest rates through bank borrowings at variable interest rates. The Company's investments in fixed deposits pay fixed interest rates.

Interest rate risk exposure
Below is the overall exposure of the Company to interest rate risk:

Particulars	As at March 31, 2024	As at March 31, 2023	As at April 01, 2022
Variable rate borrowing	48,249.13	54,669.11	59,969.36
Fixed rate borrowing	1,400.00	-	-
Total borrowings	**49,649.13**	**54,669.11**	**59,969.36**

Sensitivity
Below is the sensitivity of profit or loss and equity changes in interest rates.

Particulars	As at March 31, 2024	As at March 31, 2023	As at April 01, 2022
Interest sensitivity*			
Interest rates – increase by 50 bps*	(26.54)	(30.07)	(32.98)
Interest rates – decrease by 50 bps*	26.54	30.07	32.98

** Holding all other variables constant*

ii) Assets

The Company's fixed deposits are carried at amortised cost and are fixed rate deposits. They are therefore not subject to interest rate risk as defined in Ind AS 107 'Financial Instruments Disclosures', since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

(b) Price risk

i) Exposure

The Company requires for implementation (construction, operation and maintenance) of the projects various commodities such as cement, bitumen, steel and other construction materials which are exposed to price risk. The Company are able to manage its exposure to price increases through bulk purchases and better negotiations. Hence, the sensitivity analysis is not required to be provided.

The Company's exposure to price risk arises from investments held and classified in the Balance Sheet at fair value through profit or loss. To manage the price risk arising from investments, the Company diversifies its portfolio of assets through fixed rate investment like deposit with bank and investment in mutual funds (Growth Scheme).

ii) Sensitivity

The table below summarises the impact of increase/decrease of the NAV of mutual funds on the Company's profit/(loss) for the year :

Impact on profit before tax

Particulars	**As at March 31, 2024**	**As at March 31, 2023**	**As at April 01, 2022**
Mutual Funds			
Net assets value – increase by 100 bps	-	-	-
Net assets value – decrease by 100 bps	-	-	-

(c) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company has no significant exposure to the risk of changes in foreign exchange rates.

36 Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value.

The Company monitors capital using a gearing ratio, which is net debt divided by total equity. The Company's policy is to keep the gearing ratio optimum. Net debt includes non-current borrowings (including current maturity of non-current borrowings less cash and cash equivalents and other bank deposits (net of restricted deposits).

Debt equity ratio

Particulars	**As at March 31, 2024**	**As at March 31, 2023**	**As at April 01, 2022**
Debts	49,651.67	54,669.11	60,024.38
Less : Cash & cash equivalents and Bank balances other than cash and cash equivalents (net of restricted deposits)*	1,583.68	(1,847.40)	(2,705.32)
Net Debt	**51,235.35**	**52,821.71**	**57,319.06**
Total equity	10,979.54	14,071.95	13,158.73
Net debt to equity ratio (in times)	**4.67**	**3.75**	**4.36**

40 Provisions

The Company is required to operate and maintain the project highway during the entire concession period and hand over the project back to the Authority (ARPDC).

For this purpose, a regular maintenance along with periodic maintenances is required to be performed. Normally periodic maintenance includes resurface of pavements, repairs of structures and other equipment's and maintenance of service roads.

The maintenance cost/ bituminous overlay may vary based on the actual usage during maintenance period. Accordingly on the grounds of matching cost concept and based on technical estimates, a provision for major maintenance expenses is reviewed and is provided for in the accounts annually.

The overlay work to be executed in financial year 2025-26 for next cycle.

Movement in provisions for periodic major maintenance work

Particulars	As at March 31, 2024	As at March 31, 2023	As at April 01, 2022
Opening balance	7,026.56	4,825.39	-

Dues to Micro Enterprises and Small Enterprises have been determined to the extent such parties have been identified on the basis of information collected by the Management. This has been relied upon by the auditors.

42 Service Concession Arrangement

The details of service concession arrangement of the Company are as follows:

Western M P Infrastructure & Toll Roads Private Limited

Description and right to use specified asset:	The Company has been awarded road project in the state of Madhya Pradesh for development of Lebad-Jaora section from km.0.00 to km.125.00 on SH-31 by Madhya Pradesh Road Development Corporation Limited (MPRDC) on built Operate Transfer (BOT) basis. The concession period is 25 years. As per the terms of the arrangements, the Company had obtained the right to construct road infrastructure project for the period of 25 years to the public at large. The Company shall pay to MPRDC premium obligation and shall operate and maintain the road as per the prescribed arrangement. The Company is a private operator and MPRDC is a government body. The Company undertakes obligation of public service granted by MPRDC. Thus, the arrangement is public-to-private service concession. The road projects totally regulated by the MPRDC. At the end of the concession period, the road infrastructure shall vest with MPRDC.
Project	Road project in the state of Madhya Pradesh for development of Lebad-Jaora section from km.0.00 to km.125.00 on SH-31 by Madhya Pradesh Road Development Corporation Limited (MPRDC) on built Operate Transfer (BOT) basis.
Nature of Asset	Intangible (Rights under Service Concession Arrangements (SCA) for Toll Road Carriageway)
Year when SCA granted	August 30, 2007
Period	25 Years
Extension of Period	1825 Days
Premature termination	27-Apr-2038 (Including estimated extension period)
Obligation to provide services:	The Company shall conduct normal maintenance activities of road and other assets to maintain uninterrupted service as per the prescribed arrangement.
Major Overlays	In terms of the SCA , the Companies obligation to carry out overlay of the roads has not been defined. However, basis quality parameters to be maintained as per SCA, the management is expecting to carry out the overlay of the roads at interval of six to seven years.

43 Note on restatement

Statement of Material Accounting Policy Information and Other Explanatory Notes for financial statements for the year ended March 31, 2024
(All amounts in ₹ lacs unless otherwise stated)

44 Ratio Analysis and its elements

The following are analytical ratios for the year ended March 31, 2024 and March 31, 2023:

Ratio	Numerator	Denominator	Unit of measurement	March 31, 2024			March 31, 2023			Variation	Remarks for Variation in the ratio by more than 25% as compared to previous year
				Numerator's Value	Denominator's Value	Ratio	Numerator's Value	Denominator's Value	Ratio		
Current ratio	Current Assets	Current Liabilities	Times	2,126.21	9,228.77	**0.23**	2,349.08	8,665.02	**0.27**	**-15.02%**	Variation due to decrease in current liabilities and increase in current assets during the year.
Debt- Equity Ratio	Total Debt	Shareholder's Equity	Times	49,649.13	10,979.54	**4.52**	54,669.11	14,071.95	**3.88**	**16.40%**	Variation due to movement of debts and reserve during the year.
Debt Service Coverage ratio	Earnings for debt service = Net profit after taxes + Non-	Debt service = Interest + Lease Payments + Principal Repayments	Times	5,699.82	(10,475.38)	**(0.54)**	8,892.05	(11,093.40)	**(0.80)**	**-32.12%**	Variation due to movement in EBITA and debt payments during the year.
Return on Equity ratio	Net Profits after taxes - Preference	Average Shareholder's Equity	Percentage	(3,081.23)	12,525.75	**(0.25)**	914.95	13,615.34	**0.07**	**-466.06%**	-
Inventory Turnover ratio*	Cost of goods sold or Sales	Average Inventory	Times			**-**	-	-	**-**	**-**	-
Trade Receivable Turnover Ratio*	Net credit sales = Gross credit sales -	Average Trade Receivable	Times	-	-	**-**	-	-	**-**	**-**	-
Trade Payable Turnover Ratio	Net credit purchases = Gross credit purchases -	Average Trade Payables	Times	6,403.08	2,881.75	**2.22**	5,910.80	2,777.76	**2.13**	**4.42%**	Variation is due to movement of purchase and trade payable during the year
Net Capital Turnover Ratio	Net sales = Total sales - sales return	Working capital = Current assets - Current liabilities	Times	19,066.90	(7,102.56)	**(2.68)**	17,780.62	(6,315.94)	**(2.82)**	**-4.64%**	Variation is due to movement of revenue and rworking capital during the year
Net Profit ratio	Net Profit	Net sales = Total sales - sales return	Times	(3,081.23)	19066.9	**(0.16)**	914.95	17,780.62	**0.05**	**-414.05%**	Variation is due to movement of net profit and revenue during the year
Return on Capital Employed	Earnings before interest and taxes	Capital Employed = Tangible Net Worth* +	Percentage	3,480.05	60,628.67	**0.06**	7,272.81	68,741.06	**0.11**	**-45.75%**	-
Return on Investment	Income generated from investments	Weighted average value of investments	Percentage	-	-	**-**	0.28	-	**-**	**0.00%**	Variation is due to movement of investments during the year

*Since the Company is toll road Company operating under Design, Build, Finance, Operate and Transfer (DBFOT) basis and is not in the nature of manufacturing or a trading concern, accordingly Inventory turnover ratio and debtors turnover ratio are considered as not applicable.

*The amounts capitalised as intangible assets being the right of the Company under the Concession Agreement (to collect toll fees from the users of the Project Highway) is included as part of tangible net worth.

Note: The above Non-GAAP measures presented may not be comparable to similarly titled measures reported by other companies. Further, it should be noted that these are not a measure of operating performance or liquidity defined by generally accepted accounting principles.

45 Impairment of assets

Based on a review of the future discounted cash flows of the project facility, the recoverable amount is higher than the carrying amount and hence no provision for impairment is required for the year. The inputs to the valuation models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as Traffic growth rates, WACC, Tax rates and Inflation rates etc.

46 The Code on Social Security,2020 ('Code') relating to employee benefits during employment and post employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified. Company will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective.

47 There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

48 The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.

49 The Company does not have any transactions with struck-off companies under section 248 of the Companies Act, 2013..

50 The Company does not have any charges or satisfaction which is yet to be registered with ROC beyond the statutory period.

51 The Company has not traded or invested in Crypto currency or Virtual Currency during the financial year.

52 The Company is not deemed wilfull defaulter by any bank or financial institution or other lender.

53 The Company has not advanced or loaned or invested funds to any other person or entity, including foreign entities (Intermediaries) with the understanding that the Intermediary shall: directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company (Ultimate Beneficiaries); or provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.

54 The Company has not received any fund from any person or entity, including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall: directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries); or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

55 The Company has not any transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income tax Act, 1961).

56 The Company has not availed any working capital facilities from banks on the basis of security of current assets.

57 Expressway Developers Limited (erstwhile Holding Company) has entered into an Agreement with Cube Highways and Infrastructure V PTE LTD (Purchaser), being a company based in Singapore and incorporated with the objective of acquiring and operating transportation projects to purchase the shares from the erstwhile Holding Company (including the purchase of seller nominee shares by the purchaser nominees from the seller nominees) and the erstwhile Holding Company has agreed to sell the shares to the Purchaser (including the sale of such portion of the sale shares which are held by the seller nominees to purchaser nominees).

58 Audit Trail

The Ministry of Corporate Affairs (MCA) by the Companies (Accounts) Amendment Rules 2021 and vide notification dated 24 March 2021 has issued the "Companies (Audit and Auditors) Amendment Rules, 2021 has prescribed a new requirement for companies under the proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 inserted requiring companies, which uses accounting software for maintaining its books of account, shall use only such accounting software which has a feature of recording audit trail of each and every transaction, creating an edit log of each change made in the books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled.

The Company uses an Enterprise Resources Planning System – SAP S/4 HANA accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility , however the audit log (edit log) feature has not been enabled in the aforesaid software throughout the year. Further the audit trail feature is not enabled for direct changes to database. Since the software is having preventive controls measures inbuilt , the audit log (edit log) facility is not enabled in the system. Since there is no audit log (edit log) feature enabled at application and at database level for the year under review there is no preservation of audit trail as at March 31, 2024.

59 The company did not have any long term contracts including derivative contracts for which there were any material foreseeable losses.

60 Previous period figures have been re-grouped and/ or re-arranged wherever necessary to make their classification comparable with the current period.

61 The financial statements were approved for issue by the Board of Directors on September 02, 2024.

INDEPENDENT AUDITOR'S REPORT

To
The Members of,
Western MP Infrastructure & Toll Roads Pvt. Ltd.
Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of **Western MP Infrastructure & Toll Roads Pvt. Ltd.** ("the Company"), which comprise the Balance Sheet as at March 31, 2023, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, notes to the financial statement and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2023, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The company has made major maintenance work during the year.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Corporate Governance and Shareholder's Information, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the **"Annexure A"** a statement on the matters specified in paragraphs 3 and 4 of the Order to the extent applicable.

2. As required by section 143 (3) of the Act, we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;

   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books:

   c) The Balance Sheet, the Statement of Profit and Loss including other comprehensive income and the Statement of Cash Flows and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account:

   d) In our opinion, the aforesaid financial statements comply with the Indian Accounting Standards (IND AS) specified under section 133 of the Act and rules made there under, as applicable;

e) On the basis of written representations received from management as on March 31, 2023 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2023 from being appointed as a director in terms of Section 164(2) of the Act.

f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report **in "Annexure B"**.

g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended: In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigations which would impact on its financial position in its financial statements;

ii. The company did not have any long term contracts including derivative contracts for which there were any foreseeable losses.

iii. there has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

iv.

a. The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall:

- directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of the Company or

- Provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.

b. The management has represented, that, to the best of its knowledge and belief, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall:

- directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of the Funding Party or

- provide any guarantee, security or the like from or on behalf of the Ultimate Beneficiaries; and

c. Based on such audit procedures as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub clause (iv)(a) and (iv)(b) contain any material mis-statement.

v. No Dividend is declared or paid by the company during the year.

ANNEXURE A

To the Independent Auditors' Report on
Financial Statements of Western MP Infrastructure & Toll Roads Pvt. Ltd.
(Referred to our report of even date)

The Annexure referred to in our Independent Auditors' Report to the members of the Company on the financial statements for the year ended March 31, 2023, we report that:

i. In respect of Property, Plant & Equipment

a) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant & Equipment.

b) According to information and explanations given to us and on the basis of our examination of the records of the company, the Property, Plant & Equipment have been physically verified during the year by the management under a regular programme of verification by rotation over a period of three years, which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed.

c) According to information and explanations given to us and on the basis of our examination of the records of the company, the title deeds of immovable properties forming part of the Property, Plant & Equipment are held in the name of the Company.

d) According to information and explanations given to us and on the basis of our examination of the records of the company, the company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets or both during the year.

e) According to information and explanations given to us and on the basis of our examination of the records of the company, there are no proceedings initiated or are pending against the company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (45 of 1988) and rules made thereunder.

ii. In respect of Inventory

The Company does not hold any physical inventories. Accordingly, reporting under clause 3(II) of the order not applicable to the company.

iii. In respect of loan granted:

According to information and explanations given to us and on the basis of our examination of the records of the company, the company has made any investments, provided guarantee or security or granted any advance in nature of loans, secured or unsecured to Companies, Firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Companies Act, The Amount taken as unsecured loan is amounting to Rs. Nil (Previous Year Rs. 55.02 Lakh).

iv. **In respect of compliance of section 185 and 186 of The Companies Act, 2013**
According to information and explanations given to us and on the basis of our examination of the records of the company, in our opinion the company has not advanced any loans, made investments, gave guarantees, and provided security prescribed in provisions of section 185 and 186 of the companies Act, 2013.

v. **In respect of public deposits**
In our opinion and according to the information and explanations given to us and on the basis of our examination, the Company has not accepted any deposit from the public within the meaning of the provisions of sections 73 to 76 or any relevant provisions of the Companies Act, 2013 and the rules framed there under.

vi. **In respect of Cost Records:**
According to the information and explanations given to us, the maintenance of cost records has been specified by the central government under the section 148(1) of the Companies Act, 2013 related to road tolling business under BOT basis activities carried out by the company. And are of the opinion that prima facie, the specified accounts and records have been made and maintained.

vii. **In respect of statutory dues:**
a) According to the records of the Company, the Company is generally regular in depositing with appropriate authorities undisputed statutory dues including provident fund, employees' state insurance, income-tax, duty of custom, goods & service tax, cess and other statutory dues applicable to it. As per the records of the Company, as at March 31, 2023, the Company does not have any undisputed statutory dues which are outstanding for a period of more than six months from the date they became payable.

b) According to the information and explanations given to us and on the basis of examination of records of the company there is no dispute in respect of income tax or sales tax or service tax or value added tax or GST or any other cess.

viii. **In respect of undisclosed Income**
In our opinion and according to the information and explanations given to us and based on our examination of the records of the company, there were no such unrecorded transaction in the books of account which were surrendered or disclosed as income during the year in tax assessments under Income Tax Act, 1961 (43 of 1961).

ix. **In respect of repayment of loan**
According to the information and explanations given to us, based on our examination of the records of the company and on the basis of overall examination of the Balance Sheet of the Company,
a) The company has not defaulted in repayment of loans or borrowing to a financial institution or bank.
b) The company has not been declared willful defaulter by any bank or financial institution.
c) In our opinion the term loan were applied for the purpose for which the loan was obtained.
d) No such short term loan funds have been utilized for long term purpose.

e) The company has not raised any fund from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.
f) The company has not raised any loan during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies.

x. In respect of funds raised through IPO/FPO/Debt finance

a) On the basis of overall examination of the Balance Sheet of the Company, according to the information and explanations provided to us and based on our examination of the records of the company we report that monies raised by way of term loans were applied for the purposes for which those were raised. The Company did not raise any money by way of initial public offer or further public offer (including debt instrument).
b) In our opinion and according to the information and explanations given to us as well as based on our examination of the records of the company, the company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year under section 42 and section 62 of the Companies Act, 2013.

xi. In respect of fraud reporting

a) According to the information and explanations given to us and based on our examination of the records of the company, no material fraud by the Company or on the Company by its officers or employees was noticed or reported during the year.
b) According to the information and explanations given to us and based on our examination of the records of the company, no report under sub-section (12) of section 143 of the Companies Act has been filed by the auditors in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.
c) According to the information and explanations given to us and based on our examination of the records of the company, there are no whistle blower complaints received by the Company during the year.

xii. In respect of Nidhi Company

According to the information and explanations given to us, the Company is not a Nidhi Company. Accordingly, paragraph 3(xii) of the Order is not applicable.

xiii. In Respect of Transactions With Related Parties

According to the information and explanations given to us, transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and details of such transactions have been disclosed in the financial statements as required by the applicable accounting standards.

xiv. In Respect of Internal Audit System

According to the information and explanations given to us and based on our examination of the records of the Company, the company has not any internal audit system commensurate with the size and nature of its business and the reports of the Internal Auditors for the period under audit were considered by us.

SBA & COMPANY ★ CHARTERED ACCOUNTANTS ★

xv. **In respect of Non-Cash Transactions**

According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with him. Accordingly, paragraph 3(xv) of the Order are not applicable.

xvi. **In respect of compliance of section 45IA of the RBI Act, 1934**

b) The Company is not required to be registered under section 45 IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi)(b)of the Order is not applicable.

c) The Company is not a core investment company (CIC) as defined in the regulations made by the reserve Bank of India. Accordingly clause 3(xvi)(c) of the order is not applicable.

d) According to information and explanations given to us during the course of audit, there is no core investment company within the Group (as defined in the Core Investment Companies (Reserve Bank) Directions, 2016) and accordingly reporting under clause 3(xvi)(d) of the Order is not applicable.

xvii. **In respect of Cash losses**

The company has not incurred any cash losses in the current financial year and in the immediately preceding financial year.

xviii. **In respect of resignation of statutory auditors**

There has been no resignation of the statutory auditors during the year.

xix. **In respect of any material uncertainty to meet liability**

In our opinion and according to the information and explanations given to us and based on our examination of the records of the Company, on the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements ,our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which cause us to believe that any material uncertainty exists as on the date of the audit report that the company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

xx. **In Respect of Unspent Amount Under Section 135(5) of The Companies Act, 2013**

a. In our opinion and according to the information and explanations given to us and based on our examination of the records of the Company, there was no such unspent amount to be transferred to fund specified in Schedule VII to the Companies Act. Accordingly, paragraphs 3(xx)(a) of the Order are not applicable.

b. The Company does not have ongoing projects under section 135 of the Companies Act. Accordingly, paragraphs 3(xx)(b) of the Order are not applicable.

ANNEXURE B

To the Independent Auditors' Report on
Financial Statements of Western MP Infrastructure & Toll Roads Pvt. Ltd.
(Referred to our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Western MP Infrastructure & Toll Roads Pvt. Ltd.** ("the Company") as of March 31, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting

SBA & COMPANY ★ CHARTERED ACCOUNTANTS ★

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Western M P Infrastructure & Toll Roads Pvt. Ltd.

1 CORPORATE INFORMATION

The Company Western M P Infrastructure & Toll Roads Private Limited (the 'Company') has been awarded road project in the state of Madhya Pradesh for development of Lebad-Jaora section from km.0.00 to km.125.00 on SH-31 by Madhya Pradesh Road Development Corporation Limited (MPRDC) on built Operate Transfer (BOT) basis. The concession period is 25 years.
The registered office is located at 613/A, 5th Floor, Kohinoor City, Kirol Road Kurla (West), Mumbai, Mumbai City MH 400070, India.

The Company is a subsidiary of Express Way Developers Limited.

2 BASIS OF PREPARATION AND PRESENTATION

2.01 Basis of preparation of financial statements

These Financial Statements are prepared on accrual basis of accounting and all principal accounting policies applied in the preparation of these Financial Statements are set out below. These policies have been consistently applied to all the financial years presented.

The financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, and relevant amendment rules issued there after.

2.02 Functional and presentation currency

Items included in the financial statements Company are measured using the currency of the primary economic environment in which the Company operates ("the functional currency"). Indian rupee is the functional currency of the Company.
The financial statements are presented in Indian Rupees which is the Company's presentation in Indian Rupees has been rounded up to the nearest lakhs except where otherwise indicated.

2.03 Use of estimates

The preparation of financial statements in conformity of Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, the disclosures of contingent assets and contingent liabilities at the date of financial statements, income and expenses during the period. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions to accounting estimates are recognized in the period in which the estimates are revised and in future periods which are affected.
Application of accounting policies that require critical accounting estimates and assumption having the most significant effect on the amounts recognized in the financial statements are:

Valuation of financial instruments
Useful life of property, plant and equipment
Useful life of intangible assets
Provisions

2.04 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification in accordance with Division II of Schedule III of The Companies Act, 2013.

2.05 Disclosure of Ind AS issued but not effective

Ind AS issued but not effective
Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Rules, 2015 by issuing the Companies (Indian Accounting Standards) Amendment Rules, 2023, applicable from April 1, 2023, as below:

Ind AS 1 – Presentation of Financial Statements
The amendments require companies to disclose their material accounting policies rather than their significant accounting policies. Accounting policy information, together with other information, is material when it can reasonably be expected to influence decisions of primary users of general purpose financial statements. The Company does not expect this amendment to have any significant impact in its financial statements.

Ind AS 12 – Income Taxes
The amendments clarify how companies account for deferred tax on transactions such as leases and decommissioning obligations. The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of Ind AS 12 (recognition exemption) so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. The Company is evaluating the impact, if any, in its financial statements.

Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors
The amendments will help entities to distinguish between accounting policies and accounting estimates. The definition of a change in accounting estimates has been replaced with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty. The Company does not expect this amendment to have any significant impact in its financial statements.

3 SIGNIFICANT ACCOUNTING POLICIES

3.01 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

In the principal market for the asset or liability, or
In the absence of a principal market, in the most advantageous market for the asset or liability
The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.
A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.
The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.
All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:
Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2- Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 -Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

Western M P Infrastructure & Toll Roads PVT. LTD.

SBA & COMPANY ★ CHARTERED ACCOUNTANTS ★

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.
The Company's Management determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted

financial assets measured at fair value, and for non-recurring measurement, such as assets held for distribution in discontinued operations.
At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's accounting policies. For this analysis, the Management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.
The Management also compares the change in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.
For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.
This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

3.02 Service concession arrangements:

The Company constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time.
These arrangements may include infrastructure used in a public-to-private service concession arrangement for its entire useful life.

Under Appendix A to Ind AS 11 - Service Concession Arrangements, these arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that the Company receives the right (i.e. a franchise) to charge users of the public service. The financial asset model is used when the Company has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component. If the Company performs more than one service (i.e., construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable.
The Company manages concession arrangements which include constructing road projects. The Company maintains and services the infrastructure during the

concession period. These concession arrangements set out rights and obligations related to the infrastructure and the service to be provided.
The right to consideration gives rise to an intangible asset and financial receivable and accordingly, both the intangible asset and financial assets models are applied. Income from concession arrangements earned under the intangible asset model consists of the i) fair value of contract revenue, which is deemed to be fair value of consideration transferred to acquire the asset, and ii) payments actually received from the users. The intangible assets is amortized over its expected useful life in a way that reflects the pattern in which the assets economy benefits are consumed by the Company, starting from the date when the right to operate starts to be used. Based on these principles, the intangible assets is amortized in line with the actual usage of the specific public facility, with the maximum of the duration of the concession.
Financial receivable is recorded at the fair value of guaranteed residual value to be received at the end of the concession period. This receivable is subsequently measured at amortized cost.
Any asset carried under concession arrangements is derecognized on disposal or when no future economic benefits are expected from its future use or disposal or when the contractual rights to the financial asset expire.

3.03 Revenue recognition
Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.
The specific recognition criteria described below must also be met before revenue is recognised.

Toll collections
Toll collections from users of facility are accounted for as and when the amount is due and recovery is certain.

Interest income
Interest income is recognised on accrual basis.

3.04 Taxes
Income tax expense for the year comprises of current tax and deferred tax. It is recognised in the Statement of Profit and Loss except to the extent it relates to a business combination or to an item which is recognised directly in equity or in other comprehensive income.
Current tax is the expected tax payable/receivable on the taxable income/ loss for the year using applicable tax rates at the Balance Sheet date, and any adjustment

to taxes in respect of previous years. Interest income/ expenses and penalties, if any, related to income tax are included in current tax expense.
Deferred tax is recognised in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes.
A deferred tax liability is recognised based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted, or substantively enacted, by the end of the reporting period. Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.
Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the

asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off current tax assets

against current tax liabilities; and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

3.05 Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and where applicable accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials, direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.
When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Western M P Infrastructure & Toll Roads Pvt. Ltd.

SBA & COMPANY ★ CHARTERED ACCOUNTANTS ★

Gains and losses on disposal with the carrying amount of Property, Plant and Equipment and are determined by comparing the proceeds from disposal with the carrying amount of Property, Plant and Equipment and are recognized net within "other income/other expenses" in the Statement of Profit and Loss.

Subsequent Cost

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is de-recognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in the Statement of Profit and Loss.

Depreciation is calculated on a WDV basis using useful lives of the assets as prescribed under Schedule II to the Companies Act 2013:

Asset class	Useful life
Plant and machinery	15 years
Furniture and fixtures	10 years
Office equipment	5 years
Vehicles	8 years
Computers and printer	3 years

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

3.06 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Concessionaire Rights are amortised over the period of concession, using revenue based amortisation in respect of concessionaire rights recognised in the financial statements for the period ending immediately before the beginning of the first Ind AS reporting period. Under this method, the carrying value of the rights is amortised in the proportion of actual toll income for the year to expected revenue for the balance concession period, to reflect the pattern in which the assets economic benefits will be consumed. At each balance sheet date, the projected revenue for the balance concession period is reviewed by the Management. If there is any change in the projected revenue from previous estimates, the amortisation of concessionaire rights is changed prospectively to reflect any changes in the estimates.

Intangible assets are assessed for impairment wherever there is an indication that the intangible asset may be impaired.

3.07 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

3.08 Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The contingent liability is not recognised in books of account but its existence is disclosed in financial statements.

3.09 Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Company's of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

3.10 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

3.11 Financial instruments

Financial assets

Financial assets are recognised when the Company becomes a party to the contractual provisions of the instrument.

On initial recognition, a financial asset is recognised at fair value, in case of financial assets which are recognised at fair value through profit and loss (FVTPL), its transaction cost are recognised in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

Financial assets are subsequently classified as measured at

Western M P Infrastructure & Toll Roads Pvt. Ltd.

SBA & COMPANY ★ CHARTERED ACCOUNTANTS ★

- **amortised cost:** Financial assets that are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows that are solely payments of principal and interest, are subsequently measured at amortised cost using the effective interest rate ('EIR') method less impairment, if any. The amortisation of EIR and loss arising from impairment, if any is recognised in the Statement of Profit and Loss.
- **fair value through profit and loss (FVTPL):** A financial asset not classified as either amortised cost or FVOCI, is classified as FVTPL. Such financial assets are measured at fair value with all changes in fair value, including interest income and dividend income if any, recognised as 'other income' in the Statement of Profit and Loss.
- **fair value through other comprehensive income (FVOCI):** Financial assets that are held within a business model whose objective is achieved by both, selling financial assets and collecting contractual cash flows that are solely payments of principal and interest, are subsequently measured at fair value through other comprehensive income. Fair value movements are recognized in the other comprehensive income (OCI). Interest income measured using the EIR method and impairment losses, if any are recognised in the Statement of Profit and Loss. On derecognition, cumulative gain or loss previously recognised in OCI is reclassified from the equity to 'other income' in the Statement of Profit and Loss.

Financial assets are not reclassified subsequent to their recognition, except if and in the period the Company changes its business model for managing financial assets.

Loans:

Loans are initially recognised at fair value. Subsequently, these assets are held at amortised cost, using the effective interest rate (EIR) method net of any expected credit losses. The EIR is the rate that discounts estimated future cash income through the expected life of financial instrument.

Derecognition
The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the contractual rights to receive the cash flows from the asset.

Impairment of Financial Asset

Expected credit losses are recognized for all financial assets subsequent to initial recognition other than financials assets in FVTPL category.

For financial assets other than trade receivables, as per Ind AS 109, the Company recognises 12 month expected credit losses for all originated or acquired financial assets if at the reporting date the credit risk of the financial asset has not increased significantly since its initial recognition. The expected credit losses are measured as lifetime expected credit losses if the credit risk on financial asset increases significantly since its initial recognition. The Companys trade receivables do not contain significant financing component and loss allowance on trade receivables is measured at an amount equal to life time expected losses i.e. expected cash shortfall.
The impairment losses and reversals are recognised in Statement of Profit and Loss.

Financial Liabilities:
Initial recognition and measurement
Financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial liabilities are initially measured at the amortised cost unless at initial recognition, they are classified as fair value through profit and loss. In case of trade payables, they are initially recognised at fair value and subsequently, these liabilities are held at amortised cost, using the effective interest method.

Subsequent measurement
Financial liabilities are subsequently measured at amortised cost using the EIR method. Financial liabilities carried at fair value through profit or loss are measured at fair value with all changes in fair value recognised in the Statement of Profit and Loss.

Derecognition
A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expires.

3.12 Cash and cash equivalents
Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.
For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

3.13 Employee Benefits

i) Short term benefits
Short term employee benefit obligations are measured on an undiscounted basis and are expensed as a related service provided. A liability is recognized for the amount expected to be paid under short term cash bonus or profit sharing plans if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

3.14 Lease

Operating lease:

Lease of assets under which all the risk and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease payments / revenue under operating leases are recognized as an expense / income on accrual basis in accordance with the respective lease agreements.

3.15 Earnings per share
Basic earnings per share is computed by dividing the net profit for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.
For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

24 Gratuity and other post-employment benefit plans

(a) Defined benefit plan

The Company has a unfunded defined benefit gratuity plan. The gratuity plan is governed by the Payment of Gratuity Act, 1972. Under the act, employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn salary) for each completed year of service as per the provision of the Payment of Gratuity Act, 1972 with total ceiling on gratuity of Rs.1,000,000.

The following tables summaries the components of net benefit expense recognised in the Statement of profit and loss and the funded status and amounts recognised in the balance sheet for the gratuity plan:

Particulars	For the year ended 31 March 2023	For the year ended 31 March 2022
Statement of profit and loss		
Net employee benefit expense recognised in the employee cost		
Current service cost	2.77	3.90
Past service cost		
Interest cost on defined benefit obligation	0.99	1.01
(Gain) / losses on settlement	1.73	2.24
Benefits Paid	(3.93)	(8.27)
Total expense charged to profit and loss account	1.55	(1.12)
Amount recorded in Other Comprehensive Income (OCI)		
Opening amount recognised in OCI outside profit and loss account	-	-
Remeasurement during the period due to :		
Actuarial loss / (gain) arising from change in financial assumptions	(0.48)	(0.77)
Actuarial loss / (gain) arising on account of experience changes	2.21	3.00
Amount recognised in OCI outside profit and loss account	1.73	2.24
Closing amount recognised in OCI outside profit and loss account	1.73	2.24
Reconciliation of net liability / asset		
Opening defined benefit liability / (assets)	13.80	14.92
Expense charged to profit & loss account	1.55	(1.12)
Amount recognised in other comprehensive income		
Closing net defined benefit liability / (asset)	15.36	13.80

Movement in benefit obligation and balance sheet

A reconciliation of the benefit obligation during the inter-valuation period:

Particulars	For the year ended 31 March 2023	For the year ended 31 March 2022
Opening defined benefit obligation	13.80	14.92
Current service cost	2.77	3.90
Past service cost	-	-
Interest on defined benefit obligation	0.99	1.01
Remeasurement during the period due to :		
Actuarial loss / (gain) arising from change in financial assumptions	(0.48)	(0.77)
Actuarial loss / (gain) arising on account of experience changes	2.21	3.00
Benefits paid	(3.93)	(8.27)
Closing defined benefit obligation [liability / (asset)] recognised in balance sheet	15.36	13.80
Net liability is bifurcated as follows :		
Current	0.45	0.38
Non-current	14.90	13.42
Net liability	15.36	13.80

The principal assumptions used in determining gratuity benefit obligation for the company's plans are shown below:		
Discount rate	7.50%	7.25%
Salary escalation rate (p.a.)	6.00%	6.00%
Mortality rate	100.00%	100.00%

	60,962.53	-	-	60,962.53	60,962.53

(29) Financial risk management objectives and policies

The risk management policies of the Company are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

The Management has overall responsibility for the establishment and oversight of the Company's risk management framework.

In performing its operating, investing and financing activities, the Company is exposed to the Credit risk, Liquidity risk and Market risk.

(30) Credit risk on financial assets

Credit risk is the risk of financial loss to the company if a customer or counter-party fails to meet its contractual obligations.

Other financial assets
The company maintains exposure to cash equivalents. The company has set counter-parties limits based on multiple factors including financial positions, credit ratings, etc

The company's maximum exposure to credit risk as at 31 March 2023 and 31 March 2022 is the carrying value of each class of financial assets.

(31) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and derivative financial instruments.

Western M P Infrastructure & Toll Roads Pvt. Ltd.

SBA & COMPANY ★ CHARTERED ACCOUNTANTS ★

(32) Interest rate risk

The interest rate risk exposure is mainly from changes in fixed and floating interest rates. The interest rate are disclosed in the respective notes to the financial statement of the Company. The following table analyse the breakdown of the financial assets and liabilities by type of interest rate:

(Rs. In lakhs)

Particulars	As at 31-March-2023	As at 31-March-2022
Financial assets		
Interest bearing		
- fixed interest rate		
Other bank balances	1,507.78	2,070.99
Other financial assets	-	-
Non interest bearing		
Loans	-	-
Cash and cash equivalent	338.62	684.33
Other financial assets	-	46.48
Financial Liabilities		
Interest bearing		
-Fixed interest rate	-	-
- floating interest rate		
Borrowings	48 889.11	54,669.36
Other financial liabilities	6,000.00	6,400.00
Non interest bearing		
Borrowings	-	55.02
Trade payables	530.78	807.41
Other financial liabilities	-5,865.09	-5,369.26

(33) Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

Particulars	As at 31-March-2023	As at 31-March-2022
Increase in basis points	50.00	50.00
Effect on profit before tax	(279.35)	(289.85)
Decrease in basis points	50.00	50.00
Effect on profit before tax	279.35	289.85

(34) Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Company closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including debt and overdraft from banks at an optimised cost.

The Company maximum exposure to credit risk for the components of the balance sheet at 31 March 2023 and 31 March, 2022 is the carrying amounts. The liquidity risk is managed on the basis of expected maturity dates of the financial liabilities. The average credit period taken to settle trade payables is about 30 to 90 days. The other payables are with short-term durations. The carrying amounts are assumed to be a reasonable approximation of fair value. The following table analys financial liabilities by remaining contractual maturities:

Particulars	On demand	Less than 3 months	3 to12 months	1 to 5 years	>5 years	Total
Year ended 31 March 2023						
Borrowings	-	-	-	54,669.11		54,669.11
Other financial liabilities			34.91			34.91
Trade and other payables		3.45	482.77	44.57		530.78
	-	3.45	517.67	54,713.67	-	55,234.78
Year ended 31 March 2022						
Borrowings	-	-	-	59,969.36	-	59 969.36
Other financial liabilities	-	-	30.74	-	-	30.74
Trade and other payables	-	-	907.41	-	-	907.41
	-	-	938.15	59,969.36	-	60,907.51

At present, the Company does expects to repay all liabilities at their contractual maturity. In order to meet such cash commitments, the operating activity is expected to generate sufficient cash inflows.

(35) Capital management

For the purpose of the Company's capital management, capital includes issued equity capital, share premium and all other equity reserves attributable to the equity holders of the parent. The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company's policy is to keep optimum gearing ratio. The Company includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and cash equivalents, excluding discontinued operations.

Western M P Infrastructure & Toll Roads Pvt. Ltd.

SBA & COMPANY ★ CHARTERED ACCOUNTANTS ★

Rs. In lakhs

Particulars	As at 31-March-2023	As at 31-March-2022
Borrowings	54,869.11	60,024.38
Trade payables	530.78	907.41
Other financial liabilities	34.91	30.74

INDEPENDENT AUDITOR'S REPORT

To the Members of CHENANI NASHRI TUNNELWAY LIMITED

Report on the audit of the Ind AS Financial Statements

Qualified Opinion

We have audited the Ind AS Financial Statements of **CHENANI NASHRI TUNNELWAY LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March, 2025 and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the Ind AS Financial Statements, including a summary of material accounting policy and other explanatory information for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, **except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report,** the aforesaid Ind AS Financial Statements give the information required by the Companies Act, 2013 in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards(Ind AS) prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2025 and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Qualified Opinion

During the FY 2018-19, the Company had recognized and during the year continues to recognize thereafter impairment loss of Rs. 7,107.98 Mn. by comparing the carrying amount of the receivables under the head 'Receivable under Service Concession Arrangements' that were measured at amortized cost and bid received from third party for acquisition of entire Company. Thus, the Company had in the FY 2018-19 and continues thereafter to measure the receivables at fair value then recognized to arrive at present amortized carrying value as at the end of the year, which is not in accordance with Ind AS 109 'Financial Instruments' & read with accounting policy 3.7.4. The consequential impact of the above on the balance under the head 'Receivable under Service Concession Arrangements' reported in the balance sheet and on the profit for the year are unascertainable.

Consequently, the unreserved and explicit statement of compliance with Indian Accounting Standards as notified in the Companies (Indian Accounting Standards) Rules, 2015 and further amendments thereto in Note 2.1 is not proper.

We conducted our audit in accordance with the Standards on Auditing ("SAs") specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw your attention to

a) As mentioned in note no. 32 to the accompanying individual Ind AS Financial Statements regarding NCLAT Orders dated 12th March, 2020. In terms of Paragraph 61 (3) on Pg 87 of the orders, the company has not accounted accrued interest, default interest, penal charges or other similar charges after the cut-off date of 15th October,2018.

b) Note no. 34 to accompanying IND AS financial statements which states that the Company does not comply with certain requirements/provisions of the Companies Act 2013. In view of the above, the Company has estimated possible obligation arising out of these non-compliances and recognized the provision in the books of accounts.

c) As mentioned in note no. 39 to the accompanying IND AS financial statements, the Ministry of Corporate Affairs, Government of India, had initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS Ltd and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of its investigation, SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and relevant information is being provided by ITNL to the agency. The company has not received any direct communication from SFIO. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

Our Opinion is not modified in respect of above matters.

Material Uncertainty Related to Going Concern

We draw your attention to Note no. 31 to the accompanying Ind AS financial statements which describes that Entire Group is going through liquidity issue and defaulted in repayment of various loan instruments, Union of India has filed petition against IL&FS Limited & its Group Companies in National Company Law Tribunal and superseded earlier Board of the Holding/Ultimate Holding Company. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. As per the management, going concern assumption is appropriate for preparation of financial statements, as the company has received a bid from third party and which has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares has also been received.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi - 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

Our Opinion is not modified in respect of above matter.

Information other than the Ind AS Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, but does not include the Ind AS Financial Statements and our auditor's report thereon.

Our opinion on the Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management and Those Charged with Governance for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS Financial Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with Standards on Auditing ("SAs") will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS Financial Statements, including the disclosures, and whether the Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Ind AS Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Ind AS Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in:

(i) planning the scope of our audit work and in evaluating the results of our work; and
(ii) to evaluate the effect of any identified misstatements in the Ind AS Financial Statements.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the 'Annexure A' a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   b) In our opinion, **except for the effects of the matter described in the Basis for Qualified Opinion paragraph above,** proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   c) The Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   d) In our opinion, **except for the effects of the matter described in the Basis for Qualified Opinion paragraph above,** the aforesaid Ind AS Financial Statements comply with the Indian Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015 as amended.

   e) **Our observations made on the matters stated in Qualified Opinion paragraphs above may have a significant effect so as to adversely affect the functioning of the company.**

   f) On the basis of the written representations received from the directors as on 31st March 2025 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March 2025 from being appointed as a director in terms of Section 164 (2) of the Act.

   g) With respect to the Other Matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company has no pending litigation which would impact its financial position except those disclosed in Ind AS Financial Statements.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

ii. The Company did not have any material foreseeable losses in long-term contracts including derivative contract requiring provision.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company

iv. a) The management has represented that, to the best of its knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

b) The management has represented, that, to the best of its knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c) Based on such audit procedures that we have considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e), as provided under (a) and (b) above, contain any material misstatement.

v. The Company has not declared or paid any dividend during the year.

vi. Based on our examination which included test checks, the company has used SAP-based application as the accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with.

Additionally, audit trail has been preserved by the Company as per the statutory requirements for record retention.

h) With respect to the adequacy of the internal financial controls with reference to Ind AS Financial Statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" which expresses an unmodified opinion.

Annexure 'A' to the Independent Auditor's Report of CHENANI NASHRI TUNNELWAY LIMITED for the Year ended as on 31st March 2025

Annexure referred to in paragraph 1 under the heading "Report on Other Legal and Regulatory Requirements" of our report on even date: -

To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of audit, we state that:

i. In respect of the Company's Property, Plant and Equipment, Right-of-use Assets and Intangible Assets:

a A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.

B) The Company doesn't have Intangible Assets, hence reporting under paragraph 3(i)(a)(B) of the Order is not applicable to the Company.

b The Property, Plant and Equipment have been physically verified by the Management at regular Intervals and no material discrepancies were noticed on such verification.

c The title deeds of immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company.

d The company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets during the year. Hence, reporting under paragraph 3(i)(d) of the order is not applicable to the Company.

e There are no proceedings which have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder. Hence, reporting under paragraph 3(i)(e) of the order is not applicable to the Company.

ii. a The Company is engaged in the business of infrastructure development, operations and its maintenance and there is no inventory in hand at any point in time, hence, reporting under paragraph 3(ii)(a) of the Order is not applicable to the Company.

b The Company has not been sanctioned any working capital limits, from banks or financial institutions on the basis of security of current assets. Hence, reporting under paragraph 3(ii) (b) of the order is not applicable to the Company.

iii. The Company has not made investments in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, limited liability partnerships or any other parties. Hence, reporting under paragraph 3(iii) of the order is not applicable to the Company.

iv. The Company has not entered into any transaction in respect of loans, investments, guarantee and securities, which attracts compliance to the provisions of the sections 185 and 186 of the Companies Act, 2013. Hence, reporting under paragraph 3(iv) of the Order is not applicable to the Company.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

v. The Company has not accepted deposits or amounts which are deemed to be deposits and the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act, and the rules framed there under. Hence, reporting under paragraph 3(v) of the order is not applicable to the Company.

vi. We have broadly reviewed the books of account maintained by the company pursuant to the Rules made by the Central Government for the maintenance of cost records under section 148 of the Act, and are of the opinion that prima facie, the prescribed accounts and records have been made.

vii. In respect of statutory dues:

a The Company has been generally regular in depositing undisputed statutory dues including goods and services tax, provident fund, employee state insurance, income tax, service tax, value added tax, cess and other statutory dues during the year with the appropriate authorities. As on 31st March 2025, there are no undisputed statutory dues payables for a period exceeding for a period more than six months from the date they become payable **except undisputed amounts of INR 54.11 million on account of the tax deducted at source are in arrears since March 31, 2021.**

b Details of statutory dues referred to in sub-clause (a) which have not been deposited on account of disputes are given below:

Name of the Statute	Nature of the dues	Forum where Dispute is Pending	Amount (In million)	Remarks
Goods and Services Act, 2017	GST Demand for the period September 2017 to September 2022	ZD0102250003780 office of Joint Commissioner	15,164.12	Writ petition filed on 07.04.25 having No WP(C)/1389/2025

viii. According to the information and explanations given to us and on the basis of our examination of the books of accounts, there were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961).

ix. In respect to the borrowings:

a The Company has defaulted in repayment of loans or other borrowings. Details of the same is as under:

Default in repayment of loan (Principal & Interest) **(In Rs. Mn.)**

Name of the Lender	Nature of Due	Amount	Due since
Aditya Birla Finance Ltd	Principal	550.00	20th September 2018
IL&FS Airport Ltd	Principal	470.00	28th August 2018

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

SREI INFRASTRUCTURES	Interest	63.63	30th September 2018
IL&FS Airport Ltd	Interest	31.82	30th September 2018
IL&FS Transportation Networks Limited	Interest	372.51	30th September 2018
IL&FS Ltd	Interest	307.00	30th September 2018

Note: Principal repayment & interest payment due after 15th October, 2018 have not been disclosed as default under this clause in view of the NCLAT Orders dated 12th March, 2020.

b The Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

c The Company has not taken any term loan during the year. Hence, reporting under clause 3(ix)(c) of the Companies (Auditor's Report) Order, 2020 is not applicable

d Based on overall examination of the Ind AS Financial Statements of the Company, no short-term funds have been raised during the year.

e The Company does not have any subsidiaries, associates, or joint ventures. Hence, reporting under paragraph 3(ix)(e) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

f. The Company does not have any subsidiaries, joint ventures, or associates. Hence, reporting under paragraph 3(ix)(f) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

x. a The Company has not raised the money by way of initial public offer/ further public offer (including debt instruments) during the year.

b During the year, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year. Hence, reporting under paragraph 3(x)(b) of the order is not applicable to the Company.

xi. a According to the information and explanations given to us by the management which have been relied by us, there were no frauds on or by the Company noticed or reported during the period under audit, subject to the pending final outcome of the various matters described in Emphasis of matter above.

b No report under sub-section (12) of section 143 of the Companies Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government, during the year and up to the date of this report.

c As represented to us by the management, there are no whistle blower complaints received by the Company during the year.

xii. The Company is not a Nidhi Company. Hence, reporting under paragraph 3(xii) of the order is not applicable to the Company.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

xiii. All transactions with the related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 where applicable and the details of such transactions have been disclosed in the Ind AS Financial Statements as required by the applicable accounting standards.

xiv. a In our opinion the company has an adequate internal audit system commensurate with the size and nature of its business.

b We have considered the internal audit reports for the year under audit, issued to the Company during the year and till date, in determining the nature, timing and extent of our audit procedures.

xv. The Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence provisions of section 192 of the Companies Act, 2013 is not applicable to the Company.

xvi. a The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934). Hence, reporting under paragraph 3(xvi) (a) of the Order is not applicable to the Company.

b The Company has not conducted any Non-Banking Financial or Housing Finance activities. Hence, reporting under paragraph 3(xvi) (b) of the Order is not applicable to the Company.

c. The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India. Hence, reporting under paragraph 3(xvi) (c) of the order is not applicable to the Company.

d The Company is not a part of any group which has Core Investment Company. Hence, reporting under paragraph 3(xvi) (d) of the Order is not applicable to the Company.

xvii. The Company has not incurred cash losses in the current financial year and in the immediately preceding financial.

xviii. There has been no resignation of the statutory auditors during the year and accordingly reporting under this clause is not applicable.

xix. On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, material uncertainty exists as on the date of the audit report that company is capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the Balance sheet date. (Refer "Material Uncertainty Related to Going Concern" paragraph above)

We further state that our reporting is based on the facts up to date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

xx. a) The company has not transferred the amount remaining unspent in respect of other than ongoing projects, to a Fund specified in Schedule VII to the Companies Act, 2013 till the

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060

ANNEXURE - B TO THE INDEPENDENT AUDITORS' REPORT
(Referred to in our Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to Ind AS Financial Statements of **CHENANI NASHRI TUNNELWAY LIMITED** ("the Company") as of 31st March 2025 in conjunction with our audit of the Ind AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to Ind AS Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls with reference to Ind AS Financial Statements issued by the Institute of Chartered Accountants of India (the "Guidance Note"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to Ind AS Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Ind AS Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to Ind AS Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Ind AS Financial Statements included obtaining an understanding of internal financial controls with reference to Ind AS Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to Ind AS Financial Statements.

Meaning of Internal Financial Controls with reference to Ind AS Financial Statements

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

A Company's internal financial control with reference to Ind AS Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control with reference to Ind AS Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Ind AS Financial Statements.

Inherent Limitations of Internal Financial Controls with reference to Ind AS Financial Statements

Because of the inherent limitations of internal financial controls with reference to Ind AS Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Ind AS Financial Statements to future periods are subject to the risk that the internal financial control with reference to Ind AS Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to Ind AS Financial Statements and such internal financial controls with reference to Ind AS Financial Statements were operating effectively as at 31st March 2025, based on the internal control with reference to Ind AS Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls With reference to Ind AS Financial Statements issued by the Institute of Chartered Accountants of India.

General Information & Material Accounting Policies

Note No-1

1. General information

The Company was incorporated under the Companies Act 1956 on June 02, 2010. The Company is a special purpose vehicle (SPV) promoted by IL&FS Transportation Networks Limited (ITNL). The company registered address is "The IL&FS Financial Center, Plot C22, G Block, Bandra Kurla Complex, Mumbai - 400051." The Company has entered into a Concession Agreement (CA) on June 28, 2010 with The National Highways Authority of India (NHAI) for Rehabilitation, Strengthening and four laning of Chenani to Nashri Section of NH-1A, from km 89.00 to km 130.00(New Alignment) including 9km long tunnel (2 lane) with parallel escape tunnel on Design, Build, Finance, Operate and Transfer (DBFOT basis) in the state of Jammu & Kashmir. The Concession Agreement envisages concession for a period of 20 years including construction period of 1825 days commencing from the 23rd May 2011 (the 'Appointed date').

Note No-2

2. Material accounting policies

2.1 Statement of compliance

The financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and other relevant provisions of the Companies Act, 2013("the Act").

The Balance Sheet, the Statement of Profit and Loss and the Statement of Changes in Equity are prepared and presented in the format prescribed in the Division II of Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

2.2 Basis of preparation and presentation

The Financial Statements are presented in INR, which is also the Company's functional currency and all values are rounded to the nearest millions (INR 000,000), except earnings per share and except otherwise indicated.

The financial statements have been prepared on a historical cost basis, except for the following asset and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments),

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on this basis.

2.3 Use of estimates

The preparation of financial statements in conformity with IND AS requires the Management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and disclosure of contingent liabilities on the date of financial statements. The recognition, measurement, classification or disclosures of an item or information in the financial statements have been made relying on management estimates to a greater extent.

2.4 Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.
The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. External valuers are involved for valuation of significant assets, such as properties and significant liabilities, such as contingent consideration.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.
This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

3. Accounting for rights under service concession arrangements and revenue recognition

i. Recognition and measurement

The Company builds, operates and maintains infrastructure assets under public-to-private Service Concession Arrangements (SCAs), which is an arrangement between the "grantor" (a public sector entity/authority) and the "operator" (a private sector entity) to provide services that give the public access to major economic and social facilities utilizing private-sector funds and expertise. The infrastructures accounted for by the Company as concessions are mainly related to the activities concerning roads

Concession contracts are public-private agreements for periods specified in the SCAs including the construction, up gradation, restoration of infrastructure and future services associated with the operation and maintenance of assets in the concession period. Revenue recognition, as well as, the main characteristics of these contracts are detailed in Note 3.iii.

With respect to service concession arrangements, revenue and costs are allocated between those relating to construction services and those relating to operation & maintenance services, and are accounted for separately. Consideration received or receivable is allocated by reference to the relative fair value of services delivered when the amounts are separately identifiable. The infrastructure used in a concession are classified as an intangible asset or a financial asset, depending on the nature of the payment entitlements established in the concession agreement.

When the amount of the arrangement consideration for the provision of public services is substantially fixed by a contract, the Company recognizes revenues from construction services for public facilities (infrastructures) by the percentage-of-completion method, and recognizes the consideration as a financial asset and the same is classified as "Receivables against Service Concession Arrangements". The Company accounts for such financial assets at amortized cost, calculates interest income based on the effective interest method and recognizes it in revenue as Finance Income.

ii. Contractual obligation to restore the infrastructure to a specified level of serviceability

The Company has contractual obligations to maintain the infrastructure to a specified level of serviceability or restore the infrastructure to a specified condition during the concession period and/or at the time of hand over to the grantor of the SCA. Such obligations are measured at the best estimate of the expenditure that would be required to settle the obligation at the balance sheet date. In case of concession arrangements under financial asset model, such costs are recognized in the period in which such costs are actually incurred.

iii. Revenue recognition

Finance income for concession arrangements under financial asset model is recognized using the effective interest method. Revenues from operations and maintenance services and overlay services are recognized in each period as and when services are rendered in accordance with Ind AS 115 Revenue from contract with customers.

iv. Revenue from construction contracts

The Company recognizes and measures revenue, costs and margin for providing construction services during the period of construction of the infrastructure in accordance with Ind AS 115 'Construction Contracts'.
When the outcome of a construction contract can be estimated reliably and it is probable that it will be profitable, contract revenue and contract costs associated with the construction contract are recognised as revenue and expenses respectively by reference to the percentage of completion of the contract activity at the reporting date. The percentage of completion of a contract is determined considering the proportion that contract costs incurred for work performed upto the reporting date bear to the estimated total contract costs.

For the purposes of recognizing revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that it is probable that they will result in revenue and they are capable of being reliably measured.

The percentage of completion method is applied on a cumulative basis in each accounting period to the current estimates of contract revenue and contract costs. The effect of a change in the estimate of contract revenue or contract costs, or the effect of a change in the estimate of the outcome of a contract, is accounted for as a change in accounting estimate and the effect of which are recognized in the Statement of Profit and Loss in the period in which the change is made and in subsequent periods.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognized only to the extent of contract costs incurred of which recovery is probable and the related contract costs are recognized as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense in the Statement of Profit and Loss in the period in which such probability occurs.

v. Borrowing cost related to SCAs

In case of concession arrangement under financial asset model, borrowing costs attributable to construction of the infrastructure are charged to Statement of Profit and Loss in the period in which such costs are incurred.

In case of concession arrangement under intangible asset model, borrowing costs attributable to the construction of infrastructure assets are capitalised up to the date of the final completion certificate of the asset / facility received from the authority for its intended use specified in the Concession Agreement. All borrowing costs subsequent to the capitalization of the intangible assets are charged to the Statement of Profit and Loss in the period in which such costs are incurred.

vi. Claims

Claims raised with the concession granting authority towards reimbursement for costs incurred due to delay in handing over of unencumbered land to the Company for construction or other delays attributable solely to the concession granting authority are recognised when there are is a reasonable certainty that there will be inflow of economic benefits to the Company. The claims when recognized as such are reduced from the carrying amount of the intangible asset / financial asset under the service concession arrangement, as the case may be, to the extent the claims relate to costs earlier included as a part of the carrying amount of these assets. Further, these claims are credited to profit or loss to the extent it is probable to have economic benefits to the company.

3.1 Borrowing costs

Borrowing costs are recognised in the period to which they relate, regardless of how the funds have been utilised, except where it relates to the financing of construction of development of assets requiring a substantial period of time to prepare for their intended future use. Interest is capitalised up to the date when the asset is ready for its intended use. The amount of interest capitalised (gross of tax) for the period is determined by applying the interest rate applicable to appropriate borrowings outstanding during the period to the average amount of accumulated expenditure for the assets during the period. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds

All other borrowing costs are recognised in profit or loss in the period in which tare incurred.

GIANENDER & ASSOCIATES NEW DELHI Chartered Accountants

Chenani Nashri Tunnelway Limited

3.2 Taxation

3.2.1 Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax return with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3.2.2 Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases values used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets (including unused tax credits such as MAT credit and unused tax losses such as carried forward business loss and unabsorbed depreciation) are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of to recover or settle the carrying amount of its assets and liabilities.

3.3 Property, plant and equipment

Property, plant and equipment acquired by the Company are reported at acquisition cost, with deductions for accumulated depreciation and impairment losses, if any.

The acquisition cost includes the purchase price (excluding refundable taxes) and expenses, such as delivery and handling costs, installation, legal services and consultancy services, directly attributable to bringing the asset to the site and in working condition for its intended use.

Where the construction or development of any asset requiring a substantial period of time to set up for its intended use is funded by borrowings, the corresponding borrowing costs are capitalized up to the date when the asset is ready for its intended use.

All assets are depreciated on a Straight Line Method (SLM) of Depreciation, over the useful life of assets as prescribed under Schedule II of the Companies Act, 2013.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying of the asset and is recognised in profit or loss.

3.4 Impairment of tangible assets / intangible asset

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to

the smallest Company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

In assessing value in use, the estimated future cash flows are discounted to their present value using appropriate discount rate.

Recoverable amount is the higher of fair value less costs of disposal and value in use.
If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Foreign Currencies:

The Company's financial statements are presented in INR, which is also the Company's functional currency. In preparing the financial statements of Company, transactions in currencies other than the Company's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or statement of profit or loss are also recognized in OCI or statement of profit or loss, respectively). Exchange differences on monetary items are recognized in profit or loss in the period in which they arise except for exchange differences on transactions entered into in order to hedge certain foreign currency risks.

3.5. Provision

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the

Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

3.6 Financial instruments

Financial assets and financial liabilities are recognized when a company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL) are recognized immediately in the statement of profit and loss.

3.7 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

3.7.1 Classification of financial assets – debt instruments

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows;
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

3.7.2 Amortised cost and Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognized in profit or loss and is included in the "Other income" line item.

3.7.3 Financial assets at FVTPL

Debt instruments that do not meet the amortized cost or FVOCI criteria are measured at FVTPL. In addition, debt instruments that meet the amortized cost or FVOCI criteria but are designated as at FVTPL are measured at FVTPL.

A debt instrument that meets the amortized cost or FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in profit or loss. The net gain or loss recognized in profit or loss is included in in the "Other income" line item.

3.7.4 Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:
a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
b) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18 (referred to as 'contractual revenue receivables' in these illustrative financial statements)
c) Loan commitments which are not measured as at FVTPL

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realized upto one year from the due date, loss for the time value of money is not recognized, since the same is not considered to be material.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

3.8 Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next

reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

3.8.1 Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If [the Company] the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.
On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g., when the Company retains an option to repurchase part of a transferred asset), [the Company] the Company allocates the previous carrying amount of the financial asset between the part it continues to recognised under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

3.9 Modification of Cash Flows of financial assets and revision in estimates of Cash flows

The rate considered for recognizing Finance Income (EIR) and fair valuation of the Receivable under SCA finalised on achievement of PCOD / COD for the Project. Thereafter this rate will remain constant during the balance concession period unless there is an impairment / reversal of impairment of asset.

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with Ind AS 109, the Company recalculates the gross carrying amount of the financial asset and recognises a modification gain or loss in profit or loss. The gross carrying amount of the financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate. Any costs or fees incurred are adjusted to the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If the Company revises its estimates of payments or receipts (excluding modifications and changes in estimates of expected credit losses), it adjusts the gross carrying amount of the financial asset or amortised cost of a financial liability to reflect actual and revised estimated contractual cash flows. The Company recalculates the gross carrying amount of the financial asset or amortised cost of the financial liability as the present value of the estimated future contractual cash flows that are discounted at the financial instrument's original effective interest rate. The adjustment is recognised in profit or loss as income or expense.

3.10 Financial liabilities and equity instruments-

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate
The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

3.10.1 Classification as debt or equity
Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument

3.10.2 Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method

3.10.3 Financial liabilities subsequently measured at amortised cost

Financial liabilities are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortized cost are determined based on the effective interest method. Interest expense

that is not capitalized as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

3.10.4 Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

3.11 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

3.12 Cash Flow Statement:

The statement of cash flows shows the changes in cash and cash equivalents arising during the year from operating activities, investing activities and financing activities

The cash flows from operating activities are determined by using the indirect method. Net income is therefore adjusted by non-cash items, such as measurement gains or losses, changes in provisions, impairment of property, plant and equipment and intangible assets, as well as changes from receivables and liabilities. In addition, all income

and expenses from cash transactions that are attributable to investing or financing activities are eliminated. Interest received or paid is classified as operating cash flows

The cash flows from investing and financing activities are determined by using the direct method

3.13 Earnings per Equity Share:

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

3.14 Critical accounting judgments:

The preparation of Financial Statements in conformity with the recognition and measurement principles of Ind AS requires management to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures of contingent liabilities at the date of the Financial Statements and the reported amounts of income and expenses for the periods presented.

Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. In case the actual results are different those from estimates, the effect thereof is given in the financial statements of the period in which the events materialize. Any change in such estimates is accounted prospectively.

The matters to be disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity. Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised, and future periods are affected.

3.15 Key sources of estimation of uncertainty

Key source of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of-

a) Periodical Major Maintenance
The management, estimates expenditure w.r.t periodic major maintenance by using a model that incorporates a number of assumptions, including the life of the concession agreement and the expected cost of the periodic major maintenance which are considered as reasonable by the management.

b) Fair value measurement of financial instruments
When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer Note 29 for further disclosures.

3.16 Recent accounting pronouncements:

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On May 7, 2025, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2025, as below:

Ind AS 21-Effects of Changes in Foreign Exchange Rates

The Ministry of Corporate Affairs has amended Ind AS 21 to clarify how entities should assess and disclose when a currency is not exchangeable. Entities must now estimate spot exchange rates using observable data or alternative methods if direct exchange is not possible. Additional disclosures are required, including estimation techniques, exchange restrictions, and financial impact. These amendments apply to annual reporting periods beginning on or after 1 April 2025.

22.3 Deferred tax Disclosures

Deferred tax assets and deferred tax liabilities have been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liabilities and where the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority

Deferred Tax Asset in respect of Unabsorbed Business Loss/ depreciation has been recognized to the extent reversals of Deferred Tax Liability and Taxable Profits are available before end of concession period.

Significant management judgement is considered in determining provision for income tax, deferred tax assets and liabilities and recoverability of deferred tax assets. The recoverability of deferred tax assets is based on estimate of the taxable income for the period over which deferred tax assets will be recovered. The Company has unabsorbed business losses/depreciation which according to the management will be used to set off taxable profit arising in subsequent years from operation of the Company.

The profitability projections used for determining the recoverability of deferred tax asset has number of variables viz. Revenue projections, restructuring of debt, incurrence of overlay etc which are subject to change.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

June 2024 to March 2025	2,552.65	338.82	2,891.47
June 2025 to March 2026	2,552.65	338.82	2,891.47
June 2026 to September 2026	8,556.80	1,135.77	9,692.57
Total	25,196.49	3,344.41	28,540.90
Repayment made as per interim distribution during the year 2023	(7,796.82)		(7,796.82)
Direct Debit by SBI adjusted during the year 2023	(5,929.42)		(5,929.42)
Adjustment as per IndAS	(34.96)		(34.96)
Borrowing Outstanding as the end of the year	11,435.29	3,344.41	14,779.69

b) Standard Chartered Bank had granted a long-term loan in form of External Commercial Borrowing ("ECB") of USD 43,000,000 to the Company. As per the facility agreement dated December 2, 2015 and amended on January 21, 2016, till the long term loan remains outstanding in books, the lender was required to accrue interest on the aforesaid loan at an interest rate of LIBOR plus Margin (as defined in the facility agreement). The final maturity date of the loan is February 28, 2026.
During the previous financial year, Standard Chartered bank assigned its rights under the Facility Agreement to Deutsche Bank AG, London branch. Further, the Cross Currency interest rate SWAP contract executed by the Company with Standard Chartered Bank, Mumbai Branch, was cancelled during prewous the year. As a part of Claim Management process (as per the direction of NCLAT), the claim for Deutsche Bank AG, London has been admitted for Rs.2803.05 Mn (consisting of loan amount of Rs 2,782.95 Mn and interest of Rs 20.10 Mn). Accordingly, the liability of the Company towards ECB has been crystalized for Rs 2,782.95 Mn. Since the claim for this financial liability has been admitted in INR, no further hedge is required for this loan.

Repayment Schedule:

b) For Tax audit	0.32	0.13
c) For other services	0.38	0.01
Total	1.11	0.49

21.2 Expenditure incurred for corporate social responsibility

In terms of Section 135 of the Companies Act, 2013, a Corporate Social Responsibility (CSR) Committee has been formed by the Company. The areas for CSR activities as per the CSR policy are (i) Promotion of education, (ii) promoting gender equality and empowering women, (iii) reducing child mortality and improving maternal health, (iv) ensuring environmental sustainability, (v) employment enhancing vocational skills, (vi) social business projects, (vii) contribution to the Prime Minister's National Relief Fund or any other fund set up by the Central Government or the State Governments for socioeconomic development and relief and funds for the welfare of the Scheduled Castes, the Scheduled Tribes, other backward classes, minorities and women and (viii) such other matters as may be prescribed.

In line with Guidance Note on Accounting for Expenditure on Corporate Social Responsibility Activities, issued by the Institute of Chartered Accountants of India, the disclosure of the CSR expenditure during the period/year, is as under:

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
(i) Gross Amount required to be spent by the Company during the period/year	79.96	78.68
Add: Shortfall for the previous period/year	-	127.76
(ii) Amount spent during the period/year		
(a) Construction/acquisition of any asset	-	-
(b) On purpose other than above (ii) (a) - In cash	-	206.44
(c) On purposes other than above (ii) (a) - Yet to be paid in cash	-	-
(d) Amount unspent during the period/year	79.96	-

In accordance with Section 135(6) of the Companies Act, 2013, the Company is required to deposit the unspent amount allocated for Corporate Social Responsibility (CSR) in a designated bank account within 6 months from the end of the financial year (FY). However, due to the moratorium granted by NCLAT and the need to prioritize expenses essential for maintaining the going concern status, the Company was unable to release funds towards CSR activities till the year 2023.

During the previous year 2024, the Company decided to undertake Research Projects on Pavements with Indian Institute of Technology, Bombay. The Company has spent Rs. 78.68 Mn during the previous financial year 2024 for the said Project. The Company also donated Rs. 63.88 Mn of previous years shortfall to Prime Minister's National Relief Fund, Rs. 31.94 Mn of previous years shortfall to Prime Minister Cares & Rs. 31.94 Mn of previous years shortfall to Clean Ganga Fund.

During the current financial year, the ultimate holding company, IL&FS, has applied to NCLAT for CSR exemption, resulting in no recommended CSR expenditure for the year ending March 31, 2025.

Following is the schedule of Movement in CSR provision during the period/year:

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Opening Balance	-	127.76
Add: CSR Expense to be incurred	79.96	78.68
Less: Amount Spent during the period/year	-	206.44
Closing Balance of provision	79.96	-

22. Income taxes

22.1 Income tax recognised in profit or loss

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Current tax		
In respect of the current period (refer note below)	-	-
In respect of prior period	-	-
Deferred tax		
In respect of the current period	1,203.75	1,112.76
MAT credit entitlement	-	-
	1,203.75	1,112.76
Total income tax expense recognised in the current period relating to continuing operations	1,203.75	1,112.76

Note: In light of the Company's decision to adopt the new tax regime, the tax liability for the current year is nil. This is due to the utilization of carry-forward tax losses, which have offset the taxable income for the year.

22.2 The Income Tax Expense/(Income) can be reconciled to the accounting profit as follows:

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Profit before tax from continuing operations	4,669.55	4,305.84
Normal tax rate	25.17%	25.17%
Income tax expense	1,175.23	1,083.69
Effect of expenses that are not deductible in determining taxable profit	20.12	11.59
Deferred Tax effect on Unrealised Fair Value Gain	(0.00)	(0.00)
Deferred tax not created on IndAS adjustment	-	5.93
Effect of different tax rates	-	1.05
Deferred tax created	8.40	10.50
Tax Expense/(Income)	1,203.76	1,112.76
Adjustments recognised in the current year in relation to the current tax of prior years		
Income Tax Expense/(Income) recognized in profit or loss (relating to continuing operations)	1,203.76	**1,112.76**

27. Significant terms of Service Concession Arrangements (SCA)

Particulars	Project
Brief description of Concession	Service Concession Arrangement (SCA) dated June 28, 2010 entered into with National Highways Authority of India (NHAI), envisages Rehabilitation Strengthening and four laning of Chenani to Nashri Section of NH-1A, from km 89.00 to km 130.00 including 9km long tunnel (2 lane) with parallel escape tunnel on Design, Build, Finance, Operate and Transfer (DBFOT) basis in the state of Jammu & Kashmir. The Concession Agreement envisages concession for a period of 20 years including construction period of 1825 days commencing from 23rd May 2011 (the 'Appointed date'). Premature termination is permitted only upon happening of a force majeure event or upon the parties defaulting on their obligation. the company is entitled to earn Semi-annuity of Rs. 317.52 Crores each on the dates specified in the SCA. NHAI will retain the right to levy and collect fees from the users of the Road and to permit advertisements, hoardings and other commercial activities at the Road site.
	At the end of the concession period, the company will hand over the Road to NHAI without additional consideration.
Nature of Assets	Financial Asset
Year when SCA granted	28-Jun-10
Period	20 years (Including 5 year of Construction Period)
Extension of period	NIL
Construction	Construction Completed
Premature Termination	NIL
Frequency of Annuity	Semi-Annually
Special Term	NIL

28. Segment Reporting

The company operates in a single business segment viz. Surface Transportation Business. Also it operates in a single geographic segment. In the absence of separate reportable business or geographic segments the disclosures required under the Indian Accounting Standard (INDAS) 108 on Operating Segments are not applicable.

29. Financial Instruments

1 Capital management

The Company endeavours to maintain sufficient levels of working capital, current assets, and current liabilities which helps the company to meet its expense obligations while also maintaining sufficient cash flow

The capital structure of the Company consists of net debt (borrowings as detailed in notes 13 offset by cash and bank balances) and equity of the Company (comprising issued capital, reserves, retained earnings as detailed in notes 11 to 12). The capital structure of the Company is reviewed by the management on a periodic basis.

1.1 Gearing ratio

The gearing ratio at end of the reporting period was as follows.

Amount In (Mn's)

Particulars	As at March 31, 2025	As at March 31, 2024
Debt (i)	34,122.44	34,010.97
Cash and bank balances (including cash and bank balances in a disposal company held for sale)	28,972.49	21,520.21
Net debt	5,149.95	12,490.76
Total Equity (ii)	14,175.30	10,709.50
Net debt to total equity ratio	0.36	1.17

Footnotes:
(i) Debt is defined as long- and short-term borrowings including interest accrued (excluding derivative), as described in notes 13
(ii) Equity includes all capital and reserves of the Company that are managed as capital.

2 Categories of financial instruments

Trade payables	4,990.52	4,990.88
Other financial liabilities (excluding interest accrued)	209.73	208.43

29. Financial Instruments

3 Financial risk management objectives

The Company 's Corporate Treasury function monitors and manages the financial risks relating to the operations of the Company . These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. Refer Note 33 which states about moratorium of debt service obligations. The new board of IL&FS has undertaken certain steps for resolution of existing obligations. Accordingly, the Company is in the process of setting up mechanism to address the risks including market risk, currency risk, interest risk and liquidity risk

4 Market risk

The Company is exposed to the financial risk of changes in foreign currency exchange rates and interest rates

4.1 Foreign Currency Sensitivity Analysis

The Company was mainly exposed to the currency of United States. The contract for cross currency swap interest rate cancelled during the financial Year Ended March 31, 2022.

4.2 Interest rate swap contracts

Under interest rate swap contracts, the company agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the company to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period. The contract for cross currency swap interest rate cancelled during the financial Year Ended March 31, 2022.

5 Interest rate risk management

The company is exposed to interest rate risk because it borrows funds at both fixed and floating interest rates

The company's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

5.1 Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the company's:

i) profit for the Year would decrease/increase by ₹ 80.22 Mn (previous year ₹ 80.67 Mn.). This is mainly attributable to the company's exposure to interest rates on its variable rate borrowings; and

6 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to The Company .The Management of The Company believes that the credit risk is negligible since its main receivable is from the grantors of the concession which is a government authority.

7 Liquidity risk management

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. However, the Company has not been servicing any debt effetive Oct 15, 2018 in view of moratorium granted by NCLAT

Notes forming part of the Financial Statements for year ended March 31, 2025

29. Financial Instruments

7.1 Liquidity and interest risk tables

The following tables detail the company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods as per the existing loan agreement. The tables have been drawn up based on the undiscounted cash flows of financial liabilities. The tables include both interest (upto scheduled repayment date) and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period.

Amount In (Mn's)

Particulars	As at March 31, 2025			As at March 31, 2024		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	208.16	44,884.88	20,059.88	207.52	38,987.30	20,059.88
1-3 years	2.15	11,901.59	31.78	41.66	17,799.17	31.78
3-5 years	-	-	23.84	-	-	23.84
More than 5 years	4,966.09	-	141.30	4,988.50	-	141.30
Total	**5,176.40**	**56,786.47**	**20,256.80**	**5,237.68**	**56,786.47**	**20,256.80**

Note: - This schedule is subject to adjustment due to the repayment of Rs. 1403.18 Mn made during the year 2024 & Rs. 7796.82 Mn made during the year 2023.

The following table details the company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Amount In (Mn's)

Particulars	As at March 31, 2025			As at March 31, 2024		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	4,169.69	8,749.12	26,140.03	858.35	5,719.30	21,698.79
1-3 years	-	11,241.70	-	-	11,299.65	-
3-5 years	-	11,297.61	-	-	11,360.28	-
More than 5 years	0.00	10,557.89	-	0.00	16,191.28	-
Total	**4,169.69**	**41,846.32**	**26,140.03**	**858.35**	**44,570.51**	**21,698.79**

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

Other financial liabilities	-	-	209.73	-	-	207.52

The fair values of the financial assets and financial liabilities above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

30 **Impairment:**

During financial year 2019-20, as part of the divestment process, the IL&FS Board received a single bid from an external party for the Company. The bid was subsequently accepted by the Board of Directors of ITNL and IL&FS, subject to necessary approvals from various regulators, Committee of Creditors, NCLAT, and other relevant entities. The final price is subject to adjustment.

Based on the bid received, the Company recognized impairment of Receivable under Service Concession Arrangements in the financial statements during the earlier year. In light of the bid being continued and also received NCLT approval for the same, it is the view of the Company's management that no further impairment is required for the year ended March 31, 2025.

31 **Going Concern :**

Union of India has superseded the earlier board of Holding/Ultimate Holding Company and appointed new Board from October 01, 2018. Entire Group is going through severe financial stress. National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 has also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, which means that the Company is able to meet only financial obligation towards Senior Lenders and operational creditors. In view of this classification and the moratorium order, the Company has stopped servicing financial obligations towards all its financial creditors. The Company has received a bid from third party and the same has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares has also been received. Hence on the basis of above, these accounts are prepared on the basis of going concern.

32 **Debt servicing:**

National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 had also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, indicating that it is not able to meet all obligations (financial and operational) including the payment obligations to senior secured financial creditors. Accordingly, the Company is permitted to make only those payments necessary to maintain and preserve the going concern status. NCLAT wide its order dated March 12, 2020, had upheld its interim order of October 15, 2018. The said order specifies October 15, 2018 as the date of initiation of the Resolution Process of the Company. Accordingly the Company has not accrued any interest , default interest, penal interest and any other similar charges after the said cut off date of October 15,2018 untill March 31, 2025.

Considering the delay in the resolution process of the Company, and the significant cash lying with the Company, basis the constant demand from the lenders, during the financial year ended March 31, 2023, the Company approved an Interim Distribution to the Senior Secured Lenders of the Company be undertaken, for an amount of Rs 9,200.00 Mn which is equivalent to the principal amount that would have been paid to them under the debt restructuring plan that has been in-principle approved by the CNTL CoC. Out of Rs 9,200 Mn, Company paid Rs 7,796.82 Mn to the senior lenders during the year March 31, 2023 and Rs 1,403.18 Mn is being paid to one of the secured senior lenders, during the year March 31, 2024.

The banks have debited an amount of Rs 6,844.17 Mn for Interest & Principal (Interest & Principal for the period of October 18 - March 20) from the Escrow accounts of the Company maintained with them. The Company has written to the banks for reversal of same in view of October 15, 2018 Order of NCLT giving moratorium. The banks have not reversed the same till date. The same amount (after reducing interest upto Oct 15, 2018) was shown as recoverable in the financial statements. These amounts have not been handed back to the Company till date. As part of the interim distribution, the company adjusted Rs 119.90 Mn during the financial year March 31, 2024 and Rs 5,929.42 Mn during the financial year March 31, 2023 out of Rs 6,844.17 Mn against the loan, which was repaid during the financial year March 31, 2024, and the financial year March 31, 2023.

33 **Interest Expense Recognition :**

Pursuant to its order dated 14th February 2025, the Hon'ble National Company Law Tribunal (NCLT) approved the sale of the Company's shareholding to Cube Highways and Infrastructure II Pte Ltd. ("Cube") (the "Proposed Sale"), in accordance with Cube's binding offer dated 16th February 2024 (the "Binding Offer").

One of the key terms of the Binding Offer includes Cube's proposal to pay specific amounts towards the settlement of interest liabilities payable to the Company's external lenders. The relevant terms regarding such payments are as follows:

a) Interest for Prior Periods: ₹4,000 million for the period from June 2022 to March 2024.

b) Interest for Current Period: ₹5.25 million per day, effective from 1st April 2024 until the completion of the transaction.

As of the Year Ended 31st March 2025, the total interest expense that would have been recognized under this arrangement amounts to ₹5,916.25 million, subject to the successful execution of the transaction.

34 **Non-compliance of applicable laws and regulations :**

The Company is not in compliance with the Companies Act 2013, as applicable to the Company. These non compliances pertain to appointment of Directors, filings with Regulators, appointment of Key Management personnel and such other regulations. The Company has estimated possible obligations arising out of these non-compliances and recognised the provision in the books of account.

35 In accordance with the Company's adoption of the new tax regime, the tax liability for the current period/year is determined to be nil. This favorable outcome is attributed to the utilization of carry-forward tax losses, which have effectively offset the taxable income for the year. Consequently, the Company will not be eligible to avail the tax holiday period of 10 years as stipulated under section 80IA.

As a result of these circumstances, the Company has recognized net deferred tax liabilities in its financial statements. These deferred tax liabilities are expected to be reversed over the duration of the concession period.

36 Micro and small enterprises

Under the Micro, Small and Medium Enterprises Development Act, 2006 ('MSMED') which came into force from 2 October 2006, certain disclosures are required to be made relating to micro and small enterprises. On the basis or the information and records available with the management, there are no outstanding dues to the Micro and Small enterprises as defined in the Micro, Small mid Medium Enterprises Development Act, 2006 as set out in the following disclosures·

Amount In (Mn's)

Particulars	As at March 31, 2025	As at March 31, 2024
(a) the Principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier at the end of each accounting period/year;	22.28	-
(b) the amount interest paid by the buyer in terms of section 16 of the Micro, Small and Medium Enterprises development Act, 2006 (27 of 2006), along with the amount of the payment made to the supplier beyond the appointed day during each accounting period/year;	-	-
(c) Amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the period) but without adding the interest specified under the Micro, Small and Medium Enterprises Development Act, 2006;	-	-
(d) Amount of interest accrued and remaining unpaid at the end of each accounting period/year; and	-	-
(e) The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the purpose of disallowance of a deductible expenditure under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006.	-	-

37 Disclosure as Per Ind AS 115 Revenue from Contracts with Customers

A. Applicability of Ind AS 115

Ind AS 115 was issued on 28 March 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited exceptions, to all revenue arising from contracts with its customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The Ministry of Corporate Affairs(MCA), on March 28, 2018, notified Ind AS 115 "Revenue from Contracts with Customers" as a part of the Companies (Indian Accounting Standards) Amendment Rules, 2018. The Company has followed the IND AS 115 accordingly.

Service contracts relating to Change of Scope have an original duration of one year or less and therefore the company uses practical expedient to not disclose unsatisfied performance obligations

37 **Disclosure as Per Ind AS 115 Revenue from Contracts with Customers (Continue)**

B. Disaggregation of revenue

Set out below is the disaggregation of the Company's revenue from contracts with customers:

Amount In (Mn's)

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Type of Services		
(a) Operation and maintenance income	491.98	480.48
(b) Periodic maintenance income	16.80	19.18
(c) Finance income	2,880.24	3,142.75
Total Revenue from contracts with customers	**3,389.02**	**3,642.41**

Geographical markets

Amount In (Mn's)

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
India	3,389.02	3,642.41
Outside India	-	-
Total Revenue from contracts with customers	**3,389.02**	**3,642.41**

Timing of Revenue recognition

Amount In (Mn's)

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Services transferred at a point in time	-	-
Services transferred over time	3,389.02	3,642.41
Total Revenue from contracts with customers	**3,389.02**	**3,642.41**

Contract Balances

Amount In (Mn's)

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Receivable under Service Concession		
Trade Receivable	27,343.70	30,180.89
Less: Expected Credit Loss	-	-
Total Receivable	**27,343.70**	**30,180.89**
Contract Liabilities	-	-

Reconciling the amount of revenue recognised in the statement of profit and loss with the contracted price

Amount In (Mn's)

Particulars	Year ended March 31, 2025	Year ended March 31, 2024
Revenue as per contracted price	3,389.02	3,642.41
Adjustments - Rebate/Cash Discount	-	-
Revenue from contracts with customers	**3,389.02**	**3,642.41**

Performance obligation

Revenue from Finance income

The performance obligation in service of Finance Income for concession arrangements under financial asset model is recorded using the effecive interest method.

Revenue from Operation and maintenance income and Periodic maintenance income

The performance obligation in service of Operation and maintenance income and Periodic maintenance income for concession arrangements under financial asset model is recorded in each period as and when services are rendered in accordance with Ind AS 115 Revenue from contracts with customers

38 Ratios

The following are analytical ratios for the period ended March 31, 2025 and March 31, 2024

Amount in (Mn's)

Particulars	Numerator	Denominator	As at March 31, 2025	As at March 31, 2024	Variance	Remarks
Current Ratio	Total Current assets	Total Current liabilities	1.29	0.99	30%	(a)
Debt – Equity Ratio	Total Debt (1)	Total Equity	2.33	3.08	-24%	(b)
Debt Service Coverage Ratio #	Earnings available for debt service(2)	Debt Service(3)	#	#		
Return on Equity (ROE)	Net Profits after taxes	Average Total Equity	28%	35%	21%	(c)
Trade receivables turnover ratio	Revenue	Average Trade Receivable	$	$		
Trade payables turnover ratio	Purchases of services and other expenses	Average Trade Payables	0.11	0.11	3%	(d)
Net capital turnover ratio	Revenue from operations	Working Capital	0.45	(11.47)	104%	(e)
Net profit ratio	Net Profit for the year	Revenue from operations	102%	88%	17%	(f)
Return on capital employed (ROCE)	Earning before interest and taxes	Capital Employed(4)	10%	10%	0%	
Return on Investment(ROI)	Income generated from investments	Average investments	NA	NA	NA	

(1) Debt represents total debt value as per financial statements.

(2) Net Profit after taxes + Non-cash operating expenses + Interest + other adjustments like loss on sale of Fixed assets etc.

(3) Project debt payments (Interest payments + Principal repayments) for the current year.

(4) Tangible net worth + deferred tax liabilities + project debt.

In view of the moratorium granted by NCLAT, no debt serviced since October 15, 2018, hence the said ratio is not applicable / relevant.

$ Not applicable under IND-AS, being annuity project and revenue is recognised as per IND-AS 115.

(a) Current ratio increase is due to increase in cash balance & other bank balance due to non payment of interest due to moratorium granted by NCLAT, no debt serviced since October 15, 2018.

(b) Increase in profit during FY 2024-25.

(c) Return on equity has improved on account of increase in profit during FY 2024-25 as compare to FY 2023-24.

(d) Marginal increased in Trade payables during the year.

(e) Net capital turnover ratio has improved on account of increase in profit during FY 2024-25 as compare to FY 2023-24 & increased in current ratio - refer (a)

(f) Net profit ratio has increased due to increase in interest on fixed deposit.

39 Investigations by Serious Fraud Investigation Office ("SFIO") and other regulatory agencies:

The Ministry of Corporate Affairs (MCA), Government of India, has vide its letter dated October 1, 2018 initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS (ultimate holding company) and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of investigation of affairs of ITNL (the Holding Company), SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and it is understood that the relevant information is being provided by ITNL to the agency. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

40 Additional Regulatory Information required as per Schedule III:

a) The Company does not have any investment property, hence the requirement regarding disclosure and valuation by a registered valuer as defined under rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017 is not applicable.

b) The Company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets or both during the period/year.

c) The Company has not given any loans or advances in the nature of loans to specified persons.

d) Benami property : There are no proceedings being initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988(45 of 1988) and rules made thereunder.

e) The Company had not borrowed secured loan from Financial institution against current assets during the current period.

f) Wilful Defaulter : The Company has not been declared as wilful defaulter by any bank or financial institution or other lender.

g) The Company does not have any transactions or relationship with Struck Off Companies.

h) The Company has Registered all the charges against its assets with Registrar of Companies (ROC). There were no satisfaction of charge with ROC is pending as on March 31, 2025.

i) The Company does not have any subsidiary company or step down companies.

j) A statement of ratio analysis has been provided, refer note 38.

k) There are no Scheme of Arrangements during the period.

l) The Company has not advanced or loaned or invested funds to any other person(s) or entity(ties), including foreign entities (Intermediaries) from borrowed funds or share premium or any other source or kind of funds.

m) Additional information to be disclosed by way of Notes to Statement of Profit and Loss.

i) The Company does not have any undisclosed income as on March 31, 2025.

ii) The Company has not traded or invested in any kind of Crypto Currency or Virtual Currency.

41 Previous year figures have been re-grouped, re-worked and re-classified wherever necessary, to make them comparable with current year/period figures.

Particulars	Earlier classification	Reclassification	Current Classification	Remarks
Other financial liabilities		(39.28)	39.28	Provision for expenses reclassified from Trade payables to Other financial liabilities

INDEPENDENT AUDITOR'S REPORT

To the Members of Chenani Nashri Tunnelway Limited

Report on Audit of Special Purpose Financial Statements

Qualified Opinion

We have audited the accompanying Special Purpose Financial Statements of **Chenani Nashri Tunnelway Limited ("the Company")** which comprises the:

a. Special Purpose Balance Sheets as at 31st July 2025;
b. Statement of Profit and Loss (including Other comprehensive income) for the period from 01st April 2025 to 31st July 2025;
c. Statement of Cash Flows for the period from 01st April 2025 to 31st July 2025;
d. Statement of Changes in Equity for the period ended 31st July 2025;
e. Material accounting policy information and other explanatory information (together hereinafter referred to as 'Special Purpose Financial Statements').

These special purpose financial statements have been prepared in accordance with basis of preparation as specified in note no 2.1 read with note no 2.2 to the special purpose financial statements.

In our opinion and to the best of our information and according to the explanations given to us **except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report**, the aforesaid special purpose financial statements give a true and fair view in case of:

a. the balance sheet, of the state of affairs of the company as at 31st July 2025;
b. the statement of profit and loss (including other comprehensive income) of the company's loss for the period from 01st April 2025 to 31st July 2025;
c. the cash flow statement, of the cash movements of the company for the period from 01st April 2025 to 31st July 2025;
d. the statement of changes in equity for the period ended 31st July 2025;

Basis for Qualified Opinion

During the FY 2018-19, the Company had recognized and during the year continues to recognize thereafter impairment loss of Rs. 7,107.98 Million by comparing the carrying amount of the receivables under the head 'Receivable under Service Concession Arrangements' that were measured at amortized cost and bid received from third party for acquisition of entire Company. Thus, the Company had in the FY 2018-19 and continues thereafter to measure the receivables at fair value then recognized to arrive at present amortized carrying value as at the end of the year, which is not in accordance with Ind AS 109 'Financial Instruments' & read with accounting policy 3.7.4. The consequential impact of the above on the balance under the head 'Receivable under Service Concession Arrangements' reported in the balance sheet and on the profit for the year are unascertainable.

Consequently, the unreserved and explicit statement of compliance with Indian Accounting Standards as notified in the Companies (Indian Accounting Standards) Rules, 2015 and further amendments thereto in Note 2.1 is not proper.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

We conducted our audit of the special purpose financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Companies Act, 2013 ("the Act"). Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Special Purpose Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We have also complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements, issued by the ICAI. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the special purpose financial statements.

Emphasis of matter – Basis of Accounting

We draw attention to:

1. **Note no. 32 regarding Interest Expense Recognition:**
   In terms of Paragraph 61 (3) on Pg 87 of Hon'ble NCLAT Orders dated 12th March, 2020, the company has not accounted accrued interest, default interest, penal charges or other similar charges after the cut-off date of 15th October,2018 till 31st March, 2025.
   Further In pursuance of Hon'ble NCLT Orders dated 14th February 2025, the Hon'ble National Company Law Tribunal (NCLT) approved the sale of the Company's shareholding to Cube Highways and Infrastructure II Pte Ltd. ("Cube") (the "Proposed Sale"), in accordance with Cube's binding offer dated 16th February 2024 (the "Binding Offer").
   One of the key terms of the Binding Offer includes Cube's proposal to pay specific amounts towards the settlement of interest liabilities payable by the Company to external lenders. The relevant terms regarding such payments are as follows:

   a) Interest for Prior Periods: ₹4,000 million for the period from June 2022 to March 2024.
   b) Interest for Current Period: ₹5.25 million per day, effective from 1st April 2024 until the completion of the transaction.

   As of the period ended 31st July 2025, the total interest expense have been recognized under this arrangement amounts to ₹6,556.75 million, subject to the successful execution of the transaction.

2. **Note no. 33 regarding Debt Servicing:**
   In view of the delay in the resolution process of the Company and the significant cash balances available, and considering the constant demand from lenders, the Board approved an Interim Distribution to the Senior Secured Lenders amounting to ₹7,796.82 million and ₹1,403.18 million during FY 2022-23 and FY 2023-24 respectively.

   Further, the banks debited an aggregate of ₹6,844.17 million (towards interest and principal for the period October 2018 to March 2020) from the Company's escrow accounts. The Company has formally requested the reversal of these debits, citing the Hon'ble NCLAT's Orders dated October 15, 2018, which imposed a moratorium. However, the banks have not reversed the same. Accordingly, after adjusting for interest up to October 15, 2018, this balance was reflected as recoverable in the financial statements. As part of the interim distribution, the Company adjusted ₹5,929.42 million in FY 2022-23 and re₹119.90 million in FY 2023-24 against this amount, corresponding to loan repayments in the respective years.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

Additionally, as part of the resolution process, and pursuant to the approvals obtained from the lenders, NHAI "the Authority" and the Hon'ble NCLT, the Company's shareholding is to be transferred to a new investor. In accordance with the proposed transfer of equity and the admitted claims, the lenders had agreed to a revised debt amount as of October 15, 2018, under the approved debt restructuring plan. Consequently, the outstanding debt was required to be adjusted by the lenders to reflect the revised amount. However, based on the statements of account received from the lenders, it appears that the lenders have neither implemented the debt restructuring nor accounted for the interim distribution, and have continued to levy interest with effect from October 15, 2018, notwithstanding the moratorium granted by the Hon'ble NCLAT. This has resulted in a net variance of ₹ 22,495.67 million between the debt balances as per the lenders' statements of account and those reflected in the Company's records.

3. **Note no. 38 Investigations by Serious Fraud Investigation Office ("SFIO") and other regulatory agencies:**
   The Ministry of Corporate Affairs, Government of India, had initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS Ltd and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of its investigation, SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and relevant information is being provided by ITNL to the agency. The company has not received any direct communication from SFIO. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

Our opinion is not modified in respect of above matters.

Material Uncertainty Related to Going Concern

We draw your attention to Note no. 31 to the accompanying Ind AS financial statements which describes that Entire Group is going through severe financial stress and liquidity issue in repayment of various loan instruments. Hon'ble NCLAT had granted moratorium towards repayment obligation vide Orders dated 15th October,2018. Union of India had also filed petition against IL&FS Limited & its Group Companies in National Company Law Tribunal and superseded earlier Board of the Holding/Ultimate Holding Company. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. As per the management, going concern assumption is appropriate for preparation of financial statements, as the company has received a bid from third party and which has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares has also been received.

Our Opinion is not modified in respect of above matter.

Responsibility of Management and Those Charged with Governance for the Special Purpose Financial Statements

The Company's Management and Board of Directors is responsible for preparation and presentation of these special purpose financial statements that give a true and fair view of the company's financial position and financial performance including other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity, and notes to the financial statements, including a summary of material accounting policies and other explanatory information, prepared in accordance with the basis of preparation described in note no 2.1 read with note no 2.2 of the special purpose financial statements. This responsibility also includes maintenance of adequate accounting records for

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the special purpose financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the special purpose financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Special Purpose Financial Statements

Our objectives are to obtain reasonable assurance about whether the special purpose financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these special purpose financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the special purpose financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve Collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the special purpose financial statements, including the disclosures, and whether the special purpose

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060

financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Restriction on Distribution and Use

Our auditor's report on Special Purpose Financial Statements is intended and has been prepared solely in order to comply with the holding company's requirements for their proposed deal of divestment of equity investment in the Company as mentioned in note 2.2 to the financial statements and it should not be used by any other person or for any other purpose, or referred to in any other document, or distributed to any other person without our prior written consent. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come without our prior consent in writing.

General Information & Material Accounting Policies

Note No-1

1. General information

The Company was incorporated under the Companies Act 1956 on June 02, 2010. The Company is a special purpose vehicle (SPV) promoted by IL&FS Transportation Networks Limited (ITNL). The company registered address is "The IL&FS Financial Center, Plot C22, G Block, Bandra Kurla Complex, Mumbai - 400051." The Company has entered into a Concession Agreement (CA) on June 28, 2010 with The National Highways Authority of India (NHAI) for Rehabilitation, Strengthening and four laning of Chenani to Nashri Section of NH-1A, from km 89.00 to km 130.00(New Alignment) including 9km long tunnel (2 lane) with parallel escape tunnel on Design, Build, Finance, Operate and Transfer (DBFOT basis) in the state of Jammu & Kashmir. The Concession Agreement envisages concession for a period of 20 years including construction period of 1825 days commencing from the 23rd May 2011 (the 'Appointed date').

Note No-2

2. Material accounting policies

2.1 Statement of compliance

The special purpose financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and other relevant provisions of the Companies Act, 2013("the Act").

The Balance Sheet, the Statement of Profit and Loss and the Statement of Changes in Equity are prepared and presented in the format prescribed in the Division II of Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

2.2 Basis of preparation and presentation

This special purpose financial statement is required to be prepared in order comply with the holding company's requirements for their proposed deal of divestment of equity investment in the Company.

The Special purpose financial statements are presented in INR, which is also the Company's functional currency and all values are rounded to the nearest millions (INR 000,000), except earnings per share and except otherwise indicated.

The special purpose financial statements have been prepared on a historical cost basis, except for the following asset and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments),

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these special purpose financial statements is determined on this basis.

2.3 Use of estimates

The preparation of special purpose financial statements in conformity with IND AS requires the Management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and disclosure of contingent liabilities on the date of special purpose financial statements. The recognition, measurement, classification or disclosures of an item or information in the special purpose financial statements have been made relying on management estimates to a greater extent.

2.4 Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.
The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the special purpose financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the special purpose financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. External valuers are involved for valuation of significant assets, such as properties and significant liabilities, such as contingent consideration.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.
This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

3. Accounting for rights under service concession arrangements and revenue recognition

i. Recognition and measurement

The Company builds, operates and maintains infrastructure assets under public-to-

private Service Concession Arrangements (SCAs), which is an arrangement between the "grantor" (a public sector entity/authority) and the "operator" (a private sector entity) to provide services that give the public access to major economic and social facilities utilizing private-sector funds and expertise. The infrastructures accounted for by the Company as concessions are mainly related to the activities concerning roads.

Concession contracts are public-private agreements for periods specified in the SCAs including the construction, up gradation, restoration of infrastructure and future services associated with the operation and maintenance of assets in the concession period. Revenue recognition, as well as, the main characteristics of these contracts are detailed in Note 3.iii.

With respect to service concession arrangements, revenue and costs are allocated between those relating to construction services and those relating to operation & maintenance services, and are accounted for separately. Consideration received or receivable is allocated by reference to the relative fair value of services delivered when the amounts are separately identifiable. The infrastructure used in a concession are classified as an intangible asset or a financial asset, depending on the nature of the payment entitlements established in the concession agreement.

When the amount of the arrangement consideration for the provision of public services is substantially fixed by a contract, the Company recognizes revenues from construction services for public facilities (infrastructures) by the percentage-of-completion method, and recognizes the consideration as a financial asset and the same is classified as “Receivables against Service Concession Arrangements”. The Company accounts for such financial assets at amortized cost, calculates interest income based on the effective interest method and recognizes it in revenue as Finance Income.

ii. Contractual obligation to restore the infrastructure to a specified level of serviceability

The Company has contractual obligations to maintain the infrastructure to a specified level of serviceability or restore the infrastructure to a specified condition during the concession period and/or at the time of hand over to the grantor of the SCA. Such obligations are measured at the best estimate of the expenditure that would be required to settle the obligation at the balance sheet date. In case of concession arrangements under financial asset model, such costs are recognized in the period in which such costs are actually incurred.

iii. Revenue recognition

Finance income for concession arrangements under financial asset model is recognized using the effective interest method. Revenues from operations and maintenance services and overlay services are recognized in each period as and when services are rendered in accordance with Ind AS 115 Revenue from contract with customers.

iv. Revenue from construction contracts

The Company recognizes and measures revenue, costs and margin for providing construction services during the period of construction of the infrastructure in accordance with Ind AS 115 'Construction Contracts'.
When the outcome of a construction contract can be estimated reliably and it is probable that it will be profitable, contract revenue and contract costs associated with the construction contract are recognised as revenue and expenses respectively by reference to the percentage of completion of the contract activity at the reporting date. The percentage of completion of a contract is determined considering the proportion that contract costs incurred for work performed upto the reporting date bear to the estimated total contract costs.

For the purposes of recognizing revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that it is probable that they will result in revenue and they are capable of being reliably measured.

The percentage of completion method is applied on a cumulative basis in each accounting period to the current estimates of contract revenue and contract costs. The effect of a change in the estimate of contract revenue or contract costs, or the effect of a change in the estimate of the outcome of a contract, is accounted for as a change in accounting estimate and the effect of which are recognized in the Statement of Profit and Loss in the period in which the change is made and in subsequent periods.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognized only to the extent of contract costs incurred of which recovery is probable and the related contract costs are recognized as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense in the Statement of Profit and Loss in the period in which such probability occurs.

v. Borrowing cost related to SCAs

In case of concession arrangement under financial asset model, borrowing costs attributable to construction of the infrastructure are charged to Statement of Profit and Loss in the period in which such costs are incurred.

In case of concession arrangement under intangible asset model, borrowing costs attributable to the construction of infrastructure assets are capitalised up to the date of the final completion certificate of the asset / facility received from the authority for its intended use specified in the Concession Agreement. All borrowing costs subsequent to the capitalization of the intangible assets are charged to the Statement of Profit and Loss in the period in which such costs are incurred.

vi. Claims

Claims raised with the concession granting authority towards reimbursement for costs incurred due to delay in handing over of unencumbered land to the Company for construction or other delays attributable solely to the concession granting authority are recognised when there are is a reasonable certainty that there will be inflow of economic benefits to the Company. The claims when recognized as such are reduced from the carrying amount of the intangible asset / financial asset under the service concession arrangement, as the case may be, to the extent the claims relate to costs earlier included as a part of the carrying amount of these assets. Further, these claims are credited to profit or loss to the extent it is probable to have economic benefits to the company.

3.1 Borrowing costs

Borrowing costs are recognised in the period to which they relate, regardless of how the funds have been utilised, except where it relates to the financing of construction of development of assets requiring a substantial period of time to prepare for their intended future use. Interest is capitalised up to the date when the asset is ready for its intended use. The amount of interest capitalised (gross of tax) for the period is determined by applying the interest rate applicable to appropriate borrowings outstanding during the period to the average amount of accumulated expenditure for the assets during the period. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds

All other borrowing costs are recognised in profit or loss in the period in which tare incurred.

3.2 Taxation

3.2.1 Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax return with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3.2.2 Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the special purpose financial statements and the corresponding tax bases values used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets (including unused tax credits such as MAT credit and unused tax losses such as carried forward business loss and unabsorbed depreciation) are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.
The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of to recover or settle the carrying amount of its assets and liabilities.

3.3 Property, plant and equipment

Property, plant and equipment acquired by the Company are reported at acquisition cost, with deductions for accumulated depreciation and impairment losses, if any.

The acquisition cost includes the purchase price (excluding refundable taxes) and expenses, such as delivery and handling costs, installation, legal services and consultancy services, directly attributable to bringing the asset to the site and in working condition for its intended use.

Where the construction or development of any asset requiring a substantial period of time to set up for its intended use is funded by borrowings, the corresponding borrowing costs are capitalized up to the date when the asset is ready for its intended use.

All assets are depreciated on a Straight Line Method (SLM) of Depreciation, over the useful life of assets as prescribed under Schedule II of the Companies Act, 2013.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying of the asset and is recognised in profit or loss.

3.4 Impairment of tangible assets / intangible asset

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to

the smallest Company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

In assessing value in use, the estimated future cash flows are discounted to their present value using appropriate discount rate.

Recoverable amount is the higher of fair value less costs of disposal and value in use.
If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Foreign Currencies:

The Company's special purpose financial statements are presented in INR, which is also the Company's functional currency. In preparing the special purpose financial statements of Company, transactions in currencies other than the Company's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or statement of profit or loss are also recognized in OCI or statement of profit or loss, respectively). Exchange differences on monetary items are recognized in profit or loss in the period in which they arise except for exchange differences on transactions entered into in order to hedge certain foreign currency risks.

3.5. Provision

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the

Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

3.6 Financial instruments

Financial assets and financial liabilities are recognized when a company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL) are recognized immediately in the statement of profit and loss.

3.7 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

3.7.1 Classification of financial assets – debt instruments

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order

to collect contractual cash flows;

- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

3.7.2 Amortised cost and Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognized in profit or loss and is included in the "Other income" line item.

3.7.3 Financial assets at FVTPL

Debt instruments that do not meet the amortized cost or FVOCI criteria are measured at FVTPL. In addition, debt instruments that meet the amortized cost or FVOCI criteria but are designated as at FVTPL are measured at FVTPL.

A debt instrument that meets the amortized cost or FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.
Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in profit or loss. The net gain or loss recognized in profit or loss is included in in the "Other income" line item.

3.7.4 Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:
a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
b) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18 (referred to as 'contractual revenue receivables' in these illustrative special purpose financial statements)
c) Loan commitments which are not measured as at FVTPL

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realized upto one year from the due date, loss for the time value of money is not recognized, since the same is not considered to be material.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

3.8 Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next

reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

3.8.1 Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If [the Company] the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.
On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g., when the Company retains an option to repurchase part of a transferred asset), [the Company] the Company allocates the previous carrying amount of the financial asset between the part it continues to recognised under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

3.9 Modification of Cash Flows of financial assets and revision in estimates of Cash flows

The rate considered for recognizing Finance Income (EIR) and fair valuation of the Receivable under SCA finalised on achievement of PCOD / COD for the Project. Thereafter this rate will remain constant during the balance concession period unless there is an impairment / reversal of impairment of asset.

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with Ind AS 109, the Company recalculates the gross carrying amount of the financial asset and recognises a modification gain or loss in profit or loss. The gross carrying amount of the financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate. Any costs or fees incurred are adjusted to the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If the Company revises its estimates of payments or receipts (excluding modifications and changes in estimates of expected credit losses), it adjusts the gross carrying amount of the financial asset or amortised cost of a financial liability to reflect actual and revised estimated contractual cash flows. The Company recalculates the gross carrying amount of the financial asset or amortised cost of the financial liability as the present value of the estimated future contractual cash flows that are discounted at the financial instrument's original effective interest rate. The adjustment is recognised in profit or loss as income or expense.

3.10 Financial liabilities and equity instruments-

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate
The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

3.10.1 Classification as debt or equity

Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument

3.10.2 Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method

3.10.3 Financial liabilities subsequently measured at amortised cost

Financial liabilities are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at

amortized cost are determined based on the effective interest method. Interest expense

that is not capitalized as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

3.10.4 Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

3.11 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company’s cash management.

3.12 Cash Flow Statement:

The statement of cash flows shows the changes in cash and cash equivalents arising during the year from operating activities, investing activities and financing activities

The cash flows from operating activities are determined by using the indirect method. Net income is therefore adjusted by non-cash items, such as measurement gains

or losses, changes in provisions, impairment of property, plant and equipment and intangible assets, as well as changes from receivables and liabilities. In addition, all income

and expenses from cash transactions that are attributable to investing or financing activities are eliminated. Interest received or paid is classified as operating cash flows

The cash flows from investing and financing activities are determined by using the direct method

3.13 Earnings per Equity Share:

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

3.14 Critical accounting judgments:

The preparation of Special purpose financial statements in conformity with the recognition and measurement principles of Ind AS requires management to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures of contingent liabilities at the date of the Special purpose financial statements and the reported amounts of income and expenses for the periods presented.

Management believes that the estimates used in the preparation of the special purpose financial statements are prudent and reasonable. Actual results could differ from these estimates. In case the actual results are different those from estimates, the effect thereof is given in the special purpose financial statements of the period in which the events materialize. Any change in such estimates is accounted prospectively.

The matters to be disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity. Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised, and future periods are affected.

3.15 Key sources of estimation of uncertainty

Key source of estimation of uncertainty at the date of Special purpose financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of-

a) Periodical Major Maintenance
   The management, estimates expenditure w.r.t periodic major maintenance by using a model that incorporates a number of assumptions, including the life of the concession agreement and the expected cost of the periodic major maintenance which are considered as reasonable by the management.
b) Fair value measurement of financial instruments
   When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer Note 29 for further disclosures.

3.16 Recent accounting pronouncements:

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On May 7, 2025, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2025, as below:

Ind AS 21-Effects of Changes in Foreign Exchange Rates

The Ministry of Corporate Affairs has amended Ind AS 21 to clarify how entities should assess and disclose when a currency is not exchangeable. Entities must now estimate spot exchange rates using observable data or alternative methods if direct exchange is not possible. Additional disclosures are required, including estimation techniques, exchange restrictions, and financial impact. These amendments apply to annual reporting periods beginning on or after 1 April 2025.

Total	**3,026.01**	**-**	**4,375.88**	**-**

22.3 Deferred tax Disclosures

Deferred tax assets and deferred tax liabilities have been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liabilities and where the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority

Deferred Tax Asset in respect of Unabsorbed Business Loss/ depreciation has been recognized to the extent reversals of Deferred Tax Liability and Taxable Profits are available before end of concession period.

Significant management judgement is considered in determining provision for income tax, deferred tax assets and liabilities and recoverability of deferred tax assets. The recoverability of deferred tax assets is based on estimate of the taxable income for the period over which deferred tax assets will be recovered. The Company has unabsorbed business losses/depreciation which according to the management will be used to set off taxable profit arising in subsequent years from operation of the Company

The profitability projections used for determining the recoverability of deferred tax asset has number of variables viz. Revenue projections, restructuring of debt, incurrence of overlay etc which are subject to change.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered

Borrowing Outstanding as the end of the period/year	**11,514.90**	**2,561.31**	**14,076.22**

b) Standard Chartered Bank had granted a long-term loan in form of External Commercial Borrowing ("ECB") of USD 43,000,000 to the Company. As per the facility agreement dated December 2, 2015 and amended on January 21, 2016, till the long term loan remains outstanding in books, the lender was required to accrue interest on the aforesaid loan at an interest rate of LIBOR plus Margin (as defined in the facility agreement). The final maturity date of the loan is February 28, 2026.

During the financial year 2022, Standard Chartered bank assigned its rights under the Facility Agreement to Deutsche Bank AG, London branch. Further, the Cross Currency interest rate SWAP contract executed by the Company with Standard Chartered Bank, Mumbai Branch, was cancelled during previous the year. As a part of Claim Management process (as per the direction of NCLAT), the claim for Deutsche Bank AG, London has been admitted for Rs 2803.05 Mn (consisting of loan amount of Rs 2,782.95 Mn and interest of Rs 20.10 Mn). Accordingly, the liability of the Company towards ECB has been crystalized for Rs 2,782.95 Mn. Since the claim for this financial liability has been admitted in INR, no further hedge is required for this

Repayment Schedule:

Total ECB Loans repayment on quarterly basis installments commencing from February 28, 2017 and terminating on February 28, 2026 :

Year	Amount in INR

Direct Debit by SBI adjusted during the year 2024	(119.90)
Adjustment as per restructuring	74.38
Grand Total	**1,279.97**

Issue of Optionally Convertible Debentures (OCDs)

Pursuant to the Hon'ble NCLT order dated February 14, 2025, approving the consummation of the sale transaction of the Company with Cube, a Restated Share Purchase Agreement (SPA) was executed on March 21, 2025, among IL&FS, ITNL, CNTL, and Cube.

One of the conditions precedent under the Restated SPA requires the conversion of Crystallized Outstanding Liabilities ("COL"), being the claims admitted by Grant Thornton as on October 15, 2018, and payable by the Company to IL&FS Group companies, into suitable debt securities. Accordingly, the COL, aggregating Rs. 13,000.28 million (comprising unsecured loans and operational debt payable to IL&FS, IL&FS Airports Limited, and ITNL), has been converted into Optionally Convertible Debentures ("OCDs") of face value of Rs. 100 each.

The OCDs has been issued in different series, with each series carrying a coupon rate linked to the original interest rate applicable on the respective loans. A Debt Securities Agreement among IL&FS, ITNL, IL&FS Airports Limited, CNTL, and Cube has been executed in this regard. Details of each series is provided below:

Series	Amount	Coupon Rate	Redemption
A	5,187.05	0.001%	March 08, 2032
B	160.20	11.260%	March 08, 2032
C	217.22	13.200%	March 08, 2032
D	81.62	13.050%	March 08, 2032
E	11.69	12.900%	March 08, 2032
F	161.48	12.700%	March 08, 2032
G	1,984.18	12.800%	March 08, 2032
H	5,196.83	16.000%	March 08, 2032

Depending on the cash position of the Company at the Closing Date, Cube has proposed that each series of OCDs shall be partially redeemed out of free cash available, with the balance OCDs to be acquired by Cube through a secondary purchase from the IL&FS Group companies, at consideration determined in accordance with the IL&FS Distribution Framework.

The Board of Directors and Shareholders of the Company, at their meeting held on April 2, 2025, have approved the conversion of COL and issuance of relevant series of OCDs in terms of the above structure.

21.2 Expenditure incurred for corporate social responsibility

In terms of Section 135 of the Companies Act, 2013, a Corporate Social Responsibility (CSR) Committee has been formed by the Company. The areas for CSR activities as per the CSR policy are (i) Promotion of education, (ii) promoting gender equality and empowering women, (iii) reducing child mortality and improving maternal health, (iv) ensuring environmental sustainability, (v) employment enhancing vocational skills, (vi) social business projects, (vii) contribution to the Prime Minister's National Relief Fund or any other fund set up by the Central Government or the State Governments for socioeconomic development and relief and funds for the welfare of the Scheduled Castes, the Scheduled Tribes, other backward classes, minorities and women and (viii) such other matters as may be prescribed.

In line with Guidance Note on Accounting for Expenditure on Corporate Social Responsibility Activities, issued by the Institute of Chartered Accountants of India, the disclosure of the CSR expenditure during the period/year, is as under:

Particulars	Period ended July 31, 2025	Year ended March 31, 2025
(i) Gross Amount required to be spent by the Company during the period/year	28.62	79.96
Add: Shortfall for the previous period/year	79.96	-
(ii) Amount spent during the period/year	-	-
(a) Construction/acquisition of any asset	-	-
(b) On purpose other than above (ii) (a) - In cash	-	-
(c) On purposes other than above (ii) (a) - Yet to be paid in cash	-	-
(d) Amount unspent during the period/year	**108.58**	**79.96**

In accordance with Section 135(6) of the Companies Act, 2013, the Company is required to deposit the unspent amount allocated for Corporate Social Responsibility (CSR) in a designated bank account within 6 months from the end of the financial year (FY). However, due to the moratorium granted by NCLAT and the need to prioritize expenses essential for maintaining the going concern status, the Company was unable to release funds towards CSR activities till the year 2023.
During the previous year 2024, the Company decided to undertake Research Projects on Pavements with Indian Institute of Technology, Bombay. The Company has spent Rs. 78.68 Mn during the previous financial year 2024 for the said Project. The Company also donated Rs. 63.88 Mn of previous years shortfall to Prime Minister's National Relief Fund, Rs. 31.94 Mn of previous years shortfall to Prime Minister Cares & Rs. 31.94 Mn of previous years shortfall to Clean Ganga Fund.
During the previous financial year, the ultimate holding company, IL&FS, has applied to NCLAT for CSR exemption, resulting in no recommended CSR expenditure for the year/period ending March 31, 2025 and July 31, 2025.

Following is the schedule of Movement in CSR provision during the period/year:

Particulars	Period ended July 31, 2025	Year ended March 31, 2025
Opening Balance	79.96	-
Add: CSR Expense to be incurred	28.62	79.96
Less: Amount Spent during the period/year	-	-
Closing Balance of provision	**108.58**	**79.96**

22. Income taxes

22.1 Income tax recognised in profit or loss

Particulars	Period ended July 31, 2025	Year ended March 31, 2025
Current tax		
In respect of the current period (refer note below)	-	-
In respect of prior period	-	-
	-	-
Deferred tax		
In respect of the current period	(1,349.87)	1,203.75
MAT credit entitlement	-	-
	(1,349.87)	1,203.75
Total income tax expense recognised in the current period relating to continuing operations	**(1,349.87)**	**1,203.75**

Note: In light of the Company's decision to adopt the new tax regime, the tax liability for the current year is nil. This is due to the utilization of carry-forward tax losses, which have offset the taxable income for the year.

27. Significant terms of Service Concession Arrangements (SCA)

Particulars	**Project**
Brief description of Concession	Service Concession Arrangement (SCA) dated June 28, 2010 entered into with National Highways Authority of India (NHAI), envisages Rehabilitation Strengthening and four laning of Chenani to Nashri Section of NH-1A, from km 89.00 to km 130.00 including 9km long tunnel (2 lane) with parallel escape tunnel on Design, Build, Finance, Operate and Transfer (DBFOT) basis in the state of Jammu & Kashmir. The Concession Agreement envisages concession for a period of 20 years including construction period of 1825 days commencing from 23rd May 2011 (the 'Appointed date'). Premature termination is permitted only upon happening of a force majeure event or upon the parties defaulting on their obligation. the company is entitled to earn Semi-annuity of Rs. 317.52 Crores each on the dates specified in the SCA. NHAI will retain the right to levy and collect fees from the users of the Road and to permit advertisements, hoardings and other commercial activities at the Road site.
	At the end of the concession period, the company will hand over the Road to NHAI without additional consideration.
Nature of Assets	Financial Asset
Year when SCA granted	28-Jun-10
Period	20 years (Including 5 year of Construction Period)
Extension of period	NIL
Construction	Construction Completed
Premature Termination	NIL
Frequency of Annuity	Semi-Annually
Special Term	NIL

28. Segment Reporting

The company operates in a single business segment viz. Surface Transportation Business. Also it operates in a single geographic segment. In the absence of separate reportable business or geographic segments the disclosures required under the Indian Accounting Standard (INDAS) 108 on Operating Segments are not applicable.

29. Financial Instruments

1 Capital management

The Company endeavours to maintain sufficient levels of working capital, current assets, and current liabilities which helps the company to meet its expense obligations while also maintaining sufficient cash flow.

The capital structure of the Company consists of net debt (borrowings as detailed in notes 13 offset by cash and bank balances) and equity of the Company (comprising issued capital, reserves, retained earnings as detailed in notes 11 to 12). The capital structure of the Company is reviewed by the management on a periodic basis.

1.1 Gearing ratio

The gearing ratio at end of the reporting period was as follows.

Amount In (Mn's)

Particulars	As at July 31, 2025	As at March 31, 2025
Debt (i)	42,464.42	34,122.44
Cash and bank balances (including cash and bank balances in a disposal company held for sale)	28,970.46	28,972.49
Net debt	13,493.97	5,149.95
Total Equity (ii)	12,980.39	14,175.30
Net debt to total equity ratio	1.04	0.36

Footnotes:
(i) Debt is defined as long- and short-term borrowings including interest accrued (excluding derivative), as described in notes 13
(ii) Equity includes all capital and reserves of the Company that are managed as capital.

2 Categories of financial instruments

Amount In (Mn's)

Particulars	As at July 31, 2025	As at March 31, 2025
Financial assets		
Fair value through profit and loss (FVTPL)		
Investment in Mutual Fund	0.20	0.20
At amortised cost		
Cash & cash equivalents; and bank balances (including Balances with Banks in deposit accounts under lien)	28,970.46	28,972.49
SCA receivable	28,432.52	27,343.70
Other financial assets (excluding Balances with Banks in deposit accounts under lien)	1,019.91	1,337.84
Financial liabilities		
At amortised cost		
Borrowings (including interest accrued)	42,464.42	34,122.44
Trade payables	117.25	4,990.52
Other financial liabilities (excluding interest accrued)	4.87	209.73

29. Financial Instruments

3 Financial risk management objectives

The Company 's Corporate Treasury function monitors and manages the financial risks relating to the operations of the Company . These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. Refer Note 33 which states about moratorium of debt service obligations. The new board of IL&FS has undertaken certain steps for resolution of existing obligations. Accordingly, the Company is in the process of setting up mechanism to address the risks including market risk, currency risk, interest risk and liquidity risk.

4 Market risk

The Company is exposed to the financial risk of changes in foreign currency exchange rates and interest rates.

4.1 Foreign Currency Sensitivity Analysis

The Company was mainly exposed to the currency of United States. The contract for cross currency swap interest rate cancelled during the financial Year ended March 31, 2022.

4.2 Interest rate swap contracts

Under interest rate swap contracts, the company agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the company to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period. The contract for cross currency swap interest rate cancelled during the financial Year ended March 31, 2022.

5 Interest rate risk management

The company is exposed to interest rate risk because it borrows funds at both fixed and floating interest rates.

The company's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

5.1 Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the company's:

i) profit for the Year would decrease/increase by ₹ 80.18 Mn (previous year ₹ 80.22 Mn.). This is mainly attributable to the company’s exposure to interest rates on its variable rate borrowings; and

CHENANI NASHRI TUNNELWAY LIMITED
CIN Number : U45400MH2010PLC203614
Notes forming part of the Special Purpose Financial Statements for period ended July 31, 2025

29. Financial Instruments

6 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to The Company .The Management of The Company believes that the credit risk is negligible since its main receivable is from the grantors of the concession which is a government authority.

7 Liquidity risk management

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. However, the Company has not been servicing any debt effetive Oct 15, 2018 in view of moratorium granted by NCLAT.

7.1 Liquidity and interest risk tables

The following tables detail the company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods as per the existing loan agreement. The tables have been drawn up based on the undiscounted cash flows of financial liabilities. The tables include both interest (upto scheduled repayment date) and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period.

Amount In (Mn's)

Particulars	As at July 31, 2025			As at March 31, 2025		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	3.22	44,884.88	20,059.88	208.16	44,884.88	20,059.88
1-3 years	4.20	11,901.59	31.78	2.15	11,901.59	31.78
3-5 years	-	-	23.84	-	-	23.84
More than 5 years	112.96	-	141.30	4,966.09	-	141.30
Total	**120.39**	**56,786.47**	**20,256.80**	**5,176.40**	**56,786.47**	**20,256.80**

Note: - This schedule is subject to adjustment due to the repayment of Rs. 1403.18 Mn made during the year 2024 & Rs. 7796.82 Mn made during the year 2023.

The following table details the company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Amount In (Mn's)

Particulars	As at July 31, 2025			As at March 31, 2025		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	23.71	5,606.20	29,965.96	4,169.69	8,749.12	26,140.03
1-3 years	-	11,442.69	-	-	11,241.70	-
3-5 years	-	11,297.55	-	-	11,297.61	-
More than 5 years	0.00	10,557.83	-	0.00	10,557.89	-
Total	**23.71**	**38,904.27**	**29,965.96**	**4,169.69**	**41,846.32**	**26,140.03**

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

29. Financial Instruments

8 Fair value of the Company's material financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the company's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Amount In (Mn's)

Financial assets/ (financial liabilities)	Fair value		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	As at July 31, 2025	As at March 31, 2025				
1) Investment in Mutual Fund	0.20	0.20	Level 1	Net assets value taken as per Mutual Fund Statement	None	None

Amount In (Mn's)

	As at July 31, 2025		As at March 31, 2025	
	Carrying amount	Fair value	Carrying amount	Fair value
Financial assets				
At amortised cost				
Cash & cash equivalents; and bank balances	28,970.46	28,970.46	28,972.49	28,972.49
SCA receivable	28,432.52	28,432.52	27,343.70	27,343.70
Other financial assets	1,019.91	1,019.91	1,337.84	1,337.84
Financial liabilities				
At amortised cost				
Borrowings	42,464.42	42,484.88	34,122.44	34,151.78
Trade payables	117.25	117.25	4,990.52	4,990.52
Other financial liabilities	4.87	4.87	209.73	209.73

Amount In (Mn's)

Fair value hierarchy	As at July 31, 2025			As at March 31, 2025		
Particulars	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Financial assets						
Fair value through profit and loss (FVTPL)						
Investment in Mutual Fund	0.20	-		0.18	-	
Financial Assets measured at amortised cost						
Cash & cash equivalents; and bank balances	-	-	28,970.46	-	-	21,520.21
SCA receivable	-	-	28,432.52	-	-	30,180.89
Other financial assets	-	-	1,019.91	-	-	1,037.45
Financial liabilities						
At amortised cost						
Borrowings	-	-	42,484.88	-	-	34,031.97
Trade payables	-	-	117.25	-	-	5,030.16
Other financial liabilities	-	-	4.87	-	-	207.52

The fair values of the financial assets and financial liabilities above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

30 Impairment:

During financial year 2019-20, as part of the divestment process, the IL&FS Board received a single bid from an external party for the Company. The bid was subsequently accepted by the Board of Directors of ITNL and IL&FS, subject to necessary approvals from various regulators, Committee of Creditors, NCLAT, and other relevant entities. The final price is subject to adjustment.

Based on the bid received, the Company recognized impairment of Receivable under Service Concession Arrangements in the financial statements during the earlier year. In light of the bid being continued and also received NCLT approval for the same, it is the view of the Company's management that no further impairment is required for the year/period ended July 31, 2025.

31 Going Concern :

Union of India has superseded the earlier board of Holding/Ultimate Holding Company and appointed new Board from October 01, 2018. Entire Group is going through severe financial stress. National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 has also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, which means that the Company is able to meet only financial obligation towards Senior Lenders and operational creditors. In view of this classification and the moratorium order, the Company has stopped servicing financial obligations towards all its financial creditors. The Company has received a bid from third party and the same has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares has also been received. Hence on the basis of above, these accounts are prepared on the basis of going concern.

32 Interest Expense Recognition :

The Hon'ble National Company Law Appellate Tribunal ("NCLAT"), vide its order dated October 15, 2018 ("Interim Order") in Company Appeal (AT) No. 346 of 2018, imposed a moratorium on the creditors of IL&FS and its 348 group companies, including the Company. Subsequently, vide order dated February 11, 2019, the Company was classified under the "Amber Category" based on a 12-month cash flow solvency test, indicating its inability to meet all obligations (financial and operational), including those towards senior secured financial creditors. Accordingly, the Company was permitted to make only such payments as were necessary to maintain and preserve its going concern status. Further, vide its order dated March 12, 2020, NCLAT upheld the aforesaid Interim Order, confirming October 15, 2018 as the commencement date of the resolution process of the Company. Consequently, the Company did not accrue any interest, default interest, penal interest, or similar charges after the said cut-off date of October 15, 2018, up to March 31, 2025.

However, pursuant to the order dated February 14, 2025 of the Hon'ble National Company Law Tribunal ("NCLT") and the approval dated August 25, 2025 from the National Highways Authority of India ("NHAI") for the proposed sale of the Company's shareholding to Cube Highways and Infrastructure II Pte. Ltd. ("Cube"), in accordance with Cube's binding offer dated February 16, 2024 (the "Binding Offer"), specific provisions were made in respect of settlement of interest liabilities payable to the Company's external lenders. The key terms are as follows:

a) Interest for Prior Periods – ₹4,000 million for the period from June 2022 to March 2024.

b) Interest for Current Period – ₹5.25 million per day, effective from April 1, 2024 until the completion of the transaction.

Accordingly, up to the period ended July 31, 2025, the Company has recognized a total interest expense of ₹6,556.75 million, which remains subject to the successful completion of the transaction.

33 Debt Servicing

In view of the delay in the resolution process of the Company and the significant cash balances available, and considering the constant demand from lenders, the Board approved an Interim Distribution to the Senior Secured Lenders during the financial year ended March 31, 2023, amounting to ₹9,200.00 million. This was equivalent to the principal amount payable to them under the debt restructuring plan that had been approved in principle by the CoC of CNTL. Out of this amount, ₹7,796.82 million was distributed during FY 2022-23, and the balance ₹1,403.18 million was paid during FY 2023-24.

Separately, the banks debited an aggregate of ₹6,844.17 million (towards interest and principal for the period October 2018 to March 2020) from the Company's escrow accounts. The Company has formally requested the reversal of these debits, citing the Hon'ble NCLAT's order dated October 15, 2018, which imposed a moratorium. However, the banks have not reversed the same to date. Accordingly, after adjusting for interest up to October 15, 2018, this balance was reflected as recoverable in the financial statements. As part of the interim distribution, the Company adjusted ₹5,929.42 million in FY 2022-23 and ₹119.90 million in FY 2023-24 against this amount, corresponding to loan repayments in the respective years.

Pursuant to the ongoing resolution process, and with due approvals from the Hon'ble NCLT, lenders, and NHAI, the Company's shareholding is being transferred to a new investor. Based on admitted claims, the lenders had agreed on a revised debt amount as of October 15, 2018 under the debt restructuring plan. Accordingly, the outstanding debt was required to be aligned with this revised amount. However, as per the statements of account received, the lenders have neither given effect to the restructuring nor adjusted for the interim distribution, and have continued to charge interest with effect from October 15, 2018, despite the moratorium.

This has resulted in a net variance of ₹22,495.67 million between the debt balances as per the lenders' statements of account and the Company's records.

34 In accordance with the Company's adoption of the new tax regime, the tax liability for the current period/year is determined to be nil. This favorable outcome is attributed to the utilization of carry-forward tax losses, which have effectively offset the taxable income for the year. Consequently, the Company will not be eligible to avail the tax holiday period of 10 years as stipulated under section 80IA.

As a result of these circumstances, the Company has recognized net deferred tax liabilities in its financial statements. These deferred tax liabilities are expected to be reversed over the duration of the concession period.

Amount In (Mn's)

Particulars	**As at July 31, 2025**	**As at March 31, 2025**
(a) the Principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier at the end of each accounting period/year;	0.09	22.28
(b) the amount interest paid by the buyer in terms of section 16 of the Micro, Small and Medium Enterprises development Act, 2006 (27 of 2006), along with the amount of the payment made to the supplier beyond the appointed day during each accounting period/year;	-	-
(c) Amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the period) but without adding the interest specified under the Micro, Small and Medium Enterprises Development Act, 2006;	-	-
(d) Amount of interest accrued and remaining unpaid at the end of each accounting period/year; and	-	-
(e) The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the purpose of disallowance of a deductible expenditure under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006.	-	-

36 Disclosure as Per Ind AS 115 Revenue from Contracts with Customers

A. Applicability of Ind AS 115

Ind AS 115 was issued on 28 March 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited exceptions, to all revenue arising from contracts with its customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The Ministry of Corporate Affairs(MCA), on March 28, 2018, notified Ind AS 115 "Revenue from Contracts with Customers" as a part of the Companies (Indian Accounting Standards) Amendment Rules, 2018. The Company has followed the IND AS 115 accordingly.

Service contracts relating to Change of Scope have an original duration of one year or less and therefore the company uses practical expedient to not disclose unsatisfied performance obligations.

INDEPENDENT AUDITOR'S REPORT
To the Members of CHENANI NASHRI TUNNELWAY LIMITED

Report on Audit of Special Purpose Financial Statements

Opinion

We have audited the accompanying Special Purpose Financial Statements of **CHENANI NASHRI TUNNELWAY LIMITED ("the Company")** which comprise the:

a. Special Purpose Balance Sheet as at 20th November 2025;

b. Special Purpose Statements of Profit and Loss (including Other comprehensive income) for the period ended 20th November 2025;

c. Special Purpose Statement of Cash Flows for the period ended 20th November 2025;

d. Special Purpose Statement of Changes in Equity for the period ended 20th November 2025;

e. Special purpose Notes to the financial statements and

f. Material accounting policy information and other explanatory information (together hereinafter referred to as 'Special Purpose Financial Statements').

These special purpose financial statements have been prepared in accordance with basis of preparation as specified in note 2.2 to the special purpose financial statements.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid special purpose financial statements give a true and fair view in accordance with the basis of preparation as specified in the special purpose financial statements in case of:

a. the balance sheet, of the state of affairs of the company as at 20th November 2025;

b. the statement of profit and loss (including other comprehensive income) of the company's profit for the period ended 20th November 2025;

c. the cash flow statement, of the cash flows of the company for the period ended 20th November 2025;

d. the statement of changes in equity for the period ended 20th November 2025;

Basis for Opinion

We conducted our audit of the special purpose financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Companies Act, 2013 ("the Act"). Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Special Purpose Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the special purpose financial statements.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

Emphasis of matter – Basis of Accounting

We draw attention to Note 2.2 to the special purpose financial statements, which describes the basis of accounting. The special purpose financial statements are prepared solely for the purpose to facilitate the transfer of the Company to Cube Highways Infrastructure II Pte Ltd as of the cut-off date 20th November 2025, in accordance with the Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended

Our opinion is not modified in respect of this matter.

Responsibility of Management and Those Charged with Governance for the Special Purpose Financial Statements

The Company's Management and Board of Directors is responsible for preparation and presentation of these special purpose financial statements that give a true and fair view of the company's financial position and financial performance including other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity, and limited notes to the financial statements, including a summary of material accounting policies and other explanatory information, prepared in accordance with the basis of accounting described in Note 1.B.I of the special purpose financial statements. This responsibility also includes maintenance of adequate accounting records for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the special purpose financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the special purpose financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Special Purpose Financial Statements

Our objectives are to obtain reasonable assurance about whether the special purpose financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these special purpose financial statements.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the special purpose financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the special purpose financial statements, including the disclosures, and whether the special purpose financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

INDEPENDENT AUDITOR'S REPORT

To the Members of CHENANI NASHRI TUNNELWAY LIMITED

Report on the audit of the Ind AS Financial Statements

Qualified Opinion

We have audited the Ind AS Financial Statements of **CHENANI NASHRI TUNNELWAY LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March, 2024 and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the Ind AS Financial Statements, including a summary of significant accounting policies and other explanatory information for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, **except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report,** the aforesaid Ind AS Financial Statements give the information required by the Companies Act, 2013 in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards(Ind AS) prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2024 and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Qualified Opinion

During the FY 2018-19, the Company had recognized and during the year continues to recognize thereafter impairment loss of Rs. 7,107.98 Mn. by comparing the carrying amount of the receivables under the head 'Receivable under Service Concession Arrangements' that were measured at amortized cost and bid received from third party for acquisition of entire Company. Thus, the Company had in the FY 2018-19 and continues thereafter to measure the receivables at fair value then recognized to arrive at present amortized carrying value as at the end of the year, which is not in accordance with Ind AS 109 'Financial Instruments' & read with accounting policy 3.7.4. The consequential impact of the above on the balance under the head 'Receivable under Service Concession Arrangements' reported in the balance sheet and on the profit for the year are unascertainable.

Consequently, the unreserved and explicit statement of compliance with Indian Accounting Standards as notified in the Companies (Indian Accounting Standards) Rules, 2015 and further amendments thereto in Note 2.1 is not proper.

We conducted our audit in accordance with the Standards on Auditing ("SAs") specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

ethical requirements that are relevant to our audit of the Ind AS Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw your attention to

a) As mentioned in note no. 32 to the accompanying individual Ind AS Financial Statements regarding NCLAT Orders dated 12th March, 2020. In terms of Para 61 (3) on Pg 87 of the orders, the company has not accounted accrued interest, default interest, penal charges or other similar charges after the cut-off date of 15th October,2018.

b) Note no. 33 to accompanying IND AS financial statements which states that the Company does not comply with certain requirements/provisions of the Companies Act 2013. In view of the above, the Company has estimated possible obligation arising out of these non-compliances and recognized the provision in the books of accounts.

c) As mentioned in note no. 39 to the accompanying IND AS financial statements, the Ministry of Corporate Affairs, Government of India, had initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS Ltd and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of its investigation, SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and relevant information is being provided by ITNL to the agency. The company has not received any direct communication from SFIO. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

Our Opinion is not modified in respect of above matters.

Material Uncertainty Related to Going Concern

We draw your attention to Note no. 31 to the accompanying Ind AS financial statements which describes that Entire Group is going through liquidity issue and defaulted in repayment of various loan instruments, Union of India has filed petition against IL&FS Limited & its Group Companies in National Company Law Tribunal and superseded earlier Board of the Holding/Ultimate Holding Company. These conditions indicate the existence of a material

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. As per the management, going concern assumption is appropriate for preparation of financial statements, as the company has received a bid from third party and which has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval is awaited for transfer of equity shares to the bidder.

Our Opinion is not modified in respect of above matter.

Information other than the Ind AS Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, but does not include the Ind AS Financial Statements and our auditor's report thereon.

Our opinion on the Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

Responsibility of Management and Those Charged with Governance for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS Financial Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

In preparing the Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with Standards on Auditing ("SAs") will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS Financial Statements, including the disclosures, and whether the Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi - 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

Materiality is the magnitude of misstatements in the Ind AS Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Ind AS Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in:

(i) planning the scope of our audit work and in evaluating the results of our work; and
(ii) to evaluate the effect of any identified misstatements in the Ind AS Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the 'Annexure A' a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   b) In our opinion, **except for the effects of the matter described in the Basis for Qualified Opinion paragraph above,** proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   c) The Balance Sheet, the Statement of Profit and Loss, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   d) In our opinion, **except for the effects of the matter described in the Basis for Qualified Opinion paragraph above,** the aforesaid Ind AS Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   e) **Our observations made on the matters stated in Qualified Opinion paragraphs above may have a significant effect so as to adversely affect the functioning of the company.**

   f) On the basis of the written representations received from the directors as on 31st March, 2024 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2024 from being appointed as a director in terms of Section 164 (2) of the Act.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

g) With respect to the Other Matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has no pending litigation which would impact its financial position except those disclosed in Ind AS Financial Statements;

ii. The Company does not envisage any material foreseeable losses in long-term contracts including derivative contract requiring provision;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company

iv. a) The management has represented that, to the best of its knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries

b) The management has represented, that, to the best of its knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c) Based on such audit procedures that we have considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e), as provided under (a) and (b) above, contain any material misstatement.

v. The Company has not declared or paid any dividend during the year.

vi. Based on our examination which included test checks, the company has used SAP based application as the accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with.

Further, as proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable from 1st April 2023, reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 on preservation of audit trail as per the statutory requirements for record retention is not applicable for the financial year ended 31st March, 2024.

Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

h) With respect to the adequacy of the internal financial controls with reference to Ind AS Financial Statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" which expresses an unmodified opinion.

3. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended; In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid the managerial remuneration during the year.

Annexure 'A' to the Independent Auditor's Report of CHENANI NASHRI TUNNELWAY LIMITED for the Year ended as on 31st March, 2024

Annexure referred to in paragraph 1 under the heading "Report on Other Legal and Regulatory Requirements" of our report on even date: -

To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of audit, we state that:

i. In respect of the Company's Property, Plant and Equipment, Right-of-use Assets and Intangible Assets:

a) A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment;

B) The Company doesn't have Intangible Assets, therefore paragraph 3(i)(b) of the Order is not applicable to the Company.

b) The Property, Plant and Equipment have been physically verified by the Management at regular Intervals and no material discrepancies were noticed on such verification.

c) The title deeds of immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company.

d) The company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets during the year. Hence, reporting under Para 3(i)(d) is not applicable.

e) There are no proceedings which have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder. Hence, reporting under Para 3(i)(e) is not applicable.

ii. a) The Company is engaged in the business of infrastructure development, operations and its maintenance and there is no inventory in hand at any point in time, hence, paragraph 3(ii)(a) of the Order is not applicable to the Company.

b) The Company has not been sanctioned any working capital limits, from banks or financial institutions on the basis of security of current assets. Hence, reporting under Para 3(ii) (b) is not applicable.

iii. The Company has not made investments in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, limited liability partnerships or any other parties. Hence, reporting under Para 3(iii) is not applicable.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

iv. The Company has not entered into any transaction in respect of loans, investments, guarantee and securities, which attracts compliance to the provisions of the sections 185 and 186 of the Companies Act, 2013. Therefore, the paragraph 3(iv) of the Order is not applicable to the Company.

v. The Company has not accepted deposits or amounts which are deemed to be deposits and the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act and the rules framed there under. Hence, reporting under Para 3(v) is not applicable.

vi. We have broadly reviewed the books of account maintained by the company pursuant to the Rules made by the Central Government for the maintenance of cost records under section 148 of the Act, and are of the opinion that prima facie, the prescribed accounts and records have been made.

vii. In respect of statutory dues:

a) The Company is not regular in depositing undisputed statutory dues including goods and services tax, provident fund, employee state insurance, income tax, service tax, value added tax, cess and other statutory dues during the year with the appropriate authorities. As on 31st March 2024, there are no undisputed statutory dues payables for period exceeding for a period more than six month from the date they become payable **except undisputed amounts of INR 54.11 million on account of the tax deducted at source are in arrears since March 31, 2021.**

b) There are no statutory dues referred to in sub-clause (a) which have not been deposited on account of any dispute except;

Name of the Statute	Nature of the Dues	Amount (₹ In Million)	Period to which the amount relates	Forum where dispute is pending
Income Tax Act, 1961	Income tax	1.87	AY 2014-2015	CIT(A)
		3.31	AY 2013-2014	CIT(A)
		11.68	AY 2012-2013	CIT(A)
Income Tax Act, 1961	Traces Demand	0.096	AY 2017-2018	Traces Demand

viii. There were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961).

ix. In respect to the borrowings:

a) The Company has defaulted in repayment of loans or other borrowings. Details of the same is as under:

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

Default in repayment of loan (Principal & Interest) **(In Rs. Mn.)**

Name of the Lender	Nature of Due	Amount	Due since
Aditya Birla Finance Ltd	Principal	550.00	20th September 2018
IL&FS Airport Ltd	Principal	470.00	28th August 2018
SREI INFRASTRUCTURES	Interest	63.63	30th September 2018
IL&FS Airport Ltd	Interest	31.82	30th September 2018
IL&FS Transportation Networks Limited	Interest	372.51	30th September 2018
IL&FS Ltd	Interest	307.00	30th September 2018

Note: Principal repayment & interest payment due after 15th October, 2018 have not been disclosed as default under this clause in view the NCLAT Orders dated 12th March, 2020

b) The Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

c) The Company has utilized the money obtained by way of term loans during the year for the purposes for which they were obtained.

d) On an overall examination of the Ind AS Financial Statements of the Company, funds raised on short term basis have, prima facie, not been used during the year for long-term purposes by the Company.

e) On an overall examination of the Ind AS Financial Statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.

f) The Company has not raised loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies.

x a) The Company has not raised the money by way of initial public offer/ further public offer (including debt instruments) during the year.

b) During the year, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year. Hence, reporting under Para 3(x)(b) is not applicable.

xi a) According to the information and explanations given to us by the management which have been relied by us, there were no frauds on or by the Company noticed or reported during the period under audit, subject to the pending final outcome of the various matters described in Emphasis of matter above.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi - 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

b) No report under sub-section (12) of section 143 of the Companies Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government, during the year and up to the date of this report.

c) As represented to us by the management, there are no whistle blower complaints received by the Company during the year.

xii. The Company is not a Nidhi Company. Hence, reporting under Para 3(xii) is not applicable.

xiii. All transactions with the related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 where applicable and the details of such transactions have been disclosed in the Ind AS Financial Statements as required by the applicable accounting standards.

xiv. a) In our opinion the company has an adequate internal audit system commensurate with the size and nature of its business.

b) We have considered, the internal audit reports for the year under audit, issued to the Company during the year and till date, in determining the nature, timing and extent of our audit procedures.

xv. The Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence provisions of section 192 of the Companies Act, 2013 is not applicable to the Company.

xvi. a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934). Therefore, paragraph 3(xvi) (a) of the Order is not applicable to the Company.

b) The Company has not conducted any Non-Banking Financial or Housing Finance activities. Therefore, paragraph 3(xvi) (b) of the Order is not applicable to the Company.

c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India. Hence, reporting under Para 3(xvi) (c) & (d) is not applicable.

xvii. The Company has not incurred cash losses in the current financial year and in the immediately preceding financial.

xviii. There has been no resignation of the statutory auditors during the year and accordingly reporting under this clause is not applicable.

xix. On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, material uncertainty exists as on the date of the audit report that company is capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date.(refer "Material Uncertainty Related to Going Concern" para above)

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi – 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

xx a) During the year, the Company has no unspent amount that is required to be transferred to Fund specified in Schedule VII to the Companies Act in respect to both ongoing and other than ongoing projects. Hence, reporting under the paras' 3 (xx) (a) & (b) are not applicable.

xxi Paragraph 3(xxi) of the Order is not applicable to the Company as the Ind AS Financial Statements under reporting are not consolidated Ind AS Financial Statements.

ANNEXURE - B TO THE INDEPENDENT AUDITORS' REPORT
(Referred to in our Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to Ind AS Financial Statements of **CHENANI NASHRI TUNNELWAY LIMITED** ("the Company") as of 31st March, 2024 in conjunction with our audit of the Ind AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to Ind AS Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls with reference to Ind AS Financial Statements issued by the Institute of Chartered Accountants of India (the "Guidance Note"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to Ind AS Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Ind AS Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to Ind AS Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Ind AS Financial Statements included obtaining an understanding of internal financial controls with reference to Ind AS Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to Ind AS Financial Statements.

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajender Nagar, New Delhi - 110060
Ph: 011- 42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

Meaning of Internal Financial Controls with reference to Ind AS Financial Statements

A Company's internal financial control with reference to Ind AS Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control with reference to Ind AS Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Ind AS Financial Statements.

Inherent Limitations of Internal Financial Controls with reference to Ind AS Financial Statements

Because of the inherent limitations of internal financial controls with reference to Ind AS Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Ind AS Financial Statements to future periods are subject to the risk that the internal financial control with reference to Ind AS Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to Ind AS Financial Statements and such internal financial controls with reference to Ind AS Financial Statements were operating effectively as at 31st March 2024, based on the internal control with reference to Ind AS Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls With reference to Ind AS Financial Statements issued by the Institute of Chartered Accountants of India.

General Information & Material Accounting Policies

Note No-1

1. General information

The Company was incorporated under the Companies Act 1956 on June 02, 2010. The Company is a special purpose vehicle (SPV) promoted by IL&FS Transportation Networks Limited (ITNL). The company registered address is "The IL&FS Financial Center, Plot C22, G Block, Bandra Kurla Complex, Mumbai - 400051." The Company has entered into a Concession Agreement (CA) on June 28, 2010 with The National Highways Authority of India (NHAI) for Rehabilitation, Strengthening and four laning of Chenani to Nashri Section of NH-1A, from km 89.00 to km 130.00(New Alignment) including 9km long tunnel (2 lane) with parallel escape tunnel on Design, Build, Finance, Operate and Transfer (DBFOT basis) in the state of Jammu & Kashmir. The Concession Agreement envisages concession for a period of 20 years including construction period of 1825 days commencing from the 23rd May 2011 (the 'Appointed date').

Note No-2

2. Material accounting policies

2.1 Statement of compliance

The financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and other relevant provisions of the Companies Act, 2013("the Act").

The Balance Sheet, the Statement of Profit and Loss and the Statement of Changes in Equity are prepared and presented in the format prescribed in the Division II of Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

2.2 Basis of preparation and presentation

The Financial Statements are presented in INR, which is also the Company's functional currency and all values are rounded to the nearest millions (INR 000,000), except earnings per share and except otherwise indicated.

The financial statements have been prepared on a historical cost basis, except for the following asset and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments),

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on this basis.

2.3 Use of estimates

The preparation of financial statements in conformity with IND AS requires the Management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and disclosure of contingent liabilities on the date of financial statements. The recognition, measurement, classification or disclosures of an item or information in the financial statements have been made relying on management estimates to a greater extent.

2.4 Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.
The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. External valuers are involved for valuation of significant assets, such as properties and significant liabilities, such as contingent consideration.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.
This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

3. Accounting for rights under service concession arrangements and revenue recognition

i. Recognition and measurement

The Company builds, operates and maintains infrastructure assets under public-to-private Service Concession Arrangements (SCAs), which is an arrangement between the "grantor" (a public sector entity/authority) and the "operator" (a private sector entity) to provide services that give the public access to major economic and social facilities utilizing private-sector funds and expertise. The infrastructures accounted for by the Company

as concessions are mainly related to the activities concerning roads.

Concession contracts are public-private agreements for periods specified in the SCAs including the construction, up gradation, restoration of infrastructure and future services associated with the operation and maintenance of assets in the concession period. Revenue recognition, as well as, the main characteristics of these contracts are detailed in Note 3.iii.

With respect to service concession arrangements, revenue and costs are allocated between those relating to construction services and those relating to operation & maintenance services, and are accounted for separately. Consideration received or receivable is allocated by reference to the relative fair value of services delivered when the amounts are separately identifiable. The infrastructure used in a concession are classified as an intangible asset or a financial asset, depending on the nature of the payment entitlements established in the concession agreement.

When the amount of the arrangement consideration for the provision of public services is substantially fixed by a contract, the Company recognizes revenues from construction services for public facilities (infrastructures) by the percentage-of-completion method, and recognizes the consideration as a financial asset and the same is classified as "Receivables against Service Concession Arrangements". The Company accounts for such financial assets at amortized cost, calculates interest income based on the effective interest method and recognizes it in revenue as Finance Income.

ii. Contractual obligation to restore the infrastructure to a specified level of serviceability

The Company has contractual obligations to maintain the infrastructure to a specified level of serviceability or restore the infrastructure to a specified condition during the concession period and/or at the time of hand over to the grantor of the SCA. Such obligations are measured at the best estimate of the expenditure that would be required to settle the obligation at the balance sheet date. In case of concession arrangements under financial asset model, such costs are recognized in the period in which such costs are actually incurred.

iii. Revenue recognition

Finance income for concession arrangements under financial asset model is recognized using the effective interest method. Revenues from operations and maintenance services and overlay services are recognized in each period as and when services are rendered in

accordance with Ind AS 115 Revenue from contract with customers.

iv. Revenue from construction contracts

The Company recognizes and measures revenue, costs and margin for providing construction services during the period of construction of the infrastructure in accordance with Ind AS 115 'Construction Contracts'.
When the outcome of a construction contract can be estimated reliably and it is probable that it will be profitable, contract revenue and contract costs associated with the construction contract are recognised as revenue and expenses respectively by reference to the percentage of completion of the contract activity at the reporting date. The percentage of completion of a contract is determined considering the proportion that contract costs incurred for work performed upto the reporting date bear to the estimated total contract costs.

For the purposes of recognizing revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that it is probable that they will result in revenue and they are capable of being reliably measured.

The percentage of completion method is applied on a cumulative basis in each accounting period to the current estimates of contract revenue and contract costs. The effect of a change in the estimate of contract revenue or contract costs, or the effect of a change in the estimate of the outcome of a contract, is accounted for as a change in accounting estimate and the effect of which are recognized in the Statement of Profit and Loss in the period in which the change is made and in subsequent periods.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognized only to the extent of contract costs incurred of which recovery is probable and the related contract costs are recognized as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense in the Statement of Profit and Loss in the period in which such probability occurs.

v. Borrowing cost related to SCAs

In case of concession arrangement under financial asset model, borrowing costs attributable to construction of the infrastructure are charged to Statement of Profit and

Loss in the period in which such costs are incurred.

In case of concession arrangement under intangible asset model, borrowing costs attributable to the construction of infrastructure assets are capitalised up to the date of the final completion certificate of the asset / facility received from the authority for its intended use specified in the Concession Agreement. All borrowing costs subsequent to the capitalization of the intangible assets are charged to the Statement of Profit and Loss in the period in which such costs are incurred.

vi. Claims

Claims raised with the concession granting authority towards reimbursement for costs incurred due to delay in handing over of unencumbered land to the Company for construction or other delays attributable solely to the concession granting authority are recognised when there are is a reasonable certainty that there will be inflow of economic benefits to the Company. The claims when recognized as such are reduced from the carrying amount of the intangible asset / financial asset under the service concession arrangement, as the case may be, to the extent the claims relate to costs earlier included as a part of the carrying amount of these assets. Further, these claims are credited to profit or loss to the extent it is probable to have economic benefits to the company.

3.1 Borrowing costs

Borrowing costs are recognised in the period to which they relate, regardless of how the funds have been utilised, except where it relates to the financing of construction of development of assets requiring a substantial period of time to prepare for their intended future use. Interest is capitalised up to the date when the asset is ready for its intended use. The amount of interest capitalised (gross of tax) for the period is determined by applying the interest rate applicable to appropriate borrowings outstanding during the period to the average amount of accumulated expenditure for the assets during the period. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds

All other borrowing costs are recognised in profit or loss in the period in which tare incurred.

3.2 Taxation

3.2.1 Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax return with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3.2.2 Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases values used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets (including unused tax credits such as MAT credit and unused tax losses such as carried forward business loss and unabsorbed depreciation) are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit

or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of to recover or settle the carrying amount of its assets and liabilities.

3.3 Property, plant and equipment

Property, plant and equipment acquired by the Company are reported at acquisition cost, with deductions for accumulated depreciation and impairment losses, if any.

The acquisition cost includes the purchase price (excluding refundable taxes) and expenses, such as delivery and handling costs, installation, legal services and consultancy services, directly attributable to bringing the asset to the site and in working condition for its intended use.

Where the construction or development of any asset requiring a substantial period of time to set up for its intended use is funded by borrowings, the corresponding borrowing costs are capitalized up to the date when the asset is ready for its intended use.

All assets are depreciated on a Straight Line Method (SLM) of Depreciation, over the useful life of assets as prescribed under Schedule II of the Companies Act, 2013.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying of the asset and is recognised in profit or loss.

3.4 Impairment of tangible assets / intangible asset

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to

the smallest Company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

In assessing value in use, the estimated future cash flows are discounted to their present value using appropriate discount rate.

Recoverable amount is the higher of fair value less costs of disposal and value in use.
If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Foreign Currencies:

The Company's financial statements are presented in INR, which is also the Company's functional currency. In preparing the financial statements of Company, transactions in currencies other than the Company's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or statement of profit or loss are also recognized in OCI or statement of profit or loss, respectively). Exchange differences on monetary items are recognized in profit or loss in the period in which they arise except for exchange differences on transactions entered into in order to hedge certain foreign currency risks.

3.5. Provision

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the

Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

3.6 Financial instruments

Financial assets and financial liabilities are recognized when a company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL) are recognized immediately in the statement of profit and loss.

3.7 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

3.7.1 Classification of financial assets – debt instruments

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order

to collect contractual cash flows;

- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

3.7.2 Amortised cost and Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognized in profit or loss and is included in the "Other income" line item.

3.7.3 Financial assets at FVTPL

Debt instruments that do not meet the amortized cost or FVOCI criteria are measured at FVTPL. In addition, debt instruments that meet the amortized cost or FVOCI criteria but are designated as at FVTPL are measured at FVTPL.

A debt instrument that meets the amortized cost or FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in profit or loss. The net gain or loss recognized in profit or loss is included in in the "Other income" line item.

3.7.4 Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:
a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
b) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18 (referred to as 'contractual revenue receivables' in these illustrative financial statements)
c) Loan commitments which are not measured as at FVTPL

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realized upto one year from the due date, loss for the time value of money is not recognized, since the same is not considered to be material.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

3.8 Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next

reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

3.8.1 Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If [the Company] the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.
On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g., when the Company retains an option to repurchase part of a transferred asset), [the Company] the Company allocates the previous carrying amount of the financial asset between the part it continues to recognised under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

3.9 Modification of Cash Flows of financial assets and revision in estimates of Cash flows

The rate considered for recognizing Finance Income (EIR) and fair valuation of the Receivable under SCA finalised on achievement of PCOD / COD for the Project. Thereafter this rate will remain constant during the balance concession period unless there is an impairment / reversal of impairment of asset.

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with Ind AS 109, the Company recalculates the gross carrying amount of the financial asset and recognises a modification gain or loss in profit or loss. The gross carrying amount of the financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate. Any costs or fees incurred are adjusted to the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If the Company revises its estimates of payments or receipts (excluding modifications and changes in estimates of expected credit losses), it adjusts the gross carrying amount of the financial asset or amortised cost of a financial liability to reflect actual and revised estimated contractual cash flows. The Company recalculates the gross carrying amount of the financial asset or amortised cost of the financial liability as the present value of the estimated future contractual cash flows that are discounted at the financial instrument's original effective interest rate. The adjustment is recognised in profit or loss as income or expense.

3.10 Financial liabilities and equity instruments-

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate
The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

3.10.1 Classification as debt or equity
Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument

3.10.2 Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method

3.10.3 Financial liabilities subsequently measured at amortised cost

Financial liabilities are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at

amortized cost are determined based on the effective interest method. Interest expense that is not capitalized as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

3.10.4 Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

3.11 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

3.12 Cash Flow Statement:

The statement of cash flows shows the changes in cash and cash equivalents arising during the year from operating activities, investing activities and financing activities

The cash flows from operating activities are determined by using the indirect method. Net income is therefore adjusted by non-cash items, such as measurement gains or losses, changes in provisions, impairment of property, plant and equipment and

intangible assets, as well as changes from receivables and liabilities. In addition, all income and expenses from cash transactions that are attributable to investing or financing activities are eliminated. Interest received or paid is classified as operating cash flows

The cash flows from investing and financing activities are determined by using the direct method

3.13 Earnings per Equity Share:

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

3.14 Critical accounting judgments:

The preparation of Financial Statements in conformity with the recognition and measurement principles of Ind AS requires management to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures of contingent liabilities at the date of the Financial Statements and the reported amounts of income and expenses for the periods presented.

Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. In case the actual results are different those from estimates, the effect thereof is given in the financial statements of the period in which the events materialize. Any change in such estimates is accounted prospectively.

The matters to be disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity. Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to

accounting estimates are recognized in the period in which the estimates are revised and future periods are affected.

3.15 Key sources of estimation of uncertainty

Key source of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of-

a) Periodical Major Maintenance
The management, estimates expenditure w.r.t periodic major maintenance by using a model that incorporates a number of assumptions, including the life of the concession agreement and the expected cost of the periodic major maintenance which are considered as reasonable by the management.

b) Fair value measurement of financial instruments
When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer Note 29 for further disclosures.

Total	**3,172.13**	-	**2,059.37**	-

22.3 Deferred tax Disclosures

Deferred tax assets and deferred tax liabilities have been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liabilities and where the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority

Deferred Tax Asset in respect of Unabsorbed Business Loss/ depreciation has been recognized to the extent reversals of Deferred Tax Liability and Taxable Profits are available before end of concession period.

Significant management judgement is considered in determining provision for income tax, deferred tax assets and liabilities and recoverability of deferred tax assets. The recoverability of deferred tax assets is based on estimate of the taxable income for the period over which deferred tax assets will be recovered. The Company has unabsorbed business losses/depreciation which according to the management will be used to set off taxable profit arising in subsequent years from operation of the Company

The profitability projections used for determining the recoverability of deferred tax asset has number of variables viz. Revenue projections, restructuring of debt, incurrence of overlay etc which are subject to change

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered

Borrowing Outstanding as the end of the year	**11,524.25**	**3,344.41**	**14,868.65**

b) Standard Chartered Bank had granted a long-term loan in form of External Commercial Borrowing ("ECB") of USD 43,000,000 to the Company. As per the facility agreement dated December 2, 2015 and amended on January 21, 2016, till the long term loan remains outstanding in books, the lender was required to accrue interest on the aforesaid loan at an interest rate of LIBOR plus Margin (as defined in the facility agreement). The final maturity date of the loan is February 28, 2026.
During the previous financial year, Standard Chartered bank assigned its rights under the Facility Agreement to Deutsche Bank AG, London branch. Further, the Cross Currency interest rate SWAP contract executed by the Company with Standard Chartered Bank, Mumbai Branch, was cancelled during previous the year. As a part of Claim Management process (as per the direction of NCLAT), the claim for Deutsche Bank AG, London has been admitted for Rs 2803.05 Mn (consisting of loan amount of Rs 2,782.95 Mn and interest of Rs 20.10 Mn). Accordingly, the liability of the Company towards ECB has been crystalized for Rs 2,782.95 Mn. Since the claim for this financial liability has been admitted in INR, no further hedge is required for this loan.

Repayment Schedule:
Total ECB Loans repayment on quarterly basis installments commencing from February 28, 2017 and terminating on February 28, 2026 :

a) For Tax audit	0.13	0.15
b) For other services	0.01	0.02
Total	**0.49**	**0.53**

21.2 Expenditure incurred for corporate social responsibility

In terms of Section 135 of the Companies Act, 2013, a Corporate Social Responsibility (CSR) Committee has been formed by the Company. The areas for CSR activities as per the CSR policy are (i) Promotion of education, (ii) promoting gender equality and empowering women, (iii) reducing child mortality and improving maternal health, (iv) ensuring environmental sustainability, (v) employment enhancing vocational skills, (vi) social business projects, (vii) contribution to the Prime Minister's National Relief Fund or any other fund set up by the Central Government or the State Governments for socioeconomic development and relief and funds for the welfare of the Scheduled Castes, the Scheduled Tribes, other backward classes, minorities and women and (viii) such other matters as may be prescribed.

In line with Guidance Note on Accounting for Expenditure on Corporate Social Responsibility Activities, issued by the Institute of Chartered Accountants of India, the disclosure of the CSR expenditure during the year, is as under

Particulars	Year Ended March 31, 2024	Year Ended March 31, 2023
(i) Gross Amount required to be spent by the Company during the year	78.68	79.13
Add: Shortfall for the previous year	127.76	48.64
(ii) Amount spent during the year	-	-
(a) Construction/acquisition of any asset	-	-
(b) On purpose other than above (ii) (a) - In cash	206.44	-
(c) On purposes other than above (ii) (a) - Yet to be paid in cash	-	-
(d) Amount unspent during the year	-	127.76

In accordance with Section 135(6) of the Companies Act, 2013, the Company is required to deposit the unspent amount allocated for Corporate Social Responsibility (CSR) in a designated bank account within 6 months from the end of the financial year (FY). However, due to the moratorium granted by NCLAT and the need to prioritize expenses essential for maintaining the going concern status, the Company was unable to release funds towards CSR activities till the previous year.

During the previous year, the Company decided to undertake Research Projects on Pavements with Indian Institute of Technology, Bombay. The Company has spent Rs. 78.68 Mn during the current financial year for the said Project. The Company also donated Rs. 63.88 Mn to Prime Minister's National Relief Fund & Rs. 31.94 Mn each to Prime Minister Cares & Clean Ganga Fund respectively.

Following is the schedule of Movement in CSR provision during the year:

Particulars	Year Ended March 31, 2024	Year Ended March 31, 2023
Opening Balance	127.76	48.64
Add: CSR Expense to be incurred	78.68	79.13
Less: Amount Spent during the year	206.44	-
Closing Balance of provision	-	127.76

22. Income taxes

22.1 Income tax recognised in profit or loss

Particulars	Year Ended March 31, 2024	Year Ended March 31, 2023
Current tax		
In respect of the current period (refer note below)	-	-
In respect of prior period	-	-
	-	-
Deferred tax		
In respect of the current period	1,112.76	2,059.37
MAT credit entitlement	-	-
	1,112.76	2,059.37
Total income tax expense recognised in the current period relating to continuing operations	**1,112.76**	**2,059.37**

Note: In light of the Company's decision to adopt the new tax regime, the tax liability for the current year is nil. This is due to the utilization of carry-forward tax losses, which have offset the taxable income for the year.

22.2 The Income Tax Expense/(Income) can be reconciled to the accounting profit as follows:

Amount In (Rs.)

Particulars	Year Ended March 31, 2024	Year Ended March 31, 2023
Profit before tax from continuing operations	4,305.84	3,902.85
Normal tax rate	25.17%	25.63%
Income tax expense	1,083.69	1,000.13
Effect of expenses that are not deductible in determining taxable profit	11.59	20.26
Deferred Tax effect on Unrealised Fair Value Gain	(0.00)	(0.00)
Deferred tax not created on IndAS adjustment	5.93	7.77
Effect of different tax rates	1.05	
Deferred tax created	10.50	1,031.21
Tax Expense/(Income)	**1,112.76**	2,059.37
Adjustments recognised in the current year in relation to the current tax of prior years		
Income Tax Expense/(Income) recognized in profit or loss (relating to continuing operations)	**1,112.76**	2,059.37

27. Significant terms of Service Concession Arrangements (SCA)

Particulars	Project
Brief description of Concession	Service Concession Arrangement (SCA) dated June 28, 2010 entered into with National Highways Authority of India (NHAI), envisages Rehabilitation Strengthening and four laning of Chenani to Nashri Section of NH-1A, from km 89.00 to km 130.00 including 9km long tunnel (2 lane) with parallel escape tunnel on Design, Build, Finance, Operate and Transfer (DBFOT) basis in the state of Jammu & Kashmir. The Concession Agreement envisages concession for a period of 20 years including construction period of 1825 days commencing from 23rd May 2011 (the 'Appointed date'). Premature termination is permitted only upon happening of a force majeure event or upon the parties defaulting on their obligation. the company is entitled to earn Semi-annuity of Rs. 317.52 Crores each on the dates specified in the SCA. NHAI will retain the right to levy and collect fees from the users of the Road and to permit advertisements, hoardings and other commercial activities at the Road site. At the end of the concession period, the company will hand over the Road to NHAI without additional consideration.
Nature of Assets	Financial Asset
Year when SCA granted	28-Jun-10
Period	20 years (Including 5 year of Construction Period)
Extension of period	NIL
Construction	Construction Completed
Premature Termination	NIL
Frequency of Annuity	Semi-Annually
Special Term	NIL

28. Segment Reporting

The company operates in a single business segment viz. Surface Transportation Business. Also it operates in a single geographic segment. In the absence of separate reportable business or geographic segments the disclosures required under the Indian Accounting Standard (INDAS) 108 on Operating Segments are not applicable.

29. Financial Instruments

1 Capital management

The Company endeavours to maintain sufficient levels of working capital, current assets, and current liabilities which helps the company to meet its expense obligations while also maintaining sufficient cash flow

The capital structure of the Company consists of net debt (borrowings as detailed in notes 13 offset by cash and bank balances) and equity of the Company (comprising issued capital, reserves, retained earnings as detailed in notes 11 to 12). The capital structure of the Company is reviewed by the management on a periodic basis.

3 Financial risk management objectives

The Company 's Corporate Treasury function monitors and manages the financial risks relating to the operations of the Company . These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. Refer Note 33 which states about moratorium of debt service obligations. The new board of IL&FS has undertaken certain steps for resolution of existing obligations. Accordingly, the Company is in the process of setting up mechanism to address the risks including market risk, currency risk, interest risk and liquidity risk

4 Market risk

The Company is exposed to the financial risk of changes in foreign currency exchange rates and interest rates

4.1 Foreign Currency Sensitivity Analysis

The Company was mainly exposed to the currency of United States. The contract for cross currency swap interest rate cancelled during the financial year ended March 31, 2022.

4.2 Interest rate swap contracts

Under interest rate swap contracts, the company agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the company to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period. The contract for cross currency swap interest rate cancelled during the financial year ended March 31, 2022.

5 Interest rate risk management

The company is exposed to interest rate risk because it borrows funds at both fixed and floating interest rates.

The company's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note

5.1 Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the company's:

i) profit for the Year would decrease/increase by ₹ 80.67 Mn (previous year ₹ 87.69 Mn.). This is mainly attributable to the company's exposure to interest rates on its variable rate borrowings; and

29. Financial Instruments

6 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to The Company .The Management of The Company believes that the credit risk is negligible since its main receivable is from the grantors of the concession which is a government authority.

7 Liquidity risk management

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. However, the Company has not been servicing any debt effetive Oct 15, 2018 in view of moratorium granted by NCLAT

7.1 Liquidity and interest risk tables

The following tables detail the company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods as per the existing loan agreement. The tables have been drawn up based on the undiscounted cash flows of financial liabilities. The tables include both interest (upto scheduled repayment date) and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period.

Amount In (Mn's)

Particulars	As at March 31, 2024			As at March 31, 2023		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	207.52	38,987.30	20,059.88	207.65	27,250.62	20,059.88
1-3 years	41.66	17,799.17	31.78	215.94	11,736.67	31.78
3-5 years	-	-	23.84	-	17,799.17	23.84
More than 5 years	4,988.50	-	141.30	4,986.00	-	141.30
Total	**5,237.67**	**56,786.47**	**20,256.80**	**5,409.59**	**56,786.47**	**20,256.80**

Note: - This schedule is subject to adjustment due to the repayment of Rs. 1403.18 Mn made during the current year & Rs. 7796.82 Mn made during the previous year.

The following table details the company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Amount In (Mn's)

Particulars	As at March 31, 2024			As at March 31, 2023		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	858.35	5,719.30	21,698.79	996.13	5,658.16	15,810.88
1-3 years	-	11,299.65	-	-	11,556.39	-
3-5 years	-	11,360.28	-	-	11,257.97	-
More than 5 years	0.00	16,191.28	-	0.00	21,892.01	-
Total	**858.35**	**44,570.50**	**21,698.79**	**996.13**	**50,364.53**	**15,810.88**

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

29. Financial Instruments

8 Fair value of the Company's material financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the company's financial assets and financial liabilities are measured at fair value at the end of each reporting period The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Amount In (Mn's)

Financial assets/ (financial liabilities)	Fair value		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	As at March 31, 2024	As at March 31, 2023				
1) Investment in Mutual Fund	0.18	0.17	Level 1	Net assets value taken as per Mutual Fund Statement	None	None

Amount In (Mn's)

	As at March 31, 2024		As at March 31, 2023	
	Carrying amount	Fair value	Carrying amount	Fair value
Financial assets				
At amortised cost				
Cash & cash equivalents; and bank balances	21,520.21	21,520.21	15,812.81	15,812.81
SCA receivable	30,180.89	30,180.89	32,738.50	32,738.50
Other financial assets	1,037.45	1,037.45	1,566.10	1,566.10
Financial liabilities				
At amortised cost				
Borrowings	33,971.70	34,031.97	35,457.17	35,555.04
Trade payables	5,030.16	5,030.16	5,201.94	5,201.94
Other financial liabilities	207.52	207.52	209.34	209.34

Amount In (Mn's)

Fair value hierarchy	As at March 31, 2024			As at March 31, 2023		
Particulars	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Financial assets						
Fair value through profit and loss (FVTPL)						
Investment in Mutual Fund	0.18	-		0.17	-	-
Financial Assets measured at amortised cost						
Cash & cash equivalents; and bank balances	-	-	21,520.21	-	-	15,812.81
SCA receivable	-	-	30,180.89	-	-	32,738.50
Other financial assets	-	-	1,037.45	-	-	1,566.10
Financial liabilities						
At amortised cost						
Borrowings	-	-	34,031.97	-	-	35,555.04
Trade payables	-	-	5,030.16	-	-	5,201.94
Other financial liabilities	-	-	207.52	-	-	209.34

The fair values of the financial assets and financial liabilities above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

30 Impairment:

During financial year 2019-20, as part of the divestment process, the IL&FS Board received a single bid from an external party for the Company. The bid was subsequently accepted by the Board of Directors of ITNL and IL&FS, subject to necessary approvals from various regulators, Committee of Creditors, NCLAT, and other relevant entities. The final price is subject to adjustment.

Based on the bid received, the Company recognized impairment of Receivable under Service Concession Arrangements in the financial statements during the earlier year. In light of the bid being continued and ongoing management evaluations, it is the view of the Company's management that no further impairment is required for the financial year 2023-24.

31 Going Concern :

Union of India has superseded the earlier board of Holding/Ultimate Holding Company and appointed new Board from October 01, 2018. Entire Group is going through severe financial stress. National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 has also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, which means that the Company is able to meet only financial obligation towards Senior Lenders and operational creditors. In view of this classification and the moratorium order, the Company has stopped servicing financial obligations towards all its financial creditors. The Company has received a bid from third party and the same has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares is awaited. Hence on the basis of above, these accounts are prepared on the basis of going concern.

32 Debt servicing:

National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 had also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, indicating that it is not able to meet all obligations (financial and operational) including the payment obligations to senior secured financial creditors. Accordingly, the Company is permitted to make only those payments necessary to maintain and preserve the going concern status. NCLAT wide its order dated March 12, 2020, had upheld its interim order of October 15, 2018. The said order specifies October 15, 2018 as the date of initiation of the Resolution Process of the Company. Accordingly the Company has not accrued any interest , default interest, penal interest and any other similar charges after the said cut off date of October 15,2018

Considering the delay in the resolution process of the Company, and the significant cash lying with the Company, basis the constant demand from the lenders, during the previous year the Company approved an Interim Distribution to the Senior Secured Lenders of the Company be undertaken, for an amount of Rs 9,200.00 Mn which is equivalent to the principal amount that would have been paid to them under the debt restructuring plan that has been in-principle approved by the CNTL CoC. Out of Rs 9,200 Mn, Company paid Rs 7,796.82 Mn to the senior lenders during the previous year. Rs 1,403.18 Mn is being paid to one of the secured senior lenders, during the year March 31, 2024.

The banks have debited an amount of Rs 6,844.17 Mn for Interest & Principal (Interest & Principal for the period of October 18 - March 20) from the Escrow accounts of the Company maintained with them. The Company has written to the banks for reversal of same in view of October 15, 2018 Order of NCLT giving moratorium. The banks have not reversed the same till date. The same amount (after reducing interest upto Oct 15, 2018) was shown as recoverable in the financial statements. These amounts have not been handed back to the Company till date. As part of the interim distribution, the company adjusted Rs 119.90 Mn during the current financial year and Rs 5,929.42 Mn during the previous financial year out of Rs 6,844.17 Mn against the loan, which was repaid during the current financial year ended March 31, 2024, and the previous financial year ended March 31, 2023.

33 Non-compliance of applicable laws and regulations :

The Company is not in compliance with the Companies Act 2013, as applicable to the Company. These non compliances pertain to appointment of Directors, filings with Regulators, appointment of Key Management personnel and such other regulations. The Company has estimated possible obligations arising out of these non comliances and recognsed the provision in the books of account

34 In accordance with the Company's adoption of the new tax regime, the tax liability for the current year is determined to be nil. This favorable outcome is attributed to the utilization of carry-forward tax losses, which have effectively offset the taxable income for the year. Consequently, the Company will not be eligible to avail the tax holiday period of 10 years as stipulated under section 80IA.

As a result of these circumstances, the Company has recognized net deferred tax liabilities in its financial statements. These deferred tax liabilities are expected to be reversed over the duration of the concession period.

35 ABFL has filed petitions under Section 9 of Arbitration & Conciliation Act, 1996 seeking securing of amounts due to ABFL from the Company on account of defaults and non-payments of dues under Rupee Term Loan Facility extended by ABFL. In its order dated 18.09.2018, the High Court has directed Company to file affidavit containing the details of unencumbered assets including bank accounts and balance available. The matter was listed on January 09, 2020 for hearing. Given that the Moratorium is still continuing, the court was reluctant to vacate the stay. The matter was listed for hearing on May 12, 2023 and the Ld. Bench passed an order adjourning the petitions and to re-list on July 20, 2023 on the ground that proceedings are still pending before the Hon'ble NCLAT for moratorium of loan. In December 2023, the ABFL withdrew the petition.

36 **Micro and small enterprises**

Under the Micro, Small and Medium Enterprises Development Act, 2006 ('MSMED') which came into force from 2 October 2006, certain disclosures are required to be made relating to micro and small enterprises. On the basis or the information and records available with the management, there are no outstanding dues to the Micro and Small enterprises as defined in the Micro, Small mid Medium Enterprises Development Act, 2006 as set out in the following disclosures·

Amount In (Mn's)

Particulars	As at March 31, 2024	As at March 31, 2023
(a) the Principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier at the end of each accounting year;	-	-
(b) the amount interest paid by the buyer in terms of section 16 of the Micro, Small and Medium Enterprises development Act, 2006 (27 of 2006), along with the amount of the payment made to the supplier beyond the appointed day during each accounting year;	-	-
(c) Amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the period) but without adding the interest specified under the Micro, Small and Medium Enterprises Development Act, 2006;	-	-
(d) Amount of interest accrued and remaining unpaid at the end of each accounting year; and	-	-
(e) The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the purpose of disallowance of a deductible expenditure under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006.	-	-

37 **Disclosure as Per Ind AS 115 Revenue from Contracts with Customers**

A. Applicability of Ind AS 115

Ind AS 115 was issued on 28 March 2018 and supersedes Ind AS 11 Construction Contracts and Ind AS 18 Revenue and it applies, with limited exceptions, to all revenue arising from contracts with its customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The Ministry of Corporate Affairs(MCA), on March 28, 2018, notified Ind AS 115 "Revenue from Contracts with Customers" as a part of the Companies (Indian Accounting Standards) Amendment Rules, 2018. The Company has followed the IND AS 115 accordingly.

Service contracts relating to Change of Scope have an original duration of one year or less and therefore the company uses practical expedient to not disclose unsatisfied performance obligations.

37 Disclosure as Per Ind AS 115 Revenue from Contracts with Customers (Continue)

B. Disaggregation of revenue

Set out below is the disaggregation of the Company's revenue from contracts with customers:

Amount In (Mn's)

Particulars	Year ended March 31, 2024	Year ended March 31, 2023
Type of Services		
(a) Operation and maintenance income	480.48	525.12
(b) Periodic maintenance income	19.18	8.94
(c) Finance income	3,142.75	3,397.24
Total Revenue from contracts with customers	**3,642.42**	**3,931.30**

Geographical markets

Amount In (Mn's)

Particulars	Year ended March 31, 2024	Year ended March 31, 2023
India	3,642.42	3,931.30
Outside India	-	-
Total Revenue from contracts with customers	**3,642.42**	**3,931.30**

Timing of Revenue recognition

Amount In (Mn's)

38 Ratios

The following are analytical ratios for the year ended March 31, 2024 and March 31, 2023

Amount in (Mn's)

Particulars	Numerator	Denominator	As at March 31, 2024	As at March 31, 2023	Variance	Remarks
Current Ratio	Total Current assets	Total Current liabilities	0.99	0.77	28%	(a)
Debt – Equity Ratio	Total Debt (1)	Total Equity	3.08	4.59	33%	(b)
Debt Service Coverage Ratio #	Earnings available for debt service(2)	Debt Service(3)	#	#		
Return on Equity (ROE)	Net Profits after taxes	Average Total Equity	35%	28%	25%	(c)
Trade receivables turnover ratio	Revenue	Average Trade Receivable	$	$		
Trade payables turnover ratio	Purchases of services and other expenses	Average Trade Payables	0.11	0.12	-5%	(d)
Net capital turnover ratio	Revenue from operations	Working Capital	(11.47)	(0.65)	1659%	(e)
Net profit ratio	Net Profit for the year	Revenue from operations	88%	47%	87%	(f)
Return on capital employed (ROCE)	Earning before interest and taxes	Capital Employed(4)	10%	9%	6%	
Return on Investment(ROI)	Income generated from investments	Average investments	NA	NA	NA	

(1) Debt represents total debt value as per financial statements.

(2) Net Profit after taxes + Non-cash operating expenses + Interest + other adjustments like loss on sale of Fixed assets etc.

(3) Project debt payments (Interest payments + Principal repayments) for the current year.

(4) Tangible net worth + deferred tax liabilities + project debt.

In view of the moratorium granted by NCLAT, no debt serviced since October 15, 2018, hence the said ratio is not applicable / relevant

$ Not applicable under IND-AS, being annuity project and revenue is recognised as per IND-AS 115.

(a) Current ratio increase is due to increase in cash balance & other bank balance due to non payment of interest due to moratorium granted by NCLAT, no debt serviced since October 15, 2018.

(b) Repayment of loan & increase in profit during FY 2023-24.

(c) Return on equity has improved on account of increase in profit during FY 2023-24 as compare to FY 2022-23.

(d) Marginal increased in Trade payables during the year

(e) Net capital turnover ratio has improved on account of increase in profit during FY 2023-24 as compare to FY 2022-23 & increased in current ratio - refer (a).

(f) Net profit ratio has increased due to decrease in Operation and maintenance expenses & Modification loss .

39 Investigations by Serious Fraud Investigation Office ("SFIO") and other regulatory agencies:

The Ministry of Corporate Affairs (MCA), Government of India, has vide its letter dated October 1, 2018 initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS (ultimate holding company) and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of investigation of affairs of ITNL (the Holding Company), SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and it is understood that the relevant information is being provided by ITNL to the agency. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

40 Additional Regulatory Information required as per Schedule III:

a) The Company does not have any investment property, hence the requirement regarding disclosure and valuation by a registered valuer as defined under rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017 is not applicable.

b) The Company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets or both during the year.

INDEPENDENT AUDITOR'S REPORT

To the Members of CHENANI NASHRI TUNNELWAY LIMITED

Report on the audit of the Ind AS Financial Statements

Qualified Opinion

We have audited the Ind AS Financial Statements of **CHENANI NASHRI TUNNELWAY LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March, 2023 and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the Ind AS Financial Statements, including a summary of significant accounting policies and other explanatory information for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, **except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report,** the aforesaid Ind AS Financial Statements give the information required by the Companies Act, 2013 in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards(Ind AS) prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2023 and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Qualified Opinion

During the FY 2018-19, the Company had recognized and during the year continues to recognize thereafter impairment loss of Rs. 7,107.98 Mn. by comparing the carrying amount of the receivables under the head 'Receivable under Service Concession Arrangements' that were measured at amortized cost and bid received from third party for acquisition of entire Company. Thus, the Company had in the FY 2018-19 and continues thereafter to measure the receivables at fair value then recognized to arrive at present amortized carrying value as at the end of the year, which is not in accordance with Ind AS 109 'Financial Instruments' & read with accounting policy 3.7.4. The consequential impact of the above on the balance under the head 'Receivable under Service Concession Arrangements' reported in the balance sheet and on the profit for the year are unascertainable.

Consequently, the unreserved and explicit statement of compliance with Indian Accounting Standards as notified in the Companies (Indian Accounting Standards) Rules, 2015 and further amendments thereto in Note 2.1 is not proper.

We conducted our audit in accordance with the Standards on Auditing ("SAs") specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS Financial Statements under

Plot No. 6, Site No. 21, Geeta Mandir Marg, New Rajinder Nagar, New Delhi-110060
Ph: 011-42412008, 43038497, Email: gka_ma@yahoo.com; info.gianender@gmail.com

the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw your attention to

a) Note no. 35 to accompanying IND AS financial statements which states that the Company does not comply with certain requirements/provisions of the Companies Act 2013. The Company has recognized possible penalties in the books of accounts.

b) As mentioned in note no. 38 to the accompanying IND AS financial statements, wherein it is mentioned that the reopening and recasting of financial statements under the provisions of Section 130 of the Companies Act, 2013 for the financial years from 2012-13 to 2017-18 is applicable to IL&FS and its subsidiaries namely IFIN and ITNL only and management is of the view that it is not applicable to the Company. In view of the above, Company is not envisaging any adjustment in financial statement in this regard.

c) As mentioned in note no. 40 to the accompanying IND AS financial statements, the Ministry of Corporate Affairs, Government of India, had initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS Ltd and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of its investigation, SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and relevant information is being provided by ITNL to the agency. The company has not received any direct communication from SFIO. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

Our Opinion is not modified in respect of above matters.

Material Uncertainty Related to Going Concern

We draw your attention to Note no. 33 to the accompanying Ind AS financial statements which describes that Entire Group is going through liquidity issue and defaulted in repayment of various loan instruments, Union of India has filed petition against IL&FS Limited & its Group Companies in National Company Law Tribunal and superseded earlier Board of the Holding/Ultimate Holding Company. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. As per the management, going concern assumption is appropriate for preparation of financial statements, as the company has received a bid from third party and which has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval is awaited for transfer of equity shares to the bidder.

Our Opinion is not modified in respect of above matter.

Information other than the Ind AS Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, but does not include the Ind AS Financial Statements and our auditor's report thereon.

Our opinion on the Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

Responsibility of Management and Those Charged with Governance for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS Financial Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with Standards on Auditing ("SAs") will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS Financial Statements, including the disclosures, and whether the Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Ind AS Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Ind AS Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in:

(i) planning the scope of our audit work and in evaluating the results of our work; and
(ii) to evaluate the effect of any identified misstatements in the Ind AS Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the 'Annexure A' a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   b) In our opinion, **except for the effects of the matter described in the Basis for Qualified Opinion paragraph above,** proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   c) The Balance Sheet, the Statement of Profit and Loss, the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   d) In our opinion, **except for the effects of the matter described in the Basis for Qualified Opinion paragraph above,** the aforesaid Ind AS Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   e) **Our observations made on the matters stated in Qualified Opinion paragraphs above may have a significant effect so as to adversely affect the functioning of the company.**

   f) On the basis of the written representations received from the directors as on 31st March, 2023 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2023 from being appointed as a director in terms of Section 164 (2) of the Act.

   g) With respect to the Other Matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company has no pending litigation which would impact its financial position except those disclosed in Ind AS Financial Statements;

      ii. The Company does not envisage any material foreseeable losses in long-term contracts including derivative contract requiring provision;

      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company

      iv. a) The management has represented that, to the best of its knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner

whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries

b) The management has represented, that, to the best of its knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been received by the Company from any persons or entities, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c) Based on such audit procedures that we have considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e), as provided under (a) and (b) above, contain any material misstatement.

v. The Company has not declared or paid any dividend during the year.

vi. Proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 for maintaining books of account using accounting software which has a feature of recording audit trail (edit log) facility is applicable to the Company with effect from April 1, 2023, and accordingly, reporting under Rule 11(g) of Companies (Audit and Auditors) Rules, 2014 is not applicable for the financial year ended 31st March, 2023.

h) With respect to the adequacy of the internal financial controls with reference to Ind AS Financial Statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" which expresses an unmodified opinion.

3. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended; In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid the managerial remuneration during the year.

Annexure 'A' to the Independent Auditor's Report of CHENANI NASHRI TUNNELWAY LIMITED for the Year ended as on 31st March, 2023

Annexure referred to in paragraph 1 under the heading "Report on Other Legal and Regulatory Requirements" of our report on even date: -

To the best of our information and according to the explanations provided to us by the Company and the books of account and records examined by us in the normal course of audit, we state that:

i. In respect of the Company's Property, Plant and Equipment, Right-of-use Assets and Intangible Assets:

a) The Company does not have any fixed asset (other than Land) or Intangible Asset at 31st March, 2023, therefore paragraph 3(i)(a) of the Order is not applicable to the Company.

b) The Property, Plant and Equipment have been physically verified by the Management at regular Intervals and no material discrepancies were noticed on such verification.

c) The title deeds of immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company.

d) The company has not revalued its Property, Plant and Equipment (including Right of Use assets) or intangible assets during the year. Hence, reporting under Para 3(i)(d) is not applicable.

e) There are no proceedings which have been initiated or are pending against the Company for holding any benami property under the Benami Transactions (Prohibition) Act, 1988 (as amended in 2016) and rules made thereunder. Hence, reporting under Para 3(i)(e) is not applicable.

ii. a) The Company is engaged in the business of infrastructure development, operations and its maintenance and there is no inventory in hand at any point in time, hence, paragraph 3(ii)(a) of the Order is not applicable to the Company.

b) The Company has not been sanctioned any working capital limits, from banks or financial institutions on the basis of security of current assets. Hence, reporting under Para 3(ii) (b) is not applicable.

iii. The Company has not made investments in, provided any guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, limited liability partnerships or any other parties. Hence, reporting under Para 3(iii) is not applicable.

iv. The Company has not entered into any transaction in respect of loans, Investments, guarantee and securities, which attracts compliance to the provisions of the sections 185 and 186 of the Companies Act, 2013. Therefore, the paragraph 3(iv) of the Order is not applicable to the Company.

v. The Company has not accepted deposits or amounts which are deemed to be deposits and the directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act and the rules framed there under. Hence, reporting under Para 3(v) is not applicable.

vi. We have broadly reviewed the books of account maintained by the company pursuant to the Rules made by the Central Government for the maintenance of cost records under section 148 of the Act, and are of the opinion that prima facie, the prescribed accounts and records have been made.

vii. In respect of statutory dues:

a) The Company is not regular in depositing undisputed statutory dues including goods and services tax, provident fund, employee state insurance, income tax, service tax, value added tax, cess and other statutory dues during the year with the appropriate authorities. As on 31st March 2023, there are no undisputed statutory dues payables for period exceeding for a period more than six month from the date they become payable **except undisputed amounts of INR 54.11 million on account of the tax deducted at source are in arrears since March 31, 2021.**

b) There are no statutory dues referred to in sub-clause (a) which have not been deposited on account of any dispute except;

Name of the Statute	Nature of the Dues	Amount (₹ In Million)	Period to which the amount relates	Forum where dispute is pending
Income Tax Act, 1961	Income tax	1.87	AY 2014-2015	CIT(A)
		3.31	AY 2013-2014	CIT(A)
		11.68	AY 2012-2013	CIT(A)

viii. There were no transactions relating to previously unrecorded income that have been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (43 of 1961).

ix. In respect to the borrowings:

a) The Company has defaulted in repayment of loans or other borrowings. Details of the same is as under:

Default in repayment of loan (Principal & Interest) **(In Rs. Mn.)**

Name of the Lender	Nature of Due	Amount	Due since
Aditya Birla Finance Ltd	Principal	550.00	20th September 2018
IL&FS Airport Ltd	Principal	470.00	28th August 2018
SREI INFRASTRUCTURES	Interest	63.63	30th September 2018
IL&FS Airport Ltd	Interest	31.82	30th September 2018
IL&FS Transportation Networks Limited	Interest	372.51	30th September 2018
IL&FS Ltd	Interest	307.00	30th September 2018

Note: Principal repayment & interest payment due after 15th October, 2018 have not been disclosed as default under this clause in view the NCLAT Orders dated 12th March, 2020

b) The Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

c) The Company has utilized the money obtained by way of term loans during the year for the purposes for which they were obtained.

d) On an overall examination of the Ind AS Financial Statements of the Company, funds raised on short term basis have, prima facie, not been used during the year for long-term purposes by the Company.

e) On an overall examination of the Ind AS Financial Statements of the Company, the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiaries, associates or joint ventures.

f) The Company has not raised loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies.

x. a) The Company has not raised the money by way of initial public offer/ further public offer (including debt instruments) during the year.

b) During the year, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year. Hence, reporting under Para 3(x)(b) is not applicable.

xi. a) According to the information and explanations given to us by the management which have been relied by us, there were no frauds on or by the Company noticed or reported during the period under audit, subject to the pending final outcome of the various matters described in Emphasis of matter above.

b) No report under sub-section (12) of section 143 of the Companies Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government, during the year and up to the date of this report.

c) As represented to us by the management, there are no whistle blower complaints received by the Company during the year.

xii. The Company is not a Nidhi Company. Hence, reporting under Para 3(xii) is not applicable.

xiii. All transactions with the related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 where applicable and the details of such transactions have been disclosed in the Ind AS Financial Statements as required by the applicable accounting standards.

xiv. a) In our opinion the company has an adequate internal audit system commensurate with the size and nature of its business.

b) We have considered, the internal audit reports for the year under audit, issued to the Company during the year and till date, in determining the nature, timing and extent of our audit procedures.

xv. The Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence provisions of section 192 of the Companies Act, 2013 is not applicable to the Company.

xvi. a) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934). Therefore, paragraph 3(xvi) (a) of the Order is not applicable to the Company.

b) The Company has not conducted any Non-Banking Financial or Housing Finance activities. Therefore, paragraph 3(xvi) (b) of the Order is not applicable to the Company.

c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India. Hence, reporting under Para 3(xvi) (c) & (d) is not applicable.

xvii. The Company has not incurred cash losses in the current financial year and in the immediately preceding financial.

xviii. There has been no resignation of the statutory auditors during the year and accordingly reporting under this clause is not applicable.

xix. On the basis of the financial ratios, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, material uncertainty exists as on the date of the audit report that company is capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date.(refer "Material Uncertainty Related to Going Concern" para above)

We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

xx. a) In respect of other than ongoing projects, the company has not transferred unspent amount to a Fund specified in Schedule VII to the Companies Act, 2013 within a period of six months of the expiry of the financial year in compliance with second proviso to sub-section (5) of section 135 of the said Act, except in respect of the following:

Amount in Rs. Mn.

Financial Year	Amount unspent on Corporate Social Responsibility activities "other than Ongoing Projects"	Amount Transferred to Fund specified in Schedule VII within 6 months from the end of the Financial Year	Amount Transferred after the due date
2021-22	45.01	-	NA
2022-23	79.13	-	NA

b) Company is not spending any amount in respect of ongoing projects out of unspent amount. Hence, reporting under para 3 (xx) (a) is not applicable.

xxi. Paragraph 3(xxi) of the Order is not applicable to the Company as the Ind AS Financial Statements under reporting are not consolidated Ind AS Financial Statements.

ANNEXURE - B TO THE INDEPENDENT AUDITORS' REPORT
(Referred to in our Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to Ind AS Financial Statements of **CHENANI NASHRI TUNNELWAY LIMITED** ("the Company") as of 31st March, 2023 in conjunction with our audit of the Ind AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to Ind AS Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls with reference to Ind AS Financial Statements issued by the Institute of Chartered Accountants of India (the "Guidance Note"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to Ind AS Financial Statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Ind AS Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to Ind AS Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Ind AS Financial Statements included obtaining an understanding of internal financial controls with reference to Ind AS Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to Ind AS Financial Statements.

Meaning of Internal Financial Controls with reference to Ind AS Financial Statements

A Company's internal financial control with reference to Ind AS Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control with reference to Ind AS Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Ind AS Financial Statements.

Inherent Limitations of Internal Financial Controls with reference to Ind AS Financial Statements

Because of the inherent limitations of internal financial controls with reference to Ind AS Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Ind AS Financial Statements to future periods are subject to the risk that the internal financial control with reference to Ind AS Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to Ind AS Financial Statements and such internal financial controls with reference to Ind AS Financial Statements were operating effectively as at 31st March 2023, based on the internal control with reference to Ind AS Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls With reference to Ind AS Financial Statements issued by the Institute of Chartered Accountants of India.

General Information & Significant Accounting Policies

Note No-1

1. General information

The Company was incorporated under the Companies Act 1956 on June 02, 2010. The Company is a special purpose vehicle (SPV) promoted by IL&FS Transportation Networks Limited (ITNL). The company registered address is "The IL&FS Financial Center, Plot C22, G Block, Bandra Kurla Complex, Mumbai - 400051." The Company has entered into a Concession Agreement (CA) on June 28, 2010 with The National Highways Authority of India (NHAI) for Rehabilitation, Strengthening and four laning of Chenani to Nashri Section of NH-1A, from km 89.00 to km 130.00(New Alignment) including 9km long tunnel (2 lane) with parallel escape tunnel on Design, Build, Finance, Operate and Transfer (DBFOT basis) in the state of Jammu & Kashmir. The Concession Agreement envisages concession for a period of 20 years including construction period of 1825 days commencing from the 23rd May 2011 (the 'Appointed date').

Note No-2

2. Significant accounting policies

2.1 Statement of compliance

The financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and other relevant provisions of the Companies Act, 2013("the Act").

The Balance Sheet, the Statement of Profit and Loss and the Statement of Changes in Equity are prepared and presented in the format prescribed in the Division II of Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

2.2 Basis of preparation and presentation

The Financial Statements are presented in INR, which is also the Company's functional currency and all values are rounded to the nearest millions (INR 000,000), except earnings per share and except otherwise indicated.

The financial statements have been prepared on a historical cost basis, except for the following asset and liabilities which have been measured at fair value:

NEW DELHI

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments),

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on this basis.

2.3 Use of estimates

The preparation of financial statements in conformity with IND AS requires the Management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and disclosure of contingent liabilities on the date of financial statements. The recognition, measurement, classification or disclosures of an item or information in the financial statements have been made relying on management estimates to a greater extent.

2.4 Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.
The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

DHANDHANIA & ASSOCIATES NEW DELHI Chartered Accountants
Chenani Nashri Tunnelway Limited

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. External valuers are involved for valuation of significant assets, such as properties and significant liabilities, such as contingent consideration.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.
This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

3. Accounting for rights under service concession arrangements and revenue recognition

i. Recognition and measurement

The Company builds, operates and maintains infrastructure assets under public-to-private Service Concession Arrangements (SCAs), which is an arrangement between the "grantor" (a public sector entity/authority) and the "operator" (a private sector entity) to provide services that give the public access to major economic and social facilities utilizing private-sector funds and expertise. The infrastructures accounted for by the Company

as concessions are mainly related to the activities concerning roads.

Concession contracts are public-private agreements for periods specified in the SCAs including the construction, up gradation, restoration of infrastructure and future services associated with the operation and maintenance of assets in the concession period. Revenue recognition, as well as, the main characteristics of these contracts are detailed in Note 3.iii.

With respect to service concession arrangements, revenue and costs are allocated between those relating to construction services and those relating to operation & maintenance services, and are accounted for separately. Consideration received or receivable is allocated by reference to the relative fair value of services delivered when the amounts are separately identifiable. The infrastructure used in a concession are classified as an intangible asset or a financial asset, depending on the nature of the payment entitlements established in the concession agreement.

When the amount of the arrangement consideration for the provision of public services is substantially fixed by a contract, the Company recognizes revenues from construction services for public facilities (infrastructures) by the percentage-of completion method, and recognizes the consideration as a financial asset and the same is classified as "Receivables against Service Concession Arrangements". The Company accounts for such financial assets at amortized cost, calculates interest income based on the effective interest method and recognizes it in revenue as Finance Income.

ii. Contractual obligation to restore the infrastructure to a specified level of serviceability

The Company has contractual obligations to maintain the infrastructure to a specified level of serviceability or restore the infrastructure to a specified condition during the concession period and/or at the time of hand over to the grantor of the SCA. Such obligations are measured at the best estimate of the expenditure that would be required to settle the obligation at the balance sheet date. In case of concession arrangements under financial asset model, such costs are recognized in the period in which such costs are actually incurred.

iii. Revenue recognition

Finance income for concession arrangements under financial asset model is recognized using the effective interest method. Revenues from operations and maintenance services and overlay services are recognized in each period as and when services are rendered in

accordance with Ind AS 115 Revenue from contract with customers.

iv. Revenue from construction contracts

The Company recognizes and measures revenue, costs and margin for providing construction services during the period of construction of the infrastructure in accordance with Ind AS 115 'Construction Contracts'.
When the outcome of a construction contract can be estimated reliably and it is probable that it will be profitable, contract revenue and contract costs associated with the construction contract are recognised as revenue and expenses respectively by reference to the percentage of completion of the contract activity at the reporting date. The percentage of completion of a contract is determined considering the proportion that contract costs incurred for work performed upto the reporting date bear to the estimated total contract costs.

For the purposes of recognizing revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that it is probable that they will result in revenue and they are capable of being reliably measured.

The percentage of completion method is applied on a cumulative basis in each accounting period to the current estimates of contract revenue and contract costs. The effect of a change in the estimate of contract revenue or contract costs, or the effect of a change in the estimate of the outcome of a contract, is accounted for as a change in accounting estimate and the effect of which are recognized in the Statement of Profit and Loss in the period in which the change is made and in subsequent periods.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognized only to the extent of contract costs incurred of which recovery is probable and the related contract costs are recognized as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense in the Statement of Profit and Loss in the period in which such probability occurs.

v. Borrowing cost related to SCAs

In case of concession arrangement under financial asset model, borrowing costs attributable to construction of the infrastructure are charged to Statement of Profit and

Loss in the period in which such costs are incurred.

In case of concession arrangement under intangible asset model, borrowing costs attributable to the construction of infrastructure assets are capitalised up to the date of the final completion certificate of the asset / facility received from the authority for its intended use specified in the Concession Agreement. All borrowing costs subsequent to the capitalization of the intangible assets are charged to the Statement of Profit and Loss in the period in which such costs are incurred.

vi. Claims

Claims raised with the concession granting authority towards reimbursement for costs incurred due to delay in handing over of unencumbered land to the Company for construction or other delays attributable solely to the concession granting authority are recognised when there are is a reasonable certainty that there will be inflow of economic benefits to the Company. The claims when recognized as such are reduced from the carrying amount of the intangible asset / financial asset under the service concession arrangement, as the case may be, to the extent the claims relate to costs earlier included as a part of the carrying amount of these assets. Further, these claims are credited to profit or loss to the extent it is probable to have economic benefits to the company.

3.1 Borrowing costs

Borrowing costs are recognised in the period to which they relate, regardless of how the funds have been utilised, except where it relates to the financing of construction of development of assets requiring a substantial period of time to prepare for their intended future use. Interest is capitalised up to the date when the asset is ready for its intended use. The amount of interest capitalised (gross of tax) for the period is determined by applying the interest rate applicable to appropriate borrowings outstanding during the period to the average amount of accumulated expenditure for the assets during the period. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds

All other borrowing costs are recognised in profit or loss in the period in which tare incurred.

3.2 Taxation

3.2.1 Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax return with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3.2.2 Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases values used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets (including unused tax credits such as MAT credit and unused tax losses such as carried forward business loss and unabsorbed depreciation) are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit

or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of to recover or settle the carrying amount of its assets and liabilities.

3.3 Property, plant and equipment

Property, plant and equipment acquired by the Company are reported at acquisition cost, with deductions for accumulated depreciation and impairment losses, if any.

The acquisition cost includes the purchase price (excluding refundable taxes) and expenses, such as delivery and handling costs, installation, legal services and consultancy services, directly attributable to bringing the asset to the site and in working condition for its intended use.

Where the construction or development of any asset requiring a substantial period of time to set up for its intended use is funded by borrowings, the corresponding borrowing costs are capitalized up to the date when the asset is ready for its intended use.

All assets are depreciated on a Straight Line Method (SLM) of Depreciation, over the useful life of assets as prescribed under Schedule II of the Companies Act, 2013.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying of the asset and is recognised in profit or loss.

3.4 Impairment of tangible assets / intangible asset

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to

the smallest Company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

In assessing value in use, the estimated future cash flows are discounted to their present value using appropriate discount rate.

Recoverable amount is the higher of fair value less costs of disposal and value in use.
If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Foreign Currencies:

The Company's financial statements are presented in INR, which is also the Company's functional currency. In preparing the financial statements of Company, transactions in currencies other than the Company's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or statement of profit or loss are also recognized in OCI or statement of profit or loss, respectively). Exchange differences on monetary items are recognized in profit or loss in the period in which they arise except for exchange differences on transactions entered into in order to hedge certain foreign currency risks (see note 21.3 below for hedging accounting policies).

3.5. Provision

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the

GLAMINDER & ASSOCIATES NEW DELHI Chartered Accountants

obligation, and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

3.6 Financial instruments

Financial assets and financial liabilities are recognized when a company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL) are recognized immediately in the statement of profit and loss.

3.7 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

3.7.1 Classification of financial assets – debt instruments

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order

to collect contractual cash flows;

- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

3.7.2 Amortised cost and Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognized in profit or loss and is included in the "Other income" line item.

3.7.3 Financial assets at FVTPL

Debt instruments that do not meet the amortized cost or FVOCI criteria are measured at FVTPL. In addition, debt instruments that meet the amortized cost or FVOCI criteria but are designated as at FVTPL are measured at FVTPL.

A debt instrument that meets the amortized cost or FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in profit or loss. The net gain or loss recognized in profit or loss is included in in the "Other income" line item.

3.7.4 Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:
a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
b) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18 (referred to as 'contractual revenue receivables' in these illustrative financial statements)
c) Loan commitments which are not measured as at FVTPL

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realized upto one year from the due date, loss for the time value of money is not recognized, since the same is not considered to be material.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

3.8 Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next

GLANCE & ASSOCIATES NEW DELHI

reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

3.8.1 Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If [the Company] the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.
On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss if such gain or loss would have otherwise been recognized in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g., when the Company retains an option to repurchase part of a transferred asset), [the Company] the Company allocates the previous carrying amount of the financial asset between the part it continues to recognised under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

3.9 Modification of Cash Flows of financial assets and revision in estimates of Cash flows

The rate considered for recognizing Finance Income (EIR) and fair valuation of the Receivable under SCA finalised on achievement of PCOD / COD for the Project. Thereafter this rate will remain constant during the balance concession period unless there is an impairment / reversal of impairment of asset.

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with Ind AS 109, the Company recalculates the gross carrying amount of the financial asset and recognises a modification gain or loss in profit or loss. The gross carrying amount of the financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate. Any costs or fees incurred are adjusted to the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If the Company revises its estimates of payments or receipts (excluding modifications and changes in estimates of expected credit losses), it adjusts the gross carrying amount of the financial asset or amortised cost of a financial liability to reflect actual and revised estimated contractual cash flows. The Company recalculates the gross carrying amount of the financial asset or amortised cost of the financial liability as the present value of the estimated future contractual cash flows that are discounted at the financial instrument's original effective interest rate. The adjustment is recognised in profit or loss as income or expense.

3.10 Financial liabilities and equity instruments-

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate
The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

3.10.1 Classification as debt or equity

Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument

3.10.2 Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method

3.10.3 Financial liabilities subsequently measured at amortised cost

Financial liabilities are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at

amortized cost are determined based on the effective interest method. Interest expense that is not capitalized as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

3.10.4 Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

3.11 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

3.12 Cash Flow Statement:

The statement of cash flows shows the changes in cash and cash equivalents arising during the year from operating activities, investing activities and financing activities

The cash flows from operating activities are determined by using the indirect method. Net income is therefore adjusted by non-cash items, such as measurement gains or losses, changes in provisions, impairment of property, plant and equipment and

intangible assets, as well as changes from receivables and liabilities. In addition, all income and expenses from cash transactions that are attributable to investing or financing activities are eliminated. Interest received or paid is classified as operating cash flows

The cash flows from investing and financing activities are determined by using the direct method

3.13 Earnings per Equity Share:

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

3.14 Critical accounting judgments:

The preparation of Financial Statements in conformity with the recognition and measurement principles of Ind AS requires management to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures of contingent liabilities at the date of the Financial Statements and the reported amounts of income and expenses for the periods presented.

Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. In case the actual results are different those from estimates, the effect thereof is given in the financial statements of the period in which the events materialize. Any change in such estimates is accounted prospectively.

The matters to be disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity. Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to

GIANENDER & ASSOCIATES NEW DELHI Chartered Accountants

accounting estimates are recognized in the period in which the estimates are revised and future periods are affected.

3.15 Key sources of estimation of uncertainty

Key source of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of-

a) Periodical Major Maintenance
The management, estimates expenditure w.r.t periodic major maintenance by using a model that incorporates a number of assumptions, including the life of the concession agreement and the expected cost of the periodic major maintenance which are considered as reasonable by the management.

b) Fair value measurement of financial instruments
When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Refer Note 30 for further disclosures.

Less : Deferred tax liabilities	6,218.26	-	-	-
Total	2,059.37	-	-	-

10.2 Deferred tax Disclosures

Deferred tax assets and deferred tax liabilities have been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liabilities and where the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority

Deferred Tax Asset in respect of Unabsorbed Business Loss/ depreciation has been recognized to the extent reversals of Deferred Tax Liability and Taxable Profits are available before end of concession period

Significant management judgement is considered in determining provision for income tax, deferred tax assets and liabilities and recoverability of deferred tax assets. The recoverability of deferred tax assets is based on estimate of the taxable income for the period over which deferred tax assets will be recovered. The Company has unabsorbed business losses/depreciation which according to the management will be used to set off taxable profit arising in subsequent years from operation of the Company

The profitability projections used for determining the recoverability of deferred tax asset has number of variables viz. Revenue projections, restructuring of debt, incurrence of overlay etc which are subject to change

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered

e) a charge on the uncalled capital of the Company;

Provided that charge at (e) above, shall be limited for ensuring that the Company calls the balance uncalled capital and makes the shares fully paid up.

f) an assignment by way of security:

(i) of the right, title and interest of the Company in, to and under the project documents including the concession agreement, duly acknowledged and consented to by NHAI and by the relevant counter-parties to such project documents to the extent not expressly provided in the concession agreement or each such project document, all as amended, varied or supplemented from time to time;

(ii) of the right, title and interest of Company in, to and under all the government approvals and insurance contracts; and

(iii) of the right, title interest of the Company in, to and under any letter of credit, guarantee, including contractor guarantees and liquidated damages and performance bond provided by any party to the project documents.

(B) The Subordinate Facility together with all interests, default interest, additional interest, fees, commission, remuneration payable to the security trustee, costs, charges, expenses and all other amounts whatsoever stipulated in, or payable by the Company in terms of, the finance documents shall to the satisfaction of the senior lenders/ security trustee, be secured to the extent permitted under the concession agreement by a second charge on the above mentioned in para (A) above.

2) Terms of Payments:

(a) As per the existing common loan agreement with lenders, the Company has undertaken to repay the senior and sub debt loan to each senior and sub debt lender in accordance with the following repayment schedule. Please note that this schedule is subject to adjustment due to the repayment of Rs 7,796.82 mn made during the current year:

Repayment Schedule:

Year	Senior Debts	Sub Debts	Total
October 2018 to March 2019	862.77	114.52	977.29
June 2019 to March 2020	1,806.43	239.77	2,046.20
June 2020 to March 2021	1,970.90	261.60	2,232.50
June 2021 to March 2022	2,121.88	281.64	2,403.53
June 2022 to March 2023	2,278.26	302.40	2,580.66
June 2023 to March 2024	2,494.16	331.06	2,825.22
June 2024 to March 2025	2,552.65	338.82	2,891.47
June 2025 to March 2026	2,552.65	338.82	2,891.47
June 2026 to September 2026	8,556.80	1,135.77	9,692.57
Total	25,196.49	3,344.41	28,540.90
Repayment made as per interim distribution during the year	(7,796.82)		(7,796.82)
Direct Debit by SBI adjusted during the year	(5,809.52)		(5,809.52)
Adjustment as per IndAS	(103.50)		(103.50)
Borrowing Outstanding as the end of the year	11,486.65	3,344.41	14,831.05

b) Standard Chartered Bank had granted a long-term loan in form of External Commercial Borrowing ("ECB") of USD 43,000,000 to the Company. As per the facility agreement dated December 2, 2015 and amended on January 21, 2016, till the long term loan remains outstanding in books, the lender was required to accrue interest on the aforesaid loan at an interest rate of LIBOR plus Margin (as defined in the facility agreement). The final maturity date of the loan is February 28, 2026.
During the previous financial year, Standard Chartered bank assigned its rights under the Facility Agreement to Deutsche Bank AG, London branch. Further, the Cross Currency interest rate SWAP contract executed by the Company with Standard Chartered Bank, Mumbai Branch, was cancelled during previous the year. As a part of Claim Management process (as per the direction of NCLAT), the claim for Deutsche Bank AG, London has been admitted for Rs 2803.05 Mn (consisting of loan amount of Rs 2,782.95 Mn and interest of Rs 20.10 Mn). Accordingly, the liability of the Company towards ECB has been crystalized for Rs 2,782.95 mn. Since the claim for this financial liability has been admitted in INR, no further hedge is required for this loan

Repayment Schedule:

21.2 - The company has taken foreign currency hedge for entire ECB loan upto the previous year. Due to non repayment of ECB loan certain portion got unhedged during the year and foreign exchange fluctuation loss on such unhedged portion has been recognised. During the year due to cancellation of hedge contract, entire ECB loan has been recognised at FVTPL

21.3 Expenditure incurred for corporate social responsibility

In terms of Section 135 of the Companies Act, 2013, a Corporate Social Responsibility (CSR) Committee has been formed by the Company. The areas for CSR activities as per the CSR policy are (i) Promotion of education, (ii) promoting gender equality and empowering women, (iii) reducing child mortality and improving maternal health, (iv) ensuring environmental sustainability, (v) employment enhancing vocational skills, (vi) social business projects, (vii) contribution to the Prime Minister's National Relief Fund or any other fund set up by the Central Government or the State Governments for socioeconomic development and relief and funds for the welfare of the Scheduled Castes, the Scheduled Tribes, other backward classes, minorities and women and (viii) such other matters as may be prescribed.

In line with Guidance Note on Accounting for Expenditure on Corporate Social Responsibility Activities, issued by the Institute of Chartered Accountants of India, the disclosure of the CSR expenditure during the year, is as under:

Particulars	Year Ended March 31, 2023	Year Ended March 31, 2022
(i) Gross Amount required to be spent by the Company during the year	79.13	45.01
Add: Shortfall for the previous year	45.01	
(ii) Amount spent during the year	-	-
(a) Construction/acquistion of any asset	-	-
(b) On purpose other than above (ii) (a) - In cash	-	-
(c) On purposes other than above (ii) (a) - Yet to be paid in cash	-	-
(d) Amount unspent during the year	124.14	45.01

In accordance with Section 135(6) of the Companies Act, 2013, the Company is required to deposit the unspent amount allocated for Corporate Social Responsibility (CSR) in a designated bank account within 6 months from the end of the financial year (FY). However, due to the moratorium granted by NCLAT and the need to prioritize expenses essential for maintaining the going concern status, the Company was unable to release funds towards CSR activities during the specified period

Following is the schedule of Movement in CSR provision during the year:

Particulars	Year Ended March 31, 2023	Year Ended March 31, 2022
Opening Balance	45.01	-
Add: CSR Expense to be incurred	79.13	45.01
Less: Amount Spent during the year	-	-
Closing Balance of provision	124.14	45.01

22. Income taxes

22.1 Income tax recognised in profit or loss

Particulars	Year Ended March 31, 2023	Year Ended March 31, 2022
Current tax		
In respect of the current period (refer note below)	-	250.97
In respect of prior period	-	-
	-	250.97
Deferred tax		
In respect of the current period	2,059.37	-
MAT credit entitlement	-	-
	2,059.37	-
Total income tax expense recognised in the current period relating to continuing operations	2,059.37	250.97

Note: In light of the Company's decision to adopt the new tax regime, the tax liability for the current year is nil. This is due to the utilization of carry-forward tax losses, which have offset the taxable income for the year

23. Earnings per share

Particulars	Unit	Year Ended March 31, 2023	Year Ended March 31, 2022
Profit for the year attributable to owners of the Company	₹ Mn	1,843.48	3,534.26
Weighted average number of equity shares	Number	37,20,00,000	37,20,00,000
Nominal value per equity share	₹	10.00	10.00
Basic / Diluted earnings per share	₹	4.96	9.50

There are no potential dilutents therefore Diluted EPS is considered as Equal to Basic EPS.

24. Ratios

The following are analytical ratios for the year ended March 31, 2023 and March 31, 2022

Particulars	Numerator	Denominator	31st March 2023	31st March 2022	Variance	Remarks
Current Ratio	Total Current assets	Total Current liabilities	0.77	0.79	-3%	(a)
Debt – Equity Ratio	Total Debt	Total Equity	4.59	8.49	-46%	(b)
Debt Service Coverage Ratio #	Earnings available for debt service(1)	Debt Service(2)	#	#	#	
Return on Equity (ROE)	Net Profits after taxes	Average Total Equity	0.28	0.92	-69%	(c)
Inventory Turnover Ratio	Cost of goods sold OR sales	Average Inventory	NA	NA	NA	NA
Trade receivables turnover ratio	Revenue	Average Trade Receivable	NA	NA	NA	-
Trade payables turnover ratio	Purchases of services and other expenses	Average Trade Payables	0.12	0.13	-12%	(d)
Net capital turnover ratio	Revenue from operations	Working Capital	(0.65)	(0.58)	12%	(e)
Net profit ratio	Net Profit for the year	Revenue from operations	0.47	0.85	-45%	(f)
Return on capital employed (ROCE)	Earning before interest and taxes	Capital Employed(4)	0.09	0.07	31%	(g)
Return on Investment(ROI)	Income generated from investments	Average investments	0.05	0.03	62%	(h)

(1) Net Profit after taxes + Non-cash operating expenses + Interest + other adjustments like loss on sale of Fixed assets etc.

(2)Project debt payments (Interest payments + Principal repayments) for the current year

(3) Tangible net worth + deferred tax liabilities + project debt

(4) Total Debt + Total Equity

In view of the moratorium granted by NCLAT, no debt serviced since October 15, 2018

(a) Increase in current ratio is on account of FD created and interest accrued thereon and utilisation of FD for repayment of loans as per interim distribution .

(b) Repayment of debt during the year (Refer note 34) resulted in major variation in ratio.

(c) In view of the moratorium granted by NCLAT no Debt service since October 15,2018 and interest on borrowings has not been accrued resulting to profit. This has resulted to positive Other Equity and major variation in ratio.

(d) Decrease in Operating expenses has resulted in decrease in trade payable turnover ratio .

(e) Decrease in revenue from operations and decrease in working capital (refer note 34) has resulted in such variance in net turnover capital ratio.

(f) Increase in net profits due to increase in other income and reduction in other expenses ahs resulted in increase of net profit ratio.

(g) Repayment of Debt as per interim distribution has resulted to increase in return on capital employed ratio.

(h) The change of 62% is on account of increase in NAV of Mutual funds.

31. Financial Instruments

3 Financial risk management objectives

The Company 's Corporate Treasury function monitors and manages the financial risks relating to the operations of the Company . These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. Refer Note 33 which states about moratorium of debt service obligations. The new board of IL&FS has undertaken certain steps for resolution of existing obligations. Accordingly, the Company is in the process of setting up mechanism to address the risks including market risk, currency risk, interest risk and liquidity risk

4 Market risk

The Company is exposed to the financial risk of changes in foreign currency exchange rates and interest rates

4.1 Foreign currency risk management

The carrying amounts of the Company's unhedged foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows

Particulars	Liabilities as at (INR in Mns)		Assets as at (INR in Mns)	
	As at March 31, 2023	As at March 31, 2022	As at March 31, 2023	As at March 31, 2022
ECB - USD	-	-	-	-
-	-	-	-	-

4.2 Foreign Currency Sensitivity Analysis

The Company was mainly exposed to the currency of United States. The contract for cross currency swap interest rate cancelled during the previous financial year ended March 31, 2022.

4.3 Interest rate swap contracts

Under interest rate swap contracts, the company agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the company to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period. The contract for cross currency swap interest rate cancelled during the previous financial year ended March 31, 2022.

5 Interest rate risk management

The company is exposed to interest rate risk because it borrows funds at both fixed and floating interest rates.

The company's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

5.1 Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the company's:

i) profit for the Year would decrease/increase by ₹ 87.09 Mn (previous year ₹ 156.50 Mn.). This is mainly attributable to the company's exposure to interest rates on its variable rate borrowings; and

31. Financial Instruments

6 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to The Company .The Management of The Company believes that the credit risk is negligible since its main receivable is from the grantors of the concession which is a government authority.

7 Liquidity risk management

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. However, the Company has not been servicing any debt effetive Oct 15, 2018 in view of moratorium granted by NCLAT

7.1 Liquidity and interest risk tables

The following tables detail the company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods as per the existing loan agreement. The tables have been drawn up based on the undiscounted cash flows of financial liabilities. The tables include both interest (upto scheduled repayment date) and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period.

Amount In (Mn's)

Particulars	March 31, 2023			March 31, 2022		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	207.65	27,250.62	20,059.88	207.52	27,250.62	20,059.88
1-3 years	215.94	11,736.67	31.78	122.26	11,736.67	31.78
3-5 years	-	17,799.17	23.84	-	17,799.17	23.84
More than 5 years	4,986.00	-	141.30	4,984.80	-	141.30
Total	**5,409.59**	**56,786.47**	**20,256.80**	**5,314.58**	**56,786.47**	**20,256.80**

Note: - This schedule is subject to adjustment due to the repayment of Rs 7796.82 mn made during the current year

The following table details the company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Amount In (Mn's)

Particulars	March 31, 2023			March 31, 2022		
	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments	Non-interest bearing	Variable interest rate instruments	Fixed interest rate instruments
Upto 1 year	996.13	5,658.16	15,810.88	6,893.89	5,733.36	17,764.19
1-3 years	-	11,556.39	-	-	12,034.70	-

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

The following table details the company's liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves at the end of the reporting period. The contract for cross currency swap interest rate has been cancelled during the current financial year.

* The contract for cross currency swap interest rate has been cancelled during the current financial year

32 **Impairment:**

During financial year 2019-20, as part of the divestment process, the IL&FS Board received a single bid from an external party for the Company. The bid was subsequently accepted by the Board of Directors of ITNL and IL&FS, subject to necessary approvals from various regulators, Committee of Creditors, NCLAT, and other relevant entities The final price is subject to adjustment.

Based on the bid received, the Company recognized impairment of Receivable under Service Concession Arrangements in the financial statements during the earlier year. In light of the bid being continued and ongoing management evaluations, it is the view of the Company's management that no further impairment is required for the financial year 2022-23.

33 **Going Concern :**

Union of India has superseded the earlier board of Holding/Ultimate Holding Company and appointed new Board from October 01, 2018 Entire Group is going through severe financial stress. National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 has also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, which means that the Company is able to meet only financial obligation towards Senior Lenders and operational creditors. In view of this classification and the moratorium order, the Company has stopped servicing financial obligations towards all its financial creditors The Company has received a bid from third party and the same has been accepted by the Board of ITNL & IL&FS (the ultimate Holding Company). NCLT approval for said transfer of equity shares is awaited. Hence on the basis of above, these accounts are prepared on the basis of going concern.

34 **Debt servicing:**

National Company Law Appellate Tribunal ("NCLAT") had passed an order on October 15, 2018 ("Interim Order") in Company Appeal (AT) 346 of 2018, imposing moratorium on the creditors of IL&FS and its 348 group companies, which includes the Company. Further, NCLAT vide its order dated February 11, 2019 had also classified the Company under the "Amber Category" based on a 12 month cash flow solvency test, indicating that it is not able to meet all obligations (financial and operational) including the payment obligations to senior secured financial creditors. Accordingly, the Company is permitted to make only those payments necessary to maintain and preserve the going concern status. NCLAT wide its order dated March 12, 2020, had upheld its interim order of October 15, 2018. The said order specifies October 15, 2018 as the date of initiation of the Resolution Process of the Company. Accordingly the Company has not accrued any interest , default interest, penal interest and any other similar charges after the said cut off date of October 15,2018

Considering the delay in the resolution process of the Company, and the significant cash lying with the Company, basis the constant demand from the lenders, during the year the Company approved an Interim Distribution to the Senior Secured Lenders of the Company be undertaken, for an amount of Rs 9,200.00 mn which is equivalent to the principal amount that would have been paid to them under the debt restructuring plan that has been in-principle approved by the CNTL CoC. Out of Rs 9,200 mn, Company paid Rs 7,796.82 Mn to the senior lenders during the year. Rs 1,403.18 mn is being paid to one of the secured senior lenders, post March 31, 2023

The banks have debited an amount of Rs 6,844.17 Million for Interest & Principal (Interest & Principal for the period of October 18 - March 20) from the Escrow accounts of the Company maintained with them. The Company has written to the banks for reversal of same in view of October 15, 2018 Order of NCLT giving moratorium. The banks have not reversed the same till date. The same amount (after reducing interest upto Oct 15, 2018) was shown as recoverable in the financial statements. These amounts have not been handed back to the Company till date. As a part of interim distribution, Company adjusted Rs 5,929.42 Mn out of Rs 6,844.17 mn against the loan which was repaid during the current financial year ended March 31, 2023

35 **Non-compliance of applicable laws and regulations :**

The Company is not in compliance with the Companies Act 2013, as applicable to the Company These non compliances pertain to appointment of Directors, filings with Regulators, appointment of Key Management personnel and such other regulations. The Company has estimated possible obligations arising out of these non-comliances and recognsed the provision in the books of account.

36 In accordance with the Company's adoption of the new tax regime, the tax liability for the current year is determined to be nil. This favorable outcome is attributed to the utilization of carry-forward tax losses, which have effectively offset the taxable income for the year. Consequently, the Company will not be eligible to avail the tax holiday period of 10 years as stipulated under section 80IA.

As a result of these circumstances, the Company has recognized net deferred tax liabilities in its financial statements. These deferred tax liabilities are expected to be reversed over the duration of the concession period.

37 ABFL has filed petitions under Section 9 of Arbitration & Conciliation Act, 1996 seeking securing of amounts due to ABFL from the Company on account of defaults and non-payments of dues under Rupee Term Loan Facility extended by ABFL. In its order dated 18.09.2018, the High Court has directed Company to file affidavit containing the details of unencumbered assets including bank accounts and balance available. The matter was listed on January 09, 2020 for hearing.Given that the Moratorium is still continuing, the court was reluctant to vacate the stay. The last date of hearing was scheduled for April 16, 2020. The matter was listed for hearing on May 12, 2023 and the Ld. Bench passed an order adjourning the petitions and to re-list on July 20, 2023 on the ground that proceedings are still pending before the Hon'ble NCLAT for moratorim of loan.

38 **Order of NCLT for re-opening and re-casting of financial statements:**

The National Company Law Tribunal ("NCLT"), vide order dated January 1, 2019, had allowed a petition filed by the Union of India, for re-opening of the books of accounts and re-casting the financial statements under the provisions of Section 130 of the Companies Act, 2013 for the financial years from 2012-13 to 2017-18, of Infrastructure Leasing & Financial Services Limited ("IL&FS"), and its subsidiaries namely IL&FS Financial Services Limited ("IFIN") and IL&FS Transportation Network Limited ("ITNL"), the holding Company

During the year the Board of Directors of ITNL has taken on records restatement of its accounts for financial years 2014 to 2018 and approved the submission of the same to the MCA. This restatement does not affect the financial statements of the Company for the current year

39 **Forensic Examination :**

A) An independent third party appointed by IL&FS Board conducted and submitted forensic audit report to ITNL during previous year ended March 31, 2022. Since the audit is primarily relating to operations of ITNL, Company is not envisaging any adjustment in financial statement in this regard

B) During previous year, senior lenders had initiated forensic audit of the Company through independent third party. The Forensic Audit has been closed by lenders without any adverse comments

40 **Investigations by Serious Fraud Investigation Office ("SFIO") and other regulatory agencies:**

The Ministry of Corporate Affairs (MCA), Government of India, has vide its letter dated October 1, 2018 initiated investigation by Serious Fraud Investigation Office (SFIO) against IL&FS (ultimate holding company) and its group companies under Section 212 (1) of the Companies Act, 2013. As a part of investigation of affairs of ITNL (the Holding Company), SFIO has also been seeking from ITNL various information including relating to project undertaken by the Company (for which ITNL acted as Development Contractor and promoter). The investigation is in progress and it is understood that the relevant information is being provided by ITNL to the agency. At this stage, no material impact/ implications had arisen from the aforesaid developments. However, an uncertainty relating to the future outcome of the regulatory actions is not determinable at this stage.

41 **Creditors Claim Process :**

Pursuant to the "Third Progress Report – Proposed Resolution Framework for the IL&FS Group" dated 17 December, 2018 and the "Addendum to the Third Progress Report – Proposed Resolution Framework for IL&FS Group" dated January 15, 2019 ("Resolution Framework Report") submitted by the Company to the Ministry of Corporate Affairs, Government of India which, in turn, was filed with the Hon'ble National Company Law Appellate Tribunal ("NCLAT"), the creditors of the Company were invited (via advertisement(s) dated May 22, 2019) to submit their claims as at October 15, 2018 with proof, on or before 5 June, 2019 (later extended till February 05, 2020) to a Claims Management Advisor ("CMA") appointed by the IL&FS Group. The amounts claimed by the financial and operational creditors are assessed for admission by the CMA.

The CMA, vide their various communications to the management of the Company, have submitted their report on the status of the claims received and its admission status. The report is subject to updation based on additional information / clarification that may be received from the creditors in due course.

Management of the Company has reviewed the claims made by third parties with the CMA, and reconciled them with the books of accounts. Such claims have either been provided for, or shown as contingent liabilities if there is a possible obligation on the company. No action is taken if the possibility/probability of outflow is remote (refer Note 26)

42 In September 2018 Indusind bank has adjusted, against the various loans which Indusind bank advanced to various ITNL's subsidiaries, fixed deposit of IL&FS Ltd maintained with Indusind Bank without the permission of IL&FS Ltd. For the Company, Indusind bank adjusted interes amount of Rs 54 mn against the fixed deposit. IL&FS Ltd has accepted such adjustment in previous financial year ended March 31, 2022 and hence accordingly adjustment was made in the books of accounts of the Company during the last year.

43 **Approval of financial statements**

The Financial statements were approved for issue by the Board of Directors on August 18, 2023

INDEPENDENT AUDITOR'S REPORT

To the Members of **ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED**

Report on the Audit of Financial Statements

Opinion

We have audited the Financial Statements of Athaang Devanahalli Tollway Private Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2025, and the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and notes to the Financial Statements, including a summary of material accounting policies and other explanatory information for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, and its profit including Other Comprehensive Income, its Cash Flows and the Changes in Equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the Financial Statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Financial Statements.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report ("other information"),but does not include the Financial Statements and our auditor's report thereon.

Our opinion on the Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Financial Statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Financial Statements that give a true and fair view of the financial position, financial performance including Other Comprehensive Income, Cash Flows and Changes in Equity of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Financial Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standard on Auditing (SA's) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

Auditor's Responsibilities for the Audit of the Financial Statements *(Continued)*

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure, and content of the Financial Statements, including the disclosures and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books; except for the matters stated in the paragraph 2(i)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014

   (c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, and the Statement of Cash Flow and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

   (d) In our opinion, the aforesaid Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules,2015, as amended;

Report on Other Legal and Regulatory Requirements *(Continued)*

(e) On the basis of the written representations received from the directors as on March 31, 2025, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2025, from being appointed as a director in terms of Section 164(2) of the Act;

(f) With respect to the adequacy of the internal financial controls over financial reporting of the Company with reference to these Financial Statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2".

(g) The modifications relating to the maintenance of accounts and other matters connected therewith are as stated in the paragraph 2(b) above on reporting under Section 143(3)(b) of the Act and paragraph 2(i)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014;

(h) In Our opinion and to the best of our information and according to explanations given to us, the provisions of Section 197 of the Act are not applicable to the company for the year ended March 31, 2025.

(i) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 30.2 to the financial statements;

ii. The Company has made provision, as required under the applicable law or accounting standards for material foreseeable losses;

iii. There were no amounts which were required to be transferred, to the Investor Education and Protection Fund by the Company.

iv. (a) The Management has represented that, to the best of it's knowledge and belief, as disclosed in the Note 33(vii)to the financial statements, during the year no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(b) The Management has represented, that, to the best of it's knowledge and belief, as disclosed in the Note 33(viii) to the financial statements, during the year no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(c) Based on the audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.

v. As stated in Note 15 to Financial Statements the final dividend for the financial year 2023-24 is proposed and paid by the Company during the year is in accordance with Section 123 of the Act, as applicable.

vi. *Based on our examination which included test checks, except for the instances mentioned below, the Company, has used accounting softwares such as Tally prime, Efkon and Symphony P2P for maintaining its books of account which has a feature of recording audit trail (edit log) facility. Further, the audit trail facility has been operating throughout the year for all relevant transactions recorded in the respective softwares.*

The feature of recording audit trail (edit log) facility was not enabled in respect of Symphony P2P from April 01, 2024, to June 02, 2024.

Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with and the audit trail has been preserved by the company as per the statutory requirements for record retention.

"ANNEXURE 1" REFERRED TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED

[Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' in the Independent Auditor's Report.]

(i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and the situation of Property, Plant and Equipment.

(i) (B) The Company has maintained proper records showing full particulars of intangible assets.

(b) All Property, Plant and Equipment were physically verified by the management in the year in accordance with a planned programme of verifying them every year which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to this programme all property, plant and equipment were physically verified during the year and no material discrepancies were noticed on such verification.

(c) According to information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of all the immovable properties are held in the name of the Company.

(d) The Company has not revalued its Property, Plant and Equipment or intangible assets during the year ended March 31, 2025.

(e) According to information and explanations given to us, there are no proceedings initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.

(ii) (a) The Company's business does not require maintenance of inventories and, accordingly, the requirement to report on clause 3(ii)(a) of the Order is not applicable to the Company.

(b) The Company has not been sanctioned any working capital limits in excess of five crore rupees in aggregate from banks and financial institutions during any point of time of the year on the basis of security of current assets. Accordingly, the requirement to report on clause 3(ii)(b) of the Order is not applicable to the Company.

(iii) (a) During the year the Company has not provided loans, advances in the nature of loans, stood guarantee or provided security to the companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(a) of the Order is not applicable to the Company.

(b) During the year the Company has not made investments, provided guarantees, provided security and granted loans and advances in the nature of loans to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(b) of the Order is not applicable to the Company.

(c) ***In respect of a loan granted to the group company the schedule of repayment of principal and payment of interest has not been stipulated in the agreement. Hence, we are unable to make a specific comment on the regularity of repayment of principal and payment of interest in respect of such loan.***

(d) There are no amounts of loans and advances in the nature of loans granted to companies, firms, limited liability partnerships or any other parties which are overdue for more than ninety days.

(e) There were no loans or advance in the nature of loan granted to companies which was fallen due during the year, that have been renewed or extended or fresh loans granted to settle the overdues of existing loans given to the same parties.

(f) The Company has not granted any loans or advances in the nature of loans, either repayable on demand or without specifying any terms or period of repayment to [companies, firms, Limited Liability Partnerships or any other parties]. Accordingly, the requirement to report on clause 3(iii)(f) of the Order is not applicable to the Company.

(iv) According to the information and explanations given to us and on the basis of our examination of records, The Company has given loans to a Company in which the Director is interested and which is in compliance with section 185 of the Companies Act. Further, according to the information and explanations given to us There are no loans, investments, guarantees, or security in respect of which provisions of sections 186 of the Companies Act, 2013 are applicable

(v) The Company has neither accepted any deposits from the public nor accepted any amounts which are deemed to be deposits within the meaning of sections 73 to 76 of the Companies Act and the rules made thereunder, to the extent applicable. Accordingly, the requirement to report on clause 3(v) of the Order is not applicable to the Company.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013, and are of the opinion that prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii) (a) According to the information and explanations given to us, the Company have been generally regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident fund, employee's state insurance, duty of customs, income-tax and other statutory dues applicable to it. The provisions relating to sales-tax, duty of excise and value added tax are currently not applicable to Company. According to the information and explanations given to us and based on audit procedures performed by us, no undisputed amounts payable in respect of these statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable.

(b) According to records of the Company, the dues of income-tax, sales-tax, duty of custom, duty of excise, value added tax, cess and other statutory dues on account of dispute, are as follow

Name of the statute	Nature of the dues	Amount (Rs.in lakhs)	Amount paid under protest (Rs.in lakhs)	Period to which the amount relates	Forum where the dispute is pending
Income Tax Act, 1961	Income Tax	16.57	-	FY - 2011-12 AY - 2012- 13	Commissioner of Income Tax Appeals (CIT A)
Income Tax Act, 1961	Income Tax	402.15	86.06	FY - 2012-13 AY - 2013- 14	Commissioner of Income Tax Appeals (CIT A)
Income Tax Act, 1961	Income Tax	1,034.35	-	FY- 2013-14 AY - 2014- 15	Commissioner of Income Tax Appeals (CIT A)

(viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transaction, previously unrecorded in the books of account, in the tax assessments under the Income Tax Act, 1961 as income during the year.

(ix) (a) According to the information and explanations given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.

(b) The Company has not been declared willful defaulter by any bank or financial institution or government or any government authority.

(c) According to the information and explanations given to us, term loans were applied for the purpose for which the loans were obtained.

(d) The Company did not raise any funds on short term basis during the year hence, the requirement to report on clause 3(ix)(d) of the Order is not applicable to the Company.

(e) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on clause 3(ix)(e) of the Order is not applicable to the Company.

(f) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on clause 3(ix)(f) of the Order is not applicable to the Company.

(x) (a) According to the information and explanations are given to us, the Company has not raised any money by way of initial public offer or further public offer and hence, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year and hence, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company.

(xi) (a) According to the information and explanations given to us, no fraud by the Company or on the Company has been noticed or reported during the year.

(b) During the year, no report under sub-section (12) of section 143 of the Companies Act, 2013 has been filed by the secretarial auditor or by us in Form ADT – 4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

(c) As represented to us by the management, there are no whistleblower complaints received by the company during the year.

(xii) The Company is not a Nidhi Company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clause 3(xii)(a), (b) and (c) of the Order is not applicable to the Company.

(xiii) According to the information and explanations given to us, transactions with the related parties are in compliance with section 177 and section 188 of the Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv) (a) According to the information and explanations given to us. The Company has an internal audit system commensurate with the size and nature of its business.

(b) According to the information and explanations given to us, the internal audit reports of the Company issued till the date of the audit report, for the period under audit have been considered by us.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence requirement to report on clause 3(xv) of the Order is not applicable to the Company.

(xvi) (a) The provisions of section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934) are not applicable to the Company. Accordingly, the requirement to report on clause 3(xvi)(a) of the Order is not applicable to the Company.

(b) The Company has not conducted any Non-Banking Financial activities or Housing Finance activities without obtaining a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.

(c) The Company is not a Core Investment Company as defined in the regulations made by Reserve Bank of India. Accordingly, the requirement to report on clause 3(xvi)(c) of the Order is not applicable to the Company.

(d) There is no Core Investment Company as a part of the Group, hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.

(xvii) According to information and explanation provided to us the Company has not incurred any cash losses in the current and immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year and accordingly, requirement to report on Clause 3(xviii) of the Order is not applicable to the Company.

(xix) On the basis of the financial ratios disclosed in note 32 to the financial statements, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

(xx) (a) In respect of other than ongoing projects, there are no unspent amounts that are required to be transferred to a fund specified in Schedule VII of the Companies Act (the Act), in compliance with second proviso to sub section 5 of section 135 of the Act. This matter has been disclosed in note 30.11 to the financial statements.

(b) All amounts that are unspent under section (5) of section 135 of Companies Act, pursuant to any ongoing project, has been transferred to special account in compliance of with provisions of sub section (6) of section 135 of the said Act. This matter has been disclosed in note 30.11 to the financial statements.

(xxi) The Company does not prepare consolidated financial statements, hence the requirement to report on clause 3(xxi) of the Order is not applicable to the Company.

"ANNEXURE 2" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

To the Members of Athaang Devanahalli Tollway Private Limited

We have audited the internal financial controls over the financial reporting of Athaang Devanahalli Tollway Private Limited ("the Company") as of March 31, 2025 in conjunction with our audit of the Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation, and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by the Institute of Chartered Accountants of India and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED
CIN No. U45203TG2010PTC067113
NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

1. Background and Corporate Information

The Company had been granted the Concession by National Highway Authority of India (Under the Ministry of Road Transport & Highways of Government of India) for "Design, Engineering, Finance, Construction, Operation and Maintenance of operation and maintenance of 6 lane – 22.12 km stretch from km 534.720 (near Hebbal) to km 556.840 (near Bengaluru International Airport) of Hyderabad-Bengaluru section on NH-7 in the state of Karnataka, on Design, Build, Finance, Operate and Transfer ("DBFOT") basis. The construction of Project Road was completed and company got right to commence Commercial operation on May 01, 2014. During FY 2021, 100% ownership of the company was acquired by National Investment & Infrastructure Fund on 29th Sep 2020. Subsequently, name of company was changed from Essel Devanahalli Tollway Private Limited to Athaang Devanahalli Tollway Private Limited. With effect from 3rd October 2022, the Registered office of company has been shifted to NH44@KM 349.950 Opposite Sai Baba Temple, Indalwai Village Nizamabad, Telangana- 503164, India.

The Ind AS financial statements were authorised and approved for issue by Board of Directors on 30th April 2025.

2. Basis of preparation of Financial Statements

The Ind AS financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) as notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) and presentation requirements of Division II of Schedule III to the Companies Act, 2013. The financial statements have been prepared under the historical cost convention, as modified by the application of fair value measurements required or allowed by relevant Accounting Standards. Accounting policies have been consistently applied to all periods presented, unless otherwise stated.

The financial statements are presented in Indian Rupees (INR) and all values are converted to the nearest lakhs, except when otherwise indicated.

a. Statement of compliance

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 and the other relevant provisions of the Act.

b. Use of judgements and estimates

The preparation of the Ind AS financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of Income, expenses, assets and liabilities and the disclosure of contingent liabilities. However, Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and underlying assumptions are reviewed at each reporting date. Any revision to accounting estimates and assumptions are recognized prospectively i.e. recognized in the period in which the estimate is revised, and future periods affected.

(i) Property Plant and Equipment/ Intangible Assets

Estimates are involved in determining the cost attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the management. Property, Plant and Equipment/Intangible Assets are depreciated/ amortised over their estimated useful life, after taking into account estimated residual value. Management reviews the estimated useful life and residual values of the assets annually in order to determine the amount of depreciation/ amortisation to be recorded during any reporting period. The useful life and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological and future risks. The depreciation/ amortisation for future periods is revised if there are significant changes from previous estimates.

(ii) Provisions

The timing of recognition and quantification of the liability (including litigations) requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

3. New and Amended Standards:

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. For the year ended March 31, 2025, MCA has notified Ind AS – 117 Insurance Contracts and amendments to Ind AS 116 – Leases, relating to sale and leaseback transactions, applicable to the Company w.e.f. April 1, 2024. The Company has reviewed the new pronouncements and based on its evaluation has determined that it does not have any significant impact in its financial statements.

4. Material Accounting Policies

a. Current /non-current classification

All assets and liabilities are presented in the balance sheet based on current or non-current classification as per the company's normal operating cycle criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization into cash and cash equivalent, the Company has ascertained its operating cycle as twelve months for the purpose of current/non-current classification of assets and liabilities. An asset is treated as current when it is:

a) Expected to be realized or intended to be sold or consumed in normal operating cycle
b) Held primarily for the purpose of trading
c) Expected to be realized within twelve months after the reporting period
d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:
a) It is expected to be settled in normal operating cycle
b) It is held primarily for the purpose of trading
c) Due to be settled within twelve months after the reporting period
d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

b. Functional and presentation currency

Items included in the financial statements of the company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The functional statements are presented in Indian Rupees, which is the company's functional and presentation currency.

c. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

d. Property, Plant and Equipment(PPE)

Property, Plant and Equipment is recognised when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can measured reliably. PPE is stated at original cost net of tax/duty credits availed, if any, less accumulated depreciation For qualifying assets, borrowing costs capitalised in accordance with the IND AS 23.

Administrative and other general overhead expenses that are specifically attributable to construction or acquisition of PPE or bringing the PPE to working condition are allocated and capitalised as a part of the cost of the PPE.

Property, Plant and Equipment not ready for the intended use on the date of the Balance Sheet are disclosed as "Capital work-in-progress".

Depreciation on assets have been provided on WDV basis as per useful lives specified in the Schedule II of the Companies Act, 2013. Depreciation on additions / deductions is calculated pro-rata from / to the month of additions / deductions.

Assets individually costing less than Rs.5,000/- are fully depreciated in the year of purchase.

The estimated useful lives are as follows :

Particulars	Useful life as prescribed by Schedule II of the Companies Act, 2013	Useful life estimated by Company
Toll Equipment	5 years	5 years
Computers	3 years	3 years
Office Equipment	5 years	5 years
Furniture & Fixtures	10 years	10 years
Motor Cycle	10 years	10 years

e. Intangible Assets

Right of Carriageway - Toll Projects

Intangible assets are recognised net of government grants when it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortisation and cumulative impairment.

Toll collection rights obtained in consideration for rendering construction services, represent the right to collect toll revenue during the concession period in respect of Build-Operate-Transfer ("BOT") project undertaken by the Company. The intangible asset model is used to the extent that the Company receives a right to charge users of the public service.

The intangible assets is measured at the fair value of consideration transferred to acquire asset, which is the fair value of consideration received or receivable for the construction services delivered

Amortization of Right of Carriageway - Toll Projects

The assets would be amortized under straight line method over the life of the asset till the end of the concession period.

Amortization of Computer Software

The assets would be amortized under straight line method over useful life of 5 yrs.

f. Impairment of Non-Financial Assets

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Nonfinancial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

g. Financial Instruments

The Company classifies its financial assets into the following measurement categories:
i. Financial assets to be measured at amortised cost
ii. Financial assets to be measured at fair value through other comprehensive income
iii. Financial assets to be measured at fair value through profit or loss account

The classification depends on the contractual terms of the financial assets' cash flows and the Company's business model for managing financial assets

Fair value measurements are categorised as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirely:

• Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that entity can access at measurement date
• Level 2 inputs are inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, and
• Level 3 inputs are unobservable inputs for the asset or liability.

i) Financial Assets

All recognised financial assets are measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

Investments in debt instruments that meet the following conditions are subsequently measured at amortised cost (unless the same are designated as fair value through profit or loss (FVTPL):
• The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
• The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
A financial asset is primarily derecognised when:
i. the rights to receive cash flows from the asset have expired, or
ii. the company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement: and where
a) the company has transferred substantially all the risks and rewards of the asset, or
b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Impairment of financial assets: The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments, trade receivables and other contractual rights to receive cash or other financial asset and financial guarantees not designated as at FVTPL. For the purpose of measuring expected credit loss allowance for businesses other than financial services for trade receivables, the Company has used a provision matrix which takes into account historical credit loss experience and adjusted for forward looking information as permitted under Ind AS 109.

ii) Financial Liabilities

Financial liabilities are classified at initial recognition, as financial liabilities as fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Loans and borrowings are subsequently measured at amortised costs using Effective Interest Rate method.
Financial liabilities at fair value through profit or loss (FVTPL) are subsequently measured at fair value.
Financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires

h. Revenue Recognition

i) Revenue is measured at the fair value of the consideration received or receivable, Amounts disclosed as revenue are exclusive of duties and taxes.

ii) The Company recognizes revenue when the amount of revenue can be reliably measured, it is probable that the future economic benefits would flow to the entity and specific criteria have been met for each of the activities described below. The company bases its estimates on historical results, taking into consideration the type of customer, type of transaction and specific of the arrangement.

iii) Toll collections from the users of the infrastructure facility constructed by the Company under the Service Concession Arrangement is accounted for based on actual collection, net of revenue share payable under the Concession agreement wherever applicable.

iv) Interest Income is recognized on time proportion basis taking into account the amount outstanding and applicable interest rate.

v) Dividend Income is recognized when the right to receive is established.

vi) Profit/loss on sale of investment is recognised at the time of actual sale/redemption and for mutual funds at fair value through profit or loss.

vii) Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

viii) Other items of income are accounted as and when the right to receive arises.

i. Government Grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised on a systematic basis over the expected useful life of the related asset.

j. Foreign currencies transactions and translation

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

k. Employee Benefits

Employee benefits include provident fund, employee state insurance scheme, gratuity & compensated absences.

(i). Short term employee benefits

All employee benefits falling due wholly within twelve months of rendering the service are classified as short term employee benefits. The benefits like salaries, wages, short term compensated absences etc and the expected cost of bonus, ex-gratia are recognised in the period in which the employee renders the related service.

(ii).Post-employment benefits

(a) Defined contribution plans:

Defined Contribution Plans: The Company's obligation to employee's provident fund is a defined contribution plan. The contribution paid/payable is recognized in the period in which the employee renders the related service.

(b) Defined benefit plans:

The Company's obligation towards gratuity is a defined benefit plan.

The present value of the obligation under such Defined Benefit Plans is determined based on actuarial valuation using the Projected Unit Credit Method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans, is based on the market yields on Government securities as at the Balance sheet date, having maturity periods approximating to the terms of related obligations.

The interest element in the actuarial valuation of defined benefit plans, which comprises the implicit interest cost and the impact of changes in discount rate, is classified under finance cost. The balance charge is recognised as employee benefit expenses in the Statement of Profit and Loss.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognise the obligation on a net basis.

Gains or losses on the curtailment or settlement of any defined benefit plan are recognised when the curtailment or settlement occurs. Past service cost is recognised as expense at the earlier of the plan amendment or curtailment and when the Company recognises related restructuring costs or termination benefits.

l. Borrowing Cost

Borrowing costs include interest calculated using the effective interest rate method, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan. Borrowing costs, allocated to and utilized for acquisition, construction or production of qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset up to the date of capitalization of such asset are added to the cost of the assets. Capitalization of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.

m. Leases

Operating lease payments are recognized as an operating expense in the income statement on a straight line basis over the lease term.

n. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss attributable to equity holder of the company (after deducting preference dividends and attributable taxes) by the weighted average number of equities shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit/(loss) for the period attributable to equity shareholders of the parent company and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

o. Tax Expenses

The tax expenses for the period comprises of current tax and deferred income tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the Other Comprehensive Income. In which case, the tax is also recognised in Other Comprehensive Income.

i. Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the Income Tax authorities, based on tax rates and laws that are enacted at the Balance sheet date.

ii. Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the company will pay normal income tax. Accordingly, the MAT is recognised as an asset in the balance sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

iii. Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilised. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

p. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement

q. Contingent Liabilities and Contingent Asset

Disclosure of contingent liability is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources embodying economic benefits will be required to settle or a reliable estimate of amount cannot be made. A Contingent asset is not recognized in financial statements, however, the same are disclosed where an inflow of economic benefit is probable

r. Commitments

Commitments are future liabilities for contractual expenditure. Commitments are classified and disclosed as follows:
(i) Estimated amount of contracts remaining to be executed on capital account and not provided for
(ii) Uncalled liability on shares and other investments partly paid
(iii) Funding related commitment to subsidiary, associate and joint venture companies and
(iv) Other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.

Other commitments related to sales/procurements made in the normal course of business are not disclosed to avoid excessive details.

March-25

Settlement terms with National Highway Authority of India (NHAI)

On 24th March 2025, the Company entered into a Settlement Agreement with the National Highways Authority of India (NHAI) pursuant to the provisions of Section 73 of the Arbitration and Conciliation Act, 1996. This settlement relates to the Concession Agreement dated 30th April 2010, for the development and operation of the Hyderabad–Bengaluru Section of NH-7.

Accounting Impact

•The total settlement liability of ₹57.23 crore has been recognised in profit and loss as of 31st March 2025.
•The payment was contractually due within 30 days from the date of agreement and was fully discharged on 27th March 2025.
•The 267-day extension of the Concession and shall be accounted for prospectively in future periods.

A. Background

During the course of the business, the Company had raised various claims against NHAI pertaining to:
• Extension of the Concession Period due to Force Majeure conditions caused by the COVID-19 pandemic;
•Compensation for revenue loss and cost impacts arising during the pandemic;
•Revenue leakage due to toll inefficiencies.

In response, NHAI submitted counterclaims primarily relating to:
•Damages for non-compliance with maintenance obligations.
•Recovery of amounts due to project de-scoping;
•Penalties and interest on delayed remittances and statutory obligations.

Parties have appeared before the Conciliation Committee of Independent Experts (CCIE) and after four conciliation meetings, have amicably resolved all the claims and counterclaims. Further, the Parties and have entered into a Settlement Agreement on 24th March 2025 and have subsequently fulfilled their respective obligations.

B. Key Terms of the Settlement

The following terms were mutually agreed upon:
•Extension of Concession Period by 267 days (171 days pertaining to FY 2020 and 96 days pertaining to FY 2021).
•Final settlement payment of ₹31.52 crore by the Company to NHAI.
•Full and final waiver and discharge of all past, present, and future claims by both parties under the Concession Agreement.

C. Summary of Claims and Settlement

Sr. No.	Description	Amount
A. Concessionaire's Claims		
1	Extension of Concession Period (COVID-19 Force Majeure)	267 days
2	Cost Compensation for COVID-19 Impact	Nil
3	Revenue Leakage	Nil
	Total – Concessionaire	**267 days extension**
B. NHAI's Counterclaims		
1	Damages for Delay in Maintenance (incl. interest up to 28.02.2025)	₹24.70 crore
2	Recovery for De-scoping of Punch List Items	₹5.29 crore*
3	Interest on Delayed Remittance (FASTag penalties)	₹1.53 crore
4	Damages for Maintenance (December 2023)	Nil
	Total – NHAI	**₹31.52 crore**

** Note: ₹25.71 crore had already been recovered by NHAI in compliance with the Delhi High Court's order in OMP (Comm.) No. 370/2024. The net recovery agreed in the settlement is ₹5.29 crore. (Total ₹ 57.23 Crore)*

D. Legal Closure

•The Settlement Agreement has been duly authenticated by the CCIE.

•Delhi High Court while disposing a writ petition made by the Company challenging NHAI's notices relating to the recovery of descoped punch list items has passed an order on 2nd April 2025 binding the Parties to the terms of the of Settlement Agreement of 24th March 2025.

•Arbitral Tribunal of Justice (Rtd) Badar Ahmed appointed by the Delhi High Court to settle the claims and counter claims of NHAI and the Company. relating to damages for delay in Maintenance, Covid relief, revenue leakage etc. during the hearing of 4th April 2025 has taken cognizance of the Settlement Agreement of 24th March 2025 between the Parties. In response to a Joint request seeking disposal of the matter filed by the Parties, the Arbitral Tribunal is expected to pass an order soon.

March-24

*During the current reporting period the company has not provided an amount of Rs. 4,441 lakhs (PY 4.441 lakhs) recommended by the Independent Engineer towards liquidated damages imposed with respect to Operations & maintenance (O&M) requirements & its rectification of deficiencies within the stipulated time. However, the Company made representation with the Independent Engineer vide letter dated May, 8th 2023 for reviewing its decision to levy liquidated damages and withdraw the claim for damages. Further to that NHAI letter dated June 16, 2023, reference No. NHAI /PIU BNG/KNT- 2/Escrow/2023-24/661, the NHAI has asked the Axis Bank to remit damages amounting to Rs 4,441 lakhs. The company moved to the Delhi High Court ("the Hon'ble High Court") challenging the NHAI letter dated June 16. 2023. The Hon'ble High Court disposed of the petition of the Company by appointing an Arbitrator for adjudication of disputes between the parties in its order dated July 05,2023. As of March 31, 2024 the ongoing arbitration proceedings have not resulted in any orders or interim orders against the company. As per the legal opinion and on the grounds of merits, the likelihood of damages (penalty) may not be payable entirely or could be substantially low so the same has been disclosed as Contingent Liabilities.

** During the current reporting period company has not provided amount of Rs 8311.62 Lakhs on account of descoping of punch list as recommended by Indendent Engineer.As per Settlement Agreement entered with NHAI (Authority), Company is committed to undertake certain capex works (Punch list A & B works) as and when the land is made available by the Authority. In case, NHAI confirms non availability of land, Company is obligated to pass on estimated capex on such items. In its letter dated 10th October 2023 IE recommended to NHAI to issue a negative COS order for a sum of Rs 8311.62 lakhs (punch list A and B amount 2694.45 lakhs ,interest component Rs 5365.50 lakhs and maintainance 251.66 lakhs) towards the above items of work. However, subsequently NHAI has made available land to take-up construction of service road from km 551+ 950 to km 552+ 970 estimated capex for the same is Rs 148.70 lakhs In absence of firm and final communication on land availability for the balance works and mutually agreed quantity and rates for the work to be executed, there is no surety of crystallisation of associated payments to NHAI. However, as a measure of prudence, the above is treated as contingent liability.

30.3 Disclosure pursuant to Ind AS 19 "Employee benefits":

Defined Benefit Plan: Gratuity:

Employee benefit plans

Defined contribution plans

The Company's superannuation scheme and State governed provident fund linked with employee pension scheme are defined contribution plans. The contribution paid/ payable under the scheme is recognised during the period in which the employee renders the related service.

Defined Benefit plans

The Company has an unfunded defined benefit gratuity plan The gratuity plan is governed by the Payment of Gratuity Act, 1972. Under the act, employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn salary) for each completed year of service as per the provision of the Payment of Gratuity Act, 1972 with total ceiling on gratuity of Rs.2,000,000.

The following table sets out the funded status of the defined benefit schemes and the amount recognised in the financial statements:

(Amount in Lakhs)

1	**Table showing changes in present value of Obligation as on 31/03/2025**	**For the Year ended 31 March 2025**	**For the Year ended 31 March 2024**
	Present value of obligations at beginning of the year	11.50	7.92
	Interest Cost	0.82	0.60
	Current Service Cost	5.19	4.28
	Benefits paid		
	Past Service Cost		
	Actuarial (gain) / loss on obligation	1.84	(1.29)
	Present value of the obligation as at end of the year	19.35	11.50
2	**Table showing changes in the fair value of plan assets as on 31/03/2025**		
	Fair value of plan assets at beginning of year	-	-
	Expected return on plan assets	-	-

	Actuarial (gain) / loss on Plan Assets	-	-
	Fair value of plan assets at the end of year	-	-
3	**Table showing fair value of Plan assets**		
	Fair value of plan assets at beginning of year	-	-
	Actual return on plan assets	-	-
	Contributions	-	-
	Benefits paid	-	-
	Fair value of plan assets at the end of year	-	-
	Funded status	-	-
	Excess of Actual over estimated return on plan assets	-	-
	(Actual rate of return = Estimated rate of return as ARD falls on 31st March)		
4	**Actuarial Gain/Loss recognised as on 31/03/2025**	**For the Year ended 31 March 2025**	**For the Year ended 31 March 2024**
	Actuarial (gain) / loss for the current period on obligations	-	-
	Actuarial (gain) / loss for the current period - plan assets	-	-
	Total Actuarial (gain) / loss for the current period	1.84	(1.29)
	Total Actuarial (gain) / loss recognized in the year	1.84	(1.29)

(Amount in Lakhs)

5	**The amounts to be recognized in the balance sheet and statements of profit and loss**		
	Present value of obligations as at the end of year	19.35	11.50
	Fair value of plan assets as at the end of the year	-	-
	Unfunded Status	19.35	11.50
	Net asset / (liability) recognized in balance sheet	19.35	11.50
6	**Expenses Recognised in statement of Profit and loss**		
	Current service cost	5.19	4.28
	Past Service Cost	-	-
	Interest Cost	0.82	0.60
	Expected return on plan assets		
	Opening Present Value Obligation	11.50	7.92
	Net Actuarial (gain) / loss recognized in the year	1.84	(1.29)
	Expenses Recognised in statement of Profit and loss	6.01	4.87
	Actuarial assumptions		
	Discount rate	6.80%	7.15%
	Expected return on plan assets		
	Salary escalation	10% p.a.	10% p.a.
	Mortality Rate	100% of IALM 2012-14	100% of IALM 2012-14
	Normal retirement age	60 yrs	60 yrs
	Withdrawal Rate	5%	5%

A quantitative analysis for significant assumption is as shown below:

Indian gratuity plan:

1	Particulars	31-Mar-25	31-Mar-24
	Assumptions -Discount rate		
	Sensitivity Level (a hypothetical increase / (decrease) by)	1.00%	1.00%
	Impact on defined benefit obligation -increase of sensitivity level	-11.40%	-11.80%
	Impact on defined benefit obligation -decrease of sensitivity level	13.60%	14.00%
	Assumptions -Future salary rates		
	Sensitivity Level (a hypothetical increase / (decrease) by)	1.00%	1.00%
	Impact on defined benefit obligation-increase of sensitivity level	13.10%	13.50%
	Impact on defined benefit obligation-decrease of sensitivity level	-11.20%	-11.60%
	Assumptions -Attrition rate		
	Sensitivity Level (a hypothetical increase / (decrease) by)	0.50%	0.50%
	Impact on defined benefit obligation-increase of sensitivity level	-7.00%	-8.40%
	Impact on defined benefit obligation-decrease of sensitivity level	9.50%	10.80%

Expected payment for future years (Amount in Lakhs)

2	Particulars	31-Mar-25	31-Mar-24
	Within the next 12 months (next annual reporting period)	0.53	0.03
	Between 2 and 5 years	3.43	2.05
	Between 6 and 10 years	10.86	7.70
	Beyond 10 years	38.02	24.39
	Total expected payments	**52.84**	**34.16**

30.4 Disclosure pursuant to Ind AS 36 "Impairment of Assets"

Based on review of the future discounted cash flows of the project facility, the recoverable amount is higher than the carrying amount and hence no provision for impairment is considered.

30.5 Major Components of Deferred Tax Liabilities and Deferred Tax Assets

The company is eligible for deduction under Section 80IA of the Income Tax Act, 1961 and the concession period of the Company's project falls within the tax holiday period as defined in Section 80IA. Since deferred tax on temporary difference between Accounting Income and Taxable Income that arise during the year is reversing during such tax holiday period and hence no Deferred Tax Assets/Liabilities is being created in the accounts

30.6 Disclosure of segment information pursuant to Ind AS 108 "Operating Segments"

The Company is engaged in the business of construction, operation and maintenance of road projects on a Build Operate Transfer basis in a single business segment. Hence reporting of operating segments does not arise. The Company does not have operations outside India. Hence, disclosure of geographical segment information does not arise.

Total	52,835.94	-	-	52,835.94	-

30.15 Financials risk management objectives & policies

The risk management policies of the Company are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

The Management has overall responsibility for the establishment and oversight of the Company's risk management framework

In performing its operating, investing and financing activities, the Company is exposed to the Credit risk, Liquidity risk and Market risk

30.16 'Credit risk on financial assets

Credit risk is the risk of financial loss to the company if a customer or counter-party fails to meet its contractual obligations.

The Company is exposed to credit risk from its Financing activities, primarily Inter Company receivables from Related Parties, and fixed deposits with banks. The company generally does not have trade receivables as collection of toll income coincide as and when the traffic passes through toll - plazas except for Trade Receivables primarily from government authority i.e. NHAI.

'Other financial assets

The Company maintains exposure to cash equivalents. The company has set counter-parties limits based on multiple factors including financial positions, credit ratings, etc.

The company's maximum exposure to credit risk as at 31 March 2025 & 31 March 2024 is the carrying value of each class of financial assets.

30.17 Market Risk

The Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: Currency risk, Interest risk and price risk.

i) Foreign Currency Risk

Foreign currency risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rate

The company is not exposed to foreign currency risk as it has no borrowing in foreign currency

ii) Interest rate risk

Interest rate risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates

The interest risk arises to the company mainly from long term borrowings with variable rates. The company measures risk through sensitivity analysis

The company's exposure to interest rate risk due to variable interest rate borrowings is a below:

Particulars	As at 31st March 2025	As at 31st March 2024
	Amount in Lakhs	Amount in Lakhs
Senior Debt from Banks - Variable rate borrowings	35,384.05	42,053.05

Sensitivity analysis based on average senior Debt

Particulars	Impact on profit /loss after tax	
	For the Year ended 31 March 2025	For the Year ended 31 March 2024
	Amount in Lakhs	Amount in Lakhs
Increase or decrease in interest rate by 25 base points	88.46	105.13

Note: Profit will increase in case of decrease in interest rate and vice versa

iii) Price risk

Price risk is the risk that the fair value or future cash flows of a financials instrument will fluctuate because or changes in market prices (other than those arising from interest rate risk or currency risk) The company is not exposed to Price risk in current year is 715.07 lakhs (PY INR 13 08 Lakh)

iv) Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Company closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including debt from banks at an optimised cost.

The Company maximum exposure to credit risk for the components of the balance sheet at 31st March, 2025 & 31st March 2024 is the carrying amounts. The liquidity risk is managed on the basis of expected maturity dates of the financial liabilities. The average credit period taken to settle trade payables is about 30 to 90 days. The other payables are with short-term durations The carrying amounts are assumed to be a reasonable approximation of fair value. The following table analysis financial liabilities by remaining contractual maturities:

Particulars	On demand	Less than 3 months	3 to12 months	2 to 5 years	>5 years	Total
	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs
Year ended 31 March 2025						
Borrowings		2,473.63	25,908.19	15,969.22	-	44,351.04
Trade and other payables			94.72			94.72
Other financial liabilities			28.22	142.32		170 54
Total	-	**2,473.63**	**26,031.13**	**16,111.53**	-	**44,616.29**

Particulars	On demand	Less than 3 months	3 to12 months	2 to 5 years	>5 years	Total
	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs
Year ended 31st March 2024						
Borrowings	-	2,066.45	33,331.93	17,177.26	-	52,575.65
Trade and other payables	-		396.25	-	-	396.25
Other financial liabilities	-	-	11.97	35.73	-	47.71
Total	-	**2,066.45**	**33,740.15**	**17,212.99**	-	**53,019.61**

31. Capital Management

For the purpose of the Company's capital management, capital includes issued equity capital, share premium and all other equity reserves attributable to the equity holders of the Company The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company's policy is to keep optimum gearing ratio. The Company includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and cash equivalents, excluding discontinued Operations.

Particulars	As at 31 March 2025	As at 31 March 2024
Borrowings	44,351.04	52,575.65
Trade payables	94.72	212.59
Other financial liabilities	170.54	47.71
Less: Cash & Cash Equivalents	317.64	550.61
Net debt	**44,298.65**	**52,285.32**
Total equity	33,863.48	24,100.39
Total member's capital	**33,863.48**	**24,100.39**
Capital and net debt	**78,162.13**	**76,385.71**
Gearing ratio (%)	**56.68%**	**68.45%**

32. Ratios

Sr. No.	Ratio	Numerator	Denominator	As at March 31, 2025	As at March 31, 2024	% change	Reason for variance/ non applicability
a	Current ratio (in times)	Current Assets	Current Liabilities	2.08	1.83	13.99%	N/A
b	Debt-Equity Ratio (in times)	Total Debt	Shareholder's Equity	1.31	2.18	-39.96%	Decrease is due to repayment of Term loan and Debt
c	Debt Service Coverage Ratio (in times)	Earnings available for debt service	Debt Service	2.06	2.42	-15.00%	N/A
d	Return on Equity Ratio (in %)	Net Profits after taxes	Average Shareholder's Equity	54.40%	112.79%	-51.77%	Decrease in Net profit for current year as compared to profit in previous year

INDEPENDENT AUDITOR'S REPORT

To the Members of **ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED**

Report on the Audit of Ind AS Financial Statements

Opinion

We have audited the Ind AS Financial Statements of Athaang Devanahalli Tollway Private Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2024, and the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and notes to the Financial Statements, including a summary of material accounting policies and other explanatory information for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS Financial Statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, and its profit including Other Comprehensive Income, its Cash Flows and the Changes in Equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the Ind AS Financial Statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS Financial Statements.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report ("other information"), but does not include the Ind AS Financial Statements and our auditor's report thereon.

Our opinion on the Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS Financial Statements that give a true and fair view of the financial position, financial performance including Other Comprehensive Income, Cash Flows and Changes in Equity of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS Financial Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standard on Auditing (SA's) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements *(Continued)*

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure, and content of the Ind AS Financial Statements, including the disclosures and whether the Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

   (c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, and the Statement of Cash Flow and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

   (d) In our opinion, the aforesaid Ind AS Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules,2015, as amended;

Report on Other Legal and Regulatory Requirements (*Continued*)

(e) On the basis of the written representations received from the directors as on March 31, 2024, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2024 from being appointed as a director in terms of Section 164(2) of the Act;

(f) With respect to the adequacy of the internal financial controls over financial reporting of the Company with reference to these Ind AS Financial Statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2";

(g) In Our opinion and to the best of our information and according to explanations given to us, the provisions of Section 197 of the Act are not applicable to the company for the year ended March 31, 2024.

(h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 30.2 to the financial statements.

ii. The Company has made provision, as required under the applicable law or accounting standards for material foreseeable losses

iii. There were no amounts which were required to be transferred, to the Investor Education and Protection Fund by the Company.

iv. (a) The Management has represented that, to the best of it's knowledge and belief, as disclosed in the note 33 (vii) to the financial statements, during the year no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(b) The Management has represented, that, to the best of it's knowledge and belief, as disclosed in the note 33 (viii) to the financial statements, during the year no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(c) Based on the audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) contain any material misstatement.

Report on Other Legal and Regulatory Requirements (*Continued*)

v. The Company has not declared or paid any equity dividend during the year

vi. Based on our examination which included test checks, the company has used an accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with.

As proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable from April 1, 2023, reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 on preservation of audit trail as per the statutory requirements for record retention is not applicable for the financial year ended March 31, 2024.

Annexure 1 referred to in paragraph 1 under the heading 'Report on other legal and regulatory requirements' of our report of even date.

Re: Athaang Devanahalli Tollways Private Limited ("the Company")

(i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and the situation of Property, Plant and Equipment.

(i) (B) The Company has maintained proper records showing full particulars of intangible assets.

(b) All Property, Plant and Equipment were physically verified by the management in the year in accordance with a planned programme of verifying them every year which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to this programme all property, plant and equipment were physically verified during the year and no material discrepancies were noticed on such verification.

(c) According to information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of all the immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company.

(d) The Company has not revalued its Property, Plant and Equipment (or Intangible assets) during the year ended March 31, 2024.

(e) According to information and explanations given to us, there are no proceedings initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.

(ii) (a) The Company's business does not require maintenance of inventories and, accordingly, the requirement to report on clause 3(ii)(a) of the Order is not applicable to the Company.

(b) The Company has not been sanctioned any working capital limits in excess of five crore rupees in aggregate from banks and financial institutions during any point of time of the year on the basis of security of current assets. Accordingly, the requirement to report on Clause 3(ii)(b) of the Order is not applicable to the Company.

(iii) (a) During the year the Company has provided loans to the company as follows:

Particulars	Loans (INR)
Aggregated amount granted during the year:	
Other:	
(a) Athaang Infrastructure Private Limited	1,87,00,00,000
Balance Outstanding as at balance sheet date:	
Other:	
(a) Athaang Infrastructure Private Limited	1,87,00,00,000

(b) During the year the investments made, guarantees provided, security given and the terms and conditions of the grant of all loans and advances in the nature of loans and guarantees to companies, firms, Limited Liability Partnerships or any other parties are not prejudicial to the Company's interest.

(c) In respect of a loan granted to company the schedule of repayment of principal and payment of interest has not been stipulated in the agreement. Hence, we are unable to make a specific comment on the regularity of repayment of principal and payment of interest in respect of such loan.

(d) There are no amounts of loans and advances in the nature of loans granted to companies, firms, limited liability partnerships or any other parties which are overdue for more than ninety days.

(e) There were no loans or advance in the nature of loan granted to companies which was fallen due during the year, that have been renewed or extended or fresh loans granted to settle the overdues of existing loans given to the same parties.

(f) As disclosed in Note 33(iii) to the financial statements during the year, the Company has granted loans, either repayable on demand. Of these following are the details of the aggregate amount of loans or advances in the nature of loans granted to related parties as defined in clause (76) of section 2 of the Companies Act, 2013

Particulars	Related Party
Aggregate amount of loans in nature of loans (Repayable on demand)	1,87,00,00,000
Percentage of loans in nature of loans to the total loans	100%

(iv) According to the information and explanations given to us and on the basis of our examination of records, The Company has given loans to a Company in which the Director is interested and which is in compliance with section 185 of the Companies Act. Further, according to the information and explanations given to us There are no loans, investments, guarantees, or security in respect of which provisions of sections 186 of the Companies Act, 2013 are applicable

(v) The Company has neither accepted any deposits from the public nor accepted any amounts which are deemed to be deposits within the meaning of sections 73 to 76 of the Companies Act and the rules made thereunder, to the extent applicable. Accordingly, the requirement to report on clause 3(v) of the Order is not applicable to the Company.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013, and are of the opinion that prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii) (a) According to the information and explanations given to us, the Company have been generally regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident fund, employee's state insurance, duty of customs, income-tax and other statutory dues applicable to it. The provisions relating to sales-tax, duty of excise and value added tax are currently not applicable to Company. According to the information and explanations given to us and based on audit procedures

performed by us, no undisputed amounts payable in respect of these statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable.

(b) According to records of the Company, the dues of income-tax, sales-tax, duty of custom, duty of excise, value added tax, cess and other statutory dues on account of dispute, are as follow

`Name of the statute	Nature of the dues	Amount (Rs.in lakhs)	Amount paid under protest (Rs.in lakhs)	Period to which the amount relates	Forum where the dispute is pending
Income Tax Act, 1961	Income Tax	16.57	-	FY - 2011-12 AY - 2012-13	Commissioner of Income Tax Appeals (CIT A)
Income Tax Act, 1961	Income Tax	402.15	86.06	FY - 2012-13 AY - 2013-14	Commissioner of Income Tax Appeals (CIT A)
Income Tax Act, 1961	Income Tax	1,034.35	-	FY- 2013-14 AY - 2014-15	Commissioner of Income Tax Appeals (CIT A)

(viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transaction, previously unrecorded in the books of account, in the tax assessments under the Income Tax Act, 1961 as income during the year.

(ix) (a) According to the information and explanations given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.

(b) The Company has not been declared willful defaulter by any bank or financial institution or government or any government authority.

(c) According to the information and explanations given to us, term loans were applied for the purpose for which the loans were obtained.

(d) The Company did not raise any funds on short term basis during the year hence, the requirement to report on clause 3(ix)(d) of the Order is not applicable to the Company.

(e) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on clause 3(ix)(e) of the Order is not applicable to the Company.

(f) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on Clause 3(ix)(f) of the Order is not applicable to the Company.

(x) (a) According to the information and explanations are given to us, the Company has not raised any money by way of initial public offer or further public offer and hence, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year and hence, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company.

(xi) (a) According to the information and explanations given to us, no fraud by the Company or on the Company has been noticed or reported during the year.

(b) During the year, no report under sub-section (12) of section 143 of the Companies Act, 2013 has been filed by the secretarial auditor or by us in Form ADT – 4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

(c) As represented to us by the management, there are no whistleblower complaints received by the company during the year.

(xii) The Company is not a Nidhi Company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clause 3(xii)(a), (b) and (c) of the Order is not applicable to the Company.

(xiii) According to the information and explanations given to us, transactions with the related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv) (a) According to the information and explanations given to us. The Company has an internal audit system commensurate with the size and nature of its business.

(b) According to the information and explanations given to us, the internal audit reports of the Company issued till the date of the audit report, for the period under audit have been considered by us.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence requirement to report on clause 3(xv) of the Order is not applicable to the Company.

(xvi) (a) The provisions of section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934) are not applicable to the Company. Accordingly, the requirement to report on clause 3(xvi)(a) of the Order is not applicable to the Company.

(b) The Company has not conducted any Non-Banking Financial activities or Housing Finance activities without obtaining a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.

(c) The Company is not a Core Investment Company as defined in the regulations made by Reserve Bank of India. Accordingly, the requirement to report on clause 3(xvi)(c) of the Order is not applicable to the Company.

(d) There is no Core Investment Company as a part of the Group, hence, the requirement to report on clause 3(xvi)(d) of the Order is not applicable to the Company.

(xvii) According to information and explanation provided to us the Company has not incurred any cash losses in the current and immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year and accordingly, requirement to report on Clause 3(xviii) of the Order is not applicable to the Company.

(xix) On the basis of the financial ratios disclosed in Note 32 to the financial statements, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

(xx) (a) In respect of other than ongoing projects, there are no unspent amounts that are required to be transferred to a fund specified in Schedule VII of the Companies Act (the Act), in compliance disclosed in note with second proviso to sub section 5 of section 135 of the Act. This matter has been 30.11 to the financial statements.

(b) All amounts that are unspent under section (5) of section 135 of Companies Act, pursuant to any ongoing project, has been transferred to special account in compliance of with provisions of sub section (6) of section 135 of the said Act. This matter has been disclosed in note 30.11 to the financial statements.

(xxi) The Company does not prepare consolidated financial statements, hence the requirement to report on clause 3(xxi) of the Order is not applicable to the Company.

"ANNEXURE 2" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE IND AS FINANCIAL STATEMENTS OF ATHAANG DEVANAHALLI TOLLWAYS PRIVATE LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

To
The Member of
Athaang Devanahalli Tollways Private Limited

We have audited the internal financial controls over the financial reporting of Athaang Devanahalli Tollways Private Limited ("the Company") as of March 31, 2024 in conjunction with our audit of the Ind AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation, and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by the Institute of Chartered Accountants of India and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS Financial Statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2024 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED
NOTES TO FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2024

1. Background and Corporate Information

The Company had been granted the Concession by National Highway Authority of India (Under the Ministry of Road Transport & Highways of Government of India) for "Design, Engineering, Finance, Construction, Operation and Maintenance of operation and maintenance of 6 lane – 22.12 km stretch from km 534.720 (near Hebbal) to km 556.840 (near Bengaluru International Airport) of Hyderabad-Bengaluru section on NH-7 in the state of Karnataka, on Design, Build, Finance, Operate and Transfer ("DBFOT") basis. The construction of Project Road was completed and company got right to commence Commercial operation on May 01, 2014. During FY 2021, 100% ownership of the company was acquired by National Investment & Infrastructure Fund on 29th Sep 2020. Subsequently, name of company was changed from Essel Devanahalli Tollway Private Limited to Athaang Devanahalli Tollway Private Limited. With effect from 3rd October 2022, the Registered office of company has been shifted to NH44@KM 349.950 Opposite Sai Baba Temple, Indalwai Village Nizamabad, Telangana- 503164, India.

The Ind AS financial statements were authorised and approved for issue by Board of Directors on 27th June 2024.

2. Basis of preparation of Financial Statements

The Ind AS financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) as notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) and presentation requirements of Division II of Schedule III to the Companies Act, 2013. The financial statements have been prepared under the historical cost convention, as modified by the application of fair value measurements required or allowed by relevant Accounting Standards. Accounting policies have been consistently applied to all periods presented, unless otherwise stated

The financial statements are presented in Indian Rupees (INR) and all values are converted to the nearest lakhs, except when otherwise indicated

a. Statement of compliance

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 and the other relevant provisions of the Act.

b. Use of judgements and estimates

The preparation of the Ind AS financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of Income, expenses, assets and liabilities and the disclosure of contingent liabilities. However, Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and underlying assumptions are reviewed at each reporting date. Any revision to accounting estimates and assumptions are recognized prospectively i.e. recognized in the period in which the estimate is revised, and future periods affected.

(i) Property Plant and Equipment/ Intangible Assets

Estimates are involved in determining the cost attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the management. Property, Plant and Equipment/Intangible Assets are depreciated/ amortised over their estimated useful life, after taking into account estimated residual value. Management reviews the estimated useful life and residual values of the assets annually in order to determine the amount of depreciation/ amortisation to be recorded during any reporting period. The useful life and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological and future risks. The depreciation/ amortisation for future periods is revised if there are significant changes from previous estimates.

(ii) Provisions

The timing of recognition and quantification of the liability (including litigations) requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

3. Standards Issued but not Effective

Ministry of Corporate Affairs (MCA) notifies new standards or amendment to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Rules, 2023, as below;

i. Ind AS 1 - Presentation of Financial Statements - This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and the impact of the amendment is insignificant in the financial statements.

ii. Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors - This amednement has introduced a definition of "accounting estimates" and included amendments to Ind AS 8 to help entities distinguish changes in accounting policies from changes in accounting estimates. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its financial statements.

iii. Ind AS 12 - Income Taxes - This amendment has narrowed the scope of the initial recognition exemption so that it does not apply to transactions that give rise to equal and offseting temporary differences. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its financial statements.

NANGIA & CO. LLP * CHARTERED ACCOUNTANTS *

Athaang Devanahalli Tollway Private Limited

4. Material Accounting Policies

a. Current /non-current classification

All assets and liabilities are presented in the balance sheet based on current or non-current classification as per the company's normal operating cycle criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization into cash and cash equivalent, the Company has ascertained its operating cycle as twelve months for the purpose of current/non-current classification of assets and liabilities. An asset is treated as current when it is:

a) Expected to be realized or intended to be sold or consumed in normal operating cycle
b) Held primarily for the purpose of trading
c) Expected to be realized within twelve months after the reporting period
d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:
a) It is expected to be settled in normal operating cycle
b) It is held primarily for the purpose of trading
c) Due to be settled within twelve months after the reporting period
d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

b. Functional and presentation currency

Items included in the financial statements of the company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The functional statements are presented in Indian Rupees, which is the company's functional and presentation currency.

c. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

d. Property, Plant and Equipment(PPE)

Property, Plant and Equipment is recognised when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can measured reliably PPE is stated at original cost net of tax/duty credits availed, if any, less accumulated depreciation. For qualifying assets, borrowing costs capitalised in accordance with the IND AS 23.

Administrative and other general overhead expenses that are specifically attributable to construction or acquisition of PPE or bringing the PPE to working condition are allocated and capitalised as a part of the cost of the PPE.

Property, Plant and Equipment not ready for the intended use on the date of the Balance Sheet are disclosed as "Capital work-in-progress".

Depreciation on assets have been provided on WDV basis as per useful lives specified in the Schedule II of the Companies Act, 2013. Depreciation on additions / deductions is calculated pro-rata from / to the month of additions / deductions.

Assets individually costing less than Rs.5,000/- are fully depreciated in the year of purchase.

The estimated useful lives are as follows :

Particulars	Useful life as prescribed by Schedule II of the Companies Act, 2013	Useful life estimated by Company
Toll Equipment	5 years	5 years
Computers	3 years	3 years
Office Equipment	5 years	5 years
Furniture & Fixtures	10 years	10 years
Motor Cycle	10 years	10 years

NANGIA & CO. LLP CHARTERED ACCOUNTANTS

Attaang Devanahalli Toll Way Private Limited

e. Intangible Assets

Right of Carriageway - Toll Projects

Intangible assets are recognised net of government grants when it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortisation and cumulative impairment.

Toll collection rights obtained in consideration for rendering construction services, represent the right to collect toll revenue during the concession period in respect of Build-Operate-Transfer ("BOT") project undertaken by the Company. The intangible asset model is used to the extent that the Company receives a right to charge users of the public service.

The intangible assets is measured at the fair value of consideration transferred to acquire asset, which is the fair value of consideration received or receivable for the construction services delivered

Amortization of Right of Carriageway - Toll Projects

The assets would be amortized under straight line method over the life of the asset till the end of the concession period.

Amortization of Computer Software

The assets would be amortized under WDV basis for useful life of 5 yrs.

f. Impairment of Non-Financial Assets

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Nonfinancial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

g. Financial Instruments

The Company classifies its financial assets into the following measurement categories:
i. Financial assets to be measured at amortised cost
ii. Financial assets to be measured at fair value through other comprehensive income
iii. Financial assets to be measured at fair value through profit or loss account

The classification depends on the contractual terms of the financial assets' cash flows and the Company's business model for managing financial assets

Fair value measurements are categorised as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirely:

• Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that entity can access at measurement date
• Level 2 inputs are inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly; and

• Level 3 inputs are unobservable inputs for the asset or liability.

i) Financial Assets

All recognised financial assets are measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

Investments in debt instruments that meet the following conditions are subsequently measured at amortised cost (unless the same are designated as fair value through profit or loss (FVTPL):
• The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows: and
• The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
A financial asset is primarily derecognised when:
i. the rights to receive cash flows from the asset have expired, or
ii. the company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement; and where
a) the company has transferred substantially all the risks and rewards of the asset, or
b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Impairment of financial assets: The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments, trade receivables and other contractual rights to receive cash or other financial asset and financial guarantees not designated as at FVTPL. For the purpose of measuring expected credit loss allowance for businesses other than financial services for trade receivables, the Company has used a provision matrix which takes into account historical credit loss experience and adjusted for forward looking information as permitted under Ind AS 109.

ii) Financial Liabilities

Financial liabilities are classified at initial recognition, as financial liabilities as fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Loans and borrowings are subsequently measured at amortised costs using Effective Interest Rate method.
Financial liabilities at fair value through profit or loss (FVTPL) are subsequently measured at fair value.
Financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

h. Revenue Recognition

i) Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are exclusive of duties and taxes.

ii) The Company recognizes revenue when the amount of revenue can be reliably measured, it is probable that the future economic benefits would flow to the entity and specific criteria have been met for each of the activities described below. The company bases its estimates on historical results, taking into consideration the type of customer, type of transaction and specific of the arrangement.

iii) Toll collections from the users of the infrastructure facility constructed by the Company under the Service Concession Arrangement is accounted for based on actual collection, net of revenue share payable under the Concession agreement wherever applicable.

iv) Interest Income is recognized on time proportion basis taking into account the amount outstanding and applicable interest rate.

v) Dividend Income is recognized when the right to receive is established.

vi) Profit/loss on sale of investments is recognised at the time of actual sale/redemption and for mutual funds at fair value through profit/loss.

vii) Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

viii) Other items of income are accounted as and when the right to receive arises.

i. Government Grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised on a systematic basis over the expected useful life of the related asset.

j. Foreign currencies transactions and translation

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

k. Employee Benefits

Employee benefits include provident fund, employee state insurance scheme, gratuity & compensated absences.

(i). Short term employee benefits

All employee benefits falling due wholly within twelve months of rendering the service are classified as short term employee benefits. The benefits like salaries, wages, short term compensated absences etc and the expected cost of bonus, ex-gratia are recognised in the period in which the employee renders the related service.

(ii).Post-employment benefits

(a) Defined contribution plans:

Defined Contribution Plans: The Company's obligation to employee's provident fund is a defined contribution plan. The contribution paid/payable is recognized in the period in which the employee renders the related service.

(b) Defined benefit plans:

The Company's obligation towards gratuity is a defined benefit plan.

The present value of the obligation under such Defined Benefit Plans is determined based on actuarial valuation using the Projected Unit Credit Method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans, is based on the market yields on Government securities as at the Balance sheet date, having maturity periods approximating to the terms of related obligations.

The interest element in the actuarial valuation of defined benefit plans, which comprises the implicit interest cost and the impact of changes in discount rate, is classified under finance cost. The balance charge is recognised as employee benefit expenses in the Statement of Profit and Loss.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognise the obligation on a net basis.

Gains or losses on the curtailment or settlement of any defined benefit plan are recognised when the curtailment or settlement occurs. Past service cost is recognised as expense at the earlier of the plan amendment or curtailment and when the Company recognises related restructuring costs or termination benefits.

NANGIA & CO. LLP CHARTERED ACCOUNTANTS

Athaang Devanahalli Tollway Private Limited

l. Borrowing Cost

Borrowing costs include interest calculated using the effective interest rate method, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan. Borrowing costs, allocated to and utilized for acquisition, construction or production of qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset up to the date of capitalization of such asset are added to the cost of the assets. Capitalization of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.

m. Leases

Operating lease payments are recognized as an operating expense in the income statement on a straight line basis over the lease term

n. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss attributable to equity holder of the company (after deducting preference dividends and attributable taxes) by the weighted average number of equities shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit/(loss) for the period attributable to equity shareholders of the parent company and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

o. Tax Expenses

The tax expenses for the period comprises of current tax and deferred income tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the Other Comprehensive Income. In which case, the tax is also recognised in Other Comprehensive Income.

i. Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the Income Tax authorities, based on tax rates and laws that are enacted at the Balance sheet date.

ii. Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the company will pay normal income tax. Accordingly, the MAT is recognised as an asset in the balance sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

iii. Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilised. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

p. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement

q. Contingent Liabilities and Contingent Asset

Disclosure of contingent liability is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources embodying economic benefits will be required to settle or a reliable estimate of amount cannot be made. A Contingent asset is not recognized in financial statements, however, the same are disclosed where an inflow of economic benefit is probable

r. Commitments

Commitments are future liabilities for contractual expenditure. Commitments are classified and disclosed as follows:

(i) Estimated amount of contracts remaining to be executed on capital account and not provided for

(ii) Uncalled liability on shares and other investments partly paid

(iii) Funding related commitment to subsidiary, associate and joint venture companies and

(iv) Other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.

Other commitments related to sales/procurements made in the normal course of business are not disclosed to avoid excessive details

30. Notes forming part of the Accounts

30.1 Details of Expenditure in Foreign Currency:

The Company has not incurred any expenditure in foreign currency during the current year and previous year.

30.2 Disclosure pursuant to Ind AS 37

"Provisions, Contingent Liabilities and Contingent Assets":

Provisions:

As per the Concession Agreement with NHAI the Periodic Maintenance is expected to be incurred periodically. On the Grounds of Prudence, based on estimates, the company has decided to Provide for Major Maintenance Expense in the Books of Accounts annually.

During the current year the company has incurred Major Maintenance expenses of Rs. NIL- and net provision for MMR created of Rs. 6,49,51,372/- for year ended 31st March, 2024.

During the previous year the company has incurred Major Maintenance expenses of 19,40,397/- and net provision for MMR created of Rs. 11,52,95,413/- for year ended 31st March, 2023.

Contingent Liabilities:

Where it is not probable that an outflow of economic benefits will be required, or the amount can not be estimated reliably, the obligation is not recognized in the statements of financial position and is disclosed as a contingent liability.

(Amount in Lakhs)

Particulars	As at 31 March 2024	As at 31 March 2023
Claims against the company not acknowledged as debt		
- on Income Tax	1,367.01	1,367.01
- on liquidated damages imposed by NHAI*	4,441.00	4,441.00
- on descope of Punch list items**	8,162.91	-

March-24

*During the current reporting period the company has not provided an amount of Rs. 4,441 lakhs (PY 4,441 lakhs) recommended by the Independent Engineer towards liquidated damages imposed with respect to Operations & maintenance (O&M) requirements & its rectification of deficiencies within the stipulated time. However, the Company made representation with the Independent Engineer vide letter dated May, 8th 2023 for reviewing its decision to levy liquidated damages and withdraw the claim for damages. Further to that NHAI letter dated June 16, 2023, reference No. NHAI /PIU BNG/KNT- 2/Escrow/2023-24/661, the NHAI has asked the Axis Bank to remit damages amounting to Rs 4,441 lakhs. The company moved to the Delhi High Court ("the Hon'ble High Court") challenging the NHAI letter dated June 16, 2023. The Hon'ble High Court disposed of the petition of the Company by appointing an Arbitrator for adjudication of disputes between the parties in its order dated July 05,2023. As of March 31, 2024 the ongoing arbitration proceedings have not resulted in any orders or interim orders against the company. As per the legal opinion and on the grounds of merits, the likelihood of damages (penalty) may not be payable entirely or could be substantially low so the same has been disclosed as Contingent Liabilities.

** During the current reporting period company has not provided amount of Rs 8311.62 Lakhs on account of descoping of punch list as recommended by Indendent Enginneer.As per Settlement Agreement entered with NHAI (Authority), Company is committed to undertake certain capex works (Punch list A & B works) as and when the land is made available by the Authority. In case, NHAI confirms non availability of land, Company is obligated to pass on estimated capex on such items. In its letter dated 10th October 2023 IE recommended to NHAI to issue a negative COS order for a sum of Rs 8311.62 lakhs (punch list A and B amount 2694.45 lakhs ,interest component Rs 5365.50 lakhs and maintainance 251.66 lakhs) towards the above items of work. However, subsequently NHAI has made available land to take-up construction of service road from km 551+ 950 to km 552+ 970 estimated capex for the same is Rs 148.70 lakhs. In absence of firm and final communication on land availability for the balance works and mutually agreed quantity and rates for the work to be executed, there is no surety of crystallisation of associated payments to NHAI. However, as a measure of prudence, the above is treated as contingent liability.

March-23

*The Company has not provided an amount of Rs. 4,441 lakhs (PY 1,923 lakhs) recommended by Independent Engineer towards liquidated damages imposed by NHAI for Non- Performance of conditions as set out in the clause no. 17.8 of the concession agreement with respect to Operations & maintenance (O&M) requirements & its rectification of deficiencies within the stipulated time. However, the Company made representation with the NHAI vide letter dated 25 July 2022 for revocation of levy of liquidated damages after completion of O&M work and rectification of deficiencies.

During the previous reporting period the application filed by M/s Cauvery Asphalt & Construction Company Pvt. Ltd has been witdrawn under the Rules of the Mumbai Centre for International Arbitration ("MCIA"), where both the parties filed joint application for withdrawal of all claims and counterclaims and termination of the arbitral proceedings under Section 32(2)(b) of the Arbitration and Conciliation Act, 1996.

Accordingly, in terms of the Joint Application filed by the parties, the present proceedings stand terminated under Section 32(2)(b) and no claims and counter claims between the parties.

30.3 Disclosure pursuant to Ind AS 19 "Employee benefits":

Defined Benefit Plan: Gratuity:

Employee benefit plans

Defined contribution plans

The Company's superannuation scheme and State governed provident fund linked with employee pension scheme are defined contribution plans. The contribution paid/ payable under the scheme is recognised during the period in which the employee renders the related service.

Defined Benefit plans

The Company has an unfunded defined benefit gratuity plan. The gratuity plan is governed by the Payment of Gratuity Act, 1972. Under the act, employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn salary) for each completed year of service as per the provision of the Payment of Gratuity Act, 1972 with total ceiling on gratuity of Rs.2,000,000.

The following table sets out the funded status of the defined benefit schemes and the amount recognised in the financial statements:

30.15 Financials risk management objectives & policies

The risk management policies of the Company are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

The Management has overall responsibility for the establishment and oversight of the Company's risk management framework.

In performing its operating, investing and financing activities, the Company is exposed to the Credit risk, Liquidity risk and Market risk.

30.16 'Credit risk on financial assets

Credit risk is the risk of financial loss to the company if a customer or counter-party fails to meet its contractual obligations.

The Company is exposed to credit risk from its Financing activities, primarily Inter Company receivables from Related Parties, and fixed deposits with banks. The company generally does not have trade receivables as collection of toll income coincide as and when the traffic passes through toll - plazas except for Trade Receivables primarily from government authority i.e. NHAI.

'Other financial assets

The Company maintains exposure to cash equivalents. The company has set counter-parties limits based on multiple factors including financial positions, credit ratings, etc.

The company's maximum exposure to credit risk as at 31 March 2024 & 31 March 2023 is the carrying value of each class of financial assets.

30.17 Market Risk

The Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: Currency risk, Interest risk and price risk.

i) Foreign Currency Risk

Foreign currency risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rate

The company is not exposed to foreign currency risk as it has no borrowing in foreign currency.

ii) Interest rate risk

Interest rate risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates

The interest risk arises to the company mainly from long term borrowings with variable rates. The company measures risk through sensitivity analysis

The company's exposure to interest rate risk due to variable interest rate borrowings is a below:

Particulars	As at 31st March 2024	As at 31st March 2023
	Amount in Lakhs	Amount in Lakhs
Senior Debt from Banks - Variable rate borrowings	42,053.05	59,680.50

Sensitivity analysis based on average senior Debt

Particulars	Impact on profit /loss after tax	
	For the Year ended 31 March 2024	For the Year ended 31 March 2023
	Amount in Lakhs	Amount in Lakhs
Increase or decrease in interest rate by 25 base points	86.76	149.20

Note: Profit will increase in case of decrease in interest rate and vice versa

iii) Price risk

Price risk is the risk that the fair value or future cash flows of a financials instrument will fluctuate because or changes in market prices (other than those arising from interest rate risk or currency risk). The company is not exposed to Price risk in current year (PY. INR 10743.55 Lakh)

iv) Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Company closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including debt from banks at an optimised cost.

The Company maximum exposure to credit risk for the components of the balance sheet at 31st March, 2024 & 31st March 2023 is the carrying amounts. The liquidity risk is managed on the basis of expected maturity dates of the financial liabilities. The average credit period taken to settle trade payables is about 30 to 90 days. The other payables are with short-term durations. The carrying amounts are assumed to be a reasonable approximation of fair value. The following table analysis financial liabilities by remaining contractual maturities:

Particulars	On demand	Less than 3 months	3 to12 months	2 to 5 years	>5 years	Total
	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs
Year ended 31st March 2024

INDEPENDENT AUDITOR'S REPORT

To the Members of ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED
(Formerly Known as Essel Devanahalli Tollway Private Limited)

Report on the Audit of Ind AS Financial Statements

Opinion

We have audited the Ind AS Financial Statements of Athaang Devanahalli Tollway Private Limited ("the Company"), which comprise the Balance Sheet as at 31 March 2023, and the Statement of Profit and Loss, including the Statement of Other Comprehensive Income, the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and notes to the Financial Statements, including a summary of significant accounting policies and other explanatory information for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS Financial Statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2023, and its profit including Other Comprehensive Income, its Cash Flows and the Changes in Equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the Ind AS Financial Statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS Financial Statements.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report ("other information"), but does not include the Ind AS Financial Statements and our auditor's report thereon.

Our opinion on the Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS Financial Statements that give a true and fair view of the financial position, financial performance including Other Comprehensive Income, Cash Flows and Changes in Equity of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS Financial Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS Financial Statements or, if such disclosures are inadequate, to modify

Nangia & Co. LLP Mumbai Chartered Accountants

our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Ind AS Financial Statements, including the disclosures and whether the Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

   (c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, and the Statement of Cash Flow and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

   (d) In our opinion, the aforesaid Ind AS Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules,2015, as amended;

   (e) On the basis of the written representations received from the directors as on 31 March 2023 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2023 from being appointed as a director in terms of Section 164(2) of the Act;

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company with reference to these Ind AS Financial Statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2";

   (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 31.2 to the financial statements;

Nangia & Co. LLP Mumbai Chartered Accountants

ii. The Company has made provision, as required under the applicable law or accounting standards for material foreseeable losses;

iii. There were no amounts which were required to be transferred, to the Investor Education and Protection Fund by the Company.

iv. (a) The Management has represented that, to the best of it's knowledge and belief, as disclosed in the note 34 (vii) to the financial statements, during the year no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(b) The Management has represented, that, to the best of it's knowledge and belief, as disclosed in the note 34 (viii) to the financial statements, during the year no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(c) Based on the audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e) contain any material misstatement.

(d) As proviso to rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable for the company only w.e.f. April 1, 2023, reporting under this clause is not applicable.

v. The Company has not declared or paid any equity dividend during the year.

Annexure 1 referred to in paragraph 1 under the heading 'Report on other legal and regulatory requirements' of our report of even date.

Re: Athaang Devanahalli Tollways Private Limited ("the Company")

(i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and the situation of Property, Plant and Equipment.

(a) (B) The Company has maintained proper records showing full particulars of intangible assets.

(b) All Property, Plant and Equipment were physically verified by the management in the year in accordance with a planned programme of verifying them every year which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to this programme all property, plant and equipment were physically verified during the year and no material discrepancies were noticed on such verification.

(c) According to information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of all the immovable properties (other than properties where the company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company.

(d) The Company has not revalued its Property, Plant and Equipment (or intangible assets) during the year ended 31 March 2023.

(e) According to information and explanations given to us, there are no proceedings initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.

(ii) (a) The Company's business does not require maintenance of inventories and, accordingly, the requirement to report on clause 3(ii)(a) of the Order is not applicable to the Company.

(b) The Company has not been sanctioned any working capital limits in excess of five crore rupees in aggregate from banks and financial institutions during any point of time of the year on the basis of security of current assets. Accordingly, the requirement to report on Clause (ii)(b) of the Order is not applicable to the Company.

(iii) (a) During the year the Company has not provided loans, advances in the nature of loans, stood guarantee or provided security to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(a) of the Order is not applicable to the Company.

(b) During the year the Company has not made investments, provided guarantees, provided security and granted loans and advances in the nature of loans to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(b) of the Order is not applicable to the Company.

(c) The Company has not granted loans and advances in the nature of loans to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(c) of the Order is not applicable to the Company.

Nangia & Co. LLP Mumbai

(d) The Company has not granted loans or advances in the nature of loans to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(d) of the Order is not applicable to the Company.

(e) There were no loans or advance in the nature of loan granted to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(e) of the Order is not applicable to the Company

(f) The Company has not granted any loans or advances in the nature of loans, either repayable on demand or without specifying any terms or period of repayment to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(f) of the Order is not applicable to the Company.

(iv) According to the information and explanations given to us and on the basis of our examination of records of the Company, there are no loans, investments, guarantee or securities given in respect of which provisions of Sections 185 and 186 of the Companies Act, 2013 are applicable. Accordingly, the provision of Clause (iv) of the Order is not applicable to the Company.

(v) The Company has neither accepted any deposits from the public nor accepted any amounts which are deemed to be deposits within the meaning of sections 73 to 76 of the Companies Act and the rules made thereunder, to the extent applicable. Accordingly, the requirement to report on clause 3(v) of the Order is not applicable to the Company.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013, and are of the opinion that prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii) (a) According to the information and explanations given to us, the Company have generally been regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident fund, employee's state insurance, duty of customs, income-tax and other statutory dues applicable to it. The provisions relating to sales-tax, duty of excise and value added tax are currently not applicable to Company. According to the information and explanations given to us and based on audit procedures performed by us, no undisputed amounts payable in respect of these statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, there are no dues of goods and services tax, provident fund, employees' state insurance, sales-tax, service tax, customs duty, excise duty, value added tax, cess, goods and service tax and other statutory dues which have not been deposited on account of any dispute.

Nangia & Co. LLP Mumbai Chartered Accountants

Details of dues of Income Tax which have not been deposited as on 31 March 2023 on account of disputes are given below:

Name of the statute	Nature of the dues	Amount (Rs.in lakhs)	Period to which the amount relates	Forum where the dispute is pending	Remarks, if any
Income Tax Act, 1961	Income Tax	16.57	FY - 2011-12 AY - 2012- 13	Income Tax Appellate Tribunal (ITAT)	Tax pertains to amount of toll collection received during pre-construction period.
Income Tax Act, 1961	Income Tax	402.15	FY - 2012-13 AY - 2013- 14	Income Tax Appellate Tribunal (ITAT)	
Income Tax Act, 1961	Income Tax	1,034.35	FY- 2013-14 AY - 2014- 15	Income Tax Appellate Tribunal (ITAT)	

(viii) According to the information and explanations given to us, the Company has not surrendered or disclosed any transaction, previously unrecorded in the books of account, in the tax assessments under the Income Tax Act, 1961 as income during the year.

(ix) (a) According to the information and explanations given to us, the Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.

(b) The Company has not been declared willful defaulter by any bank or financial institution or government or any government authority.

(c) According to the information and explanations given to us, term loans were applied for the purpose for which the loans were obtained.

(d) The Company did not raise any funds on short term basis during the year hence, the requirement to report on clause (ix)(d) of the Order is not applicable to the Company.

(e) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on clause 3(ix)(e) of the Order is not applicable to the Company.

(f) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on Clause 3(ix)(f) of the Order is not applicable to the Company.

(x) (a) According to the information and explanations are given to us, the Company has not raised any money by way of initial public offer or further public offer and hence, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company.

(b) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully, partially or optionally convertible) during the year and hence, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company.

(xi) (a) According to the information and explanations given to us, no material fraud by the Company or on the Company has been noticed or reported during the year.

(b) During the year, no report under sub-section (12) of section 143 of the Companies Act, 2013 has been filed by secretarial auditor or by us in Form ADT – 4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

(c) As represented to us by the management, there are no whistleblower complaints received by the company during the year.

(xii) The Company is not a Nidhi Company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clause 3(xii)(a), (b) and (c) of the Order is not applicable to the Company.

(xiii) According to the information and explanations given to us, transactions with the related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv) (a) According to the information and explanations are given to us. The Company has an internal audit system commensurate with the size and nature of its business.

(b) According to the information and explanations given to us, the internal audit reports of the Company issued till the date of the audit report, for the period under audit have been considered by us.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence requirement to report on clause 3(xv) of the Order is not applicable to the Company.

(xvi) (a) The provisions of section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934) are not applicable to the Company. Accordingly, the requirement to report on clause (xvi)(a) of the Order is not applicable to the Company.

(b) The Company has not conducted any Non-Banking Financial activities or Housing Finance activities without obtaining a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.

(c) The Company is not a Core Investment Company as defined in the regulations made by Reserve Bank of India. Accordingly, the requirement to report on clause 3(xvi)(c) of the Order is not applicable to the Company.

(d) There is no Core Investment Company as a part of the Group, hence, the requirement to report on clause 3(xv)(d) of the Order is not applicable to the Company.

(xvii) The Company has not incurred any cash losses in the current and immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year and accordingly, requirement to report on Clause 3(xviii) of the Order is not applicable to the Company.

(xix) On the basis of the financial ratios disclosed in note 33 to the financial statements, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our

examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

(xx) (a) In respect of other than ongoing projects, there are no unspent amounts that are required to be transferred to a fund specified in Schedule VII of the Companies Act (the Act), in compliance with second proviso to sub section 5 of section 135 of the Act. This matter has been disclosed in Note 31.11 to the financial statements.

(b) There are no unspent amounts in respect of ongoing projects, that are required to be transferred to a special account in compliance of provision of sub section (6) of section 135 of Companies Act. This matter has been disclosed in Note 31.11 to the financial statements.

(xxi) The Company does not prepare consolidated financial statements, hence the requirement to report on clause 3(xxi) of the Order is not applicable to the Company.

"ANNEXURE 2" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF ATHAANG DEVANAHALLI TOLLWAYS PRIVATE LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

To
The Member of
Athaang Devanahalli Tollways Private Limited

We have audited the internal financial controls over financial reporting of Athaang Devanahalli Tollways Private Limited ("the Company") as of 31 March 2023 in conjunction with our audit of the Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by Institute of Chartered Accountants of India and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2023 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

ATHAANG DEVANAHALLI TOLLWAY PRIVATE LIMITED
NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2023

1. Background and Corporate Information

The Company had been granted the Concession by National Highway Authority of India (Under the Ministry of Road Transport & Highways of Government of India) for "Design, Engineering, Finance, Construction, Operation and Maintenance of operation and maintenance of 6 lane – 22.12 km stretch from km 534.720 (near Hebbal) to km 556.840 (near Bengaluru International Airport) of Hyderabad-Bengaluru section on NH-7 in the state of Karnataka, on Design, Build, Finance, Operate and Transfer ("DBFOT") basis. The construction of Project Road was completed and company got right to commence Commercial operation on May 01, 2014. During FY 2021, 100% ownership of the company was acquired by National Investment & Infrastructure Fund on 29th Sep 2020. Subsequently, name of company was changed from Essel Devanahalli Tollway Private Limited to Athaang Devanahalli Tollway Private Limited. With effect from 3rd October 2022, the Registered office of company has been shifted to NH44@KM 349.950 Opposite Sai Baba Temple, Indalwai Village Nizamabad, Telangana- 503164, India.

The Ind AS financial statements were authorised and approved for issue by Board of Directors on 14th June 2023.

2. Basis of preparation of Financial Statements

The Ind AS financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) as notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) and presentation requirements of Division II of Schedule III to the Companies Act, 2013. The financial statements have been prepared under the historical cost convention, as modified by the application of fair value measurements required or allowed by relevant Accounting Standards Accounting policies have been consistently applied to all periods presented, unless otherwise stated.

The financial statements are presented in Indian Rupees (INR) and all values are converted to the nearest lakhs, except when otherwise indicated.

a. Statement of compliance

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 and the other relevant provisions of the Act.

b. Use of judgements and estimates

The preparation of the Ind AS financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of Income, expenses, assets and liabilities and the disclosure of contingent liabilities. However, Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and underlying assumptions are reviewed at each reporting date. Any revision to accounting estimates and assumptions are recognized prospectively i.e. recognized in the period in which the estimate is revised, and future periods affected.

(i) Property Plant and Equipment/ Intangible Assets

Estimates are involved in determining the cost attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the management. Property, Plant and Equipment/Intangible Assets are depreciated/ amortised over their estimated useful life, after taking into account estimated residual value. Management reviews the estimated useful life and residual values of the assets annually in order to determine the amount of depreciation/ amortisation to be recorded during any reporting period. The useful life and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological and future risks. The depreciation/ amortisation for future periods is revised if there are significant changes from previous estimates

(ii) Provisions

The timing of recognition and quantification of the liability (including litigations) requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

3. Standards Issued but not Effective

Ministry of Corporate Affairs (MCA) notifies new standards or amendment to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Rules, 2023, as below:

i. Ind AS 1 - Presentation of Financial Statements - This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and the impact of the amendment is insignificant in the financial statements.

ii. Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors - This amednement has introduced a definition of "accounting estimates" and included amendments to Ind AS 8 to help entities distinguish changes in accounting policies from changes in accounting estimates. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its financial statements.

iii. Ind AS 12 - Income Taxes - This amendment has narrowed the scope of the initial recognition exemption so that it does not apply to transactions that give rise to equal and offseting temporary differences. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its financial statements.

4. Significant Accounting Policies

a. Current /non-current classification

All assets and liabilities are presented in the balance sheet based on current or non-current classification as per the company's normal operating cycle criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization into cash and cash equivalent, the Company has ascertained its operating cycle as twelve months for the purpose of current/non-current classification of assets and liabilities. An asset is treated as current when it is:

a) Expected to be realized or intended to be sold or consumed in normal operating cycle
b) Held primarily for the purpose of trading
c) Expected to be realized within twelve months after the reporting period
d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:
a) It is expected to be settled in normal operating cycle
b) It is held primarily for the purpose of trading
c) Due to be settled within twelve months after the reporting period

d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

b. Functional and presentation currency

Items included in the financial statements of the company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The functional statements are presented in Indian Rupees, which is the company's functional and presentation currency.

c. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

d. Property, Plant and Equipment(PPE)

Property, Plant and Equipment is recognised when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can measured reliably. PPE is stated at original cost net of tax/duty credits availed, if any, less accumulated depreciation. For qualifying assets, borrowing costs capitalised in accordance with the IND AS 23.

Administrative and other general overhead expenses that are specifically attributable to construction or acquisition of PPE or bringing the PPE to working condition are allocated and capitalised as a part of the cost of the PPE.

Property, Plant and Equipment not ready for the intended use on the date of the Balance Sheet are disclosed as "Capital work-in-progress".

Depreciation on assets have been provided on WDV basis as per useful lives specified in the Schedule II of the Companies Act, 2013. Depreciation on additions / deductions is calculated pro-rata from / to the month of additions / deductions.

Assets individually costing less than Rs.5,000/- are fully depreciated in the year of purchase.

The estimated useful lives are as follows :

Particulars	**Useful life as prescribed by Schedule II of the Companies Act, 2013**	**Useful life estimated by Company**
Toll Equipment	5 years	5 years
Computers	3 years	3 years
Office Equipment	5 years	5 years
Furniture & Fixtures	10 years	10 years
Motor Cycle	10 years	10 years

e. Intangible Assets

Right of Carriageway - Toll Projects

Intangible assets are recognised net of government grants when it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortisation and cumulative impairment.

Toll collection rights obtained in consideration for rendering construction services, represent the right to collect toll revenue during the concession period in respect of Build-Operate-Transfer ("BOT") project undertaken by the Company. The intangible asset model is used to the extent that the Company receives a right to charge users of the public service.

The intangible assets is measured at the fair value of consideration transferred to acquire asset, which is the fair value of consideration received or receivable for the construction services delivered

Amortization of Right of Carriageway - Toll Projects

The assets would be amortized under straight line method over the life of the asset till the end of the concession period.

Amortization of Computer Software

The assets would be amortized under WDV basis for useful life of 5 yrs.

f. Impairment of Non-Financial Assets

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Nonfinancial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

g. Financial Instruments

The Company classifies its financial assets into the following measurement categories:

i. Financial assets to be measured at amortised cost
ii. Financial assets to be measured at fair value through other comprehensive income
iii. Financial assets to be measured at fair value through profit or loss account

The classification depends on the contractual terms of the financial assets' cash flows and the Company's business model for managing financial assets

Fair value measurements are categorised as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirely:

• Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that entity can access at measurement date

• Level 2 inputs are inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly; and

• Level 3 inputs are unobservable inputs for the asset or liability.

i) Financial Assets

All recognised financial assets are measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

Investments in debt instruments that meet the following conditions are subsequently measured at amortised cost (unless the same are designated as fair value through profit or loss (FVTPL):

• The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and

• The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is primarily derecognised when:
i. the rights to receive cash flows from the asset have expired, or
ii. the company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement; and where
a) the company has transferred substantially all the risks and rewards of the asset, or
b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Impairment of financial assets: The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments, trade receivables and other contractual rights to receive cash or other financial asset and financial guarantees not designated as at FVTPL. For the purpose of measuring expected credit loss allowance for businesses other than financial services for trade receivables, the Company has used a provision matrix which takes into account historical credit loss experience and adjusted for forward looking information as permitted under Ind AS 109.

ii) Financial Liabilities

Financial liabilities are classified at initial recognition, as financial liabilities as fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Loans and borrowings are subsequently measured at amortised costs using Effective Interest Rate method.
Financial liabilities at fair value through profit or loss (FVTPL) are subsequently measured at fair value.
Financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

h. Revenue Recognition

i) Revenue is measured at the fair value of the consideration received or receivable, Amounts disclosed as revenue are exclusive of duties and taxes.

ii) The Company recognizes revenue when the amount of revenue can be reliably measured, it is probable that the future economic benefits would flow to the entity and specific criteria have been met for each of the activities described below. The company bases its estimates on historical results, taking into consideration the type of customer, type of transaction and specific of the arrangement.

iii) Toll collections from the users of the infrastructure facility constructed by the Company under the Service Concession Arrangement is accounted for based on actual collection, net of revenue share payable under the Concession agreement wherever applicable.

iv) Interest Income is recognized on time proportion basis taking into account the amount outstanding and applicable interest rate.

v) Dividend Income is recognized when the right to receive is established.
vi) Profit/loss on sale of investments is recognised at the time of actual sale/redemption and for mutual funds at fair value through profit/loss.
vii) Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.
viii) Other items of income are accounted as and when the right to receive arises.

i. Government Grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised on a systematic basis over the expected useful life of the related asset.

j. Foreign currencies transactions and translation

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

k. Employee Benefits

Employee benefits include provident fund, employee state insurance scheme, gratuity & compensated absences.

(i). Short term employee benefits

All employee benefits falling due wholly within twelve months of rendering the service are classified as short term employee benefits. The benefits like salaries, wages, short term compensated absences etc and the expected cost of bonus, ex-gratia are recognised in the period in which the employee renders the related service.

(ii).Post-employment benefits

(a) Defined contribution plans:

Defined Contribution Plans: The Company's obligation to employee's provident fund is a defined contribution plan. The contribution paid/payable is recognized in the period in which the employee renders the related service.

(b) Defined benefit plans:
The Company's obligation towards gratuity is a defined benefit plan.

The present value of the obligation under such Defined Benefit Plans is determined based on actuarial valuation using the Projected Unit Credit Method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans, is based on the market yields on Government securities as at the Balance sheet date, having maturity periods approximating to the terms of related obligations.

The interest element in the actuarial valuation of defined benefit plans, which comprises the implicit interest cost and the impact of changes in discount rate, is classified under finance cost. The balance charge is recognised as employee benefit expenses in the Statement of Profit and Loss.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognise the obligation on a net basis.

Gains or losses on the curtailment or settlement of any defined benefit plan are recognised when the curtailment or settlement occurs. Past service cost is recognised as expense at the earlier of the plan amendment or curtailment and when the Company recognises related restructuring costs or termination benefits.

l. Borrowing Cost

Borrowing costs include interest calculated using the effective interest rate method, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan. Borrowing costs, allocated to and utilized for acquisition, construction or production of qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset up to the date of capitalization of such asset are added to the cost of the assets. Capitalization of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.

m. Leases

Operating lease payments are recognized as an operating expense in the income statement on a straight line basis over the lease term

n. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss attributable to equity holder of the company (after deducting preference dividends and attributable taxes) by the weighted average number of equities shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit/(loss) for the period attributable to equity shareholders of the parent company and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

o. Tax Expenses

The tax expenses for the period comprises of current tax and deferred income tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the Other Comprehensive Income. In which case, the tax is also recognised in Other Comprehensive Income.

i. Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the Income Tax authorities, based on tax rates and laws that are enacted at the Balance sheet date.

ii. Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilised. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

p. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement

q. Contingent Liabilities and Contingent Asset

Disclosure of contingent liability is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources embodying economic benefits will be required to settle or a reliable estimate of amount cannot be made. A Contingent asset is not recognized in financial statements, however, the same are disclosed where an inflow of economic benefit is probable

r. Commitments

Commitments are future liabilities for contractual expenditure. Commitments are classified and disclosed as follows:
(i) Estimated amount of contracts remaining to be executed on capital account and not provided for
(ii) Uncalled liability on shares and other investments partly paid
(iii) Funding related commitment to subsidiary, associate and joint venture companies and

(iv) Other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.

Other commitments related to sales/procurements made in the normal course of business are not disclosed to avoid excessive details.

Mangla & Co. LLP Mumbai Chartered Accountants

31. Notes forming part of the Accounts

31.1 Details of Expenditure in Foreign Currency:
The Company has not incurred any expenditure in foreign currency during the current year and previous year.

31.2 Disclosure pursuant to Ind AS 37
"Provisions, Contingent Liabilities and Contingent Assets":
Provisions:
As per the Concession Agreement with NHAI the Periodic Maintenance is expected to be incurred periodically On the Grounds of Prudence, based on estimates, the company has decided to Provide for Major Maintenance Expense in the Books of Accounts annually.

During the current year the company has incurred Major Maintenance expenses of Rs. 19,40,397/- and net provision for MMR created of Rs. 11,52,95,413/- for year ended 31st March, 2023.

During the previous year the company has incurred Major Maintenance expenses of Rs. 13,95,20,766/- and net provision for MMR created of Rs. 6,24,48,232/- for year ended 31st March, 2022.

Contingent Liabilities:
Where it is not probable that an outflow of economic benefits will be required, or the amount can not be estimated reliably, the obligation is not recognized in the statements of financial position and is disclosed as a contingent liability.

(Amount in Lakhs)

Particulars	As at 31 March 2023	As at 31 March 2022
Claims against the company not acknowledged as debt		
- on Income Tax	1,367.01	1,367.01
- on liquidated damages imposed by NHAI*	4,441.00	1,923.00

March-23 During the current year the company has not provided an amount of Rs. 4,441 lakhs (PY 1,923 lakhs) recommended by the Independent Engineer towards liquidated damages imposed with respect to Operations & maintenance (O&M) requirements & its rectification of deficiencies within the stipulated time. However, the Company made representation with the Independent Engineer vide letter dated May, 8th 2023 for reviewing its decision to levy liquidated damages and withdraw the claim for damages The management is confident that such a penalty will not be levied by NHAI with reference to clause 17.8.2 of the concession agreement dated 30 April 2010.

March-22 The Company has not provided an amount of Rs 1,923 lakhs (PY 11,801.70 lakhs) recommended by Independent Engineer towards liquidated damages imposed by NHAI for Non- Performance of conditions as set out in the clause no. 17.8 of the concession agreement with respect to Operations & maintenance (O&M) requirements & its rectification of deficiencies within the stipulated time. However, the Company made representation with the NHAI vide letter dated 25 July 2022 for revocation of levy of liquidated damages after completion of O&M work and rectification of deficiencies.

Arbitration Matter
March-23 During the year the application filed by M/s Cauvery Asphalt & Construction Company Pvt. Ltd has been withdrawn under the Rules of the Mumbai Centre for International Arbitration ("MCIA"), where both the parties filed joint application for withdrawal of all claims and counterclaims and termination of the arbitral proceedings under Section 32(2)(b) of the Arbitration and Conciliation Act, 1996.
Accordingly, in terms of the Joint Application filed by the parties, the present proceedings stand terminated under Section 32(2)(b) and no claims and counter claims between the parties

March-22 The Company had appointed M/s Cauvery Asphalt & Construction Company Pvt. Ltd ("Cauvery") for major maintenance work at Devanahalli. The company has terminated the contract on 26 October 2020 and recovered the advance paid by invoking the advance Bank Guarantee. Subsequently Cauvery filed an application to Mumbai International Arbitration Centre Public Charitable Trust (MCIA) under Rule 3.1 of MCIA Arbitration Rules 2017 on 7th Nov 2020 and submitted claim for loss occurred on account of termination and invocation. The company defended the claim and levied liquidated damages on Cauvery. The matter is still under arbitration and the amount is not determinable. Before this, the emergency arbitration triggered by Cauvery was disposed off in favour of the Company.

31.3 Disclosure pursuant to Ind AS 19 "Employee benefits":

Defined Benefit Plan: Gratuity:

Employee benefit plans

Defined contribution plans

The Company has an unfunded defined benefit gratuity plan. The gratuity plan is governed by the Payment of Gratuity Act, 1972. Under the act, employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. Every employee who has completed five years or more of service gets a gratuity on departure at 15 days salary (last drawn salary) for each completed year of service as per the provision of the Payment of Gratuity Act, 1972 with total ceiling on gratuity of Rs 2,000,000.

The following table sets out the funded status of the defined benefit schemes and the amount recognised in the financial statements:

(Amount in Lakhs)

31.15 Financials risk management objectives & policies

The risk management policies of the Company are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

The Management has overall responsibility for the establishment and oversight of the Company's risk management framework

In performing its operating, investing and financing activities, the Company is exposed to the Credit risk, Liquidity risk and Market risk.

31.16 'Credit risk on financial assets

Credit risk is the risk of financial loss to the company if a customer or counter-party fails to meet its contractual obligations.

'Other financial assets

The Company maintains exposure to cash equivalents. The company has set counter-parties limits based on multiple factors including financial positions, credit ratings, etc.

The company's maximum exposure to credit risk as at 31 March 2023 & 31 March 2022 is the carrying value of each class of financial assets.

31.17 Market Risk

The Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: Currency risk, Interest risk and Price risk.

i) Foreign Currency Risk

Foreign currency risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rate

The company is not exposed to foreign currency risk as it has no borrowing in foreign currency.

ii) Interest rate risk

Interest rate risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates

The interest risk arises to the company mainly from long term borrowings with variable rates. The company measures risk through sensitivity analysis

The company's exposure to interest rate risk due to variable interest rate borrowings is a below.

Particulars	As at 31st March 2023	As at 31st March 2022
	Amount in Lakhs	Amount in Lakhs
Senior Debt from Banks - Variable rate borrowings	59,680.50	83,825.48

Sensitivity analysis based on average senior Debt

Particulars	Impact on profit /loss after tax	
	For the Year ended 31 March, 2023	For the Year ended 31 March, 2022
	Amount in Lakhs	Amount in Lakhs
Increase or decrease in interest rate by 25 base points	149.20	209.56

Note: Profit will increase in case of decrease in interest rate and vice versa

Nangia & Co. LLP Mumbai Chartered Accountants

iii) Price risk

Price risk is the risk that the fair value or future cash flows of a financials instrument will fluctuate because or changes in market prices (other than those arising from interest rate risk or currency risk) The company is not exposed to Price risk

iv) Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements The Company closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including debt from banks at an optimised cost.

The Company maximum exposure to credit risk for the components of the balance sheet at 31st March, 2023 & 31st March 2022 is the carrying amounts. The liquidity risk is managed on the basis of expected maturity dates of the financial liabilities The average credit period taken to settle trade payables is about 30 to 90 days. The other payables are with short-term durations. The carrying amounts are assumed to be a reasonable approximation of fair value. The following table analysis financial liabilities by remaining contractual maturities:

Particulars	On demand	Less than 3 months	3 to12 months	2 to 5 years	>5 years	Total
	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs	INR lacs
